CENTRAL PROVINCES.

(No. 27, of 1873.)

Government of India.—Financial Department.—Accounts.

To His Grace the Duke of *Argyll*, K.T., Her Majesty's Secretary of State for India.

My Lord Duke, Fort William, 10 January 1873.

In continuation of our Despatch, No. 6, dated 3rd January 1873, we have the honour to forward a copy of a letter from the Chief Commissioner, Central Provinces, and of its enclosures, furnishing the Returns of Imperial and local rates and taxes which have been called for by the Select Committee of the House of Commons on Indian Finance.

We have, &c.
(signed) *Northbrook.*

E. C. Bayley.

Government of India.—Financial Department.

Enclosure to Despatch, No. 27, of 1873.

From *J. W. Neill*, Officiating Secretary to the Chief Commissioner, Central Provinces, to the Secretary to the Government of India, Financial Department (No. 4534), dated 30th December 1872.

I AM now directed to forward the Returns of Imperial and local taxation required in Financial Resolution, No. 4510, dated 23rd October 1871.

2. On the receipt of the resolution, the circular* annexed to this letter was issued by the Chief Commissioner to all Deputy Commissioners, and they were directed to submit the information required in the shape of five Returns.

These Returns have been furnished, and have been checked as carefully as possible in this office, and Returns for the whole Province compiled from the separate district Returns are now submitted to Government.

* No. 59, dated 27th November 1871.

3. It has been a matter of considerable difficulty to obtain accurate figures for the year 1858–59. The records in the offices of Deputy Commissioners were very defective, and as the audit and control of the finances of different parts of the Province were carried on partly at Nágpúr, partly at Allahabad; and as the Central Provinces have been pieced together since 1859, it will be easily imagined that the information required was not readily obtainable, and that means of checking at head-quarters the figures supplied from individual districts were extremely deficient. This has been the cause of the long delay in submitting the information. A few remarks on each statement will be made to explain any discrepancies that exist between the figures given and the financial figures, and any other matters that may seem to require notice.

Statement I. Land revenue.

4. The land revenue collections for 1858–59 cannot be compared with the financial figures of the year for the reason given in paragraph 3. The collections for 1870–71 are given as 59,25,557 rupees. The Deputy Accountant General shows in the Finance Accounts for the year, 60,48,534 rupees; but of this sum 1,04,000 rupees consist of tribute erroneously credited and shown by him under land revenue, and the balance is due to difference in crediting under this or that head of proceeds of sales of waste lands, interest on the unpaid balance due given

from such sales, and other matters. The actual error it is, of course, impossible to trace to its source.

For 1871–72 the collections are given in Statement I. as 59,23,288 rupees. The Deputy Accountant General shows 59,38,911 rupees. This difference is again chiefly due to difference in the treatment of certain minor receipts. It may be remarked that the figures showing revenue show the revenue both including and excluding the district of Sambalpúr, which pays a small revenue. The column showing area under cultivation does not include Sambalpúr, as no measurements have ever been made there, and the area under cultivation is not known.

In the case of one or two districts the actual land revenue demand and collections for the actual year 1858–59 could not be ascertained; in such cases the demand and collections for the year immediately preceding the new settlement were taken, and they must be as nearly as possible the same as for the year 1858–59 itself, no change in the temporary settlements having been made in the interval. It must also be explained how in column 3 the total malguzari area in acres is so much greater in 1858–59 than in the years 1870 and 1871. The explanation is that in the first year the malguzari area included the whole land of the district under settlement, waste as well as cultivated land, all waste land being part of some village or other. At the new settlement large areas of waste or uncultivated land were reserved by Government, and these have not been settled with any one, and form therefore no part of the malguzari area.

Statement II. Excise.

5. The figures for 1858–59 have been taken from the earliest reports procurable. In some cases Deputy Commissioners could not furnish the actual figures for 1858–59; but as the excise revenue was invariably farmed in those years, and the amount of the farm did not materially vary, the figures given are as nearly correct as it is practicable to obtain any.

The Deputy Accountant General gives the total excise revenue for 1870–71 at 10,00,189 rupees, and for 1871–72 at 10,59,887 rupees. These figures differ so slightly from those given in the present Return that no explanation may be necessary.

Statement III. Forests.

6. The figures here given have been furnished by the Conservator of Forests, and they agree with the financial figures.

In 1858–59 any small forest revenue was included in land revenue. The Forest Department and Government Forests are creations since that time.

Statement IV. Assessed taxes.

7. The figures for 1858–59 show the collections under the Pandhari tax in the districts of the old Nagpur Province. For the other two years, 1870–71 and 1871–72, by assessed taxes is meant merely income tax.

The Deputy Accountant General shows, for 1870–71, 5,61,000 rupees as income tax collections. After deducting the tax on official salaries, and a small balance from previous years collected, the discrepancy has not been cleared.

For 1871–72 the financial figures closely approximate to these here given.

Statement V. Local rates and taxes.

8. It cannot be expected that the financial figures should exactly correspond with those here given, as here the actual cesses on the land revenue are shown.

In the same way, under pound receipts, the Deputy Accountant General shows gross receipts; the present statement shows only the balance after payment of all charges, which have first to be met before pound receipts become a local fund.

The Pandhari receipts do not differ materially in the financial books from those here given.

Under the other heads exact correspondence between the finance and present figures, which have been derived from Deputy Commissioners, cannot be expected.

Statement V. (*a*)

9. Here municipal rates and taxes are separately shown. It must be explained that the division of the octroi receipts into receipts from piece goods, on food stuffs, cattle, &c., can be no more than an estimate, and cannot pretend to accuracy. The octroi is generally farmed out, and the record of the articles entering the town on which octroi is paid, and the amount thus paid, is by no means complete.

The total municipal rates and taxes will not correspond with the financial figures of the Deputy Accountant General; first, because in 1870–71 the Government made a loan to the Nagpúr municipalities of 63,000 rupees, and in 1871–72 of 2,58,000 rupees, for the purpose of constructing the Ambajari reservoir; and secondly, because in these rates and taxes contributions and subscriptions from private individuals or from local funds in aid of municipal objects of importance are not shown in the present statements as rates and taxes, though they would find a place in the financial accounts. Were they to find a place here, local taxation might find a place twice over, and Government would be misled. The foregoing remarks will, the Chief Commissioner trusts, have sufficed to render the statements intelligible, and it may again be said that they have been prepared with much care, and at the expense of much labour.

Appendix, No. 15.

BENGAL.

ACT No. X. of 1871.

PASSED BY THE LIEUTENANT-GOVERNOR OF BENGAL IN COUNCIL.

(*Received the assent of His Honor on the* 19*th July* 1871, *and of the Governor General on the* 12*th August* 1871.)

AN ACT to provide for Local Rating for the Construction and Maintenance of Roads and other means of Communication.

Preamble.

WHEREAS it is expedient to make provision for the construction and maintenance of roads and other means of communication within the territories of the Lieutenant-Governor of Bengal, and for that purpose to authorise the levy of a district road cess on immovable property situated therein, and also to constitute local committees for the assessment of the same, and for the management of the proceeds thereof; It is hereby enacted as follows:—

PART I.—PRELIMINARY.

Commencement of Act.

I. This Act may be called "The District Road Cess Act, 1871."

It may extend to all the territories subject to the Lieutenant-Governor of Bengal which are not included within the limits of the town of Calcutta, or of any place or town to which the provisions of the "District Municipal Improvement Act," or the "District Towns Act, 1868," respectively passed by the Lieutenant-Governor of Bengal, shall have been extended.

And it shall commence and take effect in any district or districts situated in the said territories to which the said Lieutenant-Governor shall extend it by any order published in the "Calcutta Gazette," and thereupon this Act shall commence and take effect in such district or districts on the day which shall be in such order provided for the commencement thereof.

Power to fix cess year.

II. The Lieutenant-Governor shall, by an order published in the "Calcutta Gazette," fix the date from which all the cesses leviable under this Act in any district shall take effect therein, and the cess year in such district shall run from that date.

Interpretation.

III. In this Act the words in this section mentioned shall have the meanings therein attributed to them respectively, except where, from the context, a contrary intention appears:

"House."

"House" includes any shop or warehouse or place of business or factory, or other building or buildings within the same inclosure.

"Land."

"Land" means land which is cultivated, uncultivated, or covered with water.

"Estate."

"Estate" means:—

1. Any land or share in land subject to the payment to Government of an annual sum in respect of which the name of a proprietor is entered on the register known as the general register of all revenue-paying estates, or in respect of which a separate account may, in pursuance of Section X. or Section XI. of Act XI. of 1859, have been opened;
2. Any land or share in land entered in the register of revenue-free tenures;
3. Any land the revenue or rent of which may be payable directly to the collector or any person specially appointed by him to collect the same;
4. Any land acquired under any rules issued by or under authority of Government for the sale, grant, or clearance of waste lands.

"Tenure."

"Tenure" includes every interest in land, whether rent-paying or not, save an estate as above defined, and save the interest of a cultivating ryot.

"Collector."

"Collector" includes any person vested with the powers of a collector.

"District."

"District" means the portion of territory throughout which any person vested with the powers of a collector is authorised to exercise such powers.

"Immovable property."

"Immovable property" includes lands, houses, and all benefits to arise out of land and things attached to the earth, or permanently fastened to anything which is attached to the earth; but does not include crops of any kind.

"Holder

"Holder of an estate or tenure" means all or any of the holders thereof; and where two or more persons are jointly holders thereof, they shall be jointly and severally liable under this Act. "Holder of an estate or tenure."

"Cultivating ryot" means a person cultivating land and paying rent therefor not exceeding 100 rupees per annum. "Cultivating ryot."

"Annual value of land" means the total rent which is paid, or if no rent is actually paid, would be reasonably expected to be payable during the year by all the cultivating ryots thereof, or by other persons in actual use and occupation thereof. "Annual value of land."

IV. From and after the commencement of this Act in any district within the said territories subject to the Lieutenant-Governor of Bengal, all immovable property situated therein shall be liable to the payment of a district road cess, to be applied to the construction and maintenance of roads and other means of communication within the said district, and to be assessed thereto by the District Committee in manner as hereinafter is provided, and such road cess shall be recoverable from the several owners and occupiers of such property in the proportions and in the manner as are hereinafter provided. All immovable property to be liable to a road cess.

Part II.—Road Cess on Land.

Valuation.

V. Upon the commencement of this Act in any district, the Collector shall cause a proclamation to be issued, requiring every holder of any estate or tenure of which the annual Government revenue or rent shall exceed 100 rupees, severally to lodge at the Collector's office within one month a return of all lands comprised in his estate or tenure in the form of Schedule (A) hereto annexed, and containing the particulars in such form set forth. The Collector shall cause such proclamation to be published by affixing a copy thereof in some conspicuous place in the office of such Collector, in every civil court, in every police station, and in the office of every sub-divisional officer within the district. Proclamation to make return of lands to be issued.

VI. The Collector shall, so soon as may be after the publication of such proclamation, cause a notice to be served in the form in Schedule (A) for every such estate, and also a notice for every such tenure which may have been named in any return lodged in pursuance of the provisions of this Act, or may have been entered in any register in the Collector's office; and all holders of such estates and of such tenures who shall, without sufficient cause being shown to the satisfaction of the Collector, refuse or omit, for the space of three months after service of such notice, to lodge in the office of the Collector such return as hereinbefore mentioned, shall be severally liable to a fine which may extend to 50 rupees for every day after the expiration of such three months until such return shall be furnished, or until the value of the lands comprised in their respective estates and tenures shall have been ascertained and fixed by the Collector as hereinafter is provided. It shall be lawful for the Collector, upon sufficient grounds for so doing being proved to his satisfaction, from time to time to extend the period for lodging any such return. Notice to return lands. Penalty.

VII. From and after the expiry of three months from the service of any such notice, or any extension of such time under the provisions of the section next preceding, every holder of an estate or tenure in respect of which such notice shall have been served, shall be precluded from suing for or recovering any rent in respect of any land or tenure which shall be proved not to have been included in the return lodged by him, or in respect of which no return shall have been lodged as aforesaid or valuation made by the Collector, and from recovering rent for tenures subsequently created or in excess of the sum mentioned in such return without proof of the creation of such tenure or enhancement subsequent to such lodgment. No rent to be recovered till return is made.

VIII. Whenever the revenue annually payable in respect of any estate, or the rent annually payable in respect of any tenure shall not exceed the sum of 100 ruprees, the Collector may, without issuing any notice for such estate or tenure, determine the annual value of the land comprised therein to be in a permanently settled estate or tenure a sum not exceeding three times, and in a temporarily settled estate or tenure a sum not exceeding twice the amount of the annual revenue or rent payable therefor; and when the acreage thereof has been ascertained, to be at such rate per acre as to him may seem fit. When the land comprised in any estate or tenure has been valued by the Collector under this section, the annual value of any portion of such land which is comprised within a subordinate tenure shall be taken to be a sum equal to the rent thereof increased by half the same multiple or fraction of such rent as that by which the annual value of the whole of such land determined as aforesaid exceeds the revenue or rent payable for the same; or shall be at the same rate per acre as the whole of such land: Provided that the holder of any such estate or tenure may, within one month from the posting of the valuation roll in respect thereof under Section XVII., and the holder of such subordinate tenure may within one month from the date of the first demand made on him for payment of road cess, lodge a return in the form in Schedule (A) contained in regard to such estate or tenure or subordinate tenure, and thereupon the annual value of the land comprised therein shall be fixed at the amount entered in such return, subject to the provisions of Sections XII. and XIV. Or the Collector may, if he think fit, Valuation of small estates and tenures.

Appendix, No. 15.

fit, cause a notice to be served in respect of any such estate or tenure in form in Schedule (A) contained, and thereupon all the provisions of this part shall apply in the same way as they would have applied if the annual Government revenue or rent thereof had exceeded 100 rupees.

Return of plantations, &c.

IX. Whenever any lands have been acquired under any rules issued by or under the authority of the Government for the sale, grant, or clearance of waste lands, or are held directly from Government, and are used for the cultivation of tea, coffee, or cinchona, the Collector shall, in lieu of the notice to be served under Section VI., but at the time in the manner and under the penalties therein prescribed, cause a notice to be served calling on the holder of such lands to lodge a return in the form in Schedule (B) hereto annexed, and containing the particulars in such form set forth, and the annual value of such lands shall be fixed at 10 rupees in respect of every acre therein entered as cultivated.

Fines how to be levied.

X. Fines under Section VI. of this Act, and all costs of recovery thereof, may be levied by an order in writing of the Collector, and such order shall have the force of a decree of a civil court in a suit in which Government is the plaintiff and the person liable to pay is the defendant; and such order may be enforced by attachment and sale of moveable property in manner provided by Act VIII. of 1859 for the enforcement of decrees for money; and the procedure under the said Act in respect of the following matters, that is to say, sales in execution of decrees, claims to attached property, and execution of decrees out of the jurisdiction of the courts by which they were passed, shall apply to every execution issued for levying the moneys mentioned in such order, save that all the powers and duties conferred and imposed by the said Act upon the court shall be executed by the Collector by whom such order has been made, or to whom a copy thereof has been transmitted for execution according to the provisions of the said Act, Section CCLXXXVI. Or the Collector may, if he see fit, after recording his opinion to that effect, cause a notice in form contained in Schedule (C) to be served for the estate or tenure for which default has been made, and thereupon every payment of rent save to the Collector or some person by him thereunto appointed made after such service, until further order of the Collector, shall be null and void; and the Collector may recover by any process of law in that behalf for the time being in force the rent then or thereafter to become due from any occupier or tenure holder on the said estate or tenure until the amount of such fine or fines with all costs shall be satisfied, whereupon the said notice shall be ordered to be revoked; and the receipt of the Collector in respect of all sums so recovered shall be to the extent of such sums a valid discharge in respect of rent due by such occupier or tenure holder.

If returns not furnished, Collector to make valuation.

XI. The Collector may, after the expiration of four months from the service of any notice mentioned in Section VI. or Section IX., ascertain and fix, by such ways and means as to him shall seem expedient, the annual value of the lands mentioned in such notice of which no return required by such notice shall theretofore have been lodged; and all expenses incurred in making such valuation shall be recovered with all costs of recovery thereof in manner as is provided by Section X. for the recovery of fines.

If return of certain lands is untrue, Collector to make valuation.

XII. Whenever the Collector may deem that any return required by Section VI. or Section IX. of lands for which no rent is payable by cultivating ryots to the person making such return is untrue or incorrect, he may, by such ways and means as to him shall seem expedient, ascertain and fix the annual value of such lands; and in case the annual value of such lands so determined by him shall exceed by one-fifth the value stated in such return, the expense of such valuation shall be paid by the person by whom such return shall have been lodged and may be recovered in manner as is provided by Section X. for the recovery of fines, and in all other cases shall be defrayed from the district road fund established under this Act.

Person returned as cultivating ryot may be served with notice.

XIII. It shall be lawful for the Collector, whenever he may think fit, to cause a notice in the form in Schedule (A) to be served on any person holding any lands or possessing any interest therein, although such person may have been mentioned in any return as a cultivating ryot; and thereupon such person shall be bound to make a return in the form in Schedule (A) contained, and the provisions contained in Section VI. with regard to fines and extension of time for lodging a return shall be applicable to him. If no return is made, the Collector may proceed to ascertain the annual value of the lands held by such person, and in case it appears that the annual value of the land is greater than the rent which he pays, the expense of such valuation shall be borne by such person and may be recovered with all costs of recovery thereof in manner as is provided by Section X. for recovery of fines, and in all other cases shall be defrayed from the said district road fund.

False returns

XIV. If the Collector shall see ground for believing that any return made under this Act other than a return mentioned in Section XII. is untrue and incorrect, he may prosecute the maker of such return under Section 177 of the Indian Penal Code. And if the magistrate convict the person so prosecuted under the said section, the Collector may proceed to make a valuation of the lands mentioned in such return by such ways and means as to him shall seem expedient.

Power of Collector in making valuation.

XV. For the purpose of making any valuation of lands directed by this Part, the Collector shall exercise the powers vested in collectors by Section 19, Clause 1, Section 23, Clause 1, and Section 24, Clause 1, of Regulation VII. of 1822 of the Bengal Code, except so far as the said clauses authorise any inquiry into rights or interests attaching to such lands.

XVI. The

XVI. The Collector shall cause to be prepared from the returns so furnished to him, and from the valuations made by him under this Part, a valuation roll of each estate within his district, and of the tenures therein comprised, noting thereon the amount of revenue annually payable to Government on which the deduction specified in Section XXI., Clause 1, of this Act is to be calculated, and shall, on the application of any holder of an estate or tenure, or cultivating ryot, within his district, cause to be furnished to him a copy of so much of the said roll and of the returns as relate to the lands included within his estate or tenure, or ryotee holding, on being paid for the same at such rate as the Lieutenant-Governor of Bengal shall from time to time determine.

Valuation rolls to be prepared.

XVII. On the completion of every roll prescribed under this Part, the Collector shall cause a copy thereof to be posted up at the mâl cutcherry of the estate, and of every tenure to which such roll refers, and if no mâl cutcherry be found, then on some conspicuous place on the said estate and tenure.

Publication of such rolls.

XVIII. Every person who shall deem himself to be aggrieved by any valuation to be made by any Collector, under the provisions of Section XII., may, within one month after the posting up of a copy of such roll as above mentioned, appeal to the Commissioner of the division against such valuation, and the decision of such Commissioner shall be final and conclusive.

Appeals against valuation.

XIX. Every order for the levy of a fine or of expenses passed by a Collector under this Act shall be appealable to the Commissioner of Revenue within one month from the service of the first process for the levy of such fine or expenses. Pending such appeal, and until the order of the Commissioner which shall be final, all process for such levy shall be discontinued.

Orders for levy of fine appealable.

Assessment and Payment.

XX. From and after the commencement of this Act in any district, all lands in such district shall be liable to the payment of district road cess at such rate not exceeding one-half of an anna in the rupee of the annual value of such lands as the district committee in manner hereinafter provided shall determine.

Maximum rate.

XXI. (1.) Every holder of an estate shall yearly pay the entire amount of the road cess calculated on the annual value of the lands comprised in such estate, at the rate at which the road cess shall have been assessed as hereinafter provided, less a reduction to be calculated at one-half of the said rate for every rupee of the revenue entered in the valuation roll of such estate as payable in respect thereof.

Mode of payment of road cess by zemindar.

(2.) Every holder of a tenure shall yearly pay to the holder of the estate or tenure within which the land held by him is included, the entire amount of the road cess calculated on the annual value of the land comprised in his tenure at the rate at which the road cess shall have been assessed as hereinafter provided, less a deduction, to be calculated at one-half of the said rate for every rupee of the rent paid by him for such tenure.

By holder of tenure.

(3.) Every cultivating ryot shall pay to the person to whom his rent is payable one-half of the said road cess calculated upon the rent payable by him, or upon the annual value, ascertained under the provisions of Section XIII., of the land held by him.

By cultivating ryot.

XXII. When the rate of road cess to be levied in any district shall have been determined for any year by the District Committee, in manner as hereinafter provided, the Collector shall cause to be served on the holder of every estate within the district a notice showing the amount of road cess payable by such holder, and specifying the date from which such road cess shall take effect. And thereupon the said holder shall pay the amount of such road cess to the said Collector, by equal instalments, on the several days fixed for the payment of the instalments of the Government revenue due in respect of his estate, if revenue be payable thereon; and if no revenue be payable thereon, then upon such days as shall be for that purpose appointed by any order of the Lieutenant Governor, made under the provisions hereinafter contained.

Time of payment of road cess by zemindars.

XXIII. If any instalment of such road cess, or part thereof, payable to the Collector, shall not be paid, the person making default shall at any time within three years next after the same has become payable, be liable to pay the amount of the arrear, and such amount may be levied by an order in writing of the Collector, and the provisions contained in Section X. shall apply to such order; or the Collector may, if he sees fit, after recording his opinion to that effect, cause a notice in form in Schedule (C) contained to be served for the estate or tenure for which default has been made, and thereupon every payment of rent, save to the Collector or by some person by him thereunto appointed, made after such service shall be null and void; and the Collector may recover by any process of law in that behalf for the time being in force the rent then or thereafter to become due from any occupier or tenure-holder on the said estate, until the said amount, with all costs, shall be realised; whereupon the said notice shall be ordered to be revoked; and the receipt of the Collector in respect of all sums so recovered shall be to the extent of such sums a valid discharge in respect of rent due by such occupier or tenure-holder. The claim of the Collector for arrears of road cess due from any estate or tenure for which a notice has been

Road cess how to be recoverable.

Appendix, No. 15.

served under this section shall have priority over any other demand, or claim, or lien subsisting thereupon.

Times of payment from subordinate tenures.

XXIV. The payment for road cess by the holder of a tenure, or by a cultivating ryot, shall be made in the proportion of the instalments of rent payable in respect of such tenure or ryotee holding; and if there be no rent payable in respect thereof, then by two equal half-yearly instalments, upon such days as shall be for that purpose appointed by any order of the Lieutenant-Governor, made under the provisions hereinafter contained.

Recovery by holders of estates or tenures.

XXV. Every holder of an estate or tenure to whom any sums may be payable under the provisions of this Act, may recover the same in the same manner and under the same penalties as if the same were arrears of rent due in respect of the land in respect of which such sums may be payable. And any shareholder in an estate or tenure who may have paid the road cess payable in respect of such estate or tenure, may recover from his co-sharers such sums as may be payable in respect of their shares as arrears of rent; or may take credit for such sums in any adjustment of accounts between himself and his co-sharers.

Payment for certain lands for which no rent is paid.

XXVI. All lands held without payment of rent other than lands mentioned in Section IX., and not being estates entered on the register of revenue-free tenures of the district, shall, for the purposes of this Act, be deemed to form a part of the tenure within the local boundaries of which they may be included, and if they be not included within the local boundary of any tenure, then to be a part of the estate within the local boundaries of which they are included, and if they be not included within the local boundaries of any estate, then to be a part of such conterminous estate as the Collector, in whose district such conterminous estate is situated, shall, by an order under his seal, appoint. And road cess in respect of such lands shall be payable by the holder of the estate or tenure of which they are deemed to form a part, and shall be recoverable under the provisions of Section XXIII. or Section XXV. as the case may be. Or such lands may, if the Collector shall see fit, be entered on a separate register to be kept for the purposes of this Act by the Collector, and thereupon road cess shall be payable thereon and shall be recoverable in respect thereof as if the same were an estate.

Remuneration for collecting road cess for certain lands for which no rent is paid.

XXVII. It shall be lawful for the person to whom any sum shall, under the provisions of the section next preceding, have been directly paid by the holder of any tenure or tenures for which no rent is paid, to retain one-fourth thereof as and for his remuneration for costs and risk of collecting the same.

PART III.—ROAD CESS ON MINES, RAILWAYS, &c.

Maximum rate on railways, &c.

XXVIII. From and after the commencement of this Act in any district, every mine, quarry, tramway, or railway, or other immovable property not included within the provisions of Part II. and Part IV. of this Act, situated therein, shall be liable to the payment of road cess at such rate not exceeding one-half anna on every rupee of the annual net profits of such mine, quarry, tramway, or railway, or other property as aforesaid as the district committee may as hereinafter provided determine to be the rate in the rupee leviable in respect of the annual value of land under Part II.: Provided that no railway or tramway, the property of the Government of India, nor any railway nor tramway of which the dividend is guaranteed by Her Majesty's Secretary of State for India in Council, or by the Governor General of India in Council, shall be liable to road cess under the provisions of this Act without the consent of the said Governor General of India in Council first had and obtained.

Notice to return profits.

XXIX. At the time, in the manner, and under the penalties provided by Section VI. of this Act, the Collector shall cause a notice to be served upon the owner, chief agent, manager, or occupier of any property assessable under this Part: such notice shall be in the form provided by Schedule (D) of this Act, and shall require such owner, chief agent, manager, or occupier to send in to the office of the Collector a return of the annual net profits of such property calculated on the average of the annual net profits thereof for the last three years for which accounts were made up. It shall be lawful for the Collector, upon sufficient grounds for so doing being proved to his satisfaction, from time to time to extend the period for lodging any such return.

When property lies in different districts

XXX. Whenever any property assessable under this Part lies in two or more districts under the Lieutenant-Governor of Bengal, the notice to furnish a return under Section XXIX. of this Act shall be served on the owner, chief agent, manager, or occupier of such property by or through the Collector of the district where such owner, chief agent, manager, or occupier may reside or have his chief place of business, and one return for the whole of such property shall suffice.

When property is partly in and partly beyond the limits of the Bengal territories.

XXXI. Whenever any property assessable under this Part lies partly within and partly outside the territories subject to the Lieutenant-Governor of Bengal, the return sent in under Section XXIX of this Act shall state the total annual net profits calculated as aforesaid accruing from such property, and also the proportion of such profits which may reasonably be calculated to accrue in the territories subject to the Lieutenant-Governor of Bengal.

XXXII. If

XXXII. If such return be not furnished within the period of three months or any extension thereof from the date on which such notice was served, or if the Collector shall deem that any return made in pursuance of such notice is untrue or incorrect, the Collector shall proceed to ascertain and determine, by such ways or means as to him shall seem expedient, the annual net profits of such property calculated as aforesaid, and all expenses incurred in making such valuation shall be borne by the person by whom, or the property in respect of which, the default occurred, and shall be recoverable, with all costs of recovery thereof, in manner as is provided by Section X for recovery of fines.

If return not furnished or incorrect, Collector to make valuation.

XXXIII. So soon as the Collector shall have ascertained and determined the annual net profits as aforesaid of any such property, he shall cause to be served upon the owner, chief agent, manager, or occupier of such property, a notice informing him of the amount of the annual net profits so ascertained and determined by him. Any person who, having made a return under Section XXIX, may deem himself aggrieved by any valuation made by the Collector under the next preceding section may, within one month from the service of such notice, appeal to the Commissioner of the Division, and the decision of the Commissioner on such appeal shall be final.

Notice of valuation. Appeal.

XXXIV. If the Collector be unable to ascertain the annual net profits as aforesaid of any property assessable under this Part, he may by such ways or means as to him shall seem expedient, ascertain and determine the value of such property, and shall thereupon determine six per centum on such value to be the annual net profits thereon. The expenses incurred under this section shall be borne by the person by whom, or the property in respect of which, the default occurred, and shall be recoverable with all costs of recovery thereof in manner provided by Section XXXII.

Annual net profits.

XXXV. Whenever any property assessable under this Part lies in two or more districts, the Lieutenant-Governor of Bengal shall from time to time determine out of the total annual net profits stated in the return, or in the valuation of such profits accruing in the territories subject to him, and ascertained in any manner as aforesaid, the proportions in which such property shall be assessed in each of the said districts respectively.

Determination of proportion of profits when property in different districts.

XXXVI. When the rate of road cess to be levied in the district upon property assessable under this Part shall have been determined for any year by the district committee in manner as hereinafter provided, the Collector shall cause to be served on the owner, chief agent, manager, or occupier of every such property a notice showing the amount of road cess payable in respect of such property and specifying the date from which such cess shall take effect. And such amount shall be payable by such owner, chief agent, manager, or occupier, to the Collector in two equal instalments, the first on the expiry of six months, the second on the expiry of nine months after the date fixed as hereinbefore provided for the commencement of the cess year. Every occupier of such property, who shall have paid in excess of half of such amount shall be entitled to deduct such excess from the next instalment of rent payable in respect of such property; and every owner who has paid in excess of half of such amount shall be entitled to recover such excess from the occupier thereof; provided that in no case shall an occupier deduct from his annual rent more than half of the rate of the road cess on every rupee thereof. If any instalment of cess which has become payable under this section shall not be paid to the Collector, the amount thereof may thereupon, at any time within three years next after the same has become payable, be recovered with all costs under the provisions contained in Section X for the recovery of fines, so far as the same are applicable.

Notice of road cess and recovery thereof.

XXXVII. The total road cess payable in respect of property assessable under this Part, owned by the same person in two or more districts, shall be payable to the Collector of the district where the owner, chief agent, manager, or occupier may reside or have his chief place of business, and shall be by him transmitted to the Collectors of the districts in respect of which such cess shall be payable, in the proportion in which such Collectors shall be severally entitled thereto.

How distributed when property in different districts.

PART IV.—ROAD CESS ON HOUSES.

Mode of Assessment and Levy thereof.

XXXVIII. From and after the commencement of this Act in any district, all houses within such district, of any of the classes mentioned in Schedule (E) save as hereinafter is provided, shall be liable to the payment of road cess from such date.

Maximum rate.

XXXIX. The said cess shall be payable by the occupiers of the houses respectively liable thereto, according to the rates to be determined by the district committee in manner as hereinafter provided, not exceeding the rates set forth in Schedule (E) annexed to this Act; provided that every occupier who shall have paid the cess due in respect of the house which he occupies, may deduct one-half of the sum so paid from the next instalment of rent which may become payable by him in respect of the said house.

Rate thereof.

XL. No person by whom any road cess is payable under the provisions of Part II. or Part III. of this Act, shall be liable to pay road cess in respect of any house occupied by him unless such person shall carry on some trade or profession therein, the profits of which are not derived from the property in respect of which he pays cess under the provisions of either

Certain houses exempt.

Appendix, No. 15.

either of the said Parts. And no house occupied exclusively as a place of worship shall be liable to road cess under this Act.

Valuation.

XLI. The value of the houses liable to such cess shall be determined, in places and villages to which the provisions of Act XX. of 1856, or of "The Village Chowkeedaree Act, 1870," passed by the Lieutenant-Governor of Bengal in Council, shall have been extended, by the punchayets of such places and villages respectively; and in all other places and villages by assessors to be respectively appointed thereto by the Collector. The Collector shall, as soon as conveniently may be after this Act has come into force in his district, send written notices to such assessors and punchayets respectively, requiring them forthwith to determine the value of the said houses. Every punchayet and assessor shall severally prepare and deliver to the Collector within two months of the receipt of such notice a valuation roll, which roll shall be in such form as the Lieutenant-Governor shall prescribe under the provisions of Section XCVII. of this Act.

Collector may value in certain cases.

XLII. In case any punchayet or assessor who by the provisions hereinbefore contained, is charged with the duty of making any valuation under this Part, shall fail to prepare and deliver to the Collector such valuation roll within the time aforesaid, the Collector shall appoint some person to make such valuation, and to prepare and deliver to him such roll; and the valuation made by such person shall have the like force and effect as if the same had been made by the punchayet or assessor aforesaid.

Publication of valuation.

XLIII. Every punchayet or assessor, or other person appointed under the provisions of the next preceding section, shall cause the said valuation roll to be published by posting copies thereof, in the language of the district, in some conspicuous position in the place or village to which it relates, and, in the case of any union, in some conspicuous position in each village comprised within such union; and shall thereupon forward copy of such roll to the Collector.

Revision of valuation.

XLIV. The Collector may, within two months of the receipt of the said copy, cause the said valuation to be tested by a Superintendent. The valuation fixed by the punchayet or assessor or other person as aforesaid thereto appointed by the Collector shall be final, except in cases where the said Superintendent shall alter the same, and such altered valuation shall be published as in the next preceding section is provided. Any person who may deem himself aggrieved by such altered valuation may appeal within one month of the publication thereof to the Collector, and the order of the Collector thereon shall be final.

Levy of road cess where punchayets exist.

XLV. The road cess payable in respect of any house situate in any place or village to which the provisions of either of the Acts mentioned in Section XLI. shall have been extended, shall be levied from the occupiers thereof half-yearly in two equal instalments, the first becoming due on the expiry of six, and the second on the expiry of nine months after the date fixed as hereinbefore provided for the commencement of the cess year in the district in which such place or village is situated, by such person and by such ways and means as if the same were a rate or tax payable under the provisions of the Act extended to such place or village; provided that the limitation of six months prescribed in Section XLVII. of Act XX. of 1856, shall in respect to the said road cess on houses, be extended to one year.

Road cess on houses in other places how to be paid.

XLVI. In every place other than those to which the provisions of Act XX. of 1856, or of "the Village Chowkeedaree Act, 1870," shall have been extended, the road cess which may be payable in respect of any house therein shall be payable to the assessor of such place by the occupier thereof by two equal instalments. The provisions of Section XLV. with regard to time of payment and limitation shall apply to instalments payable under this Section.

How to be levied.

XLVII. Any instalment of road cess due under this Part, if not paid on or before the tenth day after it has become due and payable, may be levied in the manner prescribed for the levy of an arrear of village Chowkeedaree tax in Sections XXV. to XXXIII. inclusive, of the Village Chowkeedaree Act, 1870, and for the purposes of such levy the said assessor shall exercise the powers of a punchayet under Section XXV. and of the collecting member of such punchayet under Section XXVI. of the said Act.

Sums to be transmitted when recovered.

XLVIII. Every sum in respect of road cess on houses which shall by any person be recovered under any of the provisions aforesaid, shall be with all convenient speed transmitted by him to the Collector, or to such person as the Collector may appoint to receive the same.

PART V.—LOCAL COMMITTEES.

Constitution of District Committees.

Constitution of district committee.

XLIX. In and for any district to which this Act shall have been extended, the Lieutenant-Governor shall from time to time appoint, or cause to be elected under such rules in regard to qualification, election, and discharge as may by him be prescribed, for such period not exceeding two years as to him may seem fit, any number of the road cess payers of such district, their managers or agents, to be members of a district committee for carrying out the purposes of the Act.

L. The

L. The Lieutenant-Governor may, from time to time, discharge any one or more of the members of the committee so appointed, who shall desire to be discharged, or refuse or become incapable to act, or whom for any cause which he may deem sufficient, he may think it expedient to remove. Removal of members.

LI. In addition to the members appointed or elected as aforesaid, the Lieutenant-Governor shall have power to direct, by any writing signed by him, that all persons holding the offices in such writing specified shall be *ex officio* members of the committee for any district in which they exercise the said offices, and in which this Act shall have come into force. Appointment of *ex officio* members.

LII. The number of members of a district committee holding salaried offices under the Government shall not be more than one-third of the total number of the said committee. Number of *ex officio* members.

Their Mode of Transacting Business.

LIII. The Collector of the district shall be the chairman of the district committee, and the vice-chairman shall be elected by the said committee. Chairman and vice-chairman of committee.

LIV. The committee shall have an office within the district in and for which they shall have been appointed, where they shall meet for the transaction of business at least once in every quarter of a year. Committee to have an office.

LV. The chairman, or, in his absence, the vice-chairman, shall preside at every meeting of the committee. In the absence of both the chairman or vice-chairman, the members present shall elect a president for the occasion. Chairman at meetings.

LVI. The Chairman, or in his absence, vice-chairman, may, whenever he thinks fit, and shall, upon a requisition made in writing, and signed by not less than one-third of the members, convene a meeting. Special meeting.

LVII. At least ten days' notice shall be given of every meeting. Every notice shall state the business to be transacted at the meeting proposed to be called; and no business other than that so stated shall be transacted at such meeting. Notice of meeting.

LVIII. The quorum necessary for the transaction of business at a meeting shall be one-third of the total number of members forming the committee at the time of the meeting. Quorum.

LIX. If at the time appointed for the meeting, or such time not exceeding one hour thereafter, as the majority of the members present shall think fit, a quorum is not present, the meeting shall stand adjourned till some future day, to be appointed by the chairman or vice-chairman of the committee, and ten days' notice of such adjourned meeting shall be given. The members present at such adjourned meeting shall form a quorum, whatever their number may be. Adjourned meeting.

LX. All questions which may come before the committee at any meeting shall be decided by a majority of votes of the members present. Every member shall have one vote. In case of equality of votes, the president shall have a casting vote. Voting: casting vote.

LXI. The minutes of the proceedings of every meeting shall be recorded in a book to be kept for that purpose in the office of the committee, and any person resident in, or owning land in the district, may at all reasonable times inspect and examine such book without payment of any fee, and may obtain a certified copy of any extract therefrom on payment of such fees as the Lieutenant-Governor may direct. Minute book to be kept.

LXII. All correspondence between the committee and the Local Government shall pass through the Commissioner of the division, who in all things under this Act shall be subject to the control and supervision of the Lieutenant-Governor. The committee shall furnish him with any information he may call for connected with the duties imposed upon them by this Act. Correspondence between committee and local Government.

Their Functions.

LXIII. The first meeting of a district committee shall be convened by the chairman at such time as he shall think fit, and shall proceed to the election of a vice-chairman. Election of a vice-chairman.

LXIV. The committee at a subsequent meeting, to be convened by the chairman at such time as he shall think fit, may appoint, on the nomination of the chairman, and may suspend or dismiss, as they may think fit, such officers, engineers, clerks, and servants, as may seem to them to be necessary for carrying out the purposes of this Act, and may pay to such officers, engineers, clerks, and servants, such salaries and allowances as they may from time to time determine: Provided that the aggregate salaries and allowances of such officers, engineers, clerks and servants for any one year shall not, except with the sanction of the Commissioner of the Division, exceed one-fourth of the entire income of the committee for the said year. Appointment of officers by committee.

LXV. No member, officer, or servant of any committee shall be in any wise concerned or interested in any contract or work made with or executed for such committee; and if any such member, officer, or servant, be so concerned or interested, he shall be incapable of afterwards Penalty on members and officers being concerned in contracts.

Appendix, No. 15.

afterwards continuing to be a member of such committee, or holding or continuing in any office or employment under such committee, and shall be liable on conviction thereof to a fine of 500 rupees. Provided that nothing in this section shall apply to any person by reason only of his being a shareholder in any company incorporated by Act of Parliament or by Royal Charter or otherwise, or registered under any Act for the registration of joint-stock companies, passed by the Parliament of the United Kingdom, or by any Indian Legislature, which may enter into any contract with such committee, or execute any work for such committee, if such person shall, at or before the time of any such contract being made or tendered for, declare to such committee the extent of his interest in such company, and if an officer or servant of the committee obtain the sanction of such committee to his continuing to be an officer or servant.

Statement of roads to be prepared.

LXVI. The vice-chairman, within three months after his election, shall cause to be prepared a general statement of the roads, bridges, rivers, khals, and canals other than those on which tolls of any kind are collected the proceeds of which are not paid to the district road fund, and other than canals constructed for purposes of irrigation, to be brought within the operation of this Act within the three years then next ensuing, and the committee shall, at some meeting to be held within one month after the submission of such statement, or at any adjourned meeting, take such statement into consideration, and may pass any statement relating thereto which they may think fit.

Statement to be forwarded to Commissioner.

LXVII. The committee shall thereupon forward the statement which shall be so passed to the Commissioner of Revenue of the division.

Supplemental statement.

LXVIII. The vice-chairman may in any subsequent year cause to be prepared a supplemental statement of the kind mentioned in Section LXVI., and every such supplemental statement shall be subject to the provisions of the two sections next preceding with respect to the statement therein mentioned.

Collector to submit annual statement to committee.

LXIX. The Collector shall, at such date as the district committee shall fix, prepare and deliver to the district committee a statement showing under separate heads the estimated proceeds, for the cess year then next ensuing, of the several road cesses at the maximum rates hereinbefore provided, and also of any sum and of any sources of revenue for the said period which the Lieutenant Governor shall have assigned to the said district.

Annual estimate to be prepared.

LXX. The committee shall at some meeting to be held in such month as the Lieutenant Governor shall determine prepare an estimate of the income and expenditure of the committee for the cess year then next ensuing, together with specifications and estimates of the works to be performed during such year, such works being a portion of, or included in, the works mentioned in the statement for the time being in force. In making such estimate the committee shall first determine the amount to be appropriated to office establishment and charges, next the amount to be appropriated to the repair of roads, bridges, rivers, khals and canals then existing, and afterwards the amount to be appropriated to the construction of new roads or canals; provided that no portion of the district road fund of any one district shall, save with the previous sanction of the Lieutenant-Governor, be appropriated for the construction, repairs, maintenance, or improvement of roads, bridges, rivers, khals, or canals, within any other district.

Commissioner may revise estimate.

LXXI. Every such estimate shall be forwarded by the vice-chairman to the Commissioner, and the Commissioner may approve such estimate or may return such estimate for revision in such respects as he may point out, or may alter or vary the total amount thereby proposed to be expended: Provided always that it shall not be lawful for the Commissioner to alter or vary any estimate which shall have been approved by not less than two-thirds of the members of the committee present at the meeting at which such estimate shall have been adopted.

Limit of estimate.

LXXII. The total amount in and by any estimate proposed to be expended in any one cess year shall not exceed the proceeds estimated to be at the disposal of the committee for that year of the several road cesses hereinbefore directed to be imposed within the district at the maximum rates at which they are respectively leviable, together with any sum and the annual proceeds of any source of revenue which shall have been placed by the Lieutenant-Governor at the disposal of the committee.

Supplemental estimate.

LXXIII. Whenever any estimate shall have been altered or revised by the Commissioner as hereinbefore is provided, the committee shall cause a supplemental estimate to be prepared, and in case the amount proposed to be expended shall have been increased by such alteration or revision, shall at a meeting provide for the expenditure of such increased sum, within the limits in the next preceding section specified; and in case such sum shall have been similarly diminished, shall therein determine the works proposed in the original estimate which are to be altered or abandoned.

Calculation of annual road cess.

LXXIV. When and so soon as the amount for any one cess year proposed to be expended shall have been determined as hereinbefore is provided, the committee shall at a meeting, after deducting therefrom the amount which may be placed at their disposal as aforesaid, together with the estimated proceeds of any sources of revenue assigned to them, determine the several rates of cess under this Act required to produce the residue, and such rates shall be the rates at which the several cesses shall be respectively leviable for the ensuing year.

LXXV. So

LXXV. So soon as the said rates shall have been determined as aforesaid, the committee shall inform the Collector thereof, and the Collector shall cause a proclamation to be issued in his district declaring the same. Such proclamation shall be published in manner as in Section V. is directed. And the said rates shall be reported by every Collector to the Lieutenant-Governor, who shall forthwith cause the same to be published in the "Calcutta Gazette." Proclamation and publication of cesses.

Branch Committees.

LXXVI. In any district to which this Act shall have been extended, the Lieutenant Governor of Bengal shall, in addition to a district committee, form as many branch committees as he shall think fit, for carrying out the purposes of this Act, and shall appoint a chairman and vice-chairman thereof respectively, and shall define the portion of such district within which any branch committee shall exercise the powers conferred and discharge the duties imposed upon them by this Act. The said Lieutenant Governor shall from time to time appoint, or cause to be elected under such rules in regard to qualification, election, and discharge, as may by him be prescribed, for such period not exceeding two years as to him may seem fit, to be members of a branch committee, any number of the road cess payers of the portion of the district for which such branch committee shall be formed. Branch committees.

The provisions in Sections L. to LII. and LIV. to LXI. respecting district committees shall apply, so far as the same are suitable, to such branch committees. Sections which apply to them.

LXXVII. Every such branch committee shall be, except as hereinafter provided, subordinate to the district committee, and shall forward to the district committee such statements, suggestions, and estimates as it may think fit, and the district committee shall consider and have regard to such statements, suggestions, and estimates in framing the statements and estimates hereinbefore directed. And such branch committee may from time to time select any member thereof to be an additional member of the said district committee, who shall thereupon, for the space of one year, become a member thereof. Branch committees' statements.

LXXVIII. It shall be competent to the Lieutenant-Governor in each year to assign to any branch committee so much of the road fund levied for that year in the district for portion of which such branch committee is appointed as he may think fit, not exceeding the total estimated proceeds of all cesses leviable within the said portion of the district; and further, to allot to the said branch committee so much of the income of the fund from other sources as he shall think fit. Funds of the branch committee.

LXXIX. In any case where the Lieutenant-Governor of Bengal may declare that a branch committee shall have the full powers of a district committee within the said portion of the district, the district committee shall cease to exercise powers under Section LXIV., LXV., LXVI., LXX., and LXXIII., within such portion of the district; and such powers, together with the powers specified in Sections LXVII. and LXVIII., shall then vest in the branch committee; and in any case where the Lieutenant-Governor of Bengal may declare that a branch committee shall have the powers of a district committee for specified works or specified purposes only, the powers of the district committee in respect of such works and such purposes only shall cease within the said portion of the district; and such power shall then vest in the branch committee. Powers of the branch committee.

LXXX. Every branch committee so vested with powers as in the next preceding section provided shall prepare an estimate in regard to their annual income and expenditure similar to that required by Section LXX. to be prepared by the district road committee. Estimate.

LXXXI. The provisions of Sections LXXI., LXXII., and LXXIII. shal apply to such estimate; provided that the aggregate amount to be expended by the branch committee in any year shall not exceed the aggregate of the fund placed at their disposal for that year. Limit of estimate.

Part VI.—District Road Fund.

LXXXII. The district road fund under this Act shall consist of the amount produced by the several road cesses, and of all sums levied or recovered as fines or penalties, or otherwise under this Act, and of all sums, and the proceeds of all sources of revenue assigned by Government thereto. Constitution of district road fund.

LXXXIII. The Lieutenant Governor shall, on or before the date fixed as that from which the several road cesses under this Act shall take effect in any district, assign to the district committee appointed therein all such sums as may have been collected within the said district during the financial year then last completed, on account of any road cess payable otherwise than under the provisions of this Act, and such sums shall by the said committee be added to the district road fund. Road cess not under this Act.

LXXXIV. The district road fund shall be lodged with the Collector, and the Collector shall keep a separate account thereof, and shall cause to be prepared an annual statement of such account, showing in detail therein all receipts and disbursements during the cess year. After the appointment of any branch committee in a district the Collector shall in like manner keep a separate account of the fund placed at its disposal. Collector to prepare annual statement of the district road fund.

Appendix, No. 15.

Payments on account of the district road fund.

LXXXV. All payments on account of the district road fund shall be made by the Collector out of the said fund upon cheques signed by the vice-chairman for sums under 100 rupees, or by the chairman and vice-chairman for sums above that amount. When the vice-chairman is absent, or from any cause incapacitated to sign cheques, the chairman may sign cheques on behalf of the vice-chairman.

Collector's monthly account.

LXXXVI. The Collector shall forward to the vice-chairman of every committee in every month an account of his receipts and disbursements on account of the district road fund for the previous month.

Accounts of committee.

LXXXVII. Every committee shall keep regular and detailed accounts of the monies received or applied by them under the provisions of this Act and of their application, and such accounts shall be, at all convenient seasons, open to the inspection of all members of the committee.

Annual account current and examination thereof.

LXXXVIII. The vice-chairman of every committee shall, in every year, prepare a detailed account current of the receipts and expenditure of the district road fund during the previous cess year, and such account shall within one month of the submission thereof be examined by the said vice-chairman, together with three members of the committee appointed in its behalf by the committee. Such members shall have power to call for all vouchers and papers they may require, and may amend, correct, and pass the said account.

The account so passed shall be submitted to a meeting of the said committee to be convened to consider the same within one month from the receipt thereof.

Annual report to be submitted to Commissioner.

LXXXIX. Within one month after the account of the next preceding cess year shall have been examined as aforesaid, the committee shall submit to the Commissioner a copy of such account, and a report of the work done and in progress in such year, and such account and report shall be published at the expense of the district road fund in a "Calcutta Gazette," together with such remarks thereto as may have been received from the Commissioner.

Application of the district road fund.

XC. The district road fund shall be applied in paying the necessary expenses for carrying out the provisions of this Act, including establishment and charges incurred by the Collector. In the payment of the staff and establishment appointed under the provisions hereinbefore contained. In the construction, repair, improvement, and maintenance of roads, bridges, rivers, khals, and canals other than those on which tolls are collected, the proceeds of which are not paid to the district road fund and other than canals constructed for purposes of irrigation.

Part VII.—General Provisions.

General valuation to be in force for five years.

XCI. Every valuation under Part II. and Part IV. shall remain in force and effect for the term of five years from the date fixed as hereinbefore provided for the several cesses leviable in pursuance thereof to take effect and until a new valuation and assessment shall have been completed.

Power after five years to make new valuation.

XCII. After the expiration of the said five years the Collector may cause a new valuation roll under Part II., or under Part IV., or under both, to be prepared, and for that purpose may cause such proclamations and notices to be issued and served, and such returns to be made as are hereinbefore directed, and shall have such powers and authorities as are in the said Parts respectively conferred.

New valuation under Part III.

XCIII. New valuations under Part III. shall be made by the Collector every year, and the Collector may for that purpose cause such notices to be issued and served, and such returns to be made, and shall have such powers and authorities, as are in the said Part mentioned and conferred: Provided that whenever any return made under Section XXIX. of this Act shall be accepted by the Collector for any year, the owner, chief agent, manager or occupier of such property may, if he see fit, declare in writing at the time of such acceptance that the annual net profits set forth in such return shall, for the purposes of this Act, be the annual net profits for the five years then next ensuing. And if the Collector shall agree to accept such declaration, no new valuation shall be made for such property until the said five years shall have expired, or until a general revaluation be made under the next preceding section.

Evidence.

XCIV. Every return filed by or on behalf of any person in pursuance of the provisions of this Act shall be signed by him or his authorised agent, and shall be admissible in evidence against him, but shall not be admissible in his favour.

Service of notice.

XCV. Every notice in and by this Act required to be served, may be served:—

1. By delivering the same to the person to whom it is directed, or on failure of such service, by posting the same on some conspicuous part of the house in which the said person resides, or by delivering the said notice to any agent authorised to appear generally for the person to whom such notice is directed; or,

2. By sending a registered letter containing such notice directed to the said person, at his usual place of abode, or to the place where he may be known to reside; or,

3. By

3. By posting a copy of the notice at the mâl cutcherry of the estate or tenure; or if no such mâl cutcherry be found, on some conspicuous place on the said estate or tenure to which such notice relates, and by delivering, in the case of estates paying their annual revenue by four instalments, another copy thereof to the agent who shall have paid an instalment of revenue next after the preparation of such notice. In all cases where two or more persons are holders of an estate or tenure, service of notice under this clause shall be deemed to be good and sufficient service on each and all of such persons. Appendix, No. 15.

XCVI. The costs of service of all notices by this Act required to be served shall be defrayed from the district road fund. Cost of service.

XCVII. It shall be lawful for the Lieutenant Governor of Bengal, by an order published in the *Calcutta Gazette*, to make such rules for the performance of the duties of the district and branch committees, and of all persons employed under this Act, and in regard to the appointment, election, qualification and discharge of such persons, and otherwise for carrying out the purposes of this Act, and to prescribe such forms for the notices, returns, valuation rolls, estimates, account books, reports, and statements required by the provisions hereinbefore contained, and for which forms are not hereby given, as to him shall seem meet, and to fix the dates for payment of instalments under Sections XXII. and XXIV. and by any other order, to be in like manner published, to alter, vary, or revoke any such rules or forms, or to substitute others in lieu thereof; and all such rules and forms shall, so far as they are not inconsistent with the provisions of this Act, have the same force and effect as if they had been inserted herein. Lieutenant-Governor empowered to prescribe forms and rules.

SCHEDULE (A).

No. 1.—Form of Return Prescribed by Section V.

BOMBAY.

ACT No. I. of 1871.

Passed by the Council of the Governor of Bombay.

[Received the assent of the Governor of Bombay on the 29th April 1871, and of the Governor General on the 8th June 1871, and published by the Governor of Bombay on the 1st July 1871.]

AN ACT to provide for the Cost of Police employed in Towns and Suburbs where Act XXVI. of 1850 is in force.

WHEREAS it is expedient that the maintenance of the police employed in towns and suburbs where Act XXVI. of 1850 is in force should be defrayed from the Municipal Funds; it is hereby enacted as follows:— Preamble.

I. In any town or suburb in the territories subordinate to the Presidency of Bombay the Municipal Commissioners shall, upon the requisition of Government, annually set apart and pay to Government, out of the funds raised under Act XXVI. of 1850, or other Act for the time being in force, such sum as Government may deem necessary for the maintenance of the police of every description employed for the protection of life and property in such town or suburb; provided always that such sum shall not exceed twenty rupees per centum of the gross Municipal Revenue of such town or suburb during the year preceding that in which such requisition shall be made. Municipal Commissioners to set apart a sum from the funds for the maintenance of police. Proviso.

II. All sums payable under this Act shall be paid by the Municipal Commissioners at such times, and to such persons, as Government shall from time to time direct. Sums payable under this Act to be paid by the municipal commissioners at such times, and to such persons, as Government shall direct.

III. Nothing in this Act applies to the City of Bombay. Act not to apply in the City of Bombay.

IV. This Act shall be taken to have come into force as from the first day of April 1871. Commencement of the Act.

BOMBAY.

ACT No. II. of 1871.

Passed by the Council of the Governor of Bombay.

[Received the assent of the Governor of Bombay on the 29th April 1871, and of the Governor General on the 8th June 1871, and published by the Governor of Bombay on the 1st July 1871.]

AN ACT for imposing Duties on certain of the Non-agricultural Classes in the Territories subordinate to the Presidency of Bombay.

WHEREAS it is expedient to impose duties on certain of the non-agricultural classes in the territories subordinate to the Presidency of Bombay; it is enacted as follows:— Preamble.

I. In this act unless there be something repugnant in the subject or context, Interpretation clause.

"Collector" means the chief officer charged with the administration of a district in revenue matters, by whatever designation such officer is called. "Collector."

"Sub-collector" means any officer or class of officers authorised by Government to exercise the powers and perform the duties conferred and imposed on a sub-collector by this Act. "Sub-collector."

"Household" means the members of one family living together in the same house or in any portion of a house held as a separate tenement "Household."

II. Nothing in this Act applies to non-commissioned officers and privates of Her Majesty's forces, or of Her Majesty's Indian forces who are not in Civil employment. Exemptions.

III. Nothing in this Act applies to the City of Bombay. Act not to apply to the City of Bombay.

IV. Nothing in this Act applies to towns and suburbs required under any law for the time being in force to provide for the cost of the police employed therein: Provided that the quartering of additional police under Bombay Act VII. of 1867 in any town or suburb shall confer no right to exemption under this section. Act not to apply to townsand suburbs required to provide for the cost of the police employed therein.

Government empowered to exempt any class of persons. Government may modify such order for exemption. Orders under this section to be published in the "Government Gazette."

V. Government may from time to time by order, wholly or partially exempt from the operation of this Act, any tribe or class of persons, and may from time to time modify or revoke such order. All orders, modifications, and revocations of orders made under this section shall be published in the *Government Gazette.*

Person carrying on a trade to pay a duty according to schedule annexed.

VI. Every person being a head of a household, or occupying a separate tenement, and not assessed to the cess leviable under the provisions of (Bombay) Act III. of 1869 on every rupee of land revenue, or who, being so assessed, carries on any profession, trade, or calling (whether on behalf of himself or of any other person) other than the cultivation of land, shall be required as hereinafter provided to pay a duty fixed by Government not exceeding the duties specified in the schedule hereto annexed.

Persons required to pay duty to be assessed under different classes.

VII. Every person required to pay such duty shall be assessed under one of the three classes specified in the said schedule according to the means of livelihood possessed by himself or the household of which he is the head. Subject to rules to be made by Government as hereinafter provided and to the control of the collector, the sub-collector shall decide the class, if any, under which any person shall be assessed.

List of persons liable to pay duty to be made by the sub-collector. List to state profession, trade, &c.

VIII. The sub collector shall, on or before the first day of July 1871, and the first day of April of every subsequent year, make a list of the persons liable to pay duty under this Act, and such list shall state the profession, trade, or calling of each person therein named, and the class under which he is assessed.

List to be filed in the office of the sub-collector.

Such list shall be filed in the office of the sub-collector, and on request shall be exhibited for inspection without fee to every person chargeable under this Act.

Service of notice by the sub-collector; contents of the notice.

IX. The sub-collector shall cause a notice to be served on every person chargeable under this Act, stating :—

(1) the name and calling of the person chargeable ;

(2) the year for which the duty is to be paid ;

(3) the amount to be paid ;

and requiring him within one month from the date of the service to pay such amount.

Amount of duty to be paid to the sub-collector, who shall give a receipt.

X. Such amount shall be paid to the sub-collector, who shall give a receipt for such payment to the person making the same.

Proviso.

Provided that if such person has more than one place of residence, the duty shall be levied at and payment made to the sub-collector for the place or district at or in which such person ordinarily resides.

Receipt by whom to be signed.

Every such receipt shall be signed by the sub-collector granting it, or by such other officer as he shall from time to time empower in this behalf.

What the receipt shall specify.

XI. Every such receipt shall specify :—

(1) the name and calling of the person by or on whose behalf the duty is paid ;

(2) the year for which the duty is paid ;

(3) the amount paid, and the date of payment ;

and shall be admissible as *primâ facie* proof of all matters contained therein.

Petition by person objecting to the amount at which he is assessed.

XII. Any person objecting to the amount at which he is assessed, or denying his liability to be assessed, may within 15 days from the date of service of notice under section nine, apply by petition to the sub-collector to have the assessment reduced or cancelled.

Sub-collector to fix a day for the hearing of the petition.

XIII. The sub-collector shall fix a day and place for the hearing of the petition, and on the day and at the place so fixed, or on the day and at the place, if any, to which he has adjourned such hearing, shall hear such petition and pass his order thereon. Such order may be in favour of petitioner, or it may simply reject the petition, or it may reject the petition and enhance the rate of duty to that of a higher class, in which case the amount shall be specified in the order.

If the order be in favour of the petitioner the sub-collector shall at once refund the fee on the petition.

If the order reject the petition, the petitioner shall, within one week from the passing of the order, pay the amount found to be due.

Collector empowered to call for proceedings of any sub-collector, and to pass orders on them.

XIV. It shall be lawful for the Collector, whenever he thinks fit, to call for the proceedings of any sub-collector in his district, and pass such order thereon as to him shall seem right.

Date of payment of duties.

XV. Duties imposed by this Act shall be payable on the first day of July in the year 1871, and on the first day of April in every subsequent year.

XVI. In

XVI. In any case of default in the payment of duty under this Act, the sub-collector may after the expiration of one month from the date of service of notice, as provided in section nine, recover from the defaulter a sum not exceeding double the amount of the duty payable.

Recoveries how to be made in case of default.

Every such sum shall be recoverable as an arrear of land revenue.

Provided that where any person has presented a petition under section twelve, such sum shall not be recoverable from him unless within one week from the passing of the order on such petition he fails to pay the amount (if any) required by such order.

Proviso

On recovery from the defaulter of the amount for which he is liable under this section, the sub-collector shall forthwith grant him a receipt without any further payment in the form and manner hereinbefore provided.

XVII. Except as hereinbefore provided, every order made under this Act shall be final and conclusive; and no suit shall be entertained in any civil court to set aside or modify any assessment or order made under this Act.

Order made under the Act to be final.

XVIII. All or any of the powers and duties conferred and imposed by this Act on a Collector or sub-collector may be exercised and performed by such officers or persons as Government shall from time to time appoint in this behalf.

Powers of a collector or sub-collector may be performed by such officers as shall be appointed by Government.

XIX. Service of any notice under this Act shall be made by delivering or tendering a copy thereof under the signature of the sub-collector. Whenever it may be practicable, the service of the notice shall be on the person therein named.

Service of notice.

When such person cannot be found, the service may be made on any adult male member of his family residing with him; and if no such adult male member can be found, the serving officer shall affix the copy of the notice on the outer door of the house in which the person therein named ordinarily dwells or carries on business.

XX. Government may, from time to time,

Government may prescribe forms for notices, and make rules.

(*a*) Prescribe forms for the notices and lists hereinbefore mentioned:

(*b*) Make rules consistent with this Act for the guidance of officers in matters connected with its enforcement.

SCHEDULE.

Persons in Class I. shall be assessed at an annual duty not exceeding *Rs.*	6	–	–
Persons in Class II. at an annual duty not exceeding - - -	3	–	–
Persons in Class III. at an annual duty not exceeding - - -	1	8	–

ACT No. IV. of 1871.

PASSED BY THE GOVERNOR OF FORT ST. GEORGE IN COUNCIL.

[Received the Assent of the Governor on the 2nd March 1871, and of the Governor General on the 28th March 1871.]

AN ACT to provide Funds for Expenditure on objects of local Public Utility and Improvement, and to constitute Local Boards for the due administration of such Funds.

Preamble.

WHEREAS it is necessary that the funds available for the construction, repair, and maintenance of roads and communications in the Presidency of Madras should be increased, and that funds should also be raised by means of local rates for the diffusion of education and for other objects of public utility calculated to promote the health and the comfort or convenience of the inhabitants of places not included within the limits of any municipality; it is hereby enacted as follows:—

Interpretation clause.

1. The following words and expressions, wherever they occur in this Act, shall have the meaning hereby assigned to them:—

Landholder.

The term "landholder" shall include all persons holding under a Sunnud-i-Milkeut-Istimrar, all other zemindars, poligars, shrotriemdars, jaghirdars, and inamdars, and all persons farming the land revenue under Government; also all holders of land under Ryotwar Settlement, or in any way subject to the payment of land revenue direct to Government, and all other registered holders of land in proprietary right.

Tenant.

The term "tenant" shall include all persons who occupy land under a landholder, whether personally or by an agent, and whether they pay rent to such landholder or otherwise.

President.

The term "President" shall denote the president of any board appointed under this Act.

House.

The term "house" shall include any shop or warehouse.

Official year.

The words "official year" shall mean the year beginning on the 1st day of April or such other date as may hereafter be fixed by the Governor in Council by notification in the "Fort St. George Gazette."

Madras Acts VI. of 1863, III. of 1866, and II. of 1868, to have no effect in places to which this Act is extended.

2. The Madras Education Act No. VI. of 1863, the Madras District Road Cess Act No. III. of 1866, and the Madras Act II. of 1868 (an Act to enable landholders in certain localities to levy tolls upon roads and bridges constructed by them at their own expense and also on roads and bridges constructed at the expense of the State, the repair and maintenance of which may be undertaken by such landholders), shall, in every circle to which this Act shall be extended, cease to have effect, except as to any assessment made, or as to any act done, or as to any liability incurred, or as to any money due, or as to any proceedings commenced in such circle, before this Act shall have effect therein.

Application of Act.

3. It shall be lawful for the Governor in Council, by notification in the "Fort St. George Gazette," from time to time to declare any district or part of a district to be a circle within the meaning of this Act, and the Act shall come into force in such circle on the date fixed in such notification; provided that it shall not be applicable to the town of Madras, or to any town to which the provisions of the Towns Improvement Act of 1865, or of any Act which shall have been subsequently passed for regulating the municipal administration of towns in the Presidency of Fort St. George, shall have been extended, except to the extent hereinafter specified in Section 27 of this Act.

APPOINTMENT AND FUNCTIONS OF LOCAL FUND BOARDS.

Appointment of local fund boards.

4. In any circle to which the operation of this Act shall have been extended, the Governor in Council shall appoint a Local Fund Board for the administration of the funds raised for any or all of the several purposes of this Act. Such board shall consist of three or more persons being owners or occupiers of land in such circle, or carrying on business therein, or residing in such circle. The persons so appointed shall continue in office for three years, or until their successors shall have been appointed, and shall be eligible for re-appointment. The Governor in Council may from time to time accept the resignation of any of the members of a board appointed under this Act, or may remove any such member for misconduct or neglect of duty, add to their number, or fill up vacancies among them.

Appointment of president and *ex officio* members.

5. In addition to the number to be appointed as aforesaid, the collector of the district shall be *ex officio* member and president of each Local Fund Board appointed within the district under this Act, and it shall further be competent to the Governor in Council to appoint as members of each local fund board any officers in the service of Government; provided that not more than one-half of the whole number of members of any one Local Fund Board shall be persons holding salaried offices in the service of Government.

Appointment of vice president of the board.

6. The Governor in Council shall from time to time appoint one of the members of each Local Fund Board to be Vice-President of such board.

President of local fund board empowered to sue and be sued, to hold property, and enter into contracts.

7. The Local Fund Board shall sue and be sued in the name of their President by the description of "The President of the Local Fund Board of the Circle in the district of ;" and, in such name so described, the board shall be competent to hold property, moveable and immoveable, to them and their successors as a body corporate, and to convey the same, and to enter into all necessary contracts for the purposes of this Act.

Public streets, &c., vested in the local fund board.

8. All public roads or streets in any circle (not being private property) existing at the time this Act comes into operation, or which shall afterwards be made, and the pavements, stones, and other materials thereof, and also all erections, materials, implements and other things provided for such roads or streets, shall vest in the Local Fund Board of the circle. But it shall be competent to Government from time to time by notification to exclude any road or street from the operation of this Act, and to cancel such notification, wholly or in part.

Property vested in School Commissioners under Madras Act VI. of 1863, to be transferred to the local fund board.

9. All lands, houses, and other property in any circle, which, at the time this Act comes into operation in such circle, shall be vested in the School Commissioners appointed under the Madras Education Act, shall vest in the Local Fund Board of the circle; and all claims and demands which any person might have preferred against such School Commissioners in their official capacity may be preferred against the Local Fund Board.

Existing hospitals, schools, choultries, &c., to be vested in the local fund board.

10. All or any hospitals, dispensaries, schools, choultries, markets, tanks and wells, not being private property, and not governed by Regulation VII. of 1817 of the Madras Code, and all medicines, furniture, and other articles appurtenant thereto, not being private property, which, at the time this Act comes into operation in any circle, shall be found therein, may, by notification of the Governor in Council, be vested in the Local Fund Board of the circle; and thereupon all endowments or funds belonging to such hospitals, dispensaries, schools, or choultries shall be transferred to and vest in the Local Fund Board in trust to hold and apply the same to the purposes to which such endowments and funds were lawfully applicable at the time of such transfer:

Transfer of funds to the local fund board.

Proviso.

Provided always that no such notification shall be issued until one month after the intention of Government to transfer such property shall have been notified in the "District Gazette" in English and in the vernacular language or languages of the district.

Saving of Revenue Board's powers in regard to charitable endowments.

11. Nothing in this Act contained shall be deemed to affect the duties and powers vested in the Board of Revenue in respect of charitable endowments by the said Regulation VII. of 1817. But it shall be competent to the Board of Revenue, with the written consent of the Government and of the Local Fund Board, to make over to the Local Fund Board the

Power to transfer them to local fund board.

management and superintendence of any such endowment; and thereupon all powers and duties which attach to the Board of Revenue in respect thereof shall attach to the Local Fund Board as if such Local Fund Board had been specially named in the said Regulation.

Board to have and use a seal.

12. The Local Fund Board shall have and use a common seal, and shall have their name engraven thereon in legible characters in the English language, and also in the vernacular language of the district. All contracts entered into in respect of any sum exceeding 20 *Rs.* shall be in writing, and shall be sealed with the common seal of the board, and, on their behalf, in the presence of at least two members of the board, one of whom shall be the president or the vice-president, who shall certify the same by affixing their signatures as witnesses at the foot of the instruments. All such contracts shall be varied or discharged in a similar manner.

Board may, with consent of owners, take over and repair certain roads or streets.

13. It shall be lawful for the board to agree with the person or persons in whom the property in any road or street is vested, to take over the property therein, and, after such agreement, to declare, by notice in writing put up in any part of such road or street, that the same has become a public road or street. Thereupon such road or street, shall vest in the board, and shall thenceforth be repaired and kept up out of the local fund.

Power to purchase and sell lands.

14. The board may agree with the owners of any land for the purchase thereof for the purposes of this Act, and may sell any land which has vested in them, either together or in parcels, and the proceeds of such sale shall be applied for the purposes of this Act.

The Governor in Council may declare any land to be needed for a public purpose, &c.

15. When the board may be unable to agree with the owners of any land for the purchase thereof, the governor in council may, upon the representation of the board, and after such inquiry as may be thought proper, declare that the land is needed for a public purpose, and may order proceedings to be taken for obtaining possession of the same for the Government, and for determining the compensation to be paid to the parties interested, according to any law now or hereafter to be in force for the acquisition of land for public purposes. On payment by the board of the compensation awarded, such land shall vest in them in trust for the purposes of this Act.

Member of board not to be personally liable for contracts, &c., but only for wilful misapplication, &c., of money.

16. No member of the board shall be personally liable for any contract made, or expense incurred, by or on behalf of the board; but the funds from time to time in the hands of the board shall be liable for, and chargeable with, all contracts and expenses duly incurred as aforesaid. Every member shall be liable for any misapplication of money entrusted to the board to which he shall have been a party, or which shall have happened through, or have been facilitated by, his neglect of his duty; and he shall be liable to be sued for the same as for money due to the Government.

17. No

17. No member of the local fund board, or servant of the board, shall be interested, directly or indirectly, in any contract made with the board. And if any such person be so interested, he shall thereby become incapable of continuing in office or in employment, and shall be liable to a fine not exceeding 500 rupees, which shall be paid into and credited to the local fund: Provided always, that no person, by being a shareholder in, or member of, any incorporated or registered company, shall be disqualified from acting as a member of the local fund board by reason of any contract entered into between such company and the board. Nevertheless, it shall not be lawful for such shareholder or member to act as a member of the board in any matter relating to any contract entered into between the board and such company.

Penalty on member of board, or their servant, being interested in contracts.

Mode of transacting Business.

18. Each local fund board shall meet for the transaction of business upon such days and at such place as they may arrange, and as often as a meeting shall be called by the president or the vice-president. And all questions which may come before them at any meeting shall be decided by majority.

Local fund board to meet for the transaction of business.

19. In the absence from any meeting of the president and vice-president, the board shall choose some one of their number to preside.

Who to preside at meetings of the local fund board.

20. In every case of equality of votes, the presiding member shall have a second or casting vote.

Casting vote.

21. Minutes of the proceedings of the board at each meeting shall be drawn up and fairly entered in a book to be kept for that purpose, and shall be signed by the member who presided at such meeting. And the said minutes shall, at all reasonable times and without charge, be open at the office of the board to the inspection of any person who pays a rate or tax under this Act on behalf of himself or of any other person.

Minutes of proceedings of board to be kept and to be open for inspection.

22. No business shall be transacted at a meeting unless at least three members be present.

Quorum.

23. The resolutions of the local fund board shall be carried into effect by the president, in whom the entire executive power of the board shall be vested, and who shall be directly responsible for the due fulfilment of the purposes of this Act.

Executive power of board vested in the president.

24. The president may from time to time appoint all such officers as the board shall think necessary and proper to assist in the execution of this Act, and may from time to time remove any such officers and appoint others in their place, and out of the funds applicable to the purposes of this Act may pay such salaries to the said officers respectively as the board shall think reasonable: Provided that it shall be competent to the Government to pass such orders as they may deem proper in respect of the number of officers to be appointed under this section, and the rates of salary to be assigned to them; and such orders shall be binding on the board, and shall be carried out by them as far as the funds at their disposal will permit.

President to appoint ministerial officers for the purposes of this Act.

25. All persons in the employ of the Government, who, at the time this Act comes into operation in any district, shall be performing any executive or ministerial duties in carrying out the purposes specified in this Act, shall continue to discharge such duties under the orders of the Government, unless and until the Government shall otherwise direct.

Officers already employed by Government for similar purposes to be continued in office.

Purposes to which the Funds Raised under this Act shall be Applied.

26. The funds raised under the powers of this Act shall, subject to such rules as the Governor of Fort Saint George in Council may from time to time prescribe, be applicable to the following purposes in the circle to which they are raised:—

Purposes to which the funds raised under this Act are to be applied.

I. The construction, repair, and maintenance of roads and communications.

II. The diffusion of education, and, with this object in view, the construction and repair of school houses, the maintenance of schools either wholly or by means of grants-in-aid, the inspection of schools, and the training of teachers.

III. The construction and repair of hospitals, dispensaries, lunatic asylums, choultries, markets, tanks, and wells, the payment of all charges connected with the objects for which such buildings have been constructed, the training and employment of vaccinators and medical practitioners, the sanitary inspection of towns and villages, the cleansing of the roads, streets, and tanks, and any other local works of public utility calculated to promote the health, comfort, or convenience of the people.

27. It shall be competent to any local fund board appointed under this Act, with the sanction or upon the direction of the Government, to contribute out of the local funds belonging to any circle towards the expenses incurred in any other circle constituted under this Act, or in any municipal corporation constituted under any Act which may now or hereafter be in force within the Madras Presidency, where such expenditure is incurred for any of the purposes described in the last preceding section, and is calculated to benefit the inhabitants of the contributing circle: Provided always that, where such contribution has

Contribution to other circles and to municipalities.

Appendix, No. 15.

not been originally recommended by such local fund board, it shall not be obligatory upon them until the proposal to make such contribution shall have been submitted to them by the Government, and they shall have had the opportunity of offering their opinions thereon.

Appointment of officers to superintend operations of local fund boards.

28. It shall be competent to the Government to appoint from time to time such officers as may be required for the purpose of inspecting or superintending the operations of the local funds boards created by this Act, and to assign to them such salaries as the Governor in Council shall think reasonable; and the expense incurred by reason of such appointments shall be defrayed in rateable proportions out of the local funds of the several circles.

Collector to submit annual estimate of receipts and charges.

29. The collector of the district shall annually render to the local fund boards of each circle within his district an estimate of the probable gross receipts and charges of collection of the rates, taxes, and tolls levied under this Act in the same circle.

Estimate of annual expenditure.

30. The local fund board shall, at such time or times and in such form as the Governor in Council shall direct, furnish, for the sanction of the Governor in Council, a statement or estimate showing the probable receipts and the expenditure which it is proposed by the board to incur during the next official year, and the items in respect of which it is proposed to incur such expenditure, and may also furnish a supplemental estimate providing for any modifications which they may deem it advisable to make in the distribution of the amount to be raised and expended in the official year then current for the purposes of this Act.

Government to pass orders on estimate.

31. It shall be lawful for the Governor in Council to pass such orders as he shall think fit upon the original or supplemental estimate so submitted to him, and such orders shall be binding upon the board, and shall be carried out by them so far as the means at their disposal will permit.

Submission of annual reports and audit of local fund accounts.

32. The board shall, at such time or times and in such form as the Governor in Council shall direct, furnish an annual report of their proceedings, and statements in detail of all the works executed and measures carried out by them, and of all sums received and expended by them. The local fund accounts shall be audited by such officer and in such manner as the Governor in Council shall direct. The annual report shall be published, both in English and in one of the vernacular languages of the district, in the "District Gazette."

Saving of power of Government to appoint local committees for schools, dispensaries, &c.

33. Nothing in this Act contained shall be deemed to affect the power of Government to appoint local committees for the management of schools, dispensaries, and other institutions maintained or aided out of the funds raised under this Act: Provided that such committees shall act in subordination to the local fund board under such rules as the Governor in Council shall prescribe.

Constitution of Local Funds.

What shall constitute the local fund.

34. The ocal fund shall consist of all unexpended balances of funds raised under Madras Acts VI. of 1863 and III. of 1866, of the proceeds of the rates, taxes, and tolls hereinafter authorised, of the sale proceeds of all property vested in the local fund board which may be sold under their orders, of all fines or penalties levied under the authority of this Act, of all contributions received from other circles or municipal corporations, and of all other sums of money which under the sanction of the Government may be received by the local fund board in trust for the purposes of this Act: Provided that the said unexpended balances of funds raised under the said Madras Education Act (No. VI. of 1863), and the District Road Cess Act (No. III. of 1866), shall be applied only to the purposes to which such funds were lawfully applicable at the date of the coming into operation of this Act: Provided also that the local fund of each district shall remain liable for the repayment of all advances made by Government for the purposes of Madras Act III. of 1866 (the District Road Cess Act) in such district, which may not have been discharged out of the collections made under that Act.

Proviso.

Fund where to be lodged and how to be drawn against.

35. The local fund shall be lodged in such bank or Government Treasury as the president, under the orders of Government, may direct. All expenses incurred by him shall be paid out of such fund; and all orders or cheques upon the said fund shall be signed by the president, or, in his absence, by any officer authorised by him for the purpose, whose signature shall be a sufficient authority to such bank or Government Treasury for the payment thereof.

Rates, Tolls, and Taxes leviable under this Act.

Levy of rates, tolls, and taxes.

36. It shall be lawful for the Government, subject to the restrictions hereinafter mentioned, to levy for the purposes of this Act in any circle to which this Act shall have been applied, all or any one or more of the following rates, tolls, and taxes; that is to say,—

I. A rate or cess not exceeding one anna in the rupee on the annual rent value of all occupied land on whatever tenure held.

II. A tax

II. A tax on houses not exceeding the rates laid down in Schedule A. to this Act annexed.

III. Tolls upon carriages, carts, or animals passing along roads within the circle not exceeding the rates laid down in Schedule (B.) to this Act annexed.

Provided that the tax on houses shall not be imposed except in villages, or groups of villages or townships, in which a school supported by a Government grant-in-aid already exists, or in which the inhabitants are prepared to establish a school under such rules as may at the time be in force in respect of educational grants-in-aid, or in which the Government shall determine to establish a school: Provided also that the net proceeds of all tolls, and not less than two-thirds of the rate or cess actually levied on the annual rent value of occupied land, shall be applied to the first of the purposes specified in Section 26 of this Act.

Rate to be fixed by notification of Government.

37. The exact amount of the said rates, tolls, and taxes, and the date from which they shall be payable in each circle, shall be fixed from time to time by notification by the Governor in Council; but it shall be competent to the said Governor in Council to sanction a reduction or remission of the amount of any rate, toll, or tax authorised in such notification, in the case of particular persons or classes of persons, either on the ground of poverty, or on the ground of inequality in the incidence of taxation, or for any other reason which may appear to the Government to be satisfactory.

Rate on the Rent Value of Land.

Annual rent value of lands how to be fixed.

38. The rent value of land shall be calculated for the purposes of this Act in the following manner:—

Lands held under a ryotwary settlement.

I. In the case of lands held direct from the Government under a ryotwary settlement, the assessment payable to Government for the land, together with any water rate which may be payable for its irrigation, shall be taken to be the annual rent value of such lands.

Inam lands.

II. In the case of Inam lands, or lands held wholly or partially free from assessment, the full assessment which such lands would bear if they were not Inam, together with any water rate which may be payable for their irrigation, shall be taken to be the annual rent value; and such full assessment and water rate, if not already fixed and known, shall be determined by the collector of the district under the general orders of the Board of Revenue.

Lands held on any tenure other than ryotwary.

III. In the case of lands held on any other tenure, the annual rent payable to the landholder by his tenants shall, for the purposes of this Act, be taken to be the annual rent value of the lands held by such tenants; and the rent ordinarily payable to the landholder for lands of similar quality leased out by him in the neighbourhood shall be taken to be the annual rent value of lands occupied by the owner himself, or by any person holding the same from him free of rent, or at a favourable rent.

Local rate how to be calculated when revenue or rent is paid in kind.

39. When revenue or rent is paid in kind, the local rate shall be calculated on the rates of rent established or paid for neighbouring lands of a similar description and quality.

Holders of land, on other than ryotwary tenure, to furnish lists of their lands to collector.

40. It shall be lawful for the collector, with the sanction of the Board of Revenue, to require every landholder, holding under any tenure other than ryotwary, to furnish him with a list of his lands, whether occupied by tenants or by himself, specifying, in each case, the annual rent value of the lands so occupied.

Penalty for failing to furnish such lists.

41. If such landholder shall fail to furnish to the collector of the district, or to such other officer as he may appoint, the list referred to in the last preceding section, within six months after requisition made in the "District Gazette," or otherwise, such landholder shall be liable to a fine not exceeding 50 rupees, for each day's delay until the list be furnished, or until the annual rent value of such landholder's lands shall have been fixed by the collector as provided in the next following section. Such fine shall be credited to the local fund.

If list be not furnished, collector may fix the annual rent value of such landholder's lands.

42. If no such list be furnished by the landholder within one month from the expiration of the six months aforesaid, the collector of the district shall be empowered to fix, for the purposes of this Act, the annual rent value of such landholder's lands, both those occupied by his tenants and those occupied by himself.

Power of collector to summon parties, &c., to ascertain correctness of the lists, or to fix annual rent value when such lists have not been furnished.

43. The collector of the district shall be empowered to take steps for ascertaining the correctness of the lists referred to in Section 40, or for fixing the annual rent value as provided in the last preceding section where such lists have not been furnished, in the manner provided in the Madras Act III. of 1869, anything in Regulation XXIX. of 1802 to the contrary notwithstanding, and may depute any of his officers to make such inquiries as may be necessary.

Collector to assess landholder in accordance with list submitted by him, if he is satisfied with it, or amend the same if dissatisfied with it.

44. If the collector is satisfied with the list submitted by a landholder under Section 40 of this Act, he shall assess him in accordance with it for the local rate due on his estate; but if the collector be dissatisfied with the list, he shall, after making the inquiries referred to in Section 43, amend the same, and shall supply such landholder with a copy of such amended list, which, for the purposes of this Act, shall be taken to contain the annual rent value of his lands for the purposes of this Act.

Appeal to Board of Revenue.

45. An appeal shall lie to the Board of Revenue from decisions of collectors under the last preceding section of this Act, provided such appeal be preferred within three months from the date of the collector's decision; and the orders of the board on such appeals shall be final.

Rate to be entered in puttahs of ryotwary lands.

46. In the case of land held on ryotwary tenure, the amount of the local rate shall be entered in the puttah of the landholder.

Payment of local rate by landholder.

47. Every landholder shall pay to the collector, or other officer empowered by him to receive it, the local rate due under this Act upon his lands, whether occupied by his tenants or by himself, on or before such dates and in such instalments as the collector, under the general orders of the Board of Revenue, may declare by a notification in the Gazette of the district: Provided that every landholder is hereby empowered to collect and recover from his tenants one-half of the local rate payable under this Act in respect of the land held by such tenants.

Power to landholder to recover rate from tenant.

Remission of one-half of the local rate in case of lands held on other than ryotwary tenure.

Proviso.

48. Every holder of land coming within the meaning of Clause 3 of Section 38 of this Act shall be entitled to a remission of one-half of the local rate payable under this Act on so much of the whole annual rent value of his land as is equal to the amount of the peshcush or permanent assessment, or other revenue payable by him to Government in respect of such land: Provided always that the amount recoverable from such landholder from his tenants under the proviso to Section 47 of this Act shall be calculated upon the whole amount which would have been payable to Government if no such remission had been allowed.

Arrear of local rate how to be recovered.

49. When the whole or any portion of an instalment of local rate shall not be paid by a landholder on the date fixed by the collector under Section 47 of this Act, the sum remaining unpaid shall be deemed an arrear; and it shall be lawful for the collector, or other officer empowered by the collector in that behalf, to proceed to recover the arrear with interest and costs of process under the provisions of Madras Act II. of 1864; and the local rate is hereby declared to be included among the cesses referred to in Section 52 of that Act.

Power of landholders under the Act for the collection of local rates from their tenants

50. All landholders are hereby declared to have the same powers, and to be liable to the same penalties, in the collection of the portion of the local rate recoverable under the proviso to Section 47 from their tenants and other occupants of their lands, as may be prescribed in any Act or regulation which now is, or hereafter may be, in force for the collection of rent due to a landholder.

Tax on Houses.

Levy of tax on houses.

51. Whenever it shall be determined by the Government to levy a tax on houses in any village, or group of villages, or township, the tax shall be levied in the manner prescribed by Sections 52 to 61 of this Act inclusive.

Rate book to be kept and to be open to inspection.

52. The collector of the district, or such other revenue officers as the collector shall authorise in that behalf, shall prepare lists of all houses rateable under this Act, in each village, group of villages, or township, and shall enter the same in rate books which shall contain the name of the owner or occupier of the house, the class under which it is rated, the amount of rate due, and the date at which the rate is payable; and every person claiming to be the owner or occupier of such house, or the agent of such person, shall be at liberty to inspect the same at all reasonable hours and to make extracts therefrom without the payment of any fee.

Completion of rate book to be notified.

53. As soon as the rate books are prepared, the said collector, or other revenue officer authorised as aforesaid, shall give public notice thereof, and of the place or places where they may be inspected.

Amendment of rate book.

54. It shall be lawful for the said collector, or other revenue officer authorised as aforesaid, from time to time, to add to or amend the rate book, by inserting therein the name of any person liable to be rated, or by inserting any property liable to the rate, or by altering the classification of such property; and, in the case of every such amendment, notice thereof shall be given to the person interested in such amendment.

Appeals.

55. Every person aggrieved by any rate fixed under Section 52 or 54 of this Act shall be at liberty to appeal to the revenue officer in charge of the division of the district in which the village, or group of villages, or township is situated. The appeal shall be preferred within 30 days from the date of the publication or service respectively of the notice mentioned in the preceding sections.

Notice of appeals.

56. Every such appeal shall be in writing, and shall be left at the office of the appellate authority, whose decision upon such appeal shall be final.

57. When

57. When any house shall have been vacant for 60 or more consecutive days during any year, the collector of the district, or other revenue officer authorised as aforesaid, shall remit so much as may be proportionate to the number of days the said house may have remained unoccupied; provided that the owner of such house, or his agent, shall have given to such officer notice in writing of the vacancy thereof, and that the amount of rate to be remitted shall be calculated from the date of the delivery of such notice.

Remission of rate on account of vacant houses.

58. It shall be lawful for the collector of the district, or other revenue officer in charge of the division in which the building is situated, to exempt from payment, on the ground of poverty, the owner or occupier of any house rateable under this Act: Provided also that no building ordinarily used as a place of public worship, or as a public choultry, or as a hospital or dispensary, and no building exclusively used for charitable purposes, shall be liable to any rate.

Exemption from payment of house rate on the ground of poverty.

59. Where any house rate shall remain unpaid 10 days after the same is due, it shall be lawful for the collector, or other revenue officer authorised as aforesaid, to serve upon the owner or occupier of the house, or upon both, a notice in writing in the form given in Schedule (C.) to this Act, or to the like effect. If such person shall not, within seven days from the service of such notice of demand, pay the sum due, or show sufficient cause for non-payment of the same, such sum, with all costs, may be levied by distress and sale of all goods and chattels found on the premises, or of all goods and chattels of the owner, wherever the same may be found within the limits of the district.

Notice of demand for house rate.

60. The distraining officer shall make an inventory of the goods seized, and if the amount due is not paid within seven days after seizure, the goods shall be sold, and the surplus, if any, after paying the rate and the costs of distress and sale, shall be returned to the person in possession of the goods at the time the seizure was made.

Inventory, distress

61. Whenever any house rate shall have been paid by the occupier, or recovered from him by seizure and sale of his property, it shall be lawful for him to deduct the amount so paid or recovered from the next and following payments of rent.

Rate paid by or recovered from occupier of house to be deducted from rent thereof.

Tolls on Carriages and Animals passing along Roads within the Circle.

62. If it shall be determined by the Government to levy, for the purposes of this Act, tolls on carriages, carts, and animals passing along roads within any circle, such tolls shall be levied as provided in Sections 63 to 68 of this Act.

Toll on carriages, &c., to be levied as provided for.

63. It shall be lawful for the Governor in Council by notification to declare that tolls not exceeding the rates mentioned in Schedule (B.) annexed to this Act shall be levied upon all carriages, carts, and animals passing along any roads within the circle specified in such notification. The collector of the district may thereupon construct toll-bars, gates, and gate-keepers' stations at such places as the Governor in Council may sanction, and may place the collection of such tolls under the management of such persons as may appear to him proper, or may, with the permission of the Governor in Council, lease out the same, and shall frame bye-laws, in manner hereinafter provided, for the guidance of such toll collectors; and all persons employed in the management and collection of such tolls shall be liable to the same responsibilities as would attach to them if employed in the collection of any assessment or tax under this Act: Provided that no more than one payment of toll shall be demanded for, and in respect of, any carriage, cart, or animal in any one period of 24 hours counted from midnight to midnight.

Tolls to be levied on carriages, carts, and animals entering the circle.

64. In case of non-payment of any such toll on demand, the officer appointed or duly authorised to collect the same may seize any carriage or animal on which it is chargeable, or any part of its burden of sufficient value to defray the toll. If any toll, together with the cost arising from such seizure and custody, remains undischarged for 48 hours, the collector, or other revenue officer authorised by him in that behalf, may sell the property seized, for discharge of the toll and of all expenses occasioned by such non-payment, seizure, custody, and sale. Any balance that may remain shall be returned, on demand, if made within six months, to the owner of the property, and, if unclaimed after such period, shall be credited to the local fund. After seizure of the property as aforesaid, the collector, or other officer authorised as aforesaid, shall forthwith issue a notice that, after the expiration of two days, exclusive of Sunday, he will sell, at such place as may be stated in the notice, the property by auction: Provided that if, at any time before the sale has actually begun, the person whose property has been seized shall tender to the officer empowered to sell the property the amount of all the expenses incurred and of the toll payable by him, the property seized shall forthwith be released.

In case of non-payment of tolls, vehicle, &c., may be seized.

65. No tolls shall be paid for the passage of troops on their march, or of military or Government stores and equipages, or of military or police officers on duty, or of any person or property in their custody; but no other exemption from payment of the tolls levied under this Act shall be allowed, except as provided in the following section.

Troops, military stores, police, &c., exempt from toll.

66. It shall be lawful for the local fund board to compound with any person for a sum to be paid annually or half-yearly, in lieu of all tolls payable under the provisions of this Act, either generally in respect of all roads within the circle, or specially in respect of any particular road, and to issue licenses for such carriages, carts, or animals; and while such licenses

The board may compound with person living outside the circle for a payment in lieu of tolls.

Appendix, No. 15.

licenses shall remain in force such carriages, carts, and animals shall be exempt from all tolls as aforesaid, either generally upon all the roads within such circle, or specially upon any particular road, as may be provided by the license: Provided always that such composition shall include all the carriages, carts, and animals possessed by the person compounding.

Police to assist toll collectors.

67. In all cases of resistance to the lawful authority of the toll collectors, all police officers shall be bound to assist the toll collectors when required, and for that purpose shall have the same power which they have in the exercise of their ordinary police duties.

Table of tolls to be exhibited.

68. A table of the tolls authorised to be taken at any toll gate or station, legibly written or painted in English words and figures, and in the vernacular language of the district, shall be put up in a conspicuous place near such gate or station.

General Provisions.

Bar of suits in civil courts.

69. It shall not be competent to any civil court to entertain any suit regarding the amount of any rate or tax levied under this Act.

Duties imposed by this Act on the collector may be done by any other officer appointed for that purpose.

70. Every act which is hereby directed to be done by the collector of the district may be done by any other officer whom the Governor in Council may authorise by notification to that effect.

Delegation of the powers of Government under this Act.

71. Every act which is hereby directed to be done by the Government may be done by any authority whom the Governor in Council may authorise by notification to that effect, subject to such orders as the said Governor in Council shall from time to time prescribe.

Publication of notifications in the "District Gazette."

72. Every notification of the Governor in Council referred to in this Act shall be published in the Gazette of the district to which such notification applies, both in English and in the vernacular language or languages of the district.

Service of notice.

73. Every notice which is directed by this Act to be given to any person shall be served personally upon the person to whom such notice is addressed, or, if he cannot be found, it may be left with some servant or adult member of his family, or, in default of any such, it may be affixed upon the door of his last known place of residence.

Illegal collection of rates, taxes, or tolls.

74. Every person, other than persons appointed or duly authorised to collect the rates, taxes, or tolls under this Act, who shall levy or demand any rate, tax, or toll, and also every person who shall unlawfully and extortionately demand or take any other or higher rate, tax, or toll than the lawful rate, tax, or toll, or, under colour of this Act, seize or sell any property, knowing such seizure and sale to be unlawful, or who, in cases where he shall be entitled to recover from any person any portion of the tax paid by himself under this Act, shall demand or claim any higher portion than he is entitled to recover, or who shall in any manner unlawfully extort money or any valuable thing from any person under colour of this Act, shall be deemed to have committed the offence of cheating or extortion, as the case may be, and shall be liable to such punishment as is prescribed for those offences respectively by the Indian Penal Code.

Offender may be detained in custody, or compelled to give security, if fine, &c., be not forthwith paid.

75. In case any fine, forfeiture, or penalty imposed under or by virtue of this Act shall not be forthwith paid, the magistrate may order the offender to be apprehended and detained in safe custody until the return can be conveniently made to the warrant of distress, unless the offender shall give security to the satisfaction of the magistrate for his appearance at such place and time as shall be appointed for the return of the warrant of distress.

If no sufficient distress can be had, or there be not sufficient property, whereupon the fine, &c., can be levied, the offender, if not a European British subject, may be imprisoned.

76. If, upon the return of such warrant, it shall appear that no sufficient distress can be had whereon to levy such fine, and the same shall not be forthwith paid, or in case it shall appear to the satisfaction of the magistrate, by the confession of the offender or otherwise, that he has not sufficient property whereupon such fine or sum of money could be levied if a warrant of distress were issued, the magistrate may, by warrant under his hand, commit the offender, provided he is not a European British subject, to prison, there to be imprisoned, according to the discretion of the magistrate, for any term not exceeding two calendar months when the amount of fine shall not exceed 50 rupees, and for any term not exceeding four calendar months when the amount shall not exceed 100 rupees, and for any term not exceeding six calendar months in any other case; the commitment to be determinable in each of the cases aforesaid on payment of the amount.

Prosecutions under this Act.

77. Every prosecution under this Act may be instituted before any magistrate who has jurisdiction over the offender, except in cases otherwise provided for.

Short title.

78. This Act may be cited as "The Madras Local Funds Act."

C. Vehicles and Animals liable to taxation, with the maximum Rates of Taxation.
D. Maximum Rates of Tolls payable on entering the Municipal limits.

Appendix, No. 15.

ACT No. III. of 1871.

Passed by the Governor of Fort St. George in Council.

Received the Assent of the Governor on the 2nd March 1871, and of the Governor General on the 28th March 1871.

AN ACT to make better provision for the conservancy and improvement of towns in the Presidency of Fort Saint George; for the diffusion of education therein, and for other objects of public utility calculated to promote the health, comfort, or convenience of the inhabitants of the said towns.

Preamble.

WHEREAS it is expedient to make better provision for the conservancy and improvement of towns in the Presidency of Fort Saint George, for the diffusion of education therein, and for other objects of public utility calculated to promote the health, comfort, or convenience of the inhabitants of the said towns; it is enacted as follows:—

Short Title.

1. This Act may be cited as the "Towns Improvement Act, 1871."

Interpretation.

2. The following words and expressions in this Act shall have the several meanings hereby assigned to them, except where a different intention shall appear from the context; that is to say:—

"The Commissioners."

The expression "The Commissioners" shall mean the persons appointed by the Government, or elected by the ratepayers to conduct the affairs of any town under this Act, and shall include *ex-officio* Commissioners under this Act.

"House."

The word "House" shall include any hut, shop, or warehouse.

"Town."

The word "Town" shall include any village, hamlet, suburb, station, bazaar, or place, the limits of which shall be defined as in this Act provided, and shall also include any number of the same when declared to be united as in this Act provided.

"Land."

The word "Land" shall include fields, plantations, and gardens.

"Horse."

The word "Horse" shall include ponies and mules.

"Street."

The word "Street" shall mean any road, street, square, court, alley, or passage, whether a thoroughfare or not, over which the public have a right of way, together with such land (not being private property), whether covered or not by any pavement, pyall, verandah, or other erection or structure, as may be between the roadway and the main wall of any house or houses adjacent thereto, and also the roadway over any public bridge or causeway, within the town; and the expression "in or near any street" shall designate any place within the town. Provided that nothing in this section shall be taken to interfere with any easement enjoyed by any person in respect of such land at the date of the passing of this Act.

"Owner."

The word "Owner" shall mean the person, for the time being, receiving the rent of the land or premises, whether paid in money or in kind, or in charge of the animal or thing, in connection with which the word is used, whether on his own account, or as agent or trustee for any other person, or who would so receive the rent if such land or premises were let to a tenant. Provided that no person receiving the rent of land or premises as agent for another person shall be liable to make any outlay by this Act required to be made by the owner of such land or premises, in excess of the amount of the funds, or of the value of the produce belonging to the owner, which he may have in his possession; nor shall he be subject to any penalty, if he can prove that he has made the outlay required to the extent of such funds.

"Official year."

The words "Official year" shall mean the year beginning on the first day of April, or such other date as may hereafter be fixed by the Governor in Council by notification in the "Fort Saint George Gazette."

Madras Acts X. of 1865, VI. of 1863, and III. of 1866 to have no effect in places to which this Act is extended.

3. Madras Act No. X. of 1865 (The Towns Improvement Act, 1865), the Madras Education Act (No. VI. of 1863), and the Madras District Road Cess Act (No. III. of 1866) shall, in every town to which this Act shall be extended, cease to have effect, except as to any assessment made, or as to any act done, or as to any liability incurred, or as to any money due, or as to any proceedings commenced in such town before such Act shall have effect therein.

All the property and rights of action of the Municipal and School Commissioners appointed under Acts X. of 1865 and VI. of 1863 vested in the Commissioners appointed under this Act.

All lands, buildings, works, and hereditaments, utensils, materials, books, plans, maps, papers, effects, securities, and monies, whether derived under the said Madras Act X. of 1865, or under Madras Act VI. of 1863, and other property, moveable and immoveable, of what nature or kind soever, and all interest therein, whether vested, contingent, or in remainder, which shall on the date on which this Act shall take effect in such town, be vested in, or held in trust for, the Commissioners appointed under the said Madras Acts X. of 1865 and VI. of 1863, respectively, who shall hereafter in this Act be designated the late Commissioners, or which would have been vested in, or held in trust for, such Commissioners but for the passing of this Act, and all such estate and interest of and in the same, respectively, as shall then be or would have been in, or in trust for, the said Commissioners or any of them, with all rights of way and other rights and easements now used and enjoyed by the said Commissioners, shall, on and from the date when this Act comes into operation in such town, be vested in the Commissioners appointed under this Act and their successors; and all persons who shall then owe any money to the late Commissioners, or to any person on their behalf, shall pay the same to the Commissioners appointed under this Act, or as they shall direct: and all monies which shall be then due, and owing by, or recoverable from, the late Commissioners, shall be paid by or be recoverable from the Commissioners: and all contracts, agreements, mortgages, bonds, covenants, and securities

securities made or entered into before this Act comes into operation, to, with, or in favour of, or by, or for the said late Commissioners, or any of them, or any person on behalf of such late Commissioners, and all rights of action and suit arising out of contract or otherwise, shall take effect, and may be proceeded on and enforced, as far as circumstances will admit, in favour of, by, against, and with reference to, the Commissioners in such manner as the same would have taken effect, and might have been proceeded on and enforced in favour of, by, against, and with reference to, the said late Commissioners, or any of them, if this Act had not been passed.

Actions, &c., by or against Commissioners, not to abate, &c.

4. No action, suit, prosecution, or other proceeding whatsoever, commenced or carried on either by or against the late Commissioners previously to the coming into operation of this Act, shall abate or be discontinued or prejudicially affected by this Act, but shall continue and take effect both in favour of and against the Commissioners, in the same manner in all respects as the same would have continued and taken effect in relation to the late Commissioners, or any of them, if this Act had not been passed: and all decrees and orders made, and all fines and penalties imposed and incurred respectively, previously to the coming into operation of this Act, shall and may be enforced, levied, recovered, and proceeded for; and all administrative proceedings commenced previously to the coming into operation of this Act shall and may be continued, proceeded with, and completed in such or the like manner as if this Act had not been passed, the Commissioners under this Act being, in reference to the matters aforesaid, in all respects substituted for the late Commissioners.

For purposes of this Act, the Governor in Council may define limits of town, &c., and create unions of places.

5. For the purposes of this Act, the Governor in Council may, from time to time, by notification, define the limits of any town, village, hamlet, suburb, station, bazaar, or place not being within the limits of the town of Madras; and may, from time to time, by such notification, declare to be united for the purposes of this Act, any number of such towns, villages, hamlets, suburbs, stations, bazaars, or places, or any parts thereof; and may declare who shall be deemed inhabitants, within the meaning of this Act, or of any such town; and by what name such town shall be designated.

Act not to take effect in any town until it shall have been extended thereto.

6. The provisions of this Act shall not take effect in any town for the first time defined or declared to be united as aforesaid, until three months after the Governor in Council, by notification, shall have signified that this Act is to be extended thereto.

Establishment of Municipal Commissions and Constitution of Municipal Funds.

Appointment and removal of Commissioners.

7. In any town to which the operation of this Act shall have been extended, the Governor in Council shall appoint not less than three persons, being owners of lands or buildings in such town, or carrying on business therein, or residing in such town, to be Commissioners for carrying out in such town the purposes of this Act. The persons so appointed shall continue in office three years, or until their successors shall have been appointed, and shall be eligible for re-appointment. The Governor in Council may, from time to time, accept the resignation of any of such Commissioners, or may remove any of such Commissioners for misconduct or neglect of duty, add to their number, and fill up vacancies occurring among them.

Ex-officio Members.

8. In addition to the Commissioners to be appointed as aforesaid, the collector of the district and revenue officer in charge of the division of the district in which the town is situate shall be *ex-officio* Commissioners of every town in their respective jurisdictions, to which this Act shall be extended; and it shall further be competent to the Governor in Council to appoint as a Commissioner of any such town, any officer in the service of Government holding a salaried office in the district in which the town is situate; provided that not more than one-half of the whole number of Commissioners shall be persons holding salaried offices in the service of Government, unless such persons be elected to be Commissioners under the provisions of section 9 of this Act.

Election of Commissioners by the ratepayers.

9. If at any time it shall appear to the Governor in Council to be advisable that a certain number of the Commissioners of any town shall be appointed by election by the ratepayers, it shall be competent to the said Governor in Council to take measures for the election of such Commissioners by the ratepayers, subject to such rules and orders as may be passed by the Government. The persons so elected shall continue in office three years, or until their successors have been elected, and shall be eligible for re-election. The Governor in Council may, from time to time, accept the resignation of any of the Commissioners so elected, or may remove any of such Commissioners for misconduct or neglect of duty.

Appointment of President and Vice President.

10. The collector of the district shall *ex-officio* be President of the Commissioners for all towns within the district under his charge, and the Governor in Council shall, from time to time, appoint one of the Commissioners of each town to be Vice President. Provided that if at any time it shall appear to the Governor in Council to be advisable that in any town the Vice President shall be appointed by election by the Commissioners, it shall be competent to the said Governor in Council to authorise the election of such Vice President by the Commissioners.

Commissioners to have and use a common seal.

11. The Commissioners shall have and use a common seal, and shall have their name engraven thereon in legible characters in the English language, and also in the vernacular language of the district. All contracts entered into in respect of any sum exceeding 20 rupees

Appendix, No. 15.

rupees shall be in writing, and shall be sealed with the common seal of the Commissioners and, on their behalf, in the presence of at least two of the Commissioners, one of whom shall be the President, or, in the absence of the President, the Vice President, who shall certify the same by affixing their signatures as witnesses at the foot of the instruments. All such contracts shall be varied or discharged in a similar manner.

Commissioners empowered to sue and be sued, to hold property, and enter into contracts.

12. The Commissioners of each town shall sue and be sued in the name of their President, by the description of "The President of the Commissioners of ——————;" and in such name so described, they shall be competent to hold property, moveable and immoveable, to them and their successors as a body corporate, and to convey the same, and to enter into all necessary contracts for the purposes of this Act.

Public streets, &c., vested in the Commissioners.

13. All public streets, in any town (not being private property), existing at the time this Act comes into operation, or which shall afterwards be made, and the pavements, stones, and other materials thereof, and also all erections, materials, implements, and other things provided for such streets, shall vest in, and belong to, the Commissioners and their successors. But it shall be competent to Government, from time to time, by notification, to exclude any road or street from the operation of this Act, and to cancel such notification, wholly or in part.

Commissioners may, with consent of owners, take over and repair certain streets.

14. It shall be lawful for the Commissioners to agree with the person or persons in whom the property in any street is vested, to take over the property therein, and, after such agreement, to declare, by notice in writing, put up in any part of such street, that the same has become a public street. Thereupon such street shall vest in the Commissioners and their successors, and shall thenceforth be repaired and kept up out of the Municipal Fund.

Existing hospitals, schools, choultries, &c., to be vested in the Commissioners.

15. All or any hospitals, dispensaries, schools, choultries, markets, tanks, and wells, not being private property, and not governed by Regulation VII. of 1817 of the Madras code, and all medicines, furniture, and other articles appurtenant thereto, not being private property, which, at the time this Act comes into operation in any town, shall be found therein, may, by notification of the Governor in Council, be vested in the Commissioners; and thereupon all endowments or funds belonging to such hospitals, dispensaries, schools, or choultries, shall be transferred to, and vest in, the Commissioners as trustees, to hold and apply the same to the purposes to which such endowments and funds were lawfully applicable at the time of such transfer. Provided always that no such notification shall be issued until one month after the intention to transfer such property shall have been notified by the Governor in Council in the district Gazette, in English, and in the vernacular language of the district.

Saving of Revenue Board's powers in regard to charitable endowments.

16. Nothing in this Act contained shall be deemed to affect the duties and powers vested in the Board of Revenue in respect of charitable endowments, by Regulation VII. of 1817. But it shall be competent to the Board, with the written consent of the Government and of the Commissioners, to make over to the Commissioners the management and superintendence of any such endowment; and thereupon all powers and duties which attach to the Board of Revenue in respect thereof shall attach to such Commissioners, as if they had been specifically named in the said regulation.

What shall constitute the Municipal Fund.

17. All monies, rents, and profits received by the Commissioners of any town, by virtue of this or any other Act, and all fines, fees, and penalties, paid or levied under this Act, and all other monies which, under sanction of Government, may be transferred to such Commissioners, shall be credited to, and shall constitute, a fund which shall be called the Municipal Fund of such town, and shall, together with all property of every nature or kind which may become vested in the said Commissioners, be under their control, and shall be held by them and their successors in trust for the purposes of this Act.

Power to purchase and sell lands.

18. The Commissioners may agree with the owners of any land for the purchase thereof, for the purposes of this Act, and may lease out or sell any land belonging to the municipality and not required for such purposes, either together or in parcels; and the rent of such land, or the proceeds of such sale shall be applied for the purposes of this Act.

The Governor in Council may declare any land to be needed for a public purpose, &c.

19. When the Commissioners may be unable to agree with the owners of any land for the purchase thereof, the Governor in Council may, upon the representation of the Commissioners, and after such inquiry as may be thought proper, declare that the land is needed for a public purpose, and may order proceedings to be taken for obtaining possession of the same for the Government, and for determining the compensation to be paid to the parties interested, according to any law now or hereafter to be in force for the acquisition of land for public purposes. On payment by the Commissioners of the compensation awarded, such land shall vest in them and their successors in trust for the purposes of this Act.

No Commissioner to be personally liable for contracts, &c., but only for wilful misapplication, &c., of money.

20. No Commissioner shall be personally liable for any contract made, or expense incurred, by or on behalf of the Commissioners; but the funds, from time to time, in the hands of the Commissioners, shall be liable for, and chargeable with, all contracts and expenses duly incurred as aforesaid. Every Commissioner shall be personally liable for any misapplication of money entrusted to the Commissioners, to which he shall have been a party, and he shall be liable to be sued for the same.

Penalty on Commissioners and others being interested in contracts.

21. No Commissioner or servant of the Commissioners shall be interested, directly or indirectly, in any contract made with the Commissioners. And if any such person be so interested, he shall thereby become incapable of continuing in office or employment, and shall

shall be liable to a fine not exceeding 500 rupees. Provided always that no person, by being a shareholder in, or member of, any incorporated or registered company, shall be disqualified from acting as a Commissioner by reason of any contract entered into between such company and the Commissioners. Nevertheless, it shall not be lawful for such shareholder or member to act as a Commissioner in any matter relating to any contract entered into between the Commissioners and such company.

Mode of transacting Business and appointing Municipal Servants.

Commissioners to keep an office for the transaction of business.

22. The Commissioners shall keep an office where they shall meet for the transaction of business at least twice in every month upon such days, and at such times as they may arrange, and as often as a meeting shall be called by the President, or, in his absence, by the Vice President. And all questions, which may come before them at any meeting shall be decided by a majority.

Who to preside at meetings of the Municipal Commissioners.

23. In the absence from any meeting of the President and Vice President, the Commissioners shall choose some one of their number to preside.

Casting vote.

24. In every case of equality of votes, the presiding member shall have a second or casting vote.

Minutes of Proceedings of Commissioners to be kept, and to be open for inspection.

25. Minutes of the proceedings of the Commissioners at each meeting shall be drawn up and fairly entered in a book to be kept for that purpose; and shall be signed by the member who presided at such meeting, or, in his absence, by some one of those present. And the said minutes shall be published in the district Gazette in English and in one of the vernacular languages of the district, and shall, at all reasonable times and without charge, be open at the office of the Commissioners to the inspection of any person who pays a rate or tax under this Act, on behalf of himself or of any other person.

Quorum.

26. No business shall be transacted at a meeting unless at least three Commissioners be present.

The President or one of the Vice Presidents to exercise, with certain exceptions, the powers of the Commissioners

27. In any case of emergency, the President, or, in his absence, the Vice President, shall exercise all the powers vested by this Act in the Commissioners. Provided that it shall not be lawful for the President or the Vice President to exercise any power which it is by this Act expressly declared shall be exercised by the Commissioners at a meeting.

Appointment of overseers, clerks, and subordinate officers.

28. The President shall, from time to time, appoint all such overseers, clerks, and subordinate officers and servants, as he may think necessary and proper to assist in the execution of this Act, and may, from time to time, remove any of such persons and appoint others in their places. And, out of the Municipal Fund, he shall pay, or cause to be paid, such salaries to the said persons respectively as may be determined by the Commissioners at a meeting; or, in case of absence on leave, such portion thereof as may appear to the Commissioners to be reasonable. He shall also take from every tax collector such security for the sums collected by him as he may think proper.

Purposes to which the Funds raised under this Act shall be applied, and how Estimates of Income and Expenditure shall be framed.

Purposes to which the funds raised under this Act shall be applied.

29. The funds raised under this Act shall, subject to such rules and restrictions as the Governor in Council may, from time to time, prescribe, be applicable within the towns in which they are raised, to the following purposes; that is to say: —

I. The construction, repair, and maintenance of streets and bridges.

II. The diffusion of education, and, with this view, the construction and repair of school-houses, the establishment and maintenance of schools, either wholly or by means of grants-in-aid, the inspection of schools, and the training of teachers.

III. The construction and repair of hospitals, dispensaries, lunatic asylums, choultries, markets, tanks, and wells, the payment of all charges connected with the objects for which such buildings have been constructed, the training and employment of medical practitioners and vaccinators, the sanitary inspection of towns and villages, the application of the Indian Contagious Diseases Act, the registration of births and deaths, the cleansing of the streets and tanks, and any other local works of public utility calculated to promote the health, comfort, or convenience of the people.

Contribution to extra municipal expenditure.

30. It shall be competent to the Commissioners, with the sanction or upon the direction of the Government, to contribute a portion of the municipal funds towards the expenses incurred in any other municipality under this Act, or in any circle constituted under the Local Funds Act, where such expenditure is incurred for any of the purposes described in the last preceding section, and is calculated to benefit the inhabitants of the contributing town. Provided always that, where such contribution has not been originally recommended by the Commissioners, it shall not be obligatory upon them until the proposal to make such contribution shall have been submitted to them by the Government, and they shall have had the opportunity of offering their opinions thereon.

Appendix, No. 15.

Appointment of officers to superintend operations of municipalities.

31. It shall be competent to the Government to appoint, from time to time, such officers as may be required for the purpose of inspecting or superintending the operations of the municipalities created by this Act, and to assign to them such salaries as the Governor in Council shall think reasonable; and the expense incurred by reason of such appointments shall be defrayed in rateable proportions out of the funds of the several municipalities established under this Act.

Annual estimate of expenditure to be submitted to the Governor in Council.

32. The Commissioners shall, at such time or times and in such form as the Governor in Council shall direct, furnish, for the sanction of the Governor in Council, a statement or estimate showing the probable receipts and the expenditure which it is proposed by the Commissioners to incur during the year commencing on the first day of April then next, and the items in respect of which it is proposed to incur such expenditure, and may also furnish a supplemental estimate providing for any modifications which they may deem it advisable to make in the distribution of the amount to be raised and expended in the official year then current for the purposes of this Act.

Government to pass orders on estimate.

33. It shall be lawful for the Governor in Council to pass such orders as he shall think fit upon the original or supplemental estimate so submitted to him, and such orders shall be binding upon the Commissioners, and shall be carried out by them so far as the means at their disposal will permit.

An annual report of proceedings, &c. to be submitted.

34. The Commissioners shall, at such time or times and in such form as the Governor in Council shall direct furnish an Annual Report of their proceedings and statements in detail of all the works executed by them, and of all sums received and expended by them. All the municipal accounts shall be audited by such person and in such manner as the Governor in Council shall direct. The Annual Report shall be published in the "District Gazette."

Saving of power of Government to appoint Local Committees for schools, dispensaries, &c.

35. Nothing in this Act contained shall be deemed to affect the power of Government to appoint local committees for the management of schools, dispensaries, and other institutions maintained or aided out of the funds raised under this Act; provided that such committees shall act in subordination to the Commissioners under such rules as the Governor in Council shall prescribe.

Disposal of sums collected.

36. All sums collected under this Act, and all funds appropriated by Government for the purposes of this Act, shall be paid into the nearest Government Treasury of the district, or, with the sanction of Government, into any branch of the Bank of Madras which may be established in or near to the town, and shall be credited to an account to be called the Municipal Fund of the town where they have been raised. Provided always that it shall be competent to the Commissioners, with the sanction of Government, to invest any sums not required for immediate use either in the Government Savings Bank or in Government Securities, or in any other form of security which may be approved of by Government.

Mode of drawing money.

37. All orders for payment of money from the municipal fund shall be signed by the President, or, in his absence, by the Vice President, or, in the absence of the Vice President, by any two of the Commissioners.

Rates, Taxes, Tolls, and Fees leviable under this Act.

Rates, taxes, tolls, and fees leviable.

38. It shall be lawful for the Commissioners, with the approval of the Governor in Council, to levy, for the purposes of this Act, rates and taxes which may consist of a rate on houses, buildings, and lands, according to the annual value thereof; or of a tax upon arts, professions, trades, and callings; or of taxes on carriages, horses, and other animals as described in Schedule C. to this Act annexed; or of fees on the registration of carts; or of a toll upon carriages, carts, and animals entering the municipal limits. It shall be lawful for the Commissioners, with the approval of the Governor in Council, to raise the funds required for the purposes of this Act, from all or any one or more of the above sources as they shall decide. And the Commissioners may exempt, in whole or in part, from the payment of any rate or tax under this Act, any person who, by reason of poverty, may be unable to pay the same, and, with the sanction of the Government, may exempt from the payment of any rate or tax any class of persons whom the said Commissioners may deem it expedient to exempt from such payment.

No tax for period for which payment has been made under Acts X. of 1865, VI. of 1863, and III. of 1866.

39. No tax, rate, toll, fee, or assessment, shall be payable under this Act for any period for which payment shall have been made on the same account under Madras Act X. of 1865, or on account of any rate or cess under Madras Acts VI. of 1863 and III. of 1866, respectively.

Rates to be levied on Houses, Buildings, and Lands, under this Act.

Rates on houses, &c., to be levied as provided for.

40. If it shall be determined by the Commissioners, with the approval of the Governor in Council, to levy, for the purposes of this Act, rates on houses, buildings, and lands, according to the annual value thereof, such rates shall be levied as provided in Sections 41 to 56 of this Act.

Rates on houses, &c., how to be levied.

41. The annual rate shall be imposed by assessing a per-centage which shall not exceed seven and a-half per centum on the annual rent for which the houses, buildings, and lands liable to the rate might reasonably be expected to be let: Provided that it shall be at the option of the Commissioners, in lieu of such rate, to levy upon any lands unappropriated to any

any building or premises, or upon any native huts with their appurtenances, a fixed annual rate not exceeding rupees four for every eighty square yards occupied by them respectively. Any rate levied under this section shall be due and payable by the owner of the said houses, buildings, and lands respectively, from and after the end of the first quarter of the official year. The Commissioners shall exempt from assessment any house, building, or land, the annual value whereof is less than six rupees, if the same be the sole rateable property of the owner. No building ordinarily used as a place of public worship, or as a public choultry, hospital, or dispensary, and no building exclusively used for charitable purposes, shall be liable to any rate.

Exemption from assessment in the case of certain houses, &c.

42. The annual value at which lands, houses, buildings, or huts are to be assessed shall be fixed by the Commissioners; and such lands, houses, buildings, and huts shall be assessed upon the value so fixed. Provided that the value of a house or building so fixed shall not include the value of any machinery or furniture contained therein.

Annual value to be assessed by the Commissioners.

43. The annual value assessed by the Commissioners as hereinbefore provided, shall be entered in a book to be kept at the office of the Commissioners, wherein shall also be written in distinct columns the name of the owner of the property, or if the occupier, and not the owner, is the person liable to pay the rate, the name of the occupier, the designation of the property, either by name or number, sufficient to identify the same, together with the name of the street or division in which such property is situate, and the amount of the rate assessed thereon.

Value assessed, owner's name, &c., to be entered in a book.

44. The annual value at which lands, houses, buildings, or huts are assessed, at the date of this Act coming into operation, shall stand as entered in the book kept at the office of the Commissioners under (Madras) Act X. of 1865, and shall be taken to be the first valuation made under this Act, until such time as the Commissioners shall have caused a new valuation to be made under Section 42 of this Act.

Valuation now standing in the book of the Commissioners to be taken as the first under this Act, till new one be made.

45. When the name of the owner or occupier is not known, it shall be sufficient to designate him in the said book, and also in any notice or other proceeding under this Act, as the "owner" or the "occupier" of the property on which the rate is assessed, without further description.

Owner or occupier how to be designated, if his name be unknown.

46. The Commissioners may require the respective owners or occupiers of houses, buildings, or lands to furnish them with returns of the measurements, and of the rent or annual value thereof; and they, or any person appointed by them for that purpose, at any time between sunrise and sunset, may enter, inspect, and measure any such houses, buildings, or lands, after having given 48 hours' previous notice of their intention to the occupier thereof. When the valuation of the houses, buildings, or lands shall have been completed, the Commissioners shall cause lists, containing the valuation and rate assessed, to be made out, and shall give public notice thereof and of the place where the lists or copies thereof may be inspected; and every person claiming to be the owner or occupier of property included in the assessment, or the agent of such person, shall be at liberty to inspect such lists, and to make extracts therefrom, without the payment of any fee.

Returns may be required for the purposes of valuation.

Power to enter houses, &c.

47. The Commissioners shall, at the same time, give public notice of a day and hour, not being less than one month from the publication of such notice, when they will proceed to revise the said valuation and assessment; and in all cases in which any property is for the first time assessed, or the assessment is increased, shall give special notice thereof to the owners or occupiers of such property. All appeals against such valuation and assessment shall be made at or before the time fixed in the notice.

Public notice of valuation and assessment to be given.

48. After the appeals have been inquired into, and after the revision of the valuation and assessment has been completed, the amendments made in the lists shall be authenticated by the signature of not less than two of the Commissioners, who shall, at the same time, certify under their signatures that no valid objection has been made to the valuation and assessment in the said lists, except in the cases in which amendments have been made as shown therein, and subject to such amendments as may thereafter be duly made, the rate so assessed shall be deemed to be the rate for the whole year for which the assessment shall be made. Provided always that the President or Vice President may, at any time, amend the said lists by inserting therein the name of any person whose name ought to be so inserted, or by inserting any property liable to the rate, after giving notice to such person as may be interested in the making of the amendment, of a day, not being less than fifteen days from the date of the service of such notice, when such amendment is to be made; and, in all cases in which any property is inserted as liable to the rate, the amendment shall be considered to have been made at the expiration of 15 days from the time when the person interested first received notice thereof; and any person interested in such amendment may appeal to the said Commissioners, by application in writing left at their office three days before the day fixed in the notice for such amendment.

After revision, amendments to be authenticated by signature of two Commissioners.

Further alteration or amendment of assessment.

49. It shall not be necessary to prepare new lists or to fix the per-centage of annual rate every year; but the Commissioners may adopt the annual rate and the valuation and assessment contained in the lists for the preceding year (with such alterations as may, in particular cases, be deemed necessary), as the annual rate, valuation, and assessment for the year following. Provided that public notice of such valuation and assessment shall be given in the manner prescribed in Section 47 of this Act.

New lists need not be prepared every year.

Appendix, No. 15.

Remission on account of vacant houses.

50. When any house shall have been vacant for 60 or more consecutive days during any year, the Commissioners shall remit so much of the rate of that year as may be proportionate to the number of days the said house may have remained unoccupied; provided that the owner of such house, or his agent, shall have given to the Commissioners notice in writing of the vacancy thereof, and that the amount of rate to be remitted shall be calculated from the date of the delivery of such notice.

Bill to be presented.

51. When any sum is due for or on account of any rate or tax leviable under sections 41 to 47 of this Act, the Commissioners shall cause to be presented to the person liable to the payment thereof a bill for the amount. Such bill shall contain a statement of the period and a description of the property for which the charge is made.

Notice of demand.

Warrant of distress.

52. If the bill be not paid by the person liable to pay the same within 10 days from the presentation thereof, the Commissioners may cause to be served upon such person a notice of demand in form No. 1 in Schedule A. I to this Act annexed, or to the like effect; and, if such person shall not, within seven days from the service of such notice of demand, pay the sum due or show sufficient cause for non-payment of the same, such sum, with all costs, may be levied by distress and sale of the moveable property, wherever found within the limits of the municipality, of the defaulter, under a warrant in form No. 2 in Schedule A. I to this Act annexed or to the like effect, to be issued for that purpose by the Commissioners. For every notice of demand under this section, which the Commissioners shall cause to be served upon any person, a fee not exceeding one rupee, the amount of which shall be fixed by the Commissioners, shall be paid by such person. Such fee shall be added to the amount of the rate or rent in respect of which the notice is given, and, if not duly paid, shall be levied in the same manner as such rate, rent, or tax may be levied.

Rate due from owner may be recovered from occupier and deducted by him from his rent.

53. If the sum due on account of any rate, from the owner of any house, building, or land remains unpaid, after notice of demand has been duly served, the Commissioners may demand the amount from the occupier for the time being of such house, building, or land, and, on non-payment thereof, may recover the same by distress and sale of any goods and chattels found on the premises; and in such case, the occupier may deduct from the next and the following payments of his rent, the amount which may be so paid by or recovered from him.

Inventory and notice of sale.

54. The officer charged with the execution of the warrant of distress shall make an inventory of the property seized under such warrant, and shall, at the same time, give a notice in writing in form No. 3 in Schedule A. I to this Act annexed, to the person in possession thereof at the time of the seizure, that the said property will be sold as therein mentioned.

Sale.

Fees.

55. If the warrant is not discharged or suspended by the Commissioners, the property seized shall be sold under their orders, and they shall apply the proceeds, or such part thereof as may be necessary, in discharge of the said warrant and costs and of all expenses of and incident to the custody of the property; and the surplus (if any) shall be returned on demand, if made within 12 months from the date of sale, but not otherwise, to the person in possession of the property at the time of the seizure. Any balance remaining unclaimed at the end of 12 months shall be paid to the credit of the municipal fund. The fees payable upon distraints under this Act shall be such as are set forth in the Table of Fees in Schedule A. to this Act annexed.

Distress not unlawful for want of form.

56. No distress levied by virtue of this Act shall be deemed unlawful, nor shall any party making the same be deemed a trespasser, on account of any defect or want of form in the notice, schedule, summons, notice of demand, warrant of distress, inventory, or other proceeding relating thereto, nor shall such party be deemed a trespasser *ab initio* on account of any irregularity afterwards committed by him; but all persons aggrieved by such irregularity may recover full satisfaction for any special damage sustained by them, in any court of competent jurisdiction.

Tax on Arts, Professions, Trades, and Callings.

Tax on arts, &c., to be levied as provided for.

57. If it shall be determined by the Commissioners, with the approval of the Governor in Council, to levy, for the purposes of this Act, a tax on arts, professions, trades, and callings, such tax shall be levied as provided in Sections 58 to 61 of this Act.

Persons exercising certain professions, trades, and callings in the town to pay a tax in respect thereof.

Proviso.

58. Every person, who shall within the town exercise any of the arts, professions, trades, or callings specified in Schedule B. to this Act annexed, shall cause his name to be registered in the office of the Commissioners not less than 30 days before the expiration of the current official year, and shall take out a certificate of such registration, and shall pay, in respect thereof, the rates mentioned in the said Schedule B. Such annual sum shall be payable in two equal half-yearly instalments, of which the first shall be payable on or before the 1st day of the official year, and the second on or before the 1st day of the half-year next succeeding. Provided that no person who shall prove that he has paid the tax prescribed in this section in any one municipality shall be required to pay the same for the same half-year in any other municipality, unless it shall appear that he has exercised in both municipalities within the same half-year the art, profession, trade, or calling in respect of which he has been taxed.

59. The

59. The Commissioners shall determine under which of the classes mentioned in Schedule B. to this Act annexed, every person liable to be taxed as aforesaid shall be assessed, and shall, from time to time, declare what are to be considered bazaars or public markets within the meaning of this Act.

Commissioners to classify all persons liable by this Act to be taxed.

60. A person who carries on several kinds of business, and may come under more than one of the designations in Schedule B., shall be chargeable only under one of such designations at the discretion of the Commissioners.

Persons chargeable under one designation only.

61. On or about the first day of each official year, the Commissioners shall prepare a list of the persons to be taxed under this Act for the year then commencing, which list shall state the profession, trade, or calling of each of the persons therein named, the class under which he is assessed, and the sums payable by him; and such list shall be filed in the office of the said Commissioners, and shall be open to public inspection at all reasonable times, and notice in writing shall be given to each person assessed of the class under which he is assessed, and of the amount payable by him in respect of such assessment; and he shall be at liberty to appeal against such assessment to the Commissioners, and written notice of appeal shall be left at the office of the Commissioners within one week after notice of assessment has been received, and such appeal shall be finally determined by the Commissioners at their next meeting, or at such other time as they may signify to the appellant as the time at which such appeal will be heard, provided that it shall be competent to the Commissioners to revise the list at any time in the course of the year.

Commissioners to prepare a list of all persons to be taxed under this Act.

Appeal.

62. If any person who has received notice of assessment as aforesaid, shall exercise his art, profession, trade, or calling, for the space of two months in any one official year, without having paid the tax in respect thereof as required by Section 58, he shall be liable, on conviction before a magistrate, to pay the full amount of his assessment, and a further penalty not exceeding twice the amount which would have been payable by such person in respect of such tax for the entire year, and the Commissioners shall thereupon register his name in their office, and shall grant him a certificate of such registration.

Penalty for trading without having paid the trade tax.

Taxes on Carriages, Horses, and other Animals.

63. If it shall be determined by the Commissioners, with the approval of the Government, to levy, for the purposes of this Act, taxes on carriages, horses, and other animals, such taxes shall be levied as provided in Sections 64 to 72 of this Act.

Taxes on carriages, &c., to be levied as provided for.

64. A tax, at a rate not exceeding the rates specified in Schedule C. to this Act annexed, shall be imposed upon every carriage, horse, ass, dog, bull, bullock, male buffaloe, camel, and elephant, kept within the town, and shall be payable in advance. Provided that this section shall not apply to, or include, carriages, horses, or other animals, the property of the municipal corporation, or vehicles kept for sale and not used for any other purpose, if the property of, and kept by, *bonâ fide* dealers in such vehicles.

Taxes on carriages, horses, &c.

Exemption from tax on carriages and animals.

65. The owner or person having the charge of every carriage, horse, ass, dog, bull, bullock, male buffaloe, camel, or elephant, kept within the town, shall, within one month from the date on which the approval of the Government in Section 63 mentioned, shall have been notified in the "District Gazette," and thenceforward, within 30 days from the first day of the official year and the first day of the next succeeding half-year, send to the office of the Commissioners a statement in writing signed by him, containing a description of the vehicles and animals liable to the tax, for which he desires to take out a license. The owner shall, at the same time, pay to the Commissioners the half-yearly taxes payable by him, according to the rates given in Schedule C. to this Act annexed. Any person becoming possessed, between the first day of the official year and the first day of the next succeeding half-year, or between such last-mentioned day and the first day of the next official year, of a carriage or animal so kept, shall, within 30 days of becoming so possessed, send to the office of the Commissioners a similar statement, together with the full amount payable for the then current half-year according to the said Schedule. Provided always that no person shall be liable to be taxed under this section for any carriage or animal which shall have been in his possession for 30 days only, or any less period, in any half-year.

Owners of carriages, &c., to take out license.

66. On receiving the amount of the taxes as aforesaid, the Commissioners or some person duly authorised by them in that behalf shall give to the person paying the same a license for each of the vehicles and animals for the period in respect of which the money is received. The owner of every carriage and animal aforesaid, who shall have received a license for the same, shall, at all reasonable times, during the same period, be bound, under a penalty in default thereof not exceeding five rupees, to produce such license when called upon to do so by the Commissioners or any person duly authorised in writing by them to demand its production.

On payment of the tax, a license to be given.

67. If the owner or person having the charge of any carriage or animal so kept as aforesaid shall not have duly taken out a license under the last preceding section, he shall, on conviction before a magistrate, be fined the full amount payable by him in respect of such carriage or animal, and such further sum not exceeding 20 rupees as the magistrate may direct; and the Commissioners shall thereupon give him a license for the vehicles and animals in respect of which he has been fined as aforesaid.

Penalty for keeping a carriage, &c., without having a license.

Appendix, No. 15.

Carriages kept for hire to bear a registration number.

68. All carriages kept for the purpose of being let out for hire by the day or trip, shall bear a registration number in such manner as the Commissioners shall direct, and any owner of such carriage, who shall fail to affix the registration number assigned to such carriage, shall be liable to a fine not exceeding 10 rupees.

The Commissioners may compound for carriages with livery stable-keepers and others.

69. The Commissioners, at their discretion, may compound for any period not exceeding one year, with livery stable-keepers and other persons keeping carriages or animals aforesaid for hire, for a certain sum to be paid for all the carriages or animals so kept by such persons, in lieu of the taxes specified in Schedule C.; and, if any person having so compounded, shall refuse to pay the sum compounded for, on the written demand of the Commissioners, such person shall, on conviction before a magistrate, be liable to a fine not exceeding three times the amount so payable.

Carriages, &c., within the town, although owned by persons not residing therein, liable to the tax.

70. Whenever the owner of a carriage or animal, as aforesaid, kept for the time being in premises situated within the town, shall not reside in the town, the tax due for such carriage or animal shall be recoverable from the person in whose premises it is for the time being kept.

List of persons licensed under Section 66 to be entered in a book.

71. The Commissioners shall, from time to time, cause to be prepared and entered in distinct columns, in a book to be kept at the office of the Commissioners, and to be opened to the inspection of any person who shall apply for leave to inspect the same, a list of the persons who, during the then current period of six months, shall have received a license under Section 66 of this Act, and of the vehicles and animals in respect of which they may have paid.

Power to enter premises.

72. It shall be lawful for the Commissioners or any persons authorised by them in writing for that purpose, at any time between sunrise and sunset, to enter and inspect any stable or coachhouse, or any place wherein they may have reason to believe that there is any vehicle or animal liable to taxation under Section 64 of this Act, for which a license has not been duly taken out; and the Commissioners may summon any person whom they have reason to believe to be liable to the payment of any tax under the last-mentioned section, or any servant of such person, and may examine such person or servant as to the number and description of the carriages, horses, or other animals, in respect of which such person is liable to be taxed. Whoever being so summoned shall, without lawful excuse, fail to appear in pursuance of the summons, and whoever hinders or obstructs the Commissioners, or any person authorised by them in writing as aforesaid, from or in entering or inspecting any such stable, coachhouse, or place, shall be liable, on conviction before a magistrate, to a penalty not exceeding 50 rupees.

Registration of Carts and other Vehicles without Springs.

Registration of carts, &c., to be made as provided for.

73. If it shall be determined by the Commissioners, with the approval of the Government, to levy, for the purposes of this Act, fees for the registration of carts and other wheeled vehicles without springs, such registration shall be made and fees levied as provided in Sections 74 to 76 of this Act.

Registry and numbering of carts, &c.

74. Every cart and other wheeled vehicle without springs kept within the town shall be registered in the office of the Commissioners with the name and residence of the owner, and shall bear the number of such registration in such manner as the Commissioners shall direct. Provided that this section shall not apply to, or include conservancy carts or other such vehicles belonging to the municipal corporation.

Fee for registration.

75. The registration of carts and other vehicles under the last preceding section, shall be made, and the numbers assigned half-yearly, upon such days as the Commissioners shall notify, and such fee, as they shall fix, not exceeding two rupees, shall be paid for each registration. Any person becoming possessed, between the first day of the official year and the first day of the next succeeding half-year, or between such last-mentioned day and the first day of the next official year, of any such cart or other vehicle which has not been registered for the then current half-year, shall, within 15 days of becoming so possessed register the same; and the Commissioners shall grant registration in every such case, on payment of the fee for the current half-year. When any registered cart or other vehicle is transferred within any half-year, it shall be registered anew in the name of the person to whom it has been transferred, and a fee, not exceeding four annas, shall be paid for every such last-mentioned registration. The register of carts and other wheeled vehicles without springs shall be open to public inspection at all reasonable times without charge.

Penalty for not registering a cart or other vehicle.

76. Whoever owns or keeps any cart or other wheeled vehicle not on springs, required by this Act to be registered, without having caused the same to be registered, under the last preceding section, or shall fail to affix thereto the registration number prescribed in Section 74, shall be liable, on conviction before a magistrate, to a fine not exceeding 10 rupees; and the Commissioners or any officer duly authorised by them may seize, or cause to be seized, any such cart, or other vehicle (provided the same be not employed at the time of seizure in the conveyance of any passengers or goods), together with the horses, bullocks, or other animals drawing the same, and may detain them; and all police officers are hereby required, on the application of the Commissioners or other officer as aforesaid, to seize and detain the same. If the person owning or keeping such cart or other vehicle shall be convicted

convicted before a magistrate under this section, and ordered to pay a fine, and if the fine be not paid, or if the vehicle seized be not claimed within 10 days, such vehicle, together with the animals seized with it (if any) may be sold by auction, by order of the Commissioners, and the proceeds applied to the payment of the fine and to the costs and charges incurred on account of the seizure, detention, and sale; and the surplus (if any), if not claimed by the owner or the person keeping such cart or other vehicle within a further period of 60 days, shall be credited to the Municipal Fund.

Tolls payable for Carriages and other Vehicles, and for Animals entering the Town.

77. If it shall be determined by the Commissioners, with the approval of the Governor in Council, to levy, for the purposes of this Act, tolls on carriages, carts, and animals entering the municipal limits, such tolls shall be levied as provided in Sections 78 to 84 of this Act. *Tolls for carriages, &c., to be levied as provided for.*

78. Tolls not exceeding the rates mentioned in Schedule D., annexed to this Act, shall be levied upon all carriages, carts, and animals entering the municipal limits; and the Commissioners may construct toll-bars, gates, and gatekeepers' stations, and may place the collection of such tolls under the management of such persons as may appear to them proper, or may lease out the same, and shall frame bye-laws, in manner hereinafter provided, for the guidance of such toll collectors; and all persons employed in the management and collection of such tolls shall be liable to the same responsibilities as would attach to them if employed in the collection of any assessment or tax under this Act. Provided that this section shall not apply to carriages, carts, and animals, licensed or registered by the Commissioners. Provided also that no more than one payment of toll shall be demanded for, and in respect of any carriage, cart, or animal in any one period of 24 hours, counted from midnight to midnight. *Tolls to be levied on carriages, carts, and animals entering the municipal limits.*

79. In case of non-payment of any such toll on demand, the officer appointed or duly authorised to collect the same, may seize any carriage or animal on which it is chargeable, or any part of its burden of sufficient value to defray the toll. If any toll, together with the cost arising from such seizure and custody, remains undischarged for 48 hours, the Commissioners may sell the property seized, for discharge of the toll, and of all expenses occasioned by such non-payment, seizure, custody, and sale. Any balance that may remain shall be returned, on demand, if made within 12 months, to the owner of the property, and, if unclaimed after such period, shall be credited to the Municipal Fund. After seizure of the property as aforesaid, the Commissioners shall forthwith issue a notice in writing that, after the expiration of two days, exclusive of Sunday, they will sell, at such place as they may state in the notice, the property by auction. Provided that if, at any time before the sale has actually begun, the person whose property has been seized shall tender to the Commissioners, or other officer appointed by them, the amount of all the expenses incurred and of the toll payable by him, the Commissioners shall forthwith release the property seized. *In case of non-payment of toll, vehicle, &c., may be seized.*

80. No tolls shall be paid for the passage of troops on their march, or of military or Government stores, or of military or police officers on duty, or of any person or property in their custody, or of conservancy carts or other such vehicles belonging to the Municipal Corporation; but no other exemption from payment of tolls levied under this Act shall be allowed. *Troops, military stores, police, &c., exempt.*

81. It shall be lawful for the Commissioners to compound with persons living outside the municipal limits for a sum to be paid annually or half-yearly, in lieu of all tolls payable under the provisions of this Act, in respect of carriages, carts, or animals entering the municipal limits; and the Commissioners shall issue licenses for such carriages, carts, or animals; and, while such licenses shall remain in force, such carriages, carts, and animals shall be exempt from all tolls, as aforesaid, upon entering the municipal limits. Provided always that such composition shall include all the carriages, carts, and animals possessed by the person compounding. *The Commissioners may compound with persons living outside the municipal limits for a payment in lieu of tolls.*

82. In all cases of resistance to the lawful authority of the toll-collectors, all police officers shall be bound to assist the toll-collectors, when required; and, for that purpose, shall have the same power which they have in the exercise of their ordinary police duties. *Police to assist toll collectors.*

83. Every person, other than persons appointed or duly authorised to collect the tolls under this Act, who shall levy or demand any toll, and also every person who shall unlawfully and extortionately demand or take any other or higher toll than the lawful toll, or, under colour of this Act, seize or sell any property, knowing such seizure and sale to be unlawful, or in any manner unlawfully extort money or any valuable thing from any person under colour of this Act, shall be deemed to have committed the offence of cheating or extortion, as the case may be, and shall be liable to such punishment as is prescribed for those offences respectively by the Indian Penal Code. *Illegal collection of tolls.*

84. A table of the tolls authorised to be taken at any toll-gate or station, legibly written or painted in English words and figures, and in the vernacular language or languages of the district, shall be put up in a conspicuous place near such gate or station. *Table of tolls to be exhibited.*

Appendix, No. 15.

Appeals.

Hearing of appeals.

85. Appeals against any rate, tax, or fee assessed or levied under this Act, shall be heard and determined by not less than three Commissioners, of whom the President or the Vice President shall be one; and their adjudication and the assessment, by the Commissioners, of any rate, when no appeal is made as hereinbefore provided, shall be final. And no person shall contest any assessment in any other manner than by appeal as hereinbefore provided.

Assessment when to be final.

Limitation of appeal.

86. No appeal shall lie against any assessment on any land, house, or building, unless it be preferred within one month after public notification of the assessment, as provided in Section 47 of this Act, or within one month after service of the special notice directed in the same section. And no appeal against any tax or registration fee shall lie, unless preferred within one month from the time of such tax being charged. Provided that no appeal shall be entertained, unless the amount of such assessment, tax, or fee shall be deposited with the Commissioners on or before the day on which such appeal shall be lodged.

Assessment, &c., not to be impeached if the directions of the Act are, in substance, complied with.

87. No assessment and no charge or demand of rate, tax, or fee made under the authority of this Act, shall be impeached or affected by reason of any mistake in the name of any person liable to pay the rate, tax, or fee, or in the description of any property or thing liable to the rate, tax, or fee, or any mistake in the amount of assessment, provided that the directions of this Act be, in substance and effect, complied with.

Registration of Births and Deaths.

Commissioners to keep a register of births and deaths and to appoint registrars.

88. The Commissioners shall keep in their office a register of all births and deaths in the town, and for this purpose they may divide the town into such and so many districts as they shall think fit, and shall appoint a person to be registrar of births and deaths within the town; or, in case of the division of the town into districts, for every such district they shall appoint a person to be registrar of births and deaths within such district.

Every registrar to be resident in the town or district; list of registrars to be published, &c.

89. Every registrar shall reside within the town or district of which he is registrar, and shall cause his name, with the addition of registrar of births and deaths or the town or district for which he shall be so appointed, to be placed in some conspicuous place on or near the outer door of his own dwelling-house; and the Commissioners shall cause to be printed and published a list containing the name and abode of every such registrar in the town.

Commissioners to have register books prepared, and to furnish extracts, as prescribed.

90. The Commissioners shall cause to be prepared and printed a sufficient number of register books for making entries of all births and deaths which may take place within the town, according to such forms and instructions as may from time to time be prescribed by the Governor in Council, and published in the Fort Saint George and District "Gazettes." Extracts from the register shall be furnished at such times and to such officers as the said Governor in Council may appoint.

Registrar to inform himself of and register births and deaths.

91. Every Registrar shall inform himself carefully of every birth and death which may may happen in his town or district after this Act comes into operation, and shall learn and register, as soon as conveniently may be after the event, the particulars required to be registered according to the forms prescribed as aforesaid, touching every such birth and death as the case may be, which shall not have been already registered.

Information of birth how to be given.

92. The father or mother of every child born in the town, or, in the case of the death, illness, absence, or inability of the father or mother, some person who was present at or in attendance during the childbirth, shall, within 20 days next after the day of every such birth, give information to the registrar, according to the best of his or her knowledge and belief, of the several particulars hereby required to be known and registered touching the birth of such child.

Information of death how to be given.

93. Some one of the persons present at the death or in attendance during the last illness, of every person dying in the town, or, in case of the death, illness, inability, or default of all such persons, the occupier of the building or tenement, or, in case the occupier be the person who shall have died, some inmate of the building or tenement in which such death shall have happened, shall, within 20 days next after the day of such death, give information to the registrar, according to the best of his knowledge and belief, of the several particulars hereby required to be known and registered touching the death of such person. It shall also be the duty of every person who is conducting or performing the funeral ceremonies of any person who has died within the town, when required, to furnish to the registrar, or to any person authorised by him, such information as he may possess, touching the said several particulars.

Penalties.

94. Any person whose duty it shall be to give information to a registrar under the two preceding sections, who shall refuse or neglect to give such information, shall be liable to a penalty not exceeding 20 rupees for each offence.

Person giving information to sign the register.

95. Every person by whom the information contained in any register of births or deaths, under this Act shall have been given, shall, if he can write, sign in the register his name, description, and place of abode, or, if he cannot write, shall put his mark in the register to his name, description, and place of abode.

General Conservancy Clauses.

96. The Commissioners shall provide all cattle, carts, and implements required for the removal of night soil, dung, and other filth, and shall, from time to time, appoint or provide places convenient for the deposit of such night-soil, dung, and other filth, and for keeping all cattle, carts, and implements required for the removal thereof, and for other purposes of conservancy.

Places of deposit for filth.

97. It shall be the duty of the occupier of every house within the limits of any town to which this Act shall be applied, to remove from his premises all night-soil, dung, and other filth into carts provided by the Commissioners for the purpose of carrying away the same, and at such times and in such manner as the Commissioners may direct. Provided that if the occupier of any house shall prefer to carry away the said night-soil, dung, or other filth, it shall be open to him to do so in conformity with the provisions of Section 102 of this Act.

Occupiers of houses to remove night-soil, &c., to carts of Commissioners.

Proviso.

98. All dirt, ashes, rubbish, sewage, soil, dung, and filth collected by the Commissioners from the streets, houses, privies, sewers, and cess-pools shall be held to be the property of the said Commissioners, who shall have power to sell and dispose of the same; and the money arising from the sale thereof shall form part of the Municipal Fund.

All rubbish collected to be the property of Municipal Commissioners.

99. The Commissioners may cause any number of moveable or fixed dust boxes, or other convenient receptacles wherein dust and rubbish may be temporarily deposited until removed and carried away, to be provided and placed in convenient situations, and may require the occupiers of houses in streets to cause all such matter as aforesaid to be deposited daily, or otherwise periodically, in the said receptacles. Every person, who, after such receptacles have been provided, and after such requisition, shall deposit or cause to be deposited any such matter in any street except in such receptacles, shall be liable to a penalty not exceeding 10 rupees for each offence.

Dust boxes in streets.

100. Whoever commits a nuisance, or deposits, or permits his servants to deposit any dust, dirt, dung, ashes, garden, kitchen, or stable refuse, or filth of any kind, or any animal matter, or any broken glass or earthenware, broken brick, mortar, or other rubbish, in any street or on the pavement, pyal, or verandah of any house, or on any ground between the house and the street, or any public quay, jetty, or landing place, or on any part of a river bank, whether above or below high water-mark, except in such places and in such manner and at such hours as shall be fixed by the Commissioners, shall be liable to a penalty not exceeding 10 rupees for each offence.

Depositing dirt in streets, &c.

101. Whoever allows any offensive matter from any privy or cesspool to run, drain, or be thrown into a surface drain in any street, shall be liable to a penalty not exceeding 10 rupees for each offence.

Allowing sewage to flow on streets.

102. The Commissioners shall, from time to time, fix the hours within which it shall be lawful to remove night soil or other such offensive matter, and the manner in which such night soil or other offensive matter shall be removed, and after notification of the manner and time of such removal, any person who shall not conform to such notification shall be liable to a penalty not exceeding 10 rupees for each offence.

Removal of night-soil.

103. Whoever being the occupier of a house within the limits of any town, keeps or allows to be kept for more than 24 hours or otherwise than in some proper receptacle, any dirt, dung, night-soil, filth, or any noxious or offensive matter, in or upon the roof of such house, or in or upon the roof of any out-house, or in any yard or ground attached to and occupied by the occupier of such house, shall be liable to a penalty not exceeding 10 rupees for each offence.

Penalty on occupier of a house not removing filth.

104. Whoever being the owner or occupier of any house, building, or land within any town, whether tenantable or otherwise, suffers the same to be in a filthy or unwholesome state, shall be liable to a penalty not exceeding 10 rupees, and to a further penalty not exceeding 10 rupees for every day after conviction for such offence during which the offence is continued.

Filthy houses.

105. The Commissioners shall provide and maintain, in sufficient numbers and in proper situations, common privies and urinals, and shall cause the same to be kept in proper order and to be daily cleansed.

Common necessaries.

106. It shall also be lawful for the Commissioners to grant to such persons and for such period as they think fit, licenses to keep privies for public accommodation, subject to such conditions as may be necessary for the preservation of public health and decency. Any such person holding such license and failing to observe the conditions prescribed in such license shall be liable to a fine not exceeding 50 rupees. Provided that it shall be lawful for the Commissioners, at any time, on giving one month's notice in writing to cancel any license granted under this section.

Licensed public necessaries.

107. It shall be lawful for the Commissioners to prescribe the form or construction of privy which the owner or occupier of any house or building within the limits of the town may have on his premises; and such owner or occupier shall have such privy shut out by a wall or fence from the view of persons passing by or residing in the neighbourhood; and any

Construction of privy.

Appendix, No. 15.

any such owner or occupier having a privy constructed in a form different from that prescribed by the Commissioners, or failing to shut it out from public view in the manner hereinbefore directed, shall be liable to a fine not exceeding 10 rupees, and to a further fine not exceeding 10 rupees a day for each day of default or breach of the provisions of this section after written notice duly given by the Commissioners to such owner or occupier.

Sewers and drains, &c., under control of the Commissioners.

108. All public sewers, drains, and other works for conservancy existing in any town at the time this Act comes into operation, or which may afterwards be made, shall be under the direction and control of the Commissioners.

Sewers, &c., to be constructed under the direction of the Commissioners.

109. All public sewers, or other works for the improvement or the conservancy hereafter required in any town, shall be constructed under the direction of the Commissioners, who shall be empowered to purchase any land necessary for such purposes from funds at their disposal; or such land shall, if necessary, be taken under the sanction of Government, under the provisions of any Act heretofore passed, or which shall hereafter be passed, for the acquisition of land for public purposes.

Branch drains, privies, &c., under control of Commissioners.

110. All branch drains, and all privies and cesspools within any town, shall be under the survey and control of the Commissioners, and shall be repaired and made efficient at the cost of the owners of the lands and buildings to which the same belong. If any such owner neglect, during eight days after notice in writing, to repair and make the same efficient in such manner as may be required by the Commissioners, the Commissioners shall cause such drain, privy, or cesspool to be made efficient, or, if necessary, removed, and the expense of such removal or repair shall be paid by the owner or occupier so making default, and shall be recoverable as a debt due to the Commissioners.

Penalty for making drains, &c., contrary to Commissioners' orders.

111. If any such drain, privy, or cesspool is constructed, after the passing of this Act, contrary to the directions and regulations of the Commissioners, or contrary to the provisions of this Act, or if any person, without the consent of the Commissioners, constructs, rebuilds, or unstops any drain, privy, or cesspool, which has been ordered by them to be demolished or stopped up, or not to be made, every person so doing shall be liable to a penalty not exceeding 50 rupees. And the Commissioners may cause such drain, privy, or cesspool to be removed, or may cause such amendment or alteration to be made therein as they think fit; and the expense thereof shall be paid by the person by whom such drain, privy, or cesspool was improperly constructed, rebuilt, or unstopped, and shall be recoverable as a debt due to the Commissioners.

Throwing rubbish into sewers.

112. Whoever throws or puts, or permits his servants to throw or put any earth, dirt, or other filth, rubbish, or night-soil into any sewer not specially appropriated for such purpose by the Commissioners, shall be liable to a penalty not exceeding 10 rupees for each offence.

Inspection of drains, privies, and cesspools.

113. The Commissioners, or any officer appointed by them for that purpose, may inspect all privies, drains, and cesspools within any town at any time between sunrise and sunset, after six hours' notice in writing to the occupier of any premises in which such privies, drains, or cesspools are situated, and may, if necessary, cause the ground to be opened where they or he think fit for the purpose of preventing or removing any nuisance arising from such privies, drains, or cesspools.

All public streams, &c., to be under direction and control of the Commissioners.

114. All public streams, channels, water-courses, tanks, reservoirs, springs, and wells in any town shall, for the purpose of this Act, be under the direction and control of the Commissioners.

Bathing places, &c.

115. The Commissioners shall have power to set apart a sufficient number of convenient tanks, or parts of rivers, streams, or channels not being private property, for the inhabitants to bathe in, and also to set apart tanks or other places for washing animals or clothes, or for any other purpose connected with the health, cleanliness, or comfort of the inhabitants.

Fouling water by bathing, &c.

116. Whoever, except as permitted by the Commissioners, bathes in any public stream, channel, water-course, tank, reservoir, spring, or well, or in any other manner fouls the water thereof, shall be liable to a fine not exceeding 10 rupees for each offence.

Power to require unwholesome tanks on private premises to be cleansed or drained.

117. It shall be lawful for the Commissioners to require, by notice in writing, the owner of any premises to cleanse any private tank, and to drain off and remove any waste or stagnant water within any such premises which may appear to be injurious to health or offensive to the neighbourhood; and if such owner refuse or neglect to comply with such requisition during eight days from the service thereof, the Commissioners, their officers and workmen may enter such premises, and do all such necessary acts for all or any of the purposes aforesaid as they shall think fit; and the expense incurred thereby shall be paid by the owner of such premises so making default, and shall be recoverable as a debt due to the Commissioners.

Stagnant pools in open places.

118. The Commissioners shall, from time to time, as they think fit, cleanse, fill up, or drain all receptacles of stagnant water, not being within any private enclosure, which shall appear to them likely to prove injurious to the health of the inhabitants, whether such receptacles be the private property of any person or otherwise.

119. If

Dangerous places to be repaired or enclosed.

119. If any house or other building, tank, well, or hole, or other place, whether on public or private ground, be, for want of sufficient repair or protection, dangerous to human beings, the Commissioners shall cause notice in writing to be given to the owner, if he be known, and resident within the limits of their jurisdiction, and also to the occupier of the premises, if any, and shall also cause notice to be put on some conspicuous part of such premises, requiring the owner, or occupier, if any, forthwith to take down, secure, repair, or protect such building, tank, well, or hole, or other dangerous place; and, if such owner or occupier do not, within three days after such notice, begin to comply with the requisition, and do not carry on the work to the satisfaction of the Commissioners, they may cause the same to be taken down, secured, repaired, or protected, so as to prevent danger therefrom; and the expense of such work shall be paid by the owner or occupier of such property so making default, and shall be recoverable as a debt due to the Commissioners.

Houses, &c., in a ruinous or dangerous state.

120. If, in any street, any house, building, or wall, or any thing affixed thereon, be deemed by the Commissioners to be in a ruinous state or likely to fall, or in any way dangerous, they shall forthwith give notice in writing to the owner, if he be known, and resident within the limits of their jurisdiction, and also to the occupier thereof, if any, requiring such owner or occupier to take down or secure the same within a fixed time; and, in default, the Commissioners shall cause such repairs to be made or such buildings to be removed; and the expense thereby incurred shall be paid by the owner of the premises so making default, and shall be recoverable as a debt due to the Commissioners.

Occupier may retain or recover cost of works executed at his expense from owner, and one owner may enforce contribution from other owners.

121. Whenever, under the provisions of this Act, any work is required by the Commissioners to be executed, or any alterations or improvements to be made in any building, premises, or place, and such work, alterations, or improvements are executed by the occupier of such house, place, or premises, or by the Commissioners, at his expense, the cost thereof may be deducted by such occupier from the next and following payments of his rent due or becoming due to such owner, or may be recovered by him in any court of competent jurisdiction. Provided always, that in case the occupier has a beneficial interest in such building, premises, or place, he shall deduct or recover such sum only as will bear the same proportion to the entire cost of such work, alteration, or improvement, as the value of the owner's interest bears to the value of the joint interest of him and the occupier. And provided also, that in case the rents issuing out of any such building, premises, or place belong to more persons than one, who are entitled to the same, either as being joint proprietors of such building, premises, or place, or as having intermediate and other interests therein, the cost of any work, alteration, or improvement as aforesaid, payable by the owner, shall be borne by such persons in proportion to their respective interests, and any one or more of such persons, who may have been compelled to pay more than a just proportion in the first instance, shall have like remedies against the others, for enforcing contribution by them, as are hereby given to the occupier as against the owner.

Sale of materials of ruinous houses, &c.

122. The materials of any such house, building, wall, or other structure, or any part of the same which may be pulled down as provided in Section 120, may be sold by the Commissioners, and the proceeds of such sale applied to the payment of the expenses incurred. Any overplus of such sale shall, on demand, be restored to the owner of such house, building, or wall, and, if unclaimed, shall, after the lapse of twelve months, be carried to the credit of the Municipal Fund.

License for slaughter houses.

123. No person shall slaughter any animal for sale within any town unless in a place specially licensed or provided for that purpose by the Commissioners; and whoever slaughters any animal for sale within any town in any place not so licensed or provided, shall be liable to a penalty not exceeding 10 rupees for each offence.

Provision of markets and slaughter-houses.

124. The Commissioners may, from time to time, provide places for the purpose of being used as markets and slaughter-houses, and may levy fees for the use of such markets and slaughter-houses.

No new market to be established.

125. After the passing of this Act no new market shall be opened in any town without the license, in writing, of the Commissioners; and every person who opens a new market without such license shall be liable to a penalty not exceeding 10 rupees for each day that such new market is opened or used.

Inspection of markets and slaughter-houses.

126. It shall be lawful for the Commissioners to provide for the inspection of all markets and slaughter-houses within any town.

Sale of unwholesome food and drink.

127. It shall be lawful for the Commissioners, or for any person appointed by them for that purpose, at all reasonable times to enter into and inspect any market, building, shop, stall, or place used for the sale of any drink, or of butcher's meat, poultry, fish, vegetables, or other articles of food, and, if it appears that any such drink, meat, poultry, fish, vegetables, or other article intended for the food of man is *unfit* for such food, to order the same to be destroyed, or to be so disposed of as to prevent its being exposed for sale or used for such food, and the owner thereof, or the person in whose possession the same is found, shall be liable to a penalty not exceeding 50 rupees.

Inspection of weights and measures.

128. It shall also be lawful for the Commissioners, or for any persons appointed by them for that purpose, to inspect the weights and measures used in markets and shops in any town, with a view to the prevention and punishment of offences relating to weights and measures, as described in chapter XIII. of the Indian Penal Code.

 129. Within

Appendix, No. 15.

Penalty for establishing certain offensive or dangerous trades.

129. Within such limits as may, for the purposes of this section, be fixed by the Commissioners, no premises shall be newly used, except under license from the Commissioners, for any of the following purposes, viz., for melting tallow, for boiling offal or blood, or as a soap-house, oil-boiling house, dyeing house, tannery, brick pottery or lime kiln, or other manufactory or place of business from which offensive or unwholesome smells arise, or as a yard or depôt for hay, straw, wood, or coal; and whoever shall, without a license, use any such premises for such purpose, shall be liable to a fine not exceeding 50 rupees, and a further fine not exceeding 20 rupees for every day after conviction for such offence during which the said offence is continued.

Licenses to be granted.

130. Licenses shall be issued by the Commissioners to all persons permitted to carry on the trades aforesaid under the preceding section, or who have carried on such trades previous to the coming into operation of this Act; and in these licenses shall be fully stated the conditions under which it shall be lawful to carry on such trades; and whoever, without such license, carries on any such trade within the town shall be liable to a penalty not exceeding 50 rupees, and to a further penalty not exceeding 10 rupees for every day after conviction for such offence during which such trade is continued.

License for continuing offensive trades already existing.

131. Where any application is made to the Commissioners for a license to continue any such trade which has been carried on previous to the coming into operation of this Act, it shall be lawful for the Commissioners to suspend the issuing of such license for a reasonable time, to admit of an application being made to, and determined by, the magistrate under the next section. Provided always that no person shall be liable to a penalty for continuing such trade without a license during the period that shall elapse between the application for such license and the final determination of the magistrate.

Case of such trades to be brought to magistrate's notice.

132. If, prior to the coming into operation of this Act, any such trade has been carried on within the limits of any town, and it is shown, to the satisfaction of the Commissioners, that such trade is a nuisance, or dangerous to the neighbourhood, the Commissioners shall bring these facts to the notice of the magistrate, for the purpose of causing such nuisance to be removed as provided in chapter XX. of Act XXV. of 1861 (The Code of Criminal Procedure).

No burial or burning place henceforth to be formed without leave of the Commissioners.

133. No burial or burning ground, whether public or private, shall be made or formed after the passing of this Act, without license, in writing, from the Commissioners; and whoever shall bury or burn, or cause, permit, or suffer to be buried or burned any corpse in any burial or burning ground made or formed without such license, shall be liable to a fine not exceeding 50 rupees.

Commissioners may order certain burial or burning grounds to be closed.

134. If, upon the evidence of competent persons, it shall appear to the Commissioners that any burial or burning ground is in such a state or position as to be dangerous to the health of persons living in the neighbourhood thereof, and also that a suitable place for interment or burning, as the case may be, exists withing a reasonable distance, and is available, the Commissioners may by notification to be affixed on some conspicuous part of the ground, appoint a time, not being less than two months, for the closing of such burial or burning ground, and whoever, after the time so appointed, buries or burns, or causes or permits to be buried or burned any corpse therein, shall be liable to a fine not exceeding 50 rupees.

Burial places, &c., to be provided.

135. The Commissioners shall, from time to time, from the funds at their disposal, and with the sanction of the Governor in Council, provide fitting places to be used as burial or burning grounds, for the use of the inhabitants of the town.

Cart-stands and halting places for vehicles and cattle.

136. No place shall be used as a cart-stand or public halting place for vehicles or cattle of any description within any town, unless licensed as a cart-stand or public halting place by the Commissioners. Whoever uses or permits to be used, for any purpose aforesaid, any place within the town not so licensed, shall be liable to a penalty not exceeding 50 rupees, and to a further penalty not exceeding 10 rupees for every day after conviction for such offence during which such use is continued.

Provision and inspection of cart-stands or halting places for vehicles and cattle.

137. The Commissioners may, from time to time, provide places for the purpose of being used as cart-stands or public halting places, and shall be authorised to levy fees for the use thereof.

Future obstructions in the streets.

138. Whoever builds any wall or erects any fence or other obstruction or encroachment in any public street, or in or over any open drain or sewer along the side of any such street after this Act shall have come into operation in any town, shall be liable to a penalty not exceeding 50 rupees, and the Commissioners shall have the power to remove any such obstruction or encroachment, and the expense of such removal shall be paid by the person who caused the same to be erected, and shall be recoverable as a debt due to the Commissioners. Nothing herein contained shall prevent the Commissioners from licensing any temporary erections in any public street on occasions of festivals and ceremonies.

Removal of existing obstructions.

Proviso.

139. The Commissioners may cause any such obstruction or encroachments erected before this Act came into operation to be removed or altered as they shall think fit. Provided that 30 days before such alteration or removal is begun, notice in writing shall be given of such intended removal or alteration to the occupier of the house or building in front of which such encroachment or obstruction exists; and the Commissioners shall make reasonable compensation to every person who suffers damage by such removal or alteration.

147. Whoever

Taking up or altering pavements, &c., without authority.

140. Whoever takes up or makes any alterations in the pavement or other material, or in the fences or posts of any public street in the town, without the consent in writing of the Commissioners, or without other lawful authority, shall be liable to a fine not exceeding fifty rupees.

Private persons laying out new streets.

141. Any person who wishes to make or lay out any new street shall give notice in writing thereof to the Commissioners, showing the intended level and width of such street; and the level and width of every such street shall be fixed or approved by the Commissioners. Any one laying out any new street without the written permission of the Commissioners shall be liable to a fine not exceeding fifty rupees, and the expense of the removal of any building erected in such new street shall be paid by the offender, and be recoverable as a debt due to the Commissioners.

Erection of new huts.

142. It shall not be lawful for any person to erect within any town any building or hut, or any range or block of buildings or huts, on any plot or parcel of ground on which no buildings or huts are standing, without previous notice in writing to the Commissioners; and the Commissioners may require such buildings or huts to be built, so that they may stand in regular lines, with a free passage or way in front of each line of such width as the Commissioners may think proper for salutary ventilation, and to facilitate scavengering, and at such a level as will admit of sufficient drainage. Any buildings or huts which may be erected in contravention of this section shall, after one month's notice in writing to the builder thereof to remove the same, be removed by the direction of the Commissioners; and the expense incurred in doing so shall be paid by the person who caused the same to be built, and shall be recoverable as a debt due to the Commissioners.

Power as to existing huts.

143. Whenever the Commissioners are satisfied from inspection, or by report of competent persons, that any existing block of buildings or huts in any town is, by reason of the manner in which the buildings or huts are crowded together, or of want of drainage and the impracticability of scavengering, attended with risk of disease to the inhabitants or the neighbourhood, they may, with the sanction of the Government, cause a notice to be fixed to some conspicuous part of such buildings or blocks of huts, requiring the owners or occupiers thereof, or, at the option of the Commissioners, the owner of the land on which such buildings or huts are built, within a reasonable time to be fixed by the Commissioners for that purpose, to execute such works as the Commissioners, with such sanction as aforesaid, may deem necessary for avoidance of such risk. And, in case such owners or occupiers or the owner of the land shall refuse or neglect to execute such works within the time appointed, the Commissioners may cause the said buildings or huts to be taken down, or such works to be performed in respect of such buildings or huts as the Commissioners may deem necessary to prevent such risk. If such buildings or huts be pulled down, the Commissioners shall cause the materials of each building or hut to be sold separately, if such sale can be effected; and the proceeds shall be paid to the owner of the hut, or, if the owner be unknown or the title be disputed, shall be held in deposit by the Commissioners, until the person interested therein shall obtain the order of a court of competent jurisdiction for the payment of the same. Provided that such proceeds, if unclaimed, shall, after the expiration of twelve months, be credited to the municipal fund. Provided also that the Commissioners shall make reasonable compensation to all persons who shall suffer damage by any of the aforesaid works executed under the direction of the Commissioners.

Buildings may be set forward for improving line of streets.

144. The Commissioners may, upon such terms as they shall think fit, allow any building to be set forward for improving the line of any public street in which such building is situated.

Buildings projecting beyond line of streets when taken down, to be set back.

Proviso.

145. When any building, or any part thereof, which projects beyond the regular line of a public street, or beyond the front of the building on either side thereof, has been taken down in order to be re-built or altered, the Commissioners may require the said projecting part to be set back to or towards the line of the street or the line of the adjoining buildings. Provided always, that the Commissioners shall make full compensation to the owner of any such building for any damage he may thereby sustain, and if any dispute shall arise touching the amount of such compensation, the same shall be settled in the manner hereinafter provided for the settlement of disputes respecting damages and expenses.

Names of streets.

146. The Commissioners shall, from time to time, cause to be put up or painted on a conspicuous part of some house, building, wall, or place, at or near the end or entrance of every street, the name by which such street is to be known; and whoever destroys or defaces such name shall be liable to a penalty not exceeding ten rupees.

Numbers on houses.

147. The Commissioners may, from time to time, fix a number in a conspicuous place on the outer side of any house, or building, or at the entrance of the inclosure thereof fronting the street; and whoever destroys, pulls down, or defaces any such number shall be liable to a penalty not exceeding ten rupees.

Roofs and external walls of huts not to be made of inflammable material.

148. The external roofs, walls, and verandahs of huts or other buildings erected or renewed within the limits of any town after this Act shall have come into operation therein, shall not be made of grass, leaves, mats; or other inflammable materials, except by the permission, in writing, of the Commissioners. Any person contravening this section shall be liable to a penalty not exceeding ten rupees for every such offence, and for every day that such offence is continued after conviction.

 149. The

Appendix, No. 15.

Power to trim hedges and trees bordering on roads.

149. The Commissioners shall give notice, in writing, to the owner, if known and within the limits of their jurisdiction, and also to the occupier of any land, to trim or prune any of the hedges thereof that may be planted along any public road or street, so that they may not exceed the height of six feet from the level of the ground, and to cut and trim all trees, which, by overhanging any public road or street, obstruct the passage or cause damage thereto. And, in the event of such notice not being complied with within eight days from the date thereof, the Commissioners may cause the said hedges and trees to be cut and trimmed in the manner required; and the expense incurred by the Commissioners in respect thereof shall be paid to them by the owner or occupier of such land making default, or may be recovered from the sale of such loppings, or as a debt due to the Commissioners.

Power to remove noxious vegetation, &c.

150. Whenever any lands or premises, being private property or within any private inclosure, appear to the Commissioners to be, by reason of noxious vegetation, or want of drainage, in a state injurious to health, it shall be lawful for the Commissioners to give notice, in writing, to the owner, if known and within the limits of their jurisdiction, and also to the occupier of the premises, to clear and remove such vegetation or to drain such premises; and if such owner or occupier do not, within one week after such notice, begin to cut, clear, and remove such vegetation or to drain such land, and do not complete such work with due diligence, the Commissioners, their officers, and workmen may, after forty-eight hours' notice in writing, enter into the said premises and do all necessary acts for the purpose aforesaid as they shall think fit; and the expense incurred thereby shall be paid by the owner or occupier of such premises, or shall be recoverable as a debt due to the Commissioners.

Power to enter and cleanse buildings.

151. It shall be lawful for the Commissioners, at any time between sunrise and sunset, by themselves or their servants, on giving notice in the manner provided by the previous section, to enter into and inspect all buildings, and, by an order in writing, to direct all or any part to be forthwith internally and externally lime-washed or otherwise cleansed for sanitary reasons; and, if the owner or occupier of such building neglect to do so within a time to be fixed by the Commissioners in such order, the Commissioners may cause the same to be done; and the expenses incurred shall be paid by the owner or occupier, and shall be recoverable as a debt due to the Commissioners.

Penalty for failure to obtain renewal of licenses issued under sections 106, 123, 125, 130, 133, and 136.

152. The licenses issued under Sections 106, 123, 125, 130, 133, and 136 shall be issued annually, and shall expire on the last day of the official year; and any person who, being bound to take out such license, fails to obtain a renewal within one month after the expiration of such license, shall be liable to the penalties specified in those sections.

Licenses.

153. When any license is granted under the provision of this Act, authorising the use of any place for the purposes therein described, fees may be charged for such license at such rate as shall be fixed by the Commissioners, subject to the approval of the Governor in Council. Provided always, that no fees shall be chargeable in respect of burying or burning grounds licensed under Section 133.

Powers of the police.

154. It shall be lawful for any police constable or officer to arrest, without warrant, any person guilty of any offence committed within his view against any provision of this Act, or any bye-law under this Act. Provided that it shall be lawful for any police officer, under the general or special instructions of the Commissioners, to lay any information before a magistrate, and to apply for summons, warrant, search warrant, or such other legal process as may by law issue and may be expedient under the circumstances, against any person committing any offence under this Act, and to prosecute such offenders up to final judgment.

Duties of police.

155. It shall be the duty of all police officers to give immediate information to the Commissioners of any offence committed contrary to the provisions of this Act.

General Provisions.

Publication of notifications under this Act.

156. Every notification of the Governor in Council, which is directed under this Act, shall be published in the Gazette of the district to which it relates, both in English and the vernacular language or languages of the district.

Damage to the Town Commissioners' property to be made good in addition to penalty.

157. If, through any act, neglect, or default, on account whereof any person shall have incurred any penalty, any damage to the property of the Commissioners shall have been committed by such person, he shall be liable to make good such damage, as well as to pay such penalty; and the amount of such damage shall, in case of dispute, be determined by the magistrate by whom the party incurring such penalty shall have been convicted, and, on non-payment of such damage on demand, the same shall be levied by distress, and such magistrate shall issue his warrant accordingly.

Offender may be detained in custody, or compelled to give security, if fine, &c., be not forthwith paid.

158. In case any fine, forfeiture, or penalty imposed under or by virtue of this Act or of any bye-law made in pursuance thereof, shall not be forthwith paid, the magistrate may order the offender to be apprehended and detained in safe custody until the return can be conveniently made to the warrant of distress, unless the offender shall give security to the satisfaction of the magistrate for his appearance at such place and time as shall be appointed for the return of the warrant of distress.

159. If,

159. If, upon the return of such warrant, it shall appear that no sufficient distress can be had whereon to levy such fine, and the same shall not be forthwith paid, or in case it shall appear to the satisfaction of the magistrate by the confession of the offender or otherwise, that he has not sufficient property whereupon such fine or sum of money could be levied if a warrant of distress were issued, the magistrate may, by warrant under his hand, commit the offender, provided he is not a European British subject, to prison, there to be imprisoned, according to the discretion of the magistrate, for any term not exceeding two calendar months when the amount of fine shall not exceed fifty rupees, and for any term not exceeding four calendar months when the amount shall not exceed one hundred rupees, and for any term not exceeding six calendar months in any other case; the commitment to be determinable in each of the cases aforesaid on payment of the amount.

If no sufficient distress can be had, or there be not sufficient property whereupon the fine, &c., can be levied, the offender, if not an European British subject, may be imprisoned.

160. Every notice or summons under any of the preceding sections of this Act, or under any bye-law, may be served personally upon the person to whom the same is addressed, or may be served by leaving the same at his usual or last known place of abode, with some adult member or servant of his family; or, if it cannot be so served, it may be put up on some conspicuous part of such place of abode. If the notice or summons relates to any house, building, or land, and the place of abode of the owner is unknown, the notice or summons shall be deemed to be duly served if put upon some conspicuous part of the house, building, or land to which the same relates.

Service of notice.

161. Instead of proceeding by distress and sale, or in case of failure to realise by distress the whole, or any part, of any rates, taxes, fees, or forfeitures recoverable under the provisions of this Act, the Commissioners may sue the person liable to pay the same in any court of competent jurisdiction.

Commissioners may sue in competent court instead of distraining or on failure of distress.

162. The Commissioners may make compensation out of the municipal fund to any person sustaining any damage by reason of the exercise of any of the powers vested in the Commissioners, their officers or servants, under this Act.

Power to make compensation out of the municipal fund.

163. It shall be lawful for the Commissioners to make bye-laws—and to repeal, alter, and amend the same, subject to the confirmation hereinafter mentioned—for regulating the time and mode of collecting the rates and taxes mentioned in this Act, for regulating the conduct of persons employed by them, for the management of all matters connected with conservancy, and for carrying out all the purposes of this Act, and to affix fines and penalties for the infringement of such bye-laws. Provided that no bye-law shall be repugnant to any law in force, and that no fine for any one infringement of a bye-law shall exceed twenty rupees, and that, in case of a continuing infringement, no fine shall exceed ten rupees for every day after written notice from the Commissioners of such infringement.

Commissioners empowered to make bye-laws.

Proviso.

164. In all cases where any damages, costs, or expenses are, under any bye-laws or provisions of this Act, directed to be paid, the amount of the same, in case of dispute, shall be recoverable in any civil court of competent jurisdiction as a debt due to the Commissioners. Provided that, if the expense thus claimed shall not exceed twenty rupees, it shall be recoverable in the same manner as is hereinafter provided for the recovery of fines, forfeitures, and penalties under this Act.

Damages, costs, or expenses, how recoverable.

165. No bye-law or alteration of a bye-law shall have effect until the same shall have been approved and confirmed by the Governor in Council, and shall have been published for such length of time and in such manner as the Governor in Council shall order.

Confirmation and publication of bye-laws.

166. All bye-laws, when the same shall have been duly confirmed and published, shall, until the same be repealed or altered, be of the like effect as if they were inserted in this Act.

Bye-laws, until repealed or altered, to have like effect as if inserted in Act.

167. All bye-laws which shall have been passed under the provisions of the Towns Improvement Act of 1865, shall continue to be in force until the same shall be repealed or altered.

Bye-laws under Act X. of 1865 to continue in force until abrogated.

168. No action shall be brought against the Commissioners, or any of their officers, or any person acting under their direction, for any thing done under this Act, until the expiration of one month next after notice in writing shall have been delivered or left at the office of the Commissioners, or at the place of abode of such person, explicitly stating the cause of action and the name and place of abode of the intended plantiff; and, unless such notice be proved, the court shall find for the defendant; and every such action shall be commenced within six months next after the accrual of the cause of action, and not afterwards: and, if any person to whom any such notice of action is given shall, before action brought, tender sufficient amends to the plaintiff, such plaintiff shall recover the amount so tendered, and shall pay all cost incurred by the defendant.

No action to be brought against the Commissioners or their officers until after one month's notice of cause of action.

169. The Commissioners may direct any prosecution for the recovery of any rates, taxes, fees, or forfeitures, and may order proceedings to be taken for the recovery of any penalty, or for the punishment of any persons offending against the provisions of this Act, and the costs of such prosecution or other proceedings to be paid out of the municipal fund. No prosecution for an offence under this Act shall be instituted after the commission of such offence.

170. Every prosecution under this Act shall be instituted before a court having jurisdiction over the offender, except in

Appendix, No. 15.

SCHEDULE (A.)—(Section 55.)

Table of Fees payable under Distraints under this Act.

Sums Distrained for.	Fees.	Sums Distrained for.	Fees.

NORTH WESTERN PROVINCES.

Appendix, No. 15.

ACT No. XVIII. of 1871.

Passed by the Governor General of India in Council.

(Received the assent of the Governor General on the 6th April 1871.)

AN ACT for the levy of Rates on Land in the North Western Provinces.

WHEREAS it is expedient to provide, in the North-Western Provinces of the Presidency of Fort William, for the levy on land of rates to be applied to local purposes. It is hereby enacted as follows:— Preamble.

I. *Preliminary.*

1. This Act may be called "The North-Western Provinces Local Rates Act, 1871:" Short title.
It extends only to the territories subject to the Lieutenant Governor of the North Western Provinces; and it shall come into force on the passing thereof; Extent of Act.

2. In this Act— Interpretation clause.
"Commissioner" means Commissioner of a Division;
"Collector" means the Head Revenue Officer of a district;
"Land" means land used for agricultural purposes, or waste land which is cultivable;
"Tenant" means any person using or occupying land, and liable to pay or deliver rent therefor;
"Landlord" means the person responsible for the payment of the Government land revenue, if any, assessed on an estate, and includes a muáfídár, nazránádár or other person holding land, whereof the revenue has, either wholly or in part, been released, compounded for, redeemed, or assigned;
"Estate" means all or any part of a village separately assessed to the land revenue, or separately exempt from the payment thereof.

II. *Rates on Land in Districts of which the Settlement is liable to Revision.*

3. Every estate situate in any district in which the term of the settlement of the land revenue made under Regulation IX of 1833 has expired, shall be liable to the payment of such rate, not exceeding 5 per cent. on its annual value, as the Lieutenant Governor from time to time imposes. Rate on estates where the settlement has expired.

Such rate shall be paid by the landlord, independently of, and in addition to, any land revenue assessed on the estate:

Provided that, in estates in which, before the passing of this Act, provisional engagements have been taken from the landlord for the payment of the land revenue and cesses in one consolidated sum, and in which it appears to the Lieutenant Governor inexpedient to cancel such engagements, one-eleventh part of such sum shall be deducted on account of such cesses, and shall be treated in all respects as if it were a portion of a rate levied under the former part of this section.

"Annual value" means as follows:—

(1). In cases in which the settlement of the land revenue is liable to periodical revision, it means double the amount of the land revenue for the time being assessed on an estate;

(2). In cases in which such settlement is not liable to such revision, or in which the land revenue has been, wholly or in part, released, compounded for, redeemed or assigned, it means double the amount which, if the settlement were liable to such revision, would be assessable as land revenue on the estate.

III. *Rates on Land in Estates of which the Land Revenue is not liable to periodical Revision.*

4. Every estate situated in a district of which the land revenue is not liable to periodical revision, shall be liable to the payment of such rate as the Lieutenant Governor from time to time imposes, not exceeding two annas for each acre under cultivation, or which has been cultivated within the three years next before the assessment of the rate. Rate on estates where revenue is not periodically revised.

5. The rate shall be paid by the landlord independently of, and in addition to, any land revenue assessed on the estate, and in addition to the cess levied now on account of roads. Rate to be paid by landlord.

6. The Lieutenant Governor shall from time to time prescribe rules for ascertaining the area of the land assessable under Section 4. Lieutenant Governor to prescribe rules for ascertaining area of assessable land.

7. The

Appendix, No. 5.

Landlord's right to recover half rate from tenants.

7. The landlord may recover, from every tenant of land on which such rate has been assessed, and for the payment of which the landlord is liable, an amount equal to one-half of the rate assessed on the land held by such tenant.

Power to make rules as to when a landlord may recover rates from tenants holding at fixed or beneficial rates.

8. The Lieutenant Governor may from time to time make rules consistent with this Act for determining the cases in which a landlord shall be entitled to recover, from tenants holding at fixed or beneficial rates of rent, the whole or any portion of the rate assessed on the land held by such tenants.

IV. *Manner in which the Rates are to be expended.*

Rates to be carried to general fund.

9. The proceeds of all rates levied under this Act shall be carried to the credit of a general provincial fund.

Assignments from general fund.

10. The Lieutenant Governor shall from time to time assign from such fund an amount to be applied in each district for expenditure on all or any of the following purposes:—

(1). The construction, repair, and maintenance of roads and communications;

(2). The maintenance of the rural police and district post;

(3). The construction and repair of school-houses, the maintenance and inspection of schools, the training of teachers, and the establishment of scholarships;

(4). The construction and repair of hospitals, dispensaries, lunatic asylums, markets, wells, and tanks; the payment of all charges connected with the purposes for which such buildings or works have been constructed, and any other local works likely to promote the public health, comfort, or convenience.

Such assignment shall not be less than the total sum levied under this Act in such district in the year in which the assignment was made.

Works benefiting several districts.

11. In the case of works which benefit more districts than one, the local government may determine what proportion of the expense of the work shall be borne by each of the districts benefited thereby, and such proportion shall be payable out of the assignments made as aforesaid to such districts respectively.

Unexpended portion of assignment.

12. Any portion of such assignment remaining unexpended at the end of the financial year in which the assignment was made may, at the discretion of the Lieutenant Governor, be re-assigned for expenditure in the same district, or may be applied for the benefit of the North Western Provinces, in such manner as the Lieutenant Governor from time to time directs.

Accounts to be kept.

13. Accounts of the receipts in respect of all rates levied under this Act, and of the receipts and expenditure of such assignment, shall be kept in each district.

Such accounts shall, at all reasonable times, be open to the inspection of the local committee hereinafter mentioned.

An abstract of such accounts shall be prepared annually in English and in the vernacular language of the district, and shall be open, at all reasonable times, to public inspection at suitable places within the district without the payment of any fee.

An abstract of such accounts shall also be published annually in the local official Gazette.

Local Committees.

14. The local government shall appoint, in each district, a committee, consisting of not less than six persons, for the purpose of determining how the amount mentioned in Section 10 shall be applied, and in the supervision and control of such amount:

Provided that not less than one-half of the members of such committee shall be persons not in the service of Government, and owning or occupying land in the district, or residing therein.

The Lieutenant Governor shall, from time to time, prescribe the manner in which the members of such committee shall be appointed or removed, and shall define the functions and authority of such committee.

V. *Miscellaneous.*

Suits under Act cognizable by collector.

15. Suits for the recovery from co-sharers, tenants, or others of any sum on account of any rate imposed under this Act, and all suits on account of illegal exaction of such rate, or for the settlement of accounts, shall be cognizable by the Collector as if such suits had been included among the suits mentioned in Section 23 of Act No. X. of 1859, and in Section 1 of Act No. XIV. of 1863,

And appeals from decisions in such suits shall be cognizable in accordance with the provisions of Act No. X. of 1859, and Act No. XIV. of 1863.

Limitation of appeals.

16. In matters connected with the assessment and collection of any sum leviable under this Act, an appeal shall lie to the Commissioner from the order of the Collector, provided that such appeal be presented within 30 days from the date of the order.

The Commissioner's decision on such appeal shall be final; but all such decisions may be reviewed by the Board of Revenue.

17. The

17. The Lieutenant Governor may invest any officer subordinate to a Collector with all or any of the powers of a Collector for the purposes of this Act. Power to invest subordinate officers with powers of collector.

The orders passed by any officer so invested shall be subject to revision by the Collector of the district.

18. All sums due on account of any rate imposed under this Act shall be recoverable as if they were arrears of land revenue due on the land on account of which the rate is payable. Recovery of rates.

19. The Lieutenant Governor may, by notification from time to time,— Supplementary powers of local government.

(*a.*) Prescribe by what instalments and at what times such rate shall be payable, and by whom it shall be assessed, collected and paid;

(*b.*) Make rules consistent with this Act for the guidance of officers in matters connected with its enforcement;

(*c.*) Exempt any portion of the territories under his government from the operation of this Act, or exempt any estate from liability to pay the whole or any part of any rate under this Act;

(*d.*) Direct fresh measurements and vary the assessment accordingly.

Every notification under this section shall be published in the Government Gazette, North Western Provinces.

OUDE.

ACT No. XVII. of 1871.

Passed by the Governor General of India in Council.

(Received the Assent of the Governor General on the 31st March 1871.)

AN ACT to provide for the Levy of Rates on Land in Oudh.

WHEREAS it is expedient to provide for the levy of rates on land in Oudh to be applied to local purposes; It is hereby enacted as follows:— Preamble.

1. This Act may be cited as "The Oudh Local Rates Act:" Short title.

It extends only to the territories under the administration of the Chief Commissioner of Oudh; Local extent.

And it shall come into force on the 1st day of April 1871. Commencement.

2. In this Act— Interpretation clause.

"Land" means land assessed to the land revenue, and includes land whereof the land revenue has been wholly or in part released, compounded for, redeemed, or assigned:

"Landholder" means the person in receipt of the rent of any land, and responsible for the payment of the land revenue, if any, assessed on the estate. It also includes a muáfídár or other person holding land, the land revenue of which has been wholly or in part released, compounded for, redeemed, or assigned: Landholder.

"Estate" means all or any part of a village separately assessed to the land revenue, or separately exempted from payment thereof; and Estate.

"Annual value" means— Annual value.

(1.) Where the settlement of the land revenue is liable to periodical revision, —— double the amount of the land revenue assessed on an estate;

(2.) Where such settlement is not liable to periodical revision, or where the land revenue or a portion thereof has been released, compounded for, redeemed, or assigned, —— double the amount which, if the settlement were liable to periodical revision, would, but for such non-liability, release, composition, redemption, or assignment, have been assessed as land revenue on the estate.

3. The Chief Commissioner may impose on every estate a rate not exceeding 1¼ per cent. on its annual value. Such rate shall be payable annually by the landholder, independently of, and in adition to, any land revenue for the time being assessed on the estate and any local cesses now leviable therefrom. Rates assessable.

4. All sums due on account of any rate imposed under this Act shall be recoverable as if they were arrears of land revenue due in respect of the land on account of which the rate is payable. Recovery of rates.

5. Every landholder may recover from his co-sharers or pattídárs, if any, a share of the rate bearing the same proportion to the whole rate that the annual value of the share of such Power to recover share of rate from co-sharers or pattidárs.

Appendix, No. 15.

such co-sharer or pattídár, recorded at the time of the settlement, bears to the annual value of the whole estate.

Power to recover share of rate from under-proprietor, permanent lessee or occupancy tenant.

6. Whenever the rate is charged on a landholder on account of land in the use or occupation of an under-proprietor or permanent lessee, or of a tenant with right of occupancy whose rent has been fixed or recorded by a competent court, such landholder may realise from such under-proprietor, lessee, or tenant, a share of the rate bearing the same proportion to the whole rate that the share of such under-proprietor, lessee, or tenant in the annual value of the land on which the rate is charged, bears to half the annual value of such land.

Jurisdiction over suits as to rates.

7. Suits for the recovery from co-sharers, under-proprietors, permanent lessees, or tenants as aforesaid, of any sum on account of any rate imposed under this Act, and all suits on account of illegal exaction of such rate, or for the settlement of accounts, shall be cognisable by the Courts of Revenue in Oudh, and the provisions of the Oudh Rent Act (No. XIX. of 1868), cc. 7, 8 and 9, as to similar classes of suits, shall apply to the suits mentioned in the former part of this section.

Appeal to Commissioner.

8. An appeal shall lie to the Commissioner from the order of any person authorised, under the power hereinafter conferred, to make assessments in any matter connected with the assessment of any sum leviable under this Act: provided that such appeal be presented within 30 days from the date of the order.

The decision of the Commissioner on such appeal shall be final; but all such decisions may be reviewed by the Chief Commissioner.

General fund.

9. The proceeds of all rates levied under this Act shall be carried to the credit of a general provincial fund.

Assignments for local purposes.

10. The Chief Commissioner shall, from time to time, assign from such fund an amount to be applied in each district for expenditure on all or any of the following purposes:—

(1.) The construction, repair, and maintenance of roads and communications;

(2.) The construction and repair of schoolhouses, the maintenance and inspection of schools, the establishment of scholarships, and the training of teachers;

(3.) The construction and repair of hospitals, dispensaries, lunatic asylums, markets, wells, and tanks, the payment of all charges connected with the purposes for which such buildings or works have been constructed, and any other local works and undertakings of public utility likely to promote the public health, comfort, or convenience.

Such assignment shall not be less than the total sum assessed under this Act in such district in the year in which the assignment was made.

Unexpended portion of assignment.

11. Any portion of such assignment remaining unexpended at the end of the financial year in which the assignment was made may, at the discretion of the Chief Commissioner, be re-assigned for expenditure in the same district, or may be applied for the benefit of the Province of Oudh in such manner as the Chief Commissioner from time to time directs.

Accounts of receipts.

12. Accounts of the receipts in respect of all rates levied under this Act, and of the receipts and expenditure of the assignment made under Section 10, shall be kept in each district.

Such accounts shall, at all reasonable times, be open to the inspection of the local committee hereinafter mentioned.

An abstract of such accounts shall be prepared annually in English and in the vernacular language of the district, and shall be open, at all reasonable times, to public inspection at suitable places within the district without the payment of any fee.

An abstract of such accounts shall also be published annually in the local official Gazette.

Appointment of committees.

13. The Chief Commissioner shall appoint, in each district, a committee, consisting of not less than six persons, for the purpose of assisting in determining how the amount mentioned in Section 10 shall be applied, and in the supervision and control of the expenditure of such amount:

Provided that not less than one-half of the members of such committee shall be persons not in the service of Government, and owning or occupying land in the district, or residing therein.

The Chief Commissioner shall, from time to time, prescribe the manner in which the members of such committee shall be appointed or removed, and shall define the functions and authority of such committee.

Power to make supplementary rates.

14. The Chief Commissioner may, by notification, from time to time,—

(*a.*) Prescribe by what instalments and at what times any rate imposed under this Act shall be payable, and by whom it shall be assessed, collected, and paid;

(*b.*) Make rules consistent with this Act for the guidance of officers in matters connected with its enforcement; and

(*c.*) Exempt

(*c.*) Exempt any portion of the territories under his administration from the operation of this Act. Appendix, No. 15.

Every notification under this section shall be published in the local official Gazette.

PUNJAB.

ACT No. XX. of 1871.

Passed by the Governor General of India in Council.

(Received the Assent of the Governor General on the 20th June 1871.)

AN ACT to provide for the Levy of Rates on Land in the Punjab.

WHEREAS it is expedient to provide for the levy of rates on land in the Punjab to be applied to local purposes; it is hereby enacted as follows:— Preamble.

1. This Act may be called "The Punjab Local Rates Act, 1871": Short title.

It extends only to the territories for the time being under the government of the Lieutenant Governor of the Punjab, inclusive of any territory that may, from time to time, be removed, under the provisions of the Agror Valley Act, 1870, from the jurisdiction of the tribunals established under the general Regulations and Acts; Local extent.

And it shall come into force on the passing thereof. Commencement.

2. In this Act— Interpretation clause.

"Land" means land assessed to the land revenue, and includes land whereof the land revenue has been, wholly or in part, released, compounded for, redeemed, or assigned; "Land."

"Landholder" means any person responsible for the payment of the land revenue, if any, assessed on land. It also includes a person holding land, the land revenue of which has been, wholly or in part, released, compounded for, redeemed or assigned; "Landholder."

"Annual value" means— "Annual value."

1. Double the land revenue for the time being assessed on any land, whether such assessment be leviable or not;

2. And, where the land revenue has been permanently assessed, or has been, wholly or in part, compounded for or redeemed—

Double the amount which, but for such permanent assessment, composition or redemption, would have been leviable.

3. All land shall be liable to the payment of such rate as the Lieutenant Governor from time to time directs, not exceeding six pies for every rupee of its annual value. Rate assessable.

Such rate shall be computed as from the first day of April 1871, and shall be paid by the landholder independently of, and in addition to, any land revenue assessed on land for the land revenue of which he is responsible, and any local cesses now leviable therefrom.

Provided that, wherever the proprietors of any land pay the land revenue in kind to any assignee of revenue or any village headman, such assignee of revenue or village headman shall be responsible for the payment of the said rate, instead of the proprietors, and no demand shall be made by any such assignee or village headman on any such proprietor in respect of the payment of any such rate.

4. Whenever a rate is charged on a landholder in respect of lands held by a tenant with a right of occupancy holding at a favourable rent, such landholder may realise from such tenant a share of the said rate, bearing the same proportion to the whole rate as the excess of the annual value over the rent paid by such tenant bears to half the annual value. Power to recover a share of rate from tenant.

Illustration.—A is a landholder of an estate of which the land revenue is 50 rupees. The annual value, therefore, is 100 rupees, and the maximum rate would be *Rs.* 3. 2. The estate is held by a tenant with right of occupancy at 75 rupees rental.

Supposing the maximum rate to be levied, A will be entitled to recover from the tenant *Rs.* 1. 9, or half the rate, thus—

As half the annual value	is to	Excess of the annual value over the tenant's rent	so is	The whole rate	to	The portion which the landlord can recover from tenant.
i.e.		*i.e.*		*viz.*		*i.e.*
				Rs. as.		*Rs. as.*
50	:	25	::	3 2	:	1 9

5. The

Appendix, No. 15.

Rates to be carried to general fund.

5. The proceeds of all rates levied under this Act shall be carried to the credit of the local Government.

Assignments for local purposes.

6. The Lieutenant Governor shall from time to time assign from the funds at his disposal an amount to be applied in each district for expenditure on all or any of the following purposes:

(1.) The construction, repair, and maintenance of roads and communications;

(2.) The construction and repair of school-houses, the maintenance and inspection of schools, the training of teachers, and the establishment of scholarships;

(3.) The construction and repair of hospitals, dispensaries, lunatic asylums, wells, and tanks, the planting and preservation of trees, the payment of all charges connected with the purposes for which such buildings or works have been constructed, and any other local works likely to promote the public health, comfort or convenience.

The aggregate of such assignments in any one year shall not be less than the total sum levied under this Act in such district in the year in which the assignment is made.

Works benefiting several districts.

7. In the case of works which benefit more districts than one, the Lieutenant Governor may determine what proportion of the expenses of the work shall be borne by each of the districts benefited thereby, and such proportion shall be payable out of the assignments made as aforesaid to such districts respectively.

Unexpended portion of assignment.

8. Any portion of such assignment remaining unexpended at the end of the financial year in which the assignment was made may, at the discretion of the Lieutenant Governor, be re-assigned for expenditure in the same district, or may be applied for the benefit of the Punjab, on such one or more of the purposes mentioned in Section 6 as the Lieutenant Governor from time to time directs.

Accounts to be kept.

9. Accounts of the receipts in respect of all rates levied under this Act and of the assignments made under Section 6, shall be kept in each district.

Such accounts shall, at all reasonable times, be open to the inspection of the local committee hereinafter mentioned.

An abstract of such accounts shall be prepared annually in English and in the vernacular language of the district, and shall be open, at all reasonable times, to public inspection at suitable places within the district without the payment of any fee.

An abstract of such accounts shall also be published annually in the local official Gazette.

Local committees.

10. The Lieutenant Govenor shall appoint, in each district, a committee, consisting of not less than six persons, for the purpose of determining how the amount mentioned in Section 6 shall be applied, and of supervising and controlling such amount:

Provided that not less than one-third of the members of such committee shall be persons not in the service of Government, and owning or occupying land in the district, or residing therein.

The Lieutenant Governor shall from time to time prescribe the manner in which the members of such committee shall be appointed or removed, and shall define the functions and authority of such committee.

Suits under Act cognizable by courts having cognizance of suits for rent.

11. Suits for the recovery from co-sharers, tenants or others of any sum on account of any rate imposed under this Act, and all suits on account of illegal exaction of such rate, or for the settlement of accounts, shall be cognizable by the courts which, for the time being, have cognizance of suits for rent due on land.

Limitation of appeals.

12. In matters connected with the assessment and collection of any sum leviable under this Act, an appeal shall lie from the order of any person authorized under this Act to make assessments, to such person as the Lieutenant Governor appoints:

Provided that such appeal shall be presented within thirty days from the date of such order.

The order of such person on such appeal shall be final.

Recovery of rates.

13. All sums due on account of any rate imposed under this Act shall be recoverable as if they were arrears of land revenue due on the land on account of which the rate is payable.

Supplementary powers of local government.

14. The Lieutenant Governor may, by notification from time to time,—

(*a.*) Prescribe by what instalments and at what times such rate shall be payable, and by whom it shall be assessed, collected and paid;

(*b.*) Appoint the person or class of persons to whom the appeals referred to in section 12 shall lie;

(*c.*) Make rules consistent with this Act for the guidance of officers in matters connected with its enforcement;

(*d.*) Exempt wholly or in part any portion of the territories under his government from the operation of this Act, or exempt any land from liability to pay the whole or any part of any rate under this Act;

(*e.*) Direct fresh measurements and vary the assessment accordingly.

Every notification under this section shall be published in the Government Gazette, Punjab.

RESOLUTION.—By the Government of India, Financial Department (No. 3334), dated 14 December 1870.

RESOLUTION.—The Governor General in Council is satisfied that it is desirable to enlarge the powers and responsibility of the Governments of Presidencies and Provinces in respect to the public expenditure in some of the civil departments.

2. Under the present system, these Governments have little liberty, and but few motives for economy in their expenditure: it lies with the Government of India to control the growth of charges, to meet which it has to raise the revenue. The Local Governments are deeply interested in the welfare of the people confided to their care; and, not knowing the requirements of other parts of the country or of the empire as a whole, they are liable, in their anxiety for administrative progress, to allow too little weight to fiscal considerations. On the other hand, the Supreme Government, as responsible for the general financial safety, is obliged to reject many demands in themselves deserving of all encouragement, and is not always able to distribute satisfactorily the resources actually available.

3. Thus it happens that the Supreme and Local Governments regard from different points of view measures involving expenditure; and the division of responsibility being ill-defined, there occur conflicts of opinion injurious to the public service. In order to avoid these conflicts, it is expedient that, as far as possible, the obligation to find the funds necessary for administrative improvements should rest upon the authority whose immediate duty it is to devise such measures.

4. This is the more important, because existing Imperial resources will not suffice for the growing wants of the country. Writing of roads and communications in October 1869, the Government of India in the Public Works Department stated that it had for some years—

> "been satisfied that to attempt to provide and maintain all the roads required for the intercommunications of so vast a territory from the ordinary revenues would be to enter on an altogether impracticable task. The matter," it was added, "has been before this Government on several occasions since 1862, and the view now taken of it has already received, in general terms, the approval of the Secretary of State. It is only by a judicious system of local assessment and control that what is needed can be accomplished."

This is not less true of some other departments of the administration.

5. The Supreme Government is not in a position to understand fully local requirements, nor has it the knowledge necessary for the successful development of local resources. Each Province has special wants of its own, and may have means for supplying them which could not be appropriated for Imperial purposes. A tax adapted to the circumstances of one part of the country may be distasteful or inapplicable elsewhere; and, everywhere, rates may be proper for provincial or local purposes which could not be taken for the Imperial revenue.

6. These principles are now generally recognised, and important steps have been already taken to develope provincial resources. The Government of Bombay has for some years raised a considerable revenue for local purposes. Important measures to the same intent are under the consideration of the Legislative Council of Madras. The Government of Bengal is maturing a scheme, in accordance with the decision of the Secretary of State, for the levy of a rate for local objects in the Lower Provinces of Bengal. In all the other Provinces of India, provincial revenues have long been raised, and measures for increasing them are now being devised.

7. These measures have been promoted chiefly to provide for urgent administrative wants, the means for which are not otherwise forthcoming. It is inexpedient that the funds so raised should be intercepted, to any considerable extent, for objects the cost of which has been hitherto defrayed from the general revenues, even though such objects be of an admittedly local character. Moreover, the Governor General in Council is not desirous that the demands on the people for provincial purposes should be indefinitely or too rapidly increased.

8. It would have been satisfactory had his Excellency in Council been able to propose the enlargement of the power and responsibility of the Local Governments without charging upon local resources any part of the existing Imperial expenditure. This cannot be done; but it has been determined to make as small a demand upon these resources as possible. At the same time it should be remembered that the relief of the Imperial finances has been a principal object in the discussion of such measures on former occasions.

9. The income tax of six pies in the rupee imposed for the current year was never intended to be permanent, and the Governor General in Council has already announced a resolution not to renew the tax for the next year at this high rate unless some unforeseen contingency compels him to do so.

Appendix, No. 15.

10. It was thought at first that the income tax could not be reduced to the desired extent without imposing upon local resources almost as large a sum as might be given up. Anticipations made so long before the beginning of the financial year must be uncertain; but as far as the Governor General in Council can now judge, it will be possible next year to give substantial relief from existing taxation without the substitution of any considerable new burden.

11. The Government of India is accordingly pleased to make over to the Governments under certain conditions to be presently set forth, the following departments of the administration in which they may be supposed to take special interest; and to grant permanently, from the Imperial revenue, for these services, the sum of 4,688,711 *l.*, being less by 330,801 *l.* only than the assignments made for the same services in 1870–71.

Jails.	Printing.
Registration.	Roads.
Police.	Miscellaneous Public Improvements.
Education.	Civil Buildings.
Medical Services (except "Medical Establishments."*)	

A statement (A) is appended explanatory of the method by which the assignments to be thus made have been calculated. This statement shows the estimated receipts and charges under the first six of these heads during the current year, the "Police" charges in Bombay and the North Western Provinces having been slightly reduced by the final adjustments necessary in consequence of the Government becoming liable for the superannuation allowances of the force.

12. The figures entered for "Roads," "Civil Buildings," and "Miscellaneous Public Improvements" are the grants for this year, exclusive of the sum of 135,679 *l.* reserved for certain works detailed in Appendix B, which will not in future be a charge upon Local Governments, but will be separately provided for by the Supreme Government. The portion of this 135,679 *l.* reserved in each Province bears the same proportion to the grant made to the Province for the current year that the expenditure in the Province, upon the reserved works, has borne, during the last five years, to the whole expenditure under these three heads.

13. To the 1,168,701 *l.* thus assigned for "Works," 327,236 *l.* has been added for "Establishments" and "Tools and Plant," being the proportion of the current year's grants for these purposes which appertains to that share of the total grants for "Works" of all kinds which is transferred. This 329,237 *l.* has been distributed among the Presidencies and Provinces in the proportions in which the larger sum of 1,168,701 *l.* has been distributed. The Governments will henceforth provide themselves with "tools and plant" without the intervention of the Government of India. The future arrangements in regard to "Establishments" cannot be settled without detailed correspondence. For the year 1871–72, the Supreme Government will continue to provide "Establishments" as heretofore, and each Presidency or Province must bear a share of the cost in the proportion which the estimated outlay upon "Works," from provincial funds† bears to the total estimated outlay upon "Works," ordinary and extraordinary, Imperial and provincial, in all India. It is to be clearly understood that Local Governments must maintain in efficient repair existing lines of through communication, such as the trunk roads, unless authorised by the Supreme Government to abandon them.

14. The actual permanent Imperial assignments for "Provincial Services" will be, then, as follows: all receipts heretofore credited in connection with these services being given up to the Provinces in which they accrue:—

	£.
Oudh	206,948
Central Provinces	261,263
Burmah	275,332
Bengal	1,168,592
North Western Provinces	640,792
Punjab	516,221
Madras	739,488
Bombay	880,075
£.	4,668,711‡

15. In calculating these allotments, 350,000 *l.* has been deducted rateably from the grants made to the several Provinces in 1870–71. But it has been thought expedient to remit the deduction (19,199 *l.*) which would thus fall upon British Burmah, the circumstances of that Province being exceptional. No additional deduction has been made from the other Provinces in consequence of this concession to Burmah.

16. These

* By "Medical Establishment" here is meant the first sub-division of the Grant 22, "Medical Services," as hitherto made.

† "Provincial Funds" here does not include existing "Local Funds."

‡ If it be found, when the accounts of the year 1870–71 are made up, that the actual expenditure during that year for the official postage of the services affected exceeds the amount of the grants for that purpose, then the several assignments will be, once for all, increased by the difference.

16. These assignments will not be classified in the Financial Statement and in the Imperial Estimates and Accounts, but will appear under a single new head, "Provincial Services." The Imperial revenue will continue to bear such charges for the absentee and superannuation allowances of officers on establishments now transferred as have hitherto appeared in the Home Accounts, or under other heads in the Indian Accounts. But it would be inconvenient and difficult to maintain any distinction between these officers and officers who are paid from other local funds, or who may be added hereafter for "Provincial Services." Questions of some importance regarding this and other like details will have to be settled hereafter.

17. Unless some fiscal misfortune, such as a heavy loss in the opium revenue, or national disaster such as war or severe famine, occurs, the Governor General in Council will maintain for the future the assignments for "Provincial Services" at the amounts now fixed. They will not, in any case, be reduced without previous consultation with the Governments.

18. For the coming year the Provincial Service Estimates should be immediately prepared upon the basis of these assignments, which may be distributed at the discretion of the Governments among the several departments for which they will now be responsible. Any portion of the assignments made to any Province that may be unspent at the end of the year will not lapse to the Imperial revenue, but will remain at the disposal of the Local Government. The estimates and accounts of these Governments should therefore open and close with balances brought and carried forward. They should show not only the receipts and charges of the new "Provincial Services," but also the income and expenditure of all existing local funds; it being understood of course that the Governments are not relieved by this resolution from any legal or equitable obligation which may govern the appropriation of any particular local fund. It is essential that the estimates and accounts of all the Presidencies and Provinces should be uniform, and the precise forms to be used will be settled by the Supreme Government. The Imperial financial year must be the provincial year of account.

19. Each Local Government will publish its own yearly estimates and accounts in the local Gazette, together with a financial exposition (which should, where possible, be made before the local Legislative Council) analogous to that annually made in the Legislative Council of the Governor General. The several estimates and accounts will be compiled, and a general statement for all India published as a supplement to the Imperial Estimates and Accounts.

20. In preparing its estimates for the coming year, each Government will have to consider without delay how any deficiency in the ways and means for its "Provincial Services" can most conveniently be supplied.

21. The financial control which is thus entrusted to the Local Governments is to be exercised subject to the following conditions*:

I.—Without the previous sanction of the Government of India,—

(1.) No appointment is to be created with a salary of more than 250 rupees a month; and no addition is to be made to the pay and allowances of any officer if they exceed, or would, after the addition, exceed 250 rupees a month;

(2.) No class or grade of officers is to be created or abolished, and the pay of no class or grade of officers is to be raised;

(3.) No addition is to be made to the pay or allowances of any individual, or class of officers, that would lead to increase in the emoluments of any public servants doing duty in the same Province, whose pay and allowances are charged to the Imperial revenues. The Government of India reserves to itself the right to forbid alterations in rates of pay or allowances, which, in its opinion, would produce inconvenience in other Provinces;

(4.) No moneys are to be removed from the public treasuries for investment;

(5.) No services now rendered to other departments at the charge of the departments made over to the control of the Local Governments are to be diminished, and no services now rendered to these departments at the charge of other departments are to be increased.

II.—The rules of the Supreme Government in respect to leave of absence and absentee, deputation, and superannuation allowances are to be observed.

III.—Returns, accounts, and estimates are to be submitted to the Supreme Government in such forms, and at such times, as may be prescribed.

22. The Governor General in Council is fully aware that this resolution will effect a wide change in Indian administration. It has been adopted after long and careful consideration, in the hope that it will be received by the Governments in the spirit in which it is promulgated. The Governor General in Council believes that it will produce greater care and economy, that it will impart an element of certainty into the fiscal system which has hitherto

* It must be understood that these conditions are prescribed, for the present, tentatively; and that they are subject to revision as experience may require.

Appendix, No. 15.

hitherto been absent, and that it will lead to more harmony in action and feeling between the Supreme and the Provincial Governments than has heretofore prevailed.

23. But beyond all this, there is a greater and wider object in view. Local interest, supervision, and care are necessary to success in the management of funds devoted to education, sanitation, medical charity, and local public works. The operation of this Resolution in its full meaning and integrity, will afford opportunities for the development of self-government, for strengthening municipal institutions, and for the association of Natives and Europeans, to a greater extent than heretofore, in the administration of affairs.

24. The Governor General in Council is aware of the difficulties attending the practical adoption of these principles. But they are not insurmountable. Disappointments and partial failures may occur; but, the object in view being the instruction of many peoples and races in a good system of administration, his Excellency in Council is fully convinced that the Local Governments and all their subordinates will enlist the active assistance, or, at all events, the sympathy, of many classes who have hitherto taken little or no part in the work of social and material advancement.

25. The additional powers of financial control which will now be assumed by the Governments must be accompanied by a corresponding increase of administrative responsibility. It is the desire of the Governor General in Council to confine the interference of the Supreme Government in India in the administration of the "Provincial Services" to what is necessary for the discharge of that responsibility which the Viceroy in Council owes to the Queen and her Responsible Advisers, and for the purpose of securing adherence to to the financial conditions now prescribed, and to the general policy of the Government of India.

26. The procedure of the Departments of "Registration," "Jails," and "Police" is to a large extent governed by law. No law exists upon the subject of "Education," but the policy of the Government has been declared and prescribed in Despatches* from the Secretary of State, the authority of which, and of the rules sanctioned by the Government of India regarding "Grants-in-Aid" and other matters of general principle, is not affected by this Resolution.

* Such as No. 49, dated 19th July 1854.
„ 4 „ 7th April 1859.
„ 1 „ 23rd Jan. 1864.
„ 5 „ 12th May 1870.

27. Subject to these general restrictions, the Governments will henceforth enjoy full liberty in the expenditure of the funds appropriated to "Provincial Services." It must, however, be understood that in thus divesting himself of control, the Governor General in Council divests himself also to a large extent of his former responsibility. If responsibility for expenditure is retained, control cannot be renounced.

28. The Governor General in Council delegates to the Local Governments this large additional share of administrative power without hesitation or distrust, believing that it will be exercised with wisdom, liberality, and prudence.

Ordered, that copies of this Resolution be forwarded—

1st.—To each Local Government, with the intimation that, subject to the approval of the Secretary of State, complete effect will be given to the Resolution in the coming year, and that Local Governments should at once make all their arrangements in anticipation of this sanction.

2nd.—To the Home and Public Works Departments for information and for any further orders that may be necessary in those departments. The Public Works Department must adjust its estimates for the coming year in conformity with the orders herein contained.

3rd.—To the Comptroller General for information. He is requested, with reference to paragraph 18, to submit a form of estimates and accounts for general use. He will be good enough also to issue to Accountants General any subsidiary instructions that he may think necessary.

APPENDIX (A.)

ASSIGNMENTS to be made for "PROVINCIAL SERVICES" in accordance with the Resolution of the Government of India, in the Financial Department, No. 3334, dated 14 December 1870.

ABSTRACT of STATEMENTS of TAXATION received from *Bombay*.

LAND REVENUE.

Description of Tax or Revenue.	Collections in Bombay Presidency. 1856–57.	1870–71.	REMARKS.
Ordinary:	£.	£.	
Fixed collections - -	2,137,989	2,83,106	The revenue system has not been altered, nor have the rates of assesment been raised since 1856–7; the considerable increase shown in 1870–71 arises from extension of cultivation, from more accurate settlements and survey of the lands, and from lapses of estates, formerly shown under the head immediately following. The rate of assessment varies so greatly, according to the quality of the land, that no abstract or average would be of service. Thus in Dharwar the revenue per acre varies from 2*l.* to 1½*d.*
Surplus collections -	260	13,793	
Recoveries of revenue remitted in previous years.	- -	88	
Rent of resumed police service lands and service commutation.	723,549	637,328	The decrease in this head arises from lapses, as explained above, and from transfers of the collections from the estates to ordinary revenue in cases where on more accurate settlement the title of the holder has not been maintained.
Sale of waste lands - -	- -	4,180	
Redemption of summary settlement cess.	- -	827	
Miscellaneous:			
Revenue fines - -	1,008	1,398	
Huccaba tax - -	- -	37,406	A water rate levied on irrigated lands in Sind; in the accounts for the year 1856–7 it was not shown separately from ordinary land revenue.
Sundry receipts - -	10,205	57,768	
£.	2,873,011	3,595,894	

EXCISE DUTIES.

Description of Tax or Revenue.	1856–57. Rate.	1856–57. Amount.	1870–71. Rate.	1870–71. Amount.	REMARKS.
		£.		£.	
License fees for sale of Europe liquors.	Varying from *Rs.* 15 to *Rs.* 50 for each license.	45	Varying from *Rs.* 50 to *Rs.* 300.	17,827	
License fees for sale of imported rum.	Varying from *Rs.* 10 to *Rs.* 50 for each license.	234	*Rs.* 50 for each shop	736	In 1856–7, licenses were sold by auction in some districts.
License fees for sale of country rum.	Ditto - ditto -	9,684	Licenses annually sold by public auction.	32,198

STATEMENT OF TAXATION, MADRAS.

No. 91.—Financial Department.

From the Hon. *W. Hudleston,* Chief Secretary to the Government of *Fort St. George,* to the Secretary to the Government of *India,* Financial Department.

Sir,

I am directed to forward, herewith, four statements of taxation, and a Memorandum prepared in accordance with the instructions laid down in the Resolution of the Government of India, dated 23rd October 1871, No. 4510.

Fort St. George, 20 January 1873.

I have, &c.
(signed) *W. Hudleston,* Chief Secretary.

— I. —

TAX.	1857-58.			1870-71.			REMARKS.
	Accountant General's Books.	Revenue Board Books.	Difference.	Accountant General's Books.	Revenue Board Books.	Difference.	
	£.	£.	£.	£.	£.	£.	
1.—Land Revenue - -	3,701,586	3,543,648	157,938	4,397,803	4,393,351	4,452	The differences between the entries in the books of the Accountant General and those of the Board of Revenue for 1857–58 cannot now be thoroughly explained, as the detailed abstracts in the Accountant General's office have been destroyed, but by excluding extra revenue and collections in North Canara, transferred to Bombay (the latter of which must necessarily be omitted before any comparison can be made with the present revenue), the variation in 1857–58 is reduced to 56,970 *l.* For 1870–71 the Accountant General's books contain an item of 5,000 *l.*, commutation for the Island of Seringapatam, with which the Board have no concern. If this sum be deducted and allowance made for adjustments, the unexplained variation only amounts to 22 *l.* No data exist from which the ratio of the land revenue to the gross produce of the Presidency can be supplied with any approach to accuracy. In the case of ryotwary lands proper, it might be roughly assumed that the revenue amounts to half the net produce. In newly-settled districts, the rate of land tax per acre on ryotwary lands varies from 6 *d.* to 1 *l.* 4 *s.*, and the number of rates does not exceed 35. Where the old land assessment still prevails, the total number of rates in a district is as large as 885, varying from a fraction of a shilling to 3 *l.* 10 *s.* The present average of the whole Presidency may be put down at 2 *s.* 3 *d.* on unirrigated land, and 9 *s.* 6 *d.* on irrigated land, the rates in 1858 being about half a farthing higher for the former and 2 *d.* for the latter. According to the accounts of the Board of Revenue above given, the increase in Land Revenue between 1857–58 and 1870–71 amounts to 849,703 *l.*; but the former year was a remarkably unfortunate one, following a series of five adverse seasons. In the next year (1858–59) the land revenue rose to 4,148,029 *l.*, reducing the increase to 245,322 *l.*, which is probably the more fair measure of the difference between the periods under comparison.

I.—Statement of Taxation, Madras—*continued.*

Tax.	1857-58. Accountant General's Books.	1857-58. Revenue Board Books.	1857-58. Difference.	1870-71. Accountant General's Books.	1870-71. Revenue Board Books.	1870-71. Difference.	Remarks.
	£.	£.	£.	£.	£.	£.	
II.—Abkari (Excise) -	275,207	271,391	3,816	589,266	589,265	1	The difference of 3,816 *l.* for 1857-58 is owing to the Accountant General's figures, including the collections in North Canara. In this Presidency the exclusive privilege of manufacturing and vending country spirits is vested in Government by law. In the Mofussil the privilege is farmed out to the highest bidder, who is bound to conform to certain restrictive rules. In the town of Madras, Government retains the monopoly under the management of its own officers. The increase in the Abkari revenue is only the natural result of the increased population and wealth of the Presidency.
III.—Forests - - -	- -	15 057	- -	33,979	33,978	1	In the year 1857-58 the Accountant General's books did not contain a separate head for Forests. The detailed items of forest revenue for 1870-71 are shown in the marginal abstract. The increase is due to the extended operations of the Department, which in 1857-58 were confined to two districts, but now comprise great part of the Presidency.
IV.—Assessed Taxes:							
(*a.*) Moturpha -	106,047	105,153	894	- -	- -	- -	The only tax in 1857-58 which partook of the nature of an "assessed tax" was the Moturpha, a kind of professional tax levied under the heads marginally noted. The collections for the fasli corresponding to the year 1857-58 are also shown. This tax was abolished by Act XVIII. of 1861, and its place has been supplied by the income and license taxes of later years. The difference between the income tax receipts shown in the books of the Accountant General and the Board of Revenue arises almost entirely from the former, including the tax realised in the Mysore and Travancore States.
(*b.*) Income tax -	- -	- -	- -	227,835	223,503	4,332	
V.—Tributes:							
(*a.*) Mysore - -	245,000	- -	- -	245,000	- -	- -	Under Subsidiary Treaty, dated 8th July 1799, Article 2.
(*b.*) Travancore -	78,311	- -	- -	78,311	- -	- -	Under 3rd Article of the Treaties, dated 17th November 1795 and 12th January 1805.
	1,332	- -	- -	1,332	- -	- -	Under an agreement from the Nàwab of the Carnatic, dated the 11th Kajjab 1180 Hejira A.D. 1764.
(*c.*) Cochin - -	20,000	- -	- -	20,000	- -	- -	Under the 2nd Article of the Treaty, dated the 6th May 1809, the amount was subsequently fixed at 20,000 *l.* by the Madras Government (Minutes of Consultation, dated 26th January 1819).

	1857-58.	1870-71.
	£.	£.
I.—Sale of timber brought to depôt by Government Agency, and value of timber supplied to Public Department - -	15,057	19,793

W. Hudleston,
Chief Secretary to Government.

Appendix, No. 15.

MEMORANDUM referred to in Paragraph 15 of the RESOLUTION of the Government of India, under date 23rd October 1871, No. 4510.

STATEMENT I.

Land Revenue.—Calls for no remark.

Abkari.—Act III. of 1864 (Madras) is the Abkari law prevailing in the Provinces. By it the exclusive privilege of manufacturing and vending country spirits is farmed out, under the orders of the Board of Revenue, to the highest bidder, at auctions held from time to time. The purchasers of the farms are bound down to conform to the rules prescribed by the Board of Revenue with reference to the places at which stills and shops are erected, the number of shops and stills, the minimum prices at which spirituous liquor may be sold, &c., &c. An experiment has lately been introduced in five districts on a plan somewhat analogous to the Sudr distillery system.

Under it the exclusive privilege is rented to individuals on condition of paying an Excise duty on all spirits issued from the distillery, a certain minimum of revenue being guaranteed to the State which if not attained, the State may cancel the lease after prescribed notice.

It is expected that this system, while it tends to check reckles speculation, will place this branch of revenue on a firmer footing.

The sale of spirituous liquors in the town of Madras is regulated by Act XIX. of 1852, modified by Act XIII. of 1856, Madras Act VIII. of 1867, and Act XIV. of 1870. The monopoly is retained under the management of the Government officers.

III. *Forests.*—There is no forest law in this Presidency; but, with a few exceptions, all forests are recognised as the property of Government, subject to the prescriptive common rights of villages bordering on them, for supply of domestic needs, which, however, do not materially affect the State right.

IV. *Assessed Taxes.*—The only impost (other than local) which can be properly described as an assessed tax is the income tax.

STATEMENT II.

1. *Jungle Conservancy Fund.*—The scattered scrub jungles of the plains were being rapidly destroyed by the villagers and others in the exercise of ancient prescriptive rights; and, in order to preserve and improve them, a local tax on firewood cut, and charcoal made for sale, has been levied through the village officers and applied locally for the above purposes. The prescriptive rights of the ryots to fuel, leaves for manure, and wood for implements (for their own use and not for sale), is respected. These scrub jungles are distinct from the forests administered by the Conservancy Department, and are communal village property.

2 & 3. *Pound Fund.*—This fund arises under the Imperial Act I. of 1871, and the surplus proceeds are usually assigned to the Local Fund Circle or Municipality in which they accrue, after providing for the expenditure on model farms.

4. *Bungalow Fee Fund.*—Since 1864 fees have been levied for the accommodation afforded to travellers in the public bungalows. A grant in aid was formerly contributed by the Supreme Government for the repair and up-keep of the buildings, but it has now been discontinued, and the bungalows are being transferred to the Local Fund Boards where desired.

5. *Cochrane's and Sadras Canal Fund.*—The income of this fund is derived from tolls and license fees on boats using Cochrane's Canal to the north of Madras and the Sadras Canal to the south. It is devoted, under Government direction, to the maintenance and extension of the canal, directly, and in repayment by instalment of a Government advance for the work.

6. *Nanul Grass Fund.*—This is composed of the sale proceeds of Nanul and Koray reeds, and grass planted for the protection of the banks of rivers and tanks, and is applied to the maintenance and extension of the plantations.

7. *Canal and Ferry Fund.*—This fund consists of fees and tolls levied under Madras Act I. of 1870, and is devoted to the management of ferries and the construction and improvement of lines of navigation within the Presidency.

8. *Educational Building Fund.*—This fund was originally formed from the surplus balance of the Pagoda funds under order from the late Court of Directors. It has been augmented by grants and voluntary subscriptions.

9. *University Fee Fund.*—Calls for no remark.

10. *Village*

10. *Village Service Fund.*—This fund comprises the proceeds of the ancient merah or fees paid by the ryots for village services, the modern cess levied by law in places in lieu of these fees, and for the same purposes, and the sums charged for the enfranchisement of village service inams. The receipts are applied to the remuneration of village officers. The Cess Act (IV. of 1864) is as yet in operation only in the two districts of Kurnool and Trichinipoly.

11. *Irrigation Cess Fund.*—This is a voluntary payment by ryots holding lands under certain river channels in lieu of customary labour, and is of very limited operation, and likely to die out. The working of the system is not satisfactory in some respects, as no money payment will, in some cases, adequately supply the loss of customary labour.

12. *General Fund under Customs Act* VI. *of* 1863.—The proceeds on all confiscations and penalties imposed under the Act are paid into a general fund in accordance with the provisions of Section 229.

13. *Endowment Fund.*—This comprises the endowments of choultries, almshouses, and other foundations (not being religious) for the use of the people. The management of such institutions is vested in collectors and the Board of Revenue by Regulation VII. of 1817. Under Section 2, Act IV. of 1871, it is now competent to the Board of Revenue, with the consent of Government, and of the Local Fund Board, to make over the management of such institutions to the Local Fund Board of the circle in which they are situated.

14. *School Fee Fund.*—This is now merged in provincial services.

15. *Port Fund.*—Port dues are charged at the various ports at rates not exceeding 3 annas for every ton of burden on every sea-going vessel of over 15 tons burden entering the port. Coasting vessels usually pay half the above rates, but special provision is made for coasting steamers. The sums received on account of port dues form one general fund under Section 2, Madras Act VII. of 1867.

16 and 17. *District Road Fund and Local Funds under Act* IV. of 1871.—Act III. of 1866 (Madras) was the first enactment by which road cess was legally imposed in this Presidency, but it had been previously made a condition of settlement in several districts. The above-mentioned Act has been repealed by Madras Act IV. of 1871, "The Local Funds Act," by which the proceeds of the road cess, tolls, and other funds raised under the Act, have been devoted to the maintenance and construction of roads, education, vaccination, sanitation, and other works of public utility. Local Boards have been appointed for the administration of these funds within certain areas called "Local Fund Circles," of which there are 36 in the Presidency. While the Bill was before the Legislative Council, the opinion of the public seemed to be adverse to a proposed marriage tax, a tax on trades and professions, and a house tax. The two former were accordingly struck out altogether, while the operation of the latter was restricted to certain small areas in the immediate neighbourhood of schools to be supported from the proceeds of the tax. Only a limited number of such schools have been established with their concomitant taxation, and the wants and feelings of the people will be duly considered before further extension.

In most districts the road cess has been fixed at 1 anna in the rupee on the rent value of land, which, for the purposes of the Act, is taken to be the assessment and water rate in the case of Ryotwarry lands. The house tax varies from 5 rupees to 4 annas per house per annum, and the tolls from 1 rupee to 1 anna.

Act VI. of 1863 was an enactment enabling the inhabitants of any place to assess themselves for educational purposes. It has been repealed by Act IV. of 1871, except in respect of assessments and liabilities prior to the introduction of the latter Act.

18. The sanitary state of the large towns in the Mofussil had long been a matter calling for attention, and, in 1865, an Act was passed which has since been superseded by the present Provincial Municipal Act (III. of 1871). The people are gradually becoming reconciled to the new taxation, and much improvement has undoubtedly been effected in the state of the towns. The tax on trades and professions has been somewhat unpopular owing to difficulties in the way of its administration and to its falling heavily on those who have also to pay income tax, but the objection to it will probably wear off in course of time, as those whom it affects can usually well afford to pay it.

(A true copy.)

(signed) *D. Barbour,*
Officiating Under Secretary to the Government of India.

Appendix, No. 16.

PAPERS handed in by Mr. *Harrison.*

Appendix, No. 16. EXTRACT from "a BILL to Amend and Consolidate the LAW relating to MUNICIPALITIES," as passed in the Legislative Council of the Government of Bengal on the 27th July 1872.—(Referred to in Question 2014.)

PART 3.—MUNICIPAL TAXATION.

Power of the Commissioners to impose Taxes, Duties, and Tolls.

CHAPTER I.

Power to impose taxes.

38. IT shall be lawful for the commissioners of any municipality, at a meeting, to impose within the limits of such municipality any one or more of the following taxes, duties, and tolls, so far as the same are applicable therein, at such rate as the commissioners shall see fit, not exceeding the maximum hereinafter mentioned and prescribed. But no proceeding shall be taken in or towards levying any tax, duty, toll, or fee imposed by the commissioners under this part until the sanction of the Lieutenant Governor shall have been obtained.

On persons.

(*a*). In any municipality in which the hereinafter-mentioned tax on holdings has not been imposed, an annual tax on persons residing or owning property therein, according to the means and the property within the limits thereof of the persons liable to pay the same: Provided that no person who resides outside the limits thereof shall be assessed according to his means derivable from property outside the limits thereof, but only in regard to the property which he possesses therein.

On holdings.

(*b*). In any municipality in which the hereinbefore-mentioned tax on persons has not been imposed a tax on all holdings situated therein, not exceeding 7½ per cent. on the annual value, such annual value being not less than 6 rupees.

On carriages.

(*c*). In any municipality a tax on carriages and animals kept or used therein, and a fee on the registration of vehicles without springs.

On trades.

(*d*). In any municipality to which the hereinbefore-mentioned tax on persons has not been imposed, a tax on trades and callings carried on and exercised within the said limits.

On processions.

(*e*). In any municipality, a tax on processions conducted within the said limits.

On articles.

(*f*). In any municipality, duties on articles entering the limits thereof, or brought into markets within the said limits.

On ferries, &c.

(*g*). In any municipality, tolls on ferries within or adjacent to the limits thereof, and tolls on roads and navigable channels entering the said limits.

On boats moored.

(*h*). In any municipality, duties on boats moored within the limits thereof.

Total amount of taxation.

Provided that the total amount raised by taxation of all kinds in Howrah, and the suburbs of Calcutta, shall not exceed a sum equal to two rupees per head of the total population thereof; and save in such suburbs and Howrah, in a first-class municipality, shall not exceed a sum equal to one and a half rupee per head of the total population thereof; and in a second-class municipality shall not exceed a sum equal to 12 annas per head of the total population thereof; exclusive of the profits derivable from tolls on all ferries, roads, and channels which may have been made over to the Commissioners by the Lieutenant Governor, under sections 83, 96, and 108, and from duties on boats moored.

Appendix, No. 16.

COPY of SCHEDULE (D) appended to the Act, showing the Maximum Rates allowed to be levied under Clause (C) of the above Section.

TAX on CARRIAGES and ANIMALS.

	Per Quarter.	
	Rs.	*a.*
For every four-wheeled carriage on springs drawn by two horses -	4	8
For every four-wheeled carriage on springs drawn by one horse or a pair of ponies under 13 hands - - - - - - -	3	–
For every two-wheeled carriage on springs - - - - -	2	8
For every horse - - - - - - - - - -	2	–
For every pony under 13 hands, or mule, or donkey - - - -	–	12
For every elephant - - - - - - - - - -	6	–
For every camel - - - - - - - - - -	2	–
For every pair of bullocks - - - - - - -	1	–

Ponies under 11 hands, and children's carriages, the wheels of which do not exceed 24 inches in diameter, are exempted.

COPY of SCHEDULE (E), showing the Maximum Rates allowed to be Levied under Clause (D) of the above Section.

LICENSE on PROFESSIONS, TRADES, and CALLINGS.

	Yearly.
	Rs.
CLASS I.	
Every registered joint stock company - - - - - - - -	100

All other itinerant dealers and keepers of stalls at periodical markets or haths - - - - - - - - - - - - -	1

Note.—A person who carries on several kinds of business, and may come under more than one of the designations in this schedule, shall be chargeable only under one of such designations at the discretion of the chairman, or of the sub-committee, as the case may be; and in the case of a firm consisting of two or more persons, payment by any one of such persons shall be considered to be payment by the firm.

(signed) *Edward F. Harrison.*

(Documents referred to in Questions Nos. 4369 and 5238 of Session 1872.)

(No. 21 of 1872.—Financial Department.)

To Her Majesty's Principal Secretary of State for India in Council, London.

My Lord Duke, Bombay Castle, 20 September 1872.

We have the honour, as desired in your Grace's Despatch (No. 123, Financial, dated 20th of June 1872), to forward a detailed statement* of expenses of the household of his Excellency the Governor of Bombay in 1856–57 compared with those in 1870–71, with explanations as to the large additional charge in the latter year.

2. Your Grace also asks for a statement of all charges incurred during a series of years (from 1856–57 to 1870–71) for marine tours of the Governor of Bombay, including the expense of the Governor's yacht. Our Accountant General, in paragraph 2 of his letter No. G-2105, dated 20th August 1872, writes that the only charges on account of his Excellency's marine tour distinctly shown in the accounts of this office, and in those submitted by the military secretary to his Excellency, are the payments of table money for accommodating his Excellency's suite. No expenses of this sort were incurred prior to 3rd of May 1869. The payments on this account are as follows:—

	Rs.
1868–69 - - - - -	3,813
1869–70 - - - - -	2,249
1870–71 - - - - -	2,441

3. Your Grace will learn from a perusal of the accompanying letter* from the superintendent of marine that the boat which has been erroneously supposed to be his Excellency the Governor's yacht, is really a despatch boat in Her Majesty's service; and that she is used in that capacity about Bombay, in the Persian Gulf, and Red Sea. She has, however, been used by the late Governor on his official visits to Sind, Kàtiawar, Kutch, and elsewhere.

4. The information called for in your last paragraph will require a little time to collect, and will be forwarded by us in a separate Despatch.

We have, &c.
(signed) *P. E. Wodehouse,*
H. P. St. G. Tucker,
A. Rogers.

---

* Collection No. 1.

(No. 491 of 1872—Marine Department.) Appendix, No. 16.

To the Secretary to Government, Bombay.

Office of the Superintendent of Marine, Bombay,
28 August 1872.

Sir,

In reply to your telegram, dated Puna, August 24th, 1872, requesting to be informed how, when, and why the "May Frere" became the Governor's yacht, and was she not purchased as a despatch boat, I have the honour to state, it appears from Government Resolution, No. 766 of July 14th, 1863, and enclosure, the "Goolanar" was to be retained in the Marine as a despatch boat; also by Government Resolution, No. 580, May 28th, 1863, and enclosure, the "Goolanar" was available in the Marine as the Governor's yacht; by Government Resolution, No. 714, of October 9th, 1866, the "Margaret Crawford" (now "May Frere") was purchased as a despatch boat; by Government Resolution, No. 745 of December 11th, 1868, "May Frere" was substituted for the "Goolanar;" I am unaware of any specific order making the "May Frere" his Excellency the Governor's yacht, but conclude, she began to be called so, and considered as such, from the circumstance of her name having appeared, with the consent of his Excellency the late Governor, in the list of yachts of the Bombay Yacht Club, of which his Excellency was the patron, although she has been employed in and about Bombay, in the Persian Gulf and Red Sea, as a despatch vessel.

I have, &c.
(signed) *G. T. Robinson,*
Commander I. N., Superintendent of Marine.

DETAILED STATEMENT of EXPENSES of the HOUSEHOLD of His Excellency the GOVERNOR of BOMBAY in 1856–57, Compared with those in 1870–71, and Explaining fully the large Additional Charge in the latter Year.

PARTICULARS.	1856–57.	1870–71.	Increase.	EXPLANATIONS.
	Rs. a. p.	*Rs. a. p.*	*Rs. a. p.*	
Salary of the private secretary	11,925 12 10	16,693 8 9	4,767 11 11	The salary in both years was 1,500 rupees per *mensem*. The decrease in 1856–57 was owing to the permanent incumbent being on leave, and deputation allowance being drawn by the party who acted for him.
Salary of the surgeon	5,739 – –	9,845 11 3	4,106 11 3	In 1856–57, the salary was 600 rupees per mensem, of which 121 rupees (being military net pay) was, under the system which then prevailed, debited in the military account as a military charge. In 1870–71 the salary had been increased to 1,000 rupees per mensem, *vide* General Order Government of India, No. 370, dated 4th April 1867, which applied to a large number of staff appointments at the several Presidencies, and placed the salaries on a uniform scale.
Salary of the apothecary	660 – –	1,920 – –	1,260 – –	Salary in 1856–57 at 55 rupees per month, and in 1870–71 at 160 rupees per month, including staff allowance and Presidency house-rent, under General Order No. 550, dated 5th June 1868, by the Government of India, which was of a similar nature to that quoted above in respect to its general application.
Assistant to the private secretary	2,400 – –	4,200 – –	1,800 – –	Salary in 1856–57 at 200 rupees per month, and 1870–71 at 350 rupees per month. Salary was increased from 200 rupees to 250 rupees by authority of the Bombay Government, in Letter No. 1533, dated 24th November 1862, to the address of the private secretary, and raised to 350 rupees per mensem by resolution of the Government of Bombay, No. 271, dated 21st March 1865; this latter increase was accorded in consideration of Mr. Myer's long service of 35 years in Government House.
Two clerks	1,667 2 –	1,777 3 11	110 1 11	Salary of one clerk was increased by 20 rupees per month, from June 1864, by authority of Sir Bartle Frere, in consequence of extra work performed when on tour, imposed on him by dispensing with the services of two conductors of the Ordnance Department, who formerly used to accompany His Excellency on tour.
Household establishment, including chobdars, jemadars, havildars, &c., of the Government House	21,616 12 4	21,102 10 10	– – –	This does not call for any remarks.
Garden establishment	– – –	15,960 – –	15,960 – –	This allowance, although granted under the head of garden establishment, includes the lighting (with the exception of gas) of Government House and sundry minor expenses connected with the establishment. The total amount originally allowed in Lord Clare's time was *Rs.* 876. 9. 11. per mensem; but this sum was latterly found to be totally inadequate for the purpose, owing to the great increase of late years in the price of oil, grain, grass, labour, &c., &c., and accordingly an additional monthly allowance of *Rs.* 453. 6. 1. was sanctioned under this head by the Government of India, on the 4th June 1867, *vide* their resolution, in the Financial Department, No. 527 of that date. This charge was defrayed by the Military Department up to 31st January 1862, after which date it was transferred to the Civil Department, Government Resolution, No. 624, dated 12th April 1862. There has been no increase since 1867.
Establishment and other expenses of the Governor's band	1,429 5 10	21,190 12 11	19,761 7 1	Up to a certain period the Governor held the office of commandant of the fort of Bombay, and the band was termed the garrison band, and then, that is, in 1856–57, only the cost of their conveyance was charged to the civil establishment of the Governor; subsequently, as was the case in 1870–71, the whole cost, including pay and clothing, was charged as a civil charge for the Governor's band. In July 1871 the Government of India directed the pay and cost of clothing to be paid as a military charge, and consequently the sum allowed on the civil budget for the current year amounts to 9,800 rupees only, and the whole cost, civil and military, will not exceed *Rs.* 18,848. 14. 11.
Barge establishment	1,698 – –	736 4 1	– – –	In 1870–71, this establishment was engaged as required.
Sumptuary allowance	5,500 – –	8,000 – –	2,500 – –	This allowance was raised from 5,500 rupees to 8,000 rupees a year, by resolution of the Government of India, received with memorandum from the secretary to the Government of India, No. 381, dated 8th January 1869. The same allowance is paid at Madras.
Official postage	– – –	411 11 4	411 11 4	The system of charging official postage in all Government offices was introduced under authority of the Government of India's Notification No. 567, dated Simla, 4th May 1866. Republished in "Bombay Government Gazette" for 1866, page 288.

Contingent Expenses:				
Compensation for dearness of grain to the chobdars, peons, &c.	-	5,645 9 9	5,645 9 9	New charge, and includes arrears of former years: grain was not dear in 1856-57. This compensation is not payable at present, but if the price of grain were again to rise to a certain point, the native members of the establishment, whose pay has not been revised, would be entitled to claim it.
Gas charges for lighting the Government House at Parel and Malabar Point	-	3,767 9 9	3,767 9 9	New charge: there were no gasworks in Bombay in 1856-57; the introduction of gas to Government House, Parel, was sanctioned by the Government of Bombay, in their Resolution, No. 706, dated 10th April 1866. In the budget for this year 7,200 rupees has been sanctioned for the cost of gas; but a proposal has been submitted to the Government of India for reducing that allowance to 3,000 rupees, and applying 2,000 rupees of the amount saved to other purposes.
Telegraph charges	-	4,799 10 -	4,799 10 -	In 1856-57 service messages were not required to be paid for in cash, hence no charge in that year. The cash payment of service messages was ordered by the Government of India. The expense is inevitable, and the money paid goes into the general revenue.
Purchase of stationery	-	694 14 3	694 14 3	The charge in 1870-71 was for stationery, specially ordered out from England in that year, for the use of his Excellency the Governor; no such supply was made in 1856-57. It appears that since Sir George Clerk's time it has been customary to enter 500 rupees (which was latterly increased to 800 rupees) in the annual budget estimate under this head.
Cost of furniture supplied to the new Government House, Guneshkhind	-	59,066 7 -	59,066 7 -	This charge was sanctioned by the Government of India, in their letter to the address of the chief secretary to the Government of Bombay, No. 1986, dated 26th February 1867.
Charges for repairing and replacing furniture of the *Government Houses*, including hire of furniture on the occasions of entertainments	16,494 8 2	21,105 15 7	7,611 7 5	The sum of 3,277 rupees was expended during His Royal Highness the Duke of Edinburgh's visit to Bombay in 1870-71. If that amount be deducted from *Rs.* 24,105. 15. 7., the total increase in expenditure under this head over that of 1856-57 will be found to be only *Rs.* 4,334. 7. 5., of which 2,050 rupees were paid for new carpets, and 1,541 rupees for re-lining and covering the drawing-room furniture at Parel—an unusual outlay—so that, in point of fact, the ordinary expenditure under this head in 1870-71 only exceeded the expenditure of 1856-57 by *Rs.* 743. 7. 5. The furniture of the Government House at Bombay is insufficient to provide for the reception of persons of distinction with their suites.
Clothing to chobdars, peons, &c.	2,208 - -	1,829 - -	- - -	This requires no remark.
Clothing to the men of the Governor's band	- - -	1,019 12 -	1,019 12 -	Answered above.
Office contingencies of the Private Secretary	1,268 7 7	685 - -	- - -	Contingent charges, such as bookbinding, &c., &c.
Charges incurred in the Military Department:				
Repairs to flags, carpets, tents, &c., including coolie hire, packing charges	-	2,223 2 9	2,223 2 9	With reference to these charges the Accountant General reports—"In 1856-57, these charges were incurred in the Military Department, not adjusted, as at present, in the actual civil accounts of the year: they were, under the system then observed, brought to account in the books, after the actual accounts of the year were closed and submitted to Government." These charges will be greatly reduced in future; and it may be added, in conclusion, that correspondence is now passing with the Government of India, with a view to the assignment, as proposed by them, of one round sum to cover all the household expenses of the Governor
Cost of fire engines	-	1,362 - -	1,362 - -	
Value of tents, carpets, &c., supplied	-	2,081 12 1	2,081 12 1	
Value of carts supplied for sick persons	-	4,444 - -	4,444 - -	
Value of flags, hoes, axes, and other sundries	-	604 7 1	604 7 1	
Value of plain paulins supplied	-	1,205 11 4	1,205 11 4	
Value of medicine, &c., supplied	-	1,021 5 6	1,021 5 6	
Charges incurred in the Marine Department:				
Provisions to the crews of the Governor's barge	-	171 1 9	171 1 9	
TOTAL *Rs.*	72,607 - 9	2,16,565 5 11	1,46,396 10 2	

E. W. Ravenscroft,
Acting Chief Secretary to Government.

Appendix, No. 17.

Appendix, No. 17.

PAPERS handed in by Mr. *Nowrozjee Furdoonjee.*

(A.)

MUNICIPAL RATES and TAXES imposed in the CITY of BOMBAY under BOMBAY ACTS II., of 1865, I. of 1867, IV. of 1869, and III. of 1872.

Refreshment rooms, from	250 „ to 300 „
Taverns, each from	300 „ to 350 „
Toddy shops, each from	75 „ to 100 „

(B.)

THE PRODUCE of MUNICIPAL RATES and TAXES in the BOMBAY PRESIDENCY, in 1856–57 and 1870–71.

	In 1856–57.	Estimate in 1870–71.
	Rs.	*Rs.*
City of Bombay	15,09,839	28,71,160
Surat District	27,984	5,25,784
Ahmednugger	6,049	54,238
Hydrabad	19,792	1,12,096
Khandeish	583	55,503
Tanna	804	92,359
Shikarpoor	37,696	1,89,708
Kurrachee	50,741	2,64,445
Kaira	839	12,301
Sattara	25,581	76,131
Kulladghee	1,637	30,258
Ahmedabad	- -	1,85,354
Belgaum	4,026	29,536
Sholapore	21,673	1,21,246
Nassik	- -	58,329
Canara	- -	38,905
Broach	9,956	59,311
Dharwar	9,474	49,208
Poona	235	1,64,904
Aden	5,061	21,229
TOTAL *Rs.*	17,31,975	50,42,005

In Sukker town duties are levied at different rates on no less than 49 different articles; 158 articles in Kurrachee, and in Shikarpoor on 32 different articles of consumption, trade, and merchandize, besides a very heavy wheel-tax and tolls.

Appendix, No. 17.

(C.)

LIST of important PUBLIC WORKS constructed by NATIVES.

1. THE Bombay Mechanics' Institute, Goculdass Tejpall Hospital, the Post Office, the New Telegraph Office, and Apollo Bay Reclamation at Bombay, constructed by Mr. Muncherjee Cowasjee Merzban, assistant engineer, 3rd grade.

2. The New University Buildings, the Eye Hospital, the Rustomjee Jamsetjee J. Dharumsala, the Elphinstone College, the New Secretariate, the Public Works Offices, and the New Sailors' Home, built by Messrs. Wassoodew Bapoo and Mucoond Ramchunder, assistant engineers, 2nd grade.

3. The Masonry Fitzgerald Bridge, over the Moota Moola, constructed by Mr. Laloobhoy Keshowlall, assistant engineer.

4. The Civil Engineering College, and Saint Paul's Church, Poona, and the Barracks, Church and Powder Magazine at Kirkee, constructed by Mr. Muncherjee Dorabjee, supervisor.

5. The Ammunition Factory at Kirkee, constructed by Mr. Dorabjee Hormasjee, supervisor, 1st grade.

6. The Sea Wall, at Carnac Bunder, Bombay, built by Mr. Ruttonjie Dhunjeebhoy, supervisor.

7. The Council Hall, Poona, re-built by Mr. Ballajee Narayen, overseer, 1st grade.

8. The extension of the Apollo Pier, by Mr. Dadoba Pandoorung, overseer.

The designs of several of these works were prepared by the Native assistants and subordinates under the superintendence of the executive engineer.

9. A bhundara, or dam, built across a small river at Narayen Gaum, on the road from Poona to Nassik, to supply water for irrigation. It was constructed under the former Government more than a century ago. It is about two or three hundred feet long, and has stood up to the present time without much repair.

10. The large masonry bridge over the river Moola, near Kirkee, called the Holkars bridge, was built by the Maharattas about 70 years ago, and is still in good order.

The following bridges have been constructed by Native foremen, on the road between Patus and Indapoor, in the Deccan, under the occasional supervision of European officers. They show the practical knowledge of the Natives:—

11. A bridge of 180 feet length, near Koombhargaon, having three arches each of 60 feet span, built by Bundoo Oonala, foreman.

12. Ten bridges of smaller spans built by Succuram Manajee.

13. A large skew bridge on the road to Katrej, near Poona, built by Succaram Janojee, foreman, under the supervision of Colonel Wilkins, executive engineer.

14. The same foreman has built a handsome villa for the late Rustomjee Jamsetjee Jeejebhoy, at Poona, costing more than five lacs.

15. The Victoria and Albert Museum, commenced by the contractor, Mr. Johnstone, under the superintendence of Messrs. Scott & McCleland & Co., civil engineers, in 1869, and was nearly completed except the roofing. The funds at the disposal of the managing committee (about 1½ lacs) having been exhausted, they were obliged to apply to Government for assistance. Eventually Government took charge of the work, and undertook to complete the building, which was accordingly made over to the Public Works Department. On examining the structure it was found that the east and west main walls were leaning inside out of plumb 15 inches and 8 inches respectively. The former had been propped up by a large wooden support to prevent it from falling down. The walls, having been examined by a Committee, were condemned and pulled down, and the edifice was commenced *de novo*; the walls were rebuilt by the Government Executive Architectural Engineer, at a cost of 42,000 rupees. The bad stones had to be replaced, at a further cost of 5,500 rupees. The Museum was built by Mr. Muccoond Ramchunder, assistant to the executive engineer, under the supervision of that officer. Messrs. Scott McCleland estimated the cost of painting, gilding, and decorating interior of the building at 45,000 rupees; but the work was done most creditably by Mr. Muccoond and Native artists, at a cost of 9,570 rupees only.

16. The

16. The Sassoon Synagogue at Poona, constructed by Mr. Nundram Maistee.

17. The French Bank, at Bombay, by a Native architect, Mr. Bazonjee Muncherjee.

18. The Jamsetjee Jeejebhoy Institute, at Bombay, designed and constructed by Mr. Dinshaw Dorabjee Maistree.

19. Waterworks, masonry dam, and aqueducts, constructed by Natives at Aurungabad, Ahmednugger, and at Katruj, near Poona, under the former Native Government, displaying great engineering skill. These works, though 150 years old, are still in good working order.

(D.)

To His Excellency the Right Honourable Sir *W. R. Seymour Vesey Fitzgerald*,
Governor and President in Council, Bombay.

Right Honourable Sir,

We, the undersigned uncovenanted native officers of the upper subordinate branch of the Public Works Department of the Bombay Presidency, beg leave most respectfully to submit this Memorial for your Excellency's kind consideration which we are encouraged to hope for, from your Excellency's well-known reputation for justice; and before proceeding to the subject of our memorial, we desire to express our grateful appreciation of the many privileges which we have received from time to time from the Government of this Presidency.

2. We need hardly premise, that the appointments in the Public Works Department constitute a portion of what is called the "Uncovenanted Civil Service of India," and that they are open to all persons qualified to hold them by merit, ability and good character, irrespective of all other considerations.

3. The Public Works Department is divided into three branches, viz.:—The engineering, the upper subordinate, and the lower subordinate, and the object of our present memorial is to represent the grievances of the second or upper subordinate establishment.

4. In the first place we have to represent that the promotions among the native members of the upper subordinate establishment are slow and uncertain. An upper subordinate officer on his first admission into the department is posted as an overseer of the 3rd grade on a salary of 60 rupees per mensem. In this grade he has to remain on an average for a period of two years or more, when he is promoted to the 2nd grade on a salary of 80 rupees per month. In this latter grade he has to serve for about five years, so that about seven years after his admission into the department he acquires the position of an overseer of the first grade on a salary of 100 rupees per mensem.

5. In this last grade he has to remain for about eight years, before he has any chance of promotion to the next higher grade.

6. In short, a subordinate officer is required to serve for more than 15 years in the department before he can aspire to the place of supervisor 2nd grade on a salary of 150 rupees per month.

7. We beg humbly to submit that 15 years of actual hard service is a very long trial of patience before attaining this promotion. In no other department of the native uncovenanted service is such a long term of service required to earn such a small promotion. This exceptional state of things, we submit, is due to two causes:

1st. Because upper subordinate officers are excluded from all chances of entering into the next higher, or engineering branch.

2nd. Because an undue proportion of European and Native subordinates in the service have been fixed.

8. In theory, the natives of this country are eligible for all the appointments in the engineering branch of the service, but in practice, with the exception of only five, to whom we shall presently refer, all the appointments are held by Europeans.

9. We would respectfully point out that in the upper subordinate branch of the Public Works Department, under the immediate control of the Government of India, this distinction is not observed, and that, as a consequence, promotions are more rapid there than they are in this Presidency, owing, we believe, to a large number of native subordinates being promoted, from time to time, to posts in the engineering branch. As an instance of this, we beg leave to state that Mr. Eknath Ramchunder, who appears as an overseer of the first grade on the upper subordinate list of this Presidency, and who was

Appendix, No. 17.

transferred (when serving at Mhow) to the Bengal Presidency when the Mhow Division was attached to that Presidency in 1864, was, soon after his transfer, promoted from an overseer of the first grade, and is now a sub-engineer, on a salary of 250 rupees, while 21 overseers, 19 second grade supervisors, and 12 first grade supervisors, of this Presidency, all his seniors, are still drawing salaries of 100, 150, and 200 rupees per mensem respectively.

10. In the Public Works Department, under the Government of India, there are no less than 44 natives in the engineering branch, of whom only two have obtained the degree of L.C.E. in the Bengal University, whereas in this Presidency there is only one native executive engineer, and since the last year four young men from the Poona Engineering College, who have taken the degree of L.C.E., have been appointed assistant engineers, making a total of five natives in that branch.

11. Under the Government of India the proportion of native engineers to native subordinates is two to nine, there being 44 native officers in the engineering branch against 198 in the upper subordinate grades, whereas in this Presidency it is 1 to 27, or exactly one-sixth, *i. e.*, five native engineers against 135 native subordinates.

12. It is needless for us to observe that the education and professional ability of the members of the upper subordinate branch of the Public Works Department of this Presidency are by no means inferior to those of the subordinates under the Government of India, a fact to the truth of which the official reports of several executive and superintending engineers of this Presidency bear ample testimony.

13. We respectfully venture to state that several of the native upper subordinate officers in the service are in every way capable of holding higher and more responsible appointments in the engineering branch. Many officers of known ability and reputation have frequently advocated the justice and desirability of elevating them to the higher posts of that branch. Some of them have passed the prescribed examination laid down in the Public Works Code, c. VI. p. 15, for the appointment of candidates to the grades of assistant engineers in this department; and others there are who are willing and prepared to pass that examination, if assured that their success at such examinations will entitle them to hold appointments in the engineering branch.

14. It may be argued that a mere theoretical examination is not an infallible test, but we beg most respectfully to point out that many of those who now form the upper subordinate branch of the service have been actually employed for many years together upon the various engineering works, which have often been entrusted to their sole care and discretion by their superior officers, in consideration of their professional ability, integrity, and long experience, qualifications which, we submit, entitle them to aspire to a higher position than that of a subordinate life.

15. It is a fact well known to your Excellency's Government, that the few native subordinates who have hitherto been appointed to posts in the engineering branch have performed their duties to the entire satisfaction of their superior officers.

16. The native subordinates of the Public Works Department find the hardship of their lot, arising from this practically complete exclusion from all chances of entering the engineering branch, greatly aggravated of late by the preference given to outsiders, such as the newly-passed L.C.E.s from the Engineering College, and other young and inexperienced persons, previously not in the department. If the few vacancies that from time to time occur in the engineering branch are allowed to be exclusively supplied from these sources, the tried and experienced servants of Government (who have a prior claim to these appointments to all others, with the exception of military officers, *vide* Art. 3, c. VI., p. 15 of the Bombay Public Works Code), whose lot has placed them in the position of subordinate officers, will not only have no advancement to look to, but be often placed under the orders of their professional inferiors.

17. In Bengal, out of the 44 native assistant and executive engineers, there are only two who hold diplomas of L.C.E. from one of the universities, whilst other L.C.E.s, we observe, were appointed to the rank of overseers in the upper subordinate branch.

18. It hardly requires to be pointed out that the existing system, by checking the legitimate ambition of your Memorialists, takes away the best incentive to exertion, and is ultimately seriously detrimental to the interests of the department itself.

19. This practical closing of the Engineering Service is the first grievance we have to represent. We trust no special reason exists why a different rule should prevail here from what has been found to work so well in the Public Works Department Service, directly under the Government of India, and we feel sure that this difference in the dispensation of patronage will cease, and open, for a larger number among us who may deserve it, a regular entrance in the Engineering Service.

20. We next respectfully solicit your Excellency's attention to the circumstance which constitutes the second grievance of the service to which your Memorialists belong, and that is the recent ruling of Government, *vide* Government Resolution, No. $\frac{631}{2130}$ E, dated 13th

13th October 1865, authorising a fixed proportion of Natives and Europeans in the Upper Subordinate Establishment. The respective numbers, as fixed by the Resolution referred to, form the following table:— Appendix, No. 17.

Sanctioned Scale.	Salary.	Proportion.		Total.	Proportion of European to Native.	
		Europeans.	Natives.		E.	N.
Sub-Engineer, 1st Grade - - -	400	4	3	7	1 to	0·8
Ditto - 2nd Grade - - -	300	3	4	7	1	1·3
Ditto - 3rd Grade - - -	250	7	7	14	1	1·0
Supervisor - 1st Grade - - -	200	9	12	21	1	1·3
Ditto - 2nd Grade - - -	150	15	19	34	1	1·3
Overseer - 1st Grade - - -	100	28	54	82	1	1·9
Ditto - 2nd Grade - - -	80	10	18	28	1	1·8
Ditto - 3rd Grade - - -	60	9	18	27	1	2·0
TOTAL - - -	-	85	135	220	Average 1	Proportion 1·6

21. It will be perceived from the above table that among 85 Europeans and 135 Natives 14 of the highest and best paid appointments are conferred on Europeans and 14 upon Natives, and in the same manner out of 55 appointments of supervisors, 24 are held by Europeans and 31 by Natives. Now, we humbly beg that this limitation of numbers acts most detrimentally towards the Natives. As a rule, Native subordinates cannot enter the engineering branch, and out of the higher grades of the subordinate service which is open to them, a disproportionately large number of appointments have been reserved for Europeans, which is doubly injurious to the former. Considering the numerical majority of the Native *employés*, your Memorialists respectfully submit that the most equitable proportion that the Natives should bear to Europeans, instead of being different for each grade as at present (shown in the last column of the above table), would appear to be a uniform one of one European to 1·6 Natives.

22. Moreover, we beg to state, that not only are European subordinates often promoted over the heads of their Native co-employés, equally meritorious, if not sometimes more deserving, but the European on entering the service is enlisted at once as overseer, first grade (and is thus placed on the same footing as a Native of 8 or 10 years' standing), while, in the case of a Native, he has to rise from the lowest grade, *i.e.* overseer, third grade.

23. That European subordinates are placed over the heads of more qualified Natives, will be apparent from the following extract from Government Resolution, No. 25 E., of 15th January 1868:—

> Para. 9. "There is no grievance, therefore, in Sergeant Ward's case; on the contrary he, after seven years' service, stands in the same position as, and may perhaps be promoted before, Mr. Gungadhur Venayek, who has 12 years' service, and has passed the examination for assistant engineer," &c.

24. Many other instances can be quoted in which Europeans have been promoted to the higher appointments over the heads of their equally qualified Native colleagues, notwithstanding the greater length of the service of the latter in the department.

25. This unequal dispensation of the patronage of Government by which the interests of the Natives materially suffer is owing, we beg respectfully to point out, to the unequitable proportion of Native and Europeon subordinates as fixed by the Resolution above alluded to.

26. As far as we are aware there is no reason for making such a distinction between the two races; both should start with equal chances, and both should equally be favoured. No such distinction exists, we believe, in the Public Works Department under the Government of India, nor did it exist in this Presidency before the date of the Resolution above referred to. If the distinction is to be kept up, we trust your Excellency in Council will kindly take measures to increase the numerical ratio of the Native members of the service, as is but just under the circumstances of the case.

Appendix, No. 17.

27. In conclusion, we beg most respectfully and humbly to leave this Memorial in your Excellency's hands, being fully assured that if we have succeeded in pointing out any real grievances they will receive a calm and judicious consideration.

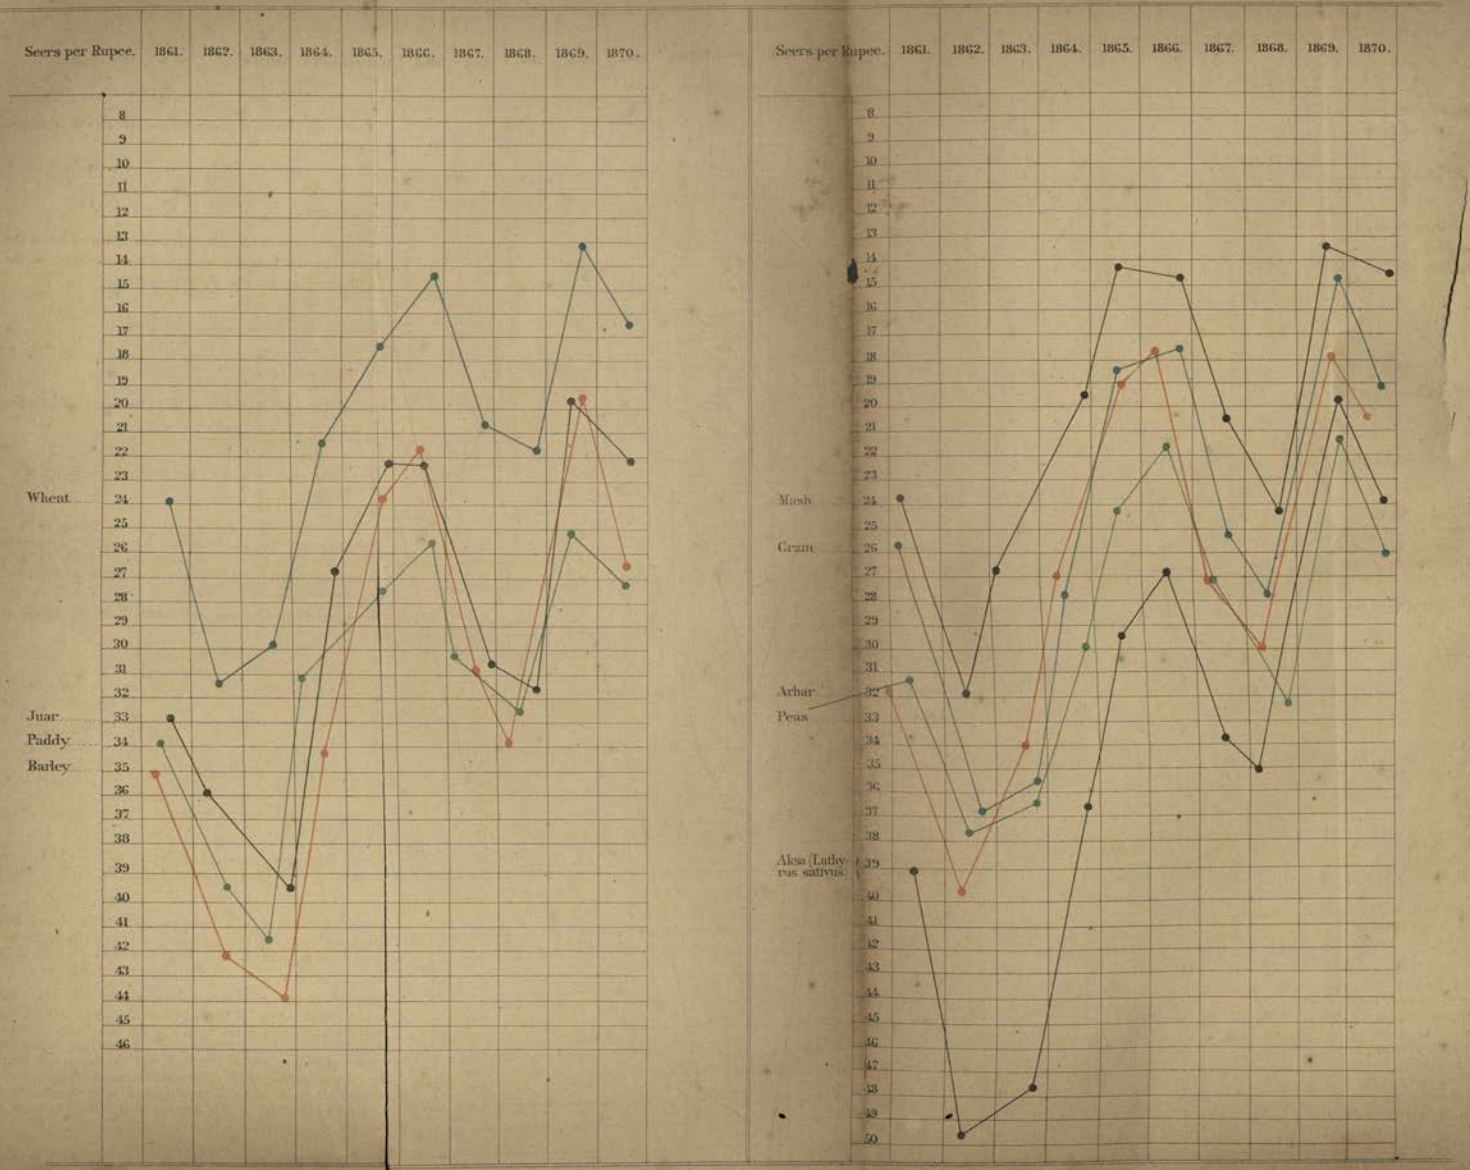
28. By removing the great barriers we have complained of, your Excellency in Council will not only remove the grievances of the Upper Subordinate Establishment, but will improve the efficiency of the service, and encourage a spirit of noble emulation in the Native members of the department by the knowledge that perseverance, integrity, and professional skill will not fail to meet with such promotion at the hands of a Government which cherishes these qualities in its servants, and holds out before their ambition the highest places in the service.

29. If your Excellency is moved to show such kind consideration to the just claims of your memorialists, your memorialists, as in duty bound, will ever pray.

We remain, &c.

August 1870.

RISE AND FALL OF THE RATES OF THE PRINCIPAL ARTICLES OF PRODUCE IN OUDH, FROM 1861 TO 1870.



Appendix, No. 18.

Diagram showing the Rise and Fall of the Rates of the principal Articles of Produce in *Oudh*, from 1861 to 1870.—(*See* opposite.)

STATEMENT showing the Prices of AGRICULTURAL PRODUCE and PROVISIONS in the Province of *Oudh*, from the Year 1861 to 1870, in continuation of those furnished to the Select Committee on East India Finance, on the 21st February 1873.

(No. 5 of 1873.)

Government of India.—Department of Revenue, Agriculture, and Commerce.—Statistics.

To His Grace the Right Hon. the Duke of *Argyll*, K.T., Her Majesty's Secretary of State for India.

My Lord Duke, Simla, 1 May 1873.

IN continuation of our Financial Despatch, No. 16, dated 3rd January 1873, we have the honour to forward copy of a letter from the Chief Commissioner of Oudh, No. 202, dated 21st idem, together with a statement showing the prices of agricultural produce and provisions in that province from the year 1861 to 1870.

Similar statements from the Provinces of Bengal and the North-West will follow on receipt.

We have, &c.
(signed) *Northbrook.*

E. C. Bayley.

From Captain *N. M. T. Horsford,* Officiating Personal Assistant to the Chief Commissioner, Oudh, to the Secretary to the Government of India (No. 202); dated Lucknow, 21 January 1873.

IN compliance with the Government Resolution, No. 1004, dated 10th June 1871, and your letter, No. 2-45, dated 31st January 1872, I am directed to submit the statement therein called for, showing the prices of agricultural produce and provisions in Oudh from 1861 to 1870.

2. The preparation of this return has been attended with exceptional difficulty. No official price-currents were prepared in the province till 1868, and many of the articles, the prices of which have been called for, have no place in the returns which have been compiled since that year. The discrepancies in the district statements required repeated return for further inquiry and explanation. Many mistakes were discovered, but there remain differences of price in adjoining districts of which the explanation is difficult. There are, however, marked differences in the prices even now ruling in various districts of the province, and it is more than probable that, in the earlier part of the decade, with deficient means of communication, these differences were really greater.

Appendix, No. 18.

3. The returns now submitted are not after all, the Chief Commissioner fears, more than approximately accurate, but he believes they give fairly correct evidence of the state of prices in the years ending in 1870. The rise and fall of the rates of the principal articles of produce has been shown in a diagram attached to this letter. There was a general fall of prices at the commencement of the decade, but they rapidly rose in all descriptions of produce, culminating in 1866. They again fell in 1867-68, but never reached the level of 1861. In 1869 they suddenly rose to a still higher point than in 1866, and only slightly retrograded in 1870. The tendency of prices in the decade has, therefore, been materially upward. The prices of the last two years of the decade were perhaps exceptional, but taking in each of the items of produce referred to in the diagram, even the average of the 10 years' prices, that average was in excess of the price prevailing in 1861 in the case of—

Paddy	8 per cent.	Arhar	19 per cent.
Wheat	11 „	Mash	18 „
Barley	12 „	Aksa	13 „
Juar	17 „	Peas	10 „
Gram	3 „		

general average 12 per cent.

Whether this tendency may be expected to continue is a question which requires further materials for a judgment than the simple history of prices for a single decade.

STATEMENT showing the Comparative Prices of AGRICULTURAL PRODUCE and PROVISIONS in the Province of *Oudh* during the Years 1861 to 1870.

DESCRIPTION OF PRODUCE.	Pratábgarh.	Rai Bareli.	Sultanpur.	Faizabad.	Barabanki.	Lucknow.	Unao.	Hardui.	Sitapur.	Kheri.	Bharaich.	Gonda.	Average.

Appendix, No. 20.

PAPERS handed in by Colonel *Johnson* and Mr. *Kellner*.
(Referred to in Question 7131.)

Extract from Military Rules and Regulations.

SECTION IV.—COMMISSIONS AND PROMOTIONS.

Bengal Staff Corps.

129. No staff appointment, except those tenable for five years only (paragraph 304) and personal staff appointments, can be held by an officer of the British service, unless by his entering the Staff Corps. This prohibition is not, however, applicable to appointments in the public works, survey and telegraph departments in the case of engineer officers, and to what are considered regimental appointments in the case of engineer and artillery officers, such as appointments in the sappers and miners which are held by engineer officers, and in native batteries of artillery and the ordnance department which are held by artillery officers.

130. All officers under the rank of a regimental field officer serving in India, who have completed two years' service, of which one shall have been passed in India, have less than seven years' service, have passed the higher-standard examination and are qualified in all other respects (paragraph 134), are eligible for admission on probation to the Staff Corps, provided there is a permanent vacancy in the Native army, to which they can be appointed.

131. Officers of British regiments are eligible for appointment to the Staff Corps of any Presidency, without reference to the Presidency in which their regiments may be serving; but officers of the Bengal army can only be appointed to the Bengal Staff Corps.

132. Commanding officers are required to give the fullest encouragement to officers under their command to prepare themselves for the Staff Corps. They cannot refuse to forward, for the consideration of the Commander in Chief, applications from officers under their command for admission to the Staff Corps, though it is open to them to state therein any objections they may have to offer.

133. Previous to final transfer to the Staff Corps, officers of the British service must serve on probation for one year with native troops, and such service must, excepting in very special cases, precede their entering on probation any civil or military department they may desire to join.

134. Applications for admission on probation to the Staff Corps are to be accompanied by certificates in the following form: and *these certificates should also accompany the application for final transfer to the Staff Corps* (paragraph 136).

Certificate of the Commanding Officer.

Certified that of the regiment , a candidate for the Staff Corps, completed two years' service from the date of his first commission on the 18 , one year of which (or the whole period of which, as the case may be) was spent in India.

has passed an examination in the native languages by the higher standard, and has attained such a knowledge of his drill and duty as an officer of infantry (or cavalry) in all its branches, as to qualify him for the command of a company (or troop) in all situations: he also possesses a fair knowledge of the Articles of War and of the Queen's Regulations, as well as of the Bengal Army Regulations, besides having gained some general acquaintance with the organization and nature of the duties of all branches of the army serving in Bengal.

I further certify that during the period has served with this regiment, he has been attentive to his duty, and that his conduct has been in all respects unexceptional.

(Station and date.) (Signature of the Officer commanding the regiment.)

Appendix, No. 20.

Medical Officer's Certificate.

I certify that, to the best of my belief, is in good bodily health, and apparently well capable of undergoing the vicissitudes of service in India.

(Station and date.) (Signature of the Medical Officer of the regiment.)

Candidate's Certificate (to be made out in his own handwriting).

I hereby declare upon my honour as an officer and a gentleman that I have not, nor, to the best of my belief, has any person on my behalf or in my interest, directly or indirectly, received or agreed to receive any sum of money, valuable security, or other thing, in respect of my appointment to the Indian Staff Corps, and I promise honourably and unreservedly that I will not receive the same, or in any manner recognise or benefit by its receipt hereafter. In this declaration I do not refer to the sum which may be awarded to me by the Army Purchase Commission.

(Station and date.) (Signature of Applicant.)

135. When certificates of character and qualifications are granted to candidates differing in form from that laid down above, commanding officers must explain in a letter why they cannot adhere to the prescribed phraseology, pointing out the difference which exists; or, if necessary, they must substitute an explanatory letter for the certificate.

136. The application for final transfer to the staff corps is further to be accompanied by a certificate from the commanding officer, and one from the head of the department, if the qualifying appointment is a departmental one, as to the conduct of the candidate while on probation with the regiment or department, and also by a medical certificate of the form given in paragraph 134, to be obtained at the completion of the period of probation.

137. The period of probation has been fixed to enable an officer to show his aptitude for, and zeal in the performance of duties with Native troops. During this time a commanding officer should satisfy himself that the probationer's temper, general habits and qualifications are such as to render him an efficient officer in the Native Army; and he should employ him generally on all duties (paragraph 144), calculated to test his fitness for the Native Army.

138. At any time during the period of probation, it will be open to the commanding officer to represent to the Commander in Chief that he does not think the probationer, either from temper or other cause, suited for employment with Native troops; in which case it will be competent for the Commander in Chief (with the sanction of Government), if satisfied with the reason assigned, to direct the officer to rejoin his regiment, or, if he is in the local service, to do duty elsewhere. The same rule applies to probationers in departments.

139. An officer who fails at the expiration of one year's probation to pass a satisfactory examination, according to the tests laid down, will be remanded to his regiment, and his name struck off the list of probationers. Circumstances of a very special nature may, however, procure for an officer so situated a further extension of his probationary service, but under no circumstances whatever is it to exceed two years in all (paragraph 147).

140. An officer of a British regiment, who is actually on probation for the Staff Corps when his regiment is ordered home, may, if the regiment is to embark not long before his period of probation terminates, be allowed by the Government to remain in India in order to complete the period, pass the tests and join the Staff Corps, provided that fair reason for expecting him to pass the tests satisfactorily can be shown, and the application is supported by his commanding officer or the head of his department and by the Commander in Chief. The position of probationers is not affected by their regiments being moved to another Presidency.

141. Officers on probation for the Staff Corps who may proceed on leave to Europe, are held to have resigned their probationary appointment. This will also be the case if they are placed upon the half-pay list.

142. It is open to an officer at any period of his probation to apply for permission to revert to regimental duty, should he find the nature of the employment unsuited to him.

143. At the end of the period of his probation or within two months of its expiry, the officer under whom the probationer may be serving will apply for a Committee of Examination with the view of his being examined according to the tests laid down in paragraph 146 (*see* paragraphs 342–379, and paragraphs 1935–41 for departmental or civil employ). This Committee can only be assembled at the head quarters of divisions, district

tricts or brigades, and will be presided over by the general officer commanding, with two commandants of Native regiments, or one commandant and one second in command, as members; the members being selected from the cavalry or infantry according to the branch of the service to which the candidate belongs.

144. The Committee will give their opinion on the result of the examination in each portion of the test separately, and will conclude by stating that they consider the candidate qualified (or not, "as the case may be") for permanent employment with Native troops. They are to embody in the report a statement as to whether the candidate has had the opportunity afforded him of acting as adjutant on parade, or has been detached under a senior officer on escort duty, and whether he has been in the habit of frequently attending the orderly-room with the commanding officer, and thereby obtained a full insight into the system of the regiment.

145. The examination papers are to be prepared on foolscap paper, on half margin, and the Committee are to note in the margin, *in red ink*, their correction of any mistakes made by the candidate. The papers and report of Committee are to be sent to the adjutant-general, through the usual channel, who will transmit them to Government with the recommendation of the Commander in Chief.

146. The following are the tests for admission to the Staff Corps in virtue of qualifying appointments in Native regiments under the Commander in Chief, or the Government of India.

Native Infantry.

(*a.*) Knowledge of the native articles of war and the army regulations, particularly all such as affect the conduct, pay, pension, clothing, &c. of Native troops, which is to be tested by an examination of a somewhat searching character, consisting of not less than fifty questions and answers, all of which are to be recorded in the report of the examination.

(*b.*) Knowledge of the system pursued in the Native infantry, and especially in the regiment to which the candidate has been attached, as to the mode of investigating, and dealing with, offences, complaints, and petitions from the men; the manner in which the rosters for furlough and guard are kept; the deductions usually made from the men's pay on account of half-mounting or for other purposes, and the system of accounts followed in the corps, together with an acquaintance with all the forms in use.

(*c.*) Knowledge of every article of equipment used by the men of the regiment, their usual or fixed cost, mode of carrying them, &c.

(*d.*) Ability to act as adjutant on parade, to be tested on parade with a battalion; knowledge of reconnoitring and outpost duty, and ability to write a report of a reconnaissance. The reconnaissance report must be written in a legible hand.

Native Cavalry.

(*a.*) An officer nominated to the Native Cavalry will be required to pass the same tests, *mutatis mutandis*, as laid down for Native Infantry. He will, however, before being attached to a Native Cavalry Regiment, be required to furnish satisfactory evidence of his aptitude for riding.

(*b.*) In addition to all the points laid down for the Native Infantry, the Committee will report on the candidate's qualifications as regards a knowledge of cavalry drill, and of the system peculiar to the Native Cavalry in regard to purchase of horses, &c. He should also prove himself to be well acquainted with the system of stable management in the corps, the district whence horses are usually obtained for it, their prevailing defects and good qualities, their usual price, &c. He should also show himself to be possessed of some general knowledge of farriery, and of the diseases and injuries to which horses are liable, as well as their treatment.

147. The date of transfer of an officer to the Staff Corps will be that of his appointment on probation, provided he obtains no regimental or cadre promotion during his period of probation, in which case he is allowed the option of entering the Staff Corps from the day following his promotion, instead of from the prior date of his appointment on probation; no leave, except privilege leave, and leave to study the native languages, will be allowed to count as portion of the year of probation, but the date of final admission to the Staff Corps will not be affected on that account.

148. Commanding officers, heads of departments and civil officers are held responsible for the examination of candidates within the time allowed by paragraph 139, and for at once reporting any circumstances arising to prevent it (paragraph 1936).

149. An officer of the Indian Army who has served for a year in a staff appointment may be admitted into the Staff Corps without further probation, on complying with the

Appendix, No. 20.

other regulations laid down for officers of line regiments, and his admission will date from the general order appointing him.

150. Officers serving as probationers in departments or offices for which no entrance examination tests are laid down, must satisfy the Government as to their fitness for the Staff Corps, and must fulfil all the general preliminary conditions required in other candidates.

151. Officers are not exempted from passing the tests laid down for any appointment or department they may be transferred to, subsequent to their admission to the Staff Corps.

152. The promotion of officers of the Staff Corps is regulated as follows (*see* paragraph 153):—

(*a*). Officers, if not lieutenants, when permanently transferred to the Staff Corps, will be promoted to that rank; other officers will have the rank which they hold in their regiments.

(*b.*) Officers of 12 years' service, of which four shall have been in the Staff Corps, will become captains. After 20 years' service, of which six shall have been in the Staff Corps, they will become majors. After 26 years' service, of which eight shall have been in the Staff Corps, they will become lieutenant-colonels.

(*c.*) Five years' service in the Staff Corps as substantive lieutenant-colonel, will entitle the officer so employed to the brevet rank of colonel (*see* also paragraphs 169–173).

(*d.*) Colonels of the Staff Corps will rise to the rank of major general on the amalgamated list of colonels, and to the ranks of lieutenant general and general on the fixed establishment of general officers of the British Army (paragraph 167).

153. Leave of absence, excepting privilege leave, forms no portion of the qualifying service in the Staff Corps required for promotion from one rank to another under paragraph 152; but all authorised leave is included in the five years' service required for the brevet rank of colonel. Time passed when on half-pay, or when out of employment, or when doing general duty subsequently to removal from a staff appointment for inefficiency or misconduct, will not count towards promotion in the Staff Corps.

154. Officers of the Staff Corps not entitled to substantive rank are granted the brevet rank of captain, major, and lieutenant colonel, allowed to officers of the Indian Army in clauses (*c*) of paragraphs 174 to 176. But this system of brevet promotion will cease in its application to the several grades of the Staff Corps on the extinction of those grades among the officers of the Indian Army. Majors on the half-pay list of the Staff Corps are eligible for the brevet rank of lieutenant colonel by seniority, and colonels for that of major general.

155. All unemployed officers of the Staff Corps are at the disposal of the Commander in Chief. Whenever, therefore, an officer of the Staff Corps becomes unemployed, he will at once report himself to the Adjutant General, and also to the officer commanding the nearest military station.

156. Staff Corps officers cannot decline any employment they may be selected for, or throw themselves out of employment by resignation. Applications for permission to decline or resign under special circumstances will, however, be duly considered by the Government in the Military Department.

156 *a*. No officer of the Staff Corps can be removed from his appointment without the sanction of the Governor General in Council.

157. Officers of the Staff Corps of one Presidency may, with the sanction of the Government of India, hold appointments in any other Presidency other than appointments in the Army Staff Departments or Corps of the regular Native Army.

158. All officers joining the Staff Corps from British regiments are required to furnish the Adjutant General's Office with a statement of their services, in War Office Form, No. 360. They are also required to state whether they are married or not, and to furnish a statement in the form given in Appendix (A), signed by their late commanding officers. This latter statement is to be forwarded to the Secretary to the Government of India in the Military Department at Calcutta, and a copy of it is to be sent to the Adjutant General's Office at Simla.

167. The names of the officers of the Staff Corps shall be retained on the Indian List in italics until their death or retirement, for the purpose of regulating the promotion of the officers below them on that list (clause *d*, paragraph 152).

168. On the occurrence of a vacancy in the fixed number of general officers on the Indian List, specified in paragraph 160, whether among those who remain effective on that list, or among those whose names are merely retained in italics, and who shall be considered as forming part of the said fixed establishment, the name of the senior officer in each grade on the Indian List below that in which the vacancy may occur (with the exception

exception of the grade of lieutenant colonel), shall be moved up to the next higher grade; but in the case of the officers whose names remain in italics there shall be no actual promotion, the arrangement being limited to the transfer of the names for the purpose of regulating the promotion of those officers who remain effective on the Indian List; and the promotion of an effective colonel on the Indian List to the rank of major general shall in no case be affected by casualties among the general officers of the Staff Corps until the number of general officers to be added to the British Establishment under Clause 24 of the Royal Warrant of the 27th December 1870 shall be complete.

189. Officers of the Staff Corps, under the substantive rank of field officer, are allowed to exchange with regimental officers of the same rank, with the concurrence of the Government and the Commander in Chief in India, and subject to the confirmation of Her Majesty; but it is to be understood that the regimental officer must possess all the qualifications required by Staff Corps rules. In like manner exchanges may be permitted between officers of the Staff Corps of the different presidencies under the substantive rank of field officer.

190. When an officer of the Staff Corps wishes to exchange into a regiment of the line, he is to forward with his application a recommendation, signed by the Adjutant General, of his fitness for line service, and a certificate, signed by himself and countersigned by the commanding officer, or the head of the department under whose orders he may be serving at the time of application, to the effect that the exchange solicited and recommended does not originate in any regimental (or departmental) proceeding of any kind, or in any cause affecting the honour and character of the applicant, and that there are no grounds of personal objection which have, in the smallest degree, induced the application for the exchange.

198. Officers of the Staff Corps under the rank of major general, who may be considered unfit for employment, will be removed from the service by authority of Her Majesty, exercised through the Secretary of State for India, and will be placed upon half-pay or pension, provided that, in the latter case, they are entitled to pension, or, in the former case, they have served three years in India in the Staff Corps.

199. Officers on the half-pay list of the Staff Corps are eligible for re-employment on the effective list if their health permits of their return to India, and if the Government is desirous of availing itself of their service.

200. Officers of the Staff Corps compelled to retire to England on half-pay will be allowed the benefit of any rank they may attain within the leave granted to them.

SECTION VI.—STAFF OFFICERS AND EXAMINATIONS.

303. Officers of the Staff Corps and of the Indian Army, including the late Bengal Artillery and Engineers on succeeding to colonels' allowance will be considered to have vacated any appointments they may then be holding. They are, however, eligible for re-appointment or employment in any other capacities (regimental appointments excepted) at the discretion of the Government, and with the sanction of the Secretary of State for India.

342. Officers, whether of the Staff Corps or of the British (paragraph 133) or Indian Service, desirous of entering the departments of the Judge Advocate General, Military Account Department, Commissariat, Stud, Survey, Civil, or Foreign (*see* paragraphs 1935-41), must qualify according to the test laid down for each department in the following paragraphs.

Department of Judge Advocate General.

343. The examination for permanent appointment to this department consists of:—

(*a.*) A *vivâ voce* examination before a Committee as to the candidate's knowledge of military law.

(*b.*) Replies in writing to a series of questions which will be propounded to the candidate by the Deputy Judge Advocate General.

344. The Committee of Examination will assemble at divisional or district head quarters, and will be composed of the Deputy Judge Advocate attached to the division or district, and two selected field officers, and their report will be forwarded to the Deputy Judge Advocate General.

345. The examination must be conducted so as to show the amount of the candidate's knowledge of the different Mutiny Acts and Articles of War, the Queen's Regulations, the Bengal Army Regulations, and of the Indian Penal Code. The candidate's capacity

Appendix, No. 20.

to review the proceedings of minor courts martial will be tested by questions put to him by the Committee, his fitness to conduct the proceedings of a general court martial being ascertained in the same manner, and by requiring him to frame a skeleton charge under any specified article, and to write out in their presence the proper form to be observed in recording the proceedings of such court martial, entering the punishment awardable on conviction of the charge indicated.

346. The series of questions to be propounded by the Deputy Judge Advocate General, will be prepared at army head-quarters, under the orders of the Commander in Chief, and sent to the Committee, in whose presence they must be replied to, and by whom they, as well as the candidate's replies, will be forwarded with their proceedings. The examination papers are to be prepared and corrected, as laid down in paragraph 145.

347. This examination will precede the period of probation (paragraph 133), which will be terminable after one year's performance of duty, on a satisfactory report as to the probationer's practical qualifications from the officer commanding the division or district to whose staff he is attached, and the Deputy Judge Advocate General.

Appointments in the Military Account Department.

348. Under this heading are included all situations of whatever kind (save that of regimental paymaster) held in the departments connected with the pay accounts or audit accounts of the army or of its establishments. No appointment on probation will be made without proof that the candidate is a fair accountant.

349. On an officer being selected as a probationer (paragraph 133) he will, in the first place, appear before the nearest divisional paymaster, who will examine him as to his general knowledge of accounts and book-keeping, and also question him as to the extent to which he has mastered the pay regulations.

350. The certificate of the divisional paymaster, in the following form, is to be forwarded to Government through the Controller of Military Accounts, and if it is found to be satisfactory, the candidate will be appointed on probation:—

"Certified that , a candidate for employment in the department of Military Finance, appears to me to have a good general knowledge of accounts and book-keeping, and that, on a *vivâ voce* examination, his answers to a series of questions put showed that he possesses a fair acquaintance with the pay code."

351. The probation will extend over a year, and will be passed at the Presidency. During this period the probationer will be employed under the orders of the Controller of Military Accounts, and he will be attached in succession to the different branches of the Controller's Department.

352. At the end of this time, on the Controller reporting that the candidate has been regular in attendance, and gives promise of being useful in the department, the probationer will appear before a Committee composed of the Controller, the Military Accountant, and a Pay Examiner.

353. The examination will embrace the practical branches of arithmetic and book-keeping, as well as questions involving a ready acquaintance with pay and audit rules, and the general principle on which these rules are based. It will be conducted by means of a series of written questions, and by testing the ability of the candidate to check selected abstracts and bills.

354. If the report of the Committee be favourable, the candidate will be confirmed in the department, and will be attached to an office at the Presidency or to one of the larger divisional pay offices.

Appointments in the Commissariat Department.

355. The period of probation in this department will be one year (paragraph 133); but, before a candidate can be appointed as a probationer, he must pass a preliminary examination; and, before he can be permanently appointed to the department, he must pass a final examination on the expiry of the year of his probation.

356. The subjects of the preliminary examination will be:—

I. The rules of arithmetic, including vulgar and decimal fractions, involution and evolution, mensuration and the computation of areas and solid contents, and the system of book-keeping by single and double entry.

II. He will be required to read aloud correctly and with tolerable ease three Urdu or Hindostani papers. These papers are to be taken from official records at random, and written in the Persian character by different persons in fairly legible running hands. After having read them aloud, the candidate must explain their contents in English correctly.

III. He must translate, without assistance, from English into Urdu and Hindi, an instruction to a subordinate commissariat officer, or other official paper to be furnished

furnished by the Examining Committee. The translation must be precise and correct in meaning, and perfectly intelligible to a native, tolerably correct in grammar and spelling, and free from any very bad errors of idiom.

IV. He must dictate with some fluency the translation into Hindostani of an English letter or other official paper also to be furnished by the Examining Committee, whereof the translation is to be written down exactly as dictated. The dictated paper must be intelligible and correct in meaning.

V. He must undergo a thorough and careful test in conversation with two or three natives in such manner and to such extent as shall suffice completely to satisfy the Committee as to the degree of his power of understanding natives of different classes, and of making himself understood by them both in common conversation and in the usual course of departmental business. This test is in addition to the higher standard examination.

357. The preliminary examination will be held at the head-quarters of divisions or districts, and will be conducted by the senior commissariat officer and the executive engineer or officer acting as such. The committee will test the candidate's acquaintance with arithmetic by requiring him to show not only the answers to the arithmetical questions, but also the details by which they are worked out. He will prove his knowledge of the fundamental rules of book-keeping by furnishing written replies to a series of questions which will be given to him by the examiners. The examination in the native languages will be conducted by the board of examiners or by other qualified committee.

358. The probationer will have to undergo his final examination at the expiration of his term of probation. The heads of the examination will be:—

I. His acquaintance with his responsibility and duties in the care and custody of the cattle and stores under the charge of a commissariat officer.

II. His knowledge of the system of procuring supplies by departmental agency or contract, as circumstances may require, and the rules affecting the preparation of contract deeds and the liability of contractors.

III. His acquaintance with the mode of rationing British troops, and the different articles comprising their rations.

IV. His acquaintance with the mode of rationing Native troops, and the circumstances under which rations are issued to them.

V. His knowledge of departmental rules, and of the forms of returns furnished periodically to the heads of his department.

VI. His ability to draw up with accuracy estimates and average statements of the cost of victualling troops and of feeding cattle.

VII. His knowledge of the equipments of cattle and stores required for the Cavalry, Artillery and Infantry, with reference to their numbers, and the distance to be marched.

VIII. His knowledge of the animals in use for food, as to their breeding and where the best are produced; where the best transport animals are found, and the weight they respectively carry.

IX. His facility in reading Gomashtahs' accounts as presented in Persian or Hindi, and in writing purwanahs in the above languages.

X. His ability to prepare monthly disbursements from the checked accounts of native agents with an account current, and his knowledge of the vouchers required to support charges under the different heads of expenditure.

XI. His acquaintance with the general system of accounts in the Commissariat Department.

359. The examination in the final test will be held at the Presidency, and will be conducted by a committee composed of a selected civil officer, the Deputy Commissary General of the Circle, and the Examiner of Commissariat Accounts. A selected field officer of a British regiment will be associated with the Committee in that part of their examination which relates to the rationing of British troops.

360. On nomination to the department on probation, an officer will, under the orders of the Commissary General, proceed at the public expense to join one of the first-class executive charges for six months for the purpose of learning the executive duties of the department. At the expiration of this time he will proceed to the office of the Examiner of Commissariat Accounts, and will remain there three months to learn the system of audit; for the remaining three months he will join the Presidency Office, and will then appear before the Committee for his final examination.

Appointments in the Stud Department.

361. The period of probation in this department will be one year (paragraph 133). There will be no preliminary examination. At the expiration of the term of probation the probationer will be examined by a Committee, who will forward their report to Government for approval.

362. The Committee will be composed of the superintendent, or, in his unavoidable absence, of a deputy superintendent, as President, with the next senior available stud officer, and a selected field officer, or Captain of Cavalry, as members. A selected veterinary surgeon will be associated with the committee during the examination of the candidate under heads 5, 6, and 7 of paragraph 365.

363. An officer appointed on probation will join a stud depôt, and the deputy superintendent of the stud will be required to see that he is punctual in attendance during office hours, that he attends stables regularly, that he accompanies the depôt officer in his tours of inspection of the stud stock of the breeding districts, and that he attends all purchases of the same by the deputy superintendent of the stud.

364. The deputy superintendent will furnish the Examination Committee with a certificate that the probationer has fulfilled the foregoing conditions. He will also state whether, from his personal observation, he considers him likely to make a good stud officer. The qualities to be considered in forming this estimate are intelligence, industry, activity, health to enable him to bear considerable exposure, willingness to learn, a fondness for, and a knowledge of, horses, and temper and disposition likely to render him popular with natives.

365. The subjects of examination will be:—

I. Arithmetic, including vulgar and decimal fractions, and the system of book-keeping by single and double entry.

II. His acquaintance with his responsibility and duties in the care of stud cattle and stores under the charge of a depôt officer.

III. His knowledge of the system of procuring grain and fodder for the stud cattle, both by contract and by departmental agency.

IV. His knowledge of departmental rules and of the forms of returns furnished periodically to the heads of the department.

V. His knowledge of the management and feeding of young cattle on admission into stud stable.

VI. His knowledge of what constitutes unsoundness in horses, his ability to age them from inspection of their teeth, his ability readily to discover external injuries in any way received by stud cattle, together with some general knowledge of the veterinary art, and of shoeing.

VII. His knowledge of the qualifications of horses, their power, shape, action, &c., and for which branch of the mounted service they are best fitted.

VIII. His ability to make out estimates and the average cost of the feed of cattle.

IX. His ability to prepare monthly disbursements from checked accounts of Native agents, with an account current, and his knowledge of the vouchers required to support charges under the different heads of expenditure.

366. The knowledge required under heads 6 and 7 of above paragraph will be tested practically, the probationer being required to class a stable of colts to the different branches of the service, rejecting such as he thinks unfit, and making any remarks regarding any unsoundness or peculiarities in any animal. The accuracy and judgment of this classification will be reported on by the Committee.

367. The remaining subjects for examination will be tested by requiring written answers from the candidate to a paper of questions which the Committee will previously prepare.

Appointments in the Survey Department.

368. For this department the period of probation will be one year (paragraph 133). If, in any case, strong special reasons under an extension of this term are expedient, application should be made through the Surveyor General, or the head of the department in which the probationer is serving, in full time to permit of orders being passed before the period of probation expires.

369. Every candidate will be required to furnish a certificate from his commanding officer (paragraph 134), and from a surgeon a certificate of the following form:—

"I certify that, to the best of my belief, is in good bodily health, has good eyesight, and is apparently well capable of undergoing the vicissitudes of service in India."

370. There

370. There will be distinct examinations, both preliminary and final, for the topographical and revenue surveys (including the topographical branch of the trigonometrical survey) and for the great trigonometrical survey. Appendix, No. 20.

371. For the topographical and revenue surveys, the preliminary examination will embrace the following subjects:—

I. Arithmetic, including involution and evolution, arithmetical and geometrical progression, proportion, or rule-of-three, vulgar and decimal fractions, logarithmic calculations and mensuration of surfaces.

II. Elementary geometry, first four books of Euclid.

III. Algebra as far as quadratic equations, inclusive.

IV. Elements of plane trigonometry.

V. Topographical, mechanical or civil drawing, to be executed in the presence of examiners.

372. Artillery officers and officers holding certificates of qualification granted at the institutions of Addiscombe and Woolwich, or the Staff College, or Civil Engineering Colleges, or who may have passed an examination in surveying according to the army standard, will be exempted from undergoing any preliminary examination, and will, on being nominated, at once enter as probationers and be attached to survey parties to learn their practical duties in the field and during the recess.

373. The final examination for the topographical and revenue surveys, to he held at the close of the period of probation, will comprise :—

I. The satisfactory execution, unassisted, of a small area of country, including the computation and entire mapping involved in the same.

II. Perfect use and knowledge of all the instruments employed in the department, and adjustment of the same.

III. The elements of astronomy, sufficient for ascertaining time, azimuth, and latitude.

IV. A fair knowledge of all rules in force for the general conduct of the survey establishments in the department to which the probationer is attached.

374. Each candidate will also be required to produce a certificate of having passed the higher standard examination in any vernacular language prescribed by the Government under which the probationer is employed.

375. The examination for the topographical and revenue surveys will be conducted by the head of the department in which the probationer is serving, aided by such professional officers, to the number of two, as may be available. Whenever desirable, sealed examination questions may be transmitted in view to their being answered by the probationer in the presence of the officer in charge of the survey party to which he is attached, in lieu of obliging him to appear at departmental head-quarters for the purpose of examination.

376. For the geodesical branch of the trigonometrical survey, the preliminary examination will be theoretical only, comprising mathematics up to conic sections and the principles of construction of instruments in common use. The final examination will be theoretical and practical, embracing analytical geometry of three dimensions, statics, dynamics, astronomy, the construction of the instruments of the great trigonometrical survey, and a practical familiarity with their management. Candidates will also be required to produce the certificate required by paragraph 136.

377. The examiners will be the superintendent of the great trigonometrical survey, with any two available officers of the department at his head-quarters.

378. The degree of proficiency attained by candidates will be ascertained in both branches of the Survey Department by written questions, the examination papers being framed at departmental head-quarters.

379. The certificates laid down in paragraphs 134, 136, and 369, must, on all occasions, be forwarded by officers, of all services, entering the Staff Corps from the above departments, not only with the applications for appointment on probation, but also with those for final admission to the Staff Corps.

SECTION XVII.—CIVIL AND POLITICAL AUTHORITIES.

1935. A candidate for civil or political employ, qualifying for admission to the Staff Corps, must have been previously attached, for a period of not less than one year, to a Native regiment, but such period may form part of the two years' regimental duty with a regiment required by paragraph 129. He will be required to produce the certificates described

Appendix, No. 20.

described in paragraphs 134–6, and a certificate from his superior officer testifying to his efficiency and good conduct, and especially to his conciliatory demeanour towards the Native soldiery and other people of the country with whom he has been brought in contact.

1936. The period of one year, reckoned (paragraph 133) from the date of the first half-yearly examination held subsequent to appointment, is fixed as the limit within which an officer, admitted on probation for civil or political employ, will be required to qualify himself to undergo the examinations hereinafter mentioned, on passing which he will have a claim to have his services retained, and he will then, under the orders of the Government in the Military Department, be appointed to the Staff Corps.

1937. Examinations will be held half-yearly, in October and April of each year. A candidate may appear at the first examination held after the expiration of the first six months of his probation, and, if he fail to pass, must again appear at the next examination six months later. A candidate failing to pass at the first examination held after the expiration of his year of probation will be remanded to his regiment.

1938. The head of the Administration will, not less than a month in advance, fix the exact date on which, and the place where, the examinations will be held. He will also, a fortnight before the date fixed for the examination, appoint a Committee to frame the questions, conduct the examination, and determine the marks obtained by each candidate.

1939. The subjects and books for the examination of candidates for employment in the civil administration of the non-regulation provinces, or as cantonment magistrates, are as follow:—

Indian History.—The last edition of Marshman's "History of India."

Political Economy.—Fawcett's "Manual of Political Economy."

Jurisprudence.—Bentham's "Theory of Legislation."

1940. Every officer in civil employment will, in addition to the above examination, and notwithstanding his appointment to the Staff Corps, be required to undergo the local and departmental examinations prescribed for covenanted civil servants in the province in which he is serving.

1941. Candidates for political employ are required to pass an examination in the following books and subjects, in addition to those detailed in the preceding paragraph:—

(1.) "Wheaton's International Law."

(2.) "Aitchison's Treaties," more particularly those portions relating to the province in which the officer is serving.

(3.) The "Persian" language. (In British Burmah the test will be the higher standard in Burmese.)

The production of a certificate showing that the candidate has passed an examination in Persian elsewhere, will exempt him from further examination in that language.

1942. For the examination in the Persian language, the candidate will be required to—

(1.) Translate a passage of Persian into English.

(2.) Translate a passage of English into Persian.

(3.) Hold with moderate fluency a conversation in Persian with some proficient in that language to be appointed by the Committee.

(4.) Read a Persian manuscript with a fair amount of facility.

To each of the above four tests a maximum of 20 marks will be allotted, and the attainment of not less than 45 marks in the aggregate will entitle the candidate to pass.

1943. As a general rule, military officers will be appointed to the Political Department from among those who are already in civil employment, and every officer so transferred will be required to pass, within one year from the date of his transfer, the additional examination in International Law and Indian Treaties prescribed for the Political Department, failing which he will forfeit his appointment.

1944. The case of any officer, who has been formerly in civil or political employment, and who, having quitted such employment, may hereafter be reappointed to it, will be specially dealt with, as the circumstances of the case may require.

Appendix, No. 21.

PAPERS handed in by Mr. *Nowrozjee Furdoonjee.* Appendix, No. 21.

STATEMENT regarding the Enhancement of ASSESSMENT in the BOMBAY PRESIDENCY.

I WILL put in the figures, which the Select Committee require, regarding the amount of the assessment which has lately been enhanced by Government in the Bombay Presidency. I quote the following figures from the report of Mr. Beyts regarding the revision of assessment of the Soopa Talooka in Guzerat, dated 22nd November 1868 (p. 57).

	Acres.
Area of Government land in year of settlement, 1867–68 - - -	54,523
	Rs.
Assessment according to old rates on area in 1867–68 - - -	2,45,293
Assessment according to experimental rates introduced in 1867–68 -	3,18,432
Proposed revision - - - - - - - - - - -	3,01,526
Increase according to experimental rates introduced in 1867–68 - -	73,687
Increase according to proposed revision - - - - - -	56,488
Per-centage of increase of experimental revision - - - -	30
Per-centage of proposed revision - - - - - - -	23

Analysis.

In	17	villages the assessment has been enhanced from -	31	to 104 per cent.
„	48	ditto - - - - - - - - -	11	to 28 „
„	9	ditto - - - - - - - - -	2	to 8 „
„	4	ditto - - - - (reduced from) -	½	to 9 „
Total	78	villages.		

In Madeh Talooka of the Sholapoor Collectorate, which was re-assessed in 1871, the enhancement of assessment was, on an average, 77 per cent. I give the following figures and remarks from the report of the Survey and Settlement Commissioner, Colonel Francis, dated 14th March 1871:—

	Cultivated Land.	Waste Land.	Total.
	Rs.	*Rs.*	*Rs.*
Assessment according to proposed rates - - - -	1,77,933	115	1,78,048
Assessment according to present rates - - - -	1,00,531	48	1,00,579
Increase - - - *Rs.*	77,402	67	77,469

"The average rate being 9 annas 4 pies per acre. Above twenty thousand of this increase represents the assessment on the excess in culturable area of the present over the former survey, and Mr. Grant puts this down under the head of 'concealed cultivation.' It may literally be said to be so, but, as it has been held for a lengthened period by the cultivators, it forms in reality part of the area on which the former assessment has been paid, and cannot consequently be considered to be extra or new land, now made over to them, which is what Mr. Grant represents it to be, and no set-off from the new assessment can therefore be fairly made on this account."

This rate is considered too high for the Deccan by the highest authority, as appears from the following passage of the report made to Government, by Mr. W. H. Havelock, Revenue Commissioner, S. D., dated 13th April 1871.

"But the Revenue Commissioner thinks 77 per cent. a high total enhancement for the Deccan, which is liable to excessive fluctuation of rainfall, and that if the rate is to be taken as a precedent for revision in other cases, it would be well to inculcate a caution, and to keep the scale nearer to 50 per cent., as in Indapoor, which, over a large tract of country, will give a sensible increase of revenue, and will lessen the risk of over-assessment in any case where the recent general fall in the value of money may be so checked as to render it difficult for the ryots to meet a high enhancement in bad years. It was one of the cardinal

Appendix, No. 21.

virtues of the survey assessment hitherto that it left profits enough in good years to enable cultivators to meet the comparative losses of a year of drought or other failure."

In the Bhimthuree Talooka the assessment has been enhanced 73 per cent., as appears from the following figures and remarks contained in the Report of Colonel Waddington, dated 12th July 1871:—

"STATEMENT, showing the effect of the proposed Rates, contrasted with the last year's payments in 48 Villages of the Bheemthuree Talooka.

	Cultivated Land.		Waste Land.		TOTAL.	
	Acres.	Assessment.	Acres.	Assessment.	Acres.	Assessment.
		Rs.		*Rs.*		*Rs.*
Assessment according to proposed rates - - -	186,776	1,28,971	2,019	871	188,795	1,29,842
Assessment according to present rates - - -	164,618	74,222	1,884	644	166,502	74,866
Increase - - -	22,158	54,749	135	227	22,293	54,976

"This shows an increase of 54,976 rupees, which is equivalent to 73 per cent. on the last year's payments; but it must be recollected that a considerable portion of this increase is on account of land hitherto held in excess of former recorded area, which amounts to 22,293 acres. The average rate per acre by the proposed rate is 11 annas, at which rates the land found to have been held in excess will represent 15,326 rupees, so that the actual increase due to the imposition of a higher rate may be said to be 39,650 rupees, which will give an increase of 53 per cent. over present assessment."

There are in all 48 villages in the above-mentioned district. The increase of assessment ranges from 94 to 166 per cent. in 11 villages, from 51 to 92 per cent. in 29 villages, and from 16 to 86 per cent. in the remaining eight villages.

It appears from Government Resolution, dated 25th January 1868, that, owing to the extremely heavy rates of enhancement of assessment imposed in Chickle and Bardolee, the ryots relinquished their lands in these districts, and Government were therefore obliged to reduce the rates.

MEMORANDUM on the working of the FOREST DEPARTMENT.

THE Forest Department, though the latest born of the departments, has, in the Thana district especially, been exacting and oppressive to a degree unequalled by any other department. Not only have the guaranteed rights of private proprietors in the forest, reserved by them, been interfered with, but all manner of exactions and levies of a miscellaneous kind have been made without any legal authority; the result has been that a large number of suits have been brought against Government, in most of which the acts of the Government officers have been condemned by the judges, and the Government saddled with the costs. As only a few persons have the courage and means to fight their disputes in civil courts, the illegal oppressions in the large number of cases continue with more or less force even to this day. The full details of the oppression exercised by the forest officers, backed by the revenue and magisterial agency of the Government, will be seen from the following summary, which is too plain to need any further comment.

Witness No. 31, from Combergaum Talooka, of the Tanna district, states that, by the custom of the country and the guarantee of Government, when a rate has been once fixed upon revenue-paying land, firewood and timber trees, which the ryot plants in his own lands, belong, like other produce, to him. The British Government has all along professed to act on this understanding (*vide* Proclamation, No. 108 of 1847, and Bombay Government Resolutions, No. 49 of 1847, and No. 1240 of 1868, as also joint rules, clauses 1 and 10). Of late, however, Government officers in the Forest Department have shown a disregard of these guarantees, and disputed the ryot's claim of property in his own trees.

In those Talookas of the Tanna district which were settled before 1863-64, the prohibition to cut timber growing in the ryot's own lands extends to teakwood and blackwood only. In the Talookas, which were subsequently settled, viz., Dhanoo, Shahpoor, and Waddeh, the ryots were told, at the time of the settlement, that they should not cut teak and blackwood growing in their own numbers without the permission of Government, but that they might cut all other trees without asking for such permission. In spite of this assurance given at the time of the settlement, the prohibition has been extended to every variety of timber trees. By a subsequent circular it has been formally declared that the ryot is not the owner of the timber trees growing on his land. This subsequent Circular was not

not explained nor published for the information of the people. This was made evident in one case of the Mamlutdar of Dhanoo, Mr. Trimbak Sadasheo, who was charged with having negligently caused loss to Government by allowing the ryots to cut their own trees against the orders contained in this unpublished Circular. The inquiry was held before Mr. Trevor, first assistant collector, in which the Mamlutdar's innocence was established, chiefly by the favourable testimony of village patels and tullatees, who stated the particulars of the assurance given to them at the time of the settlement, and denied all knowledge or publication of the prohibitory Circular. The Circular Order, No. 100, dated 6th March 1866, expressly affirms the ryot's right in his own trees, by declaring that if any person wanted to cut down timber growing on land not his own, permission would be given to him, with the consent of the owner of the number. This old Circular could not be repealed by the unpublished private Circular, No. 1,004 of 1866, from the Survey Department, referred to before.

In the year 1869-70, the right to remove dry wood from Government forests was sold by auction. The auction purchaser was subsequently, by an order of the Deputy Conservator of Forests, permitted to remove dry wood from the ryots' numbers. The ryots of Shapoor accordingly sent a memorial to Government, remonstrating against this oppressive order, which memorial was published in the local papers of Tanna, that the matter might be reported to Government through the reporter on the native press, but no notice was taken by Government of this complaint, and the oppression continues. Independently of the circular orders before referred to, the ryot's claim to the trees growing on his land is good both in law and equity. It takes 40 years for timber trees to grow to a condition fit for cutting. During all that time the owner bears the loss of the ground under the trees planted by him, and pays the full Government assessment; and yet, when the trees grow, and are in a condition to be cut, the Government step in and prohibit the owner from deriving the full benefit of his investment. Such a demand cannot but appear to be unjust and unreasonable.

Great oppression is at times exercised by the unauthorised orders of the forest officers, obedience to which is secured by criminal prosecution, and convictions before the subordinate magistrates.

In the year 1863-64 Mr. Ellis, late Revenue Commissioner, issued an order that in the case of those private forests, from which it was customary to exact a share of the produce of the trees growing on them, the Government should give up its right for ever to interfere with the owner of such land on receipt from him of 10 years' value of the estimated produce. Further, it was ordered that in future Government forest numbers, in which teak and other timber trees of full growth were found, should not be given to private individuals. If, however, any Government number contained only the inferior kinds of timber, a valuation should be made of the teak and blackwood trees, if any growing on it, and the remaining inferior kinds of trees should not be valued, but should become the property of the ryots who took up the forest number from Government. Rules were framed by the Collector of Thana in accordance with this Circular; but instead of confining the two last rules to Government numbers, they were made to extend to land which was the ryots' private property, and lists of timber trees of all kinds were made of all forest numbers, whether belonging to Government or to private persons.

Two years after, when the Government had received the commutation value of the 10 years' produce for the forest numbers, which were the private property of the ryots, so far from ceasing to interfere any further with the numbers so settled, its forest officers required that the ryots should not, without their permission, cut timber from trees growing on their own lands, if the trees were not included in the lists made for valuation purposes. The result was that a suit was filed against Government by a forest proprietor, which was decided by the assistant judge of Tanna in March 1869 against Government, and this decision was upheld by the High Court in December 1872. Notwithstanding the result of this suit, the Government officers still interfere with the ryots' management of numbers settled under the 10 years' commutation, but poor people are oppressed and obtain no redress.

Up to the year 1869-70, a practice obtained of levying a small fee for written passes, or permission to cut timber from private forests, and, if the pass was not shown, the timber was confiscated as belonging to Government, and the party that cut the timber was criminally prosecuted. The levy of this fee, and the confiscation, were both illegal, and the illegality was established in a suit brought against Government by a man from the Bassein Talooka, and in consequence of the decision in this suit, the payment of the fee was made optional.

In the Southern Konkan all the rights of the State were given away to the people by a proclamation issued by the Collector, Mr. Dunlop, in 1851. The Bombay Government, at the recommendation of their local officer, attempted to cancel this grant by issuing another proclamation, but it has been now finally decided by the Bombay High Court that the second proclamation has not cancelled the first (*see* Bombay High Court Reports, Vol. VIII., pp. 1-6). Notwithstanding this decision, the officers of Government are taking advantage of their position, and are ruining the people by expensive litigation. Government has no right in any forests except those reserved by the proclamation issued by Mr. Dunlop. This has been decided by the Secretary of State for India, and yet the Bombay Government and its officers are oppressing landholders throughout the country; and heavy suits are pending before the High Court and the District Court in consequence. The Conservator of forests induced several landholders in the Bombay Presidency to enter into agreements, agreeing to give up two-thirds of their own forests and to remain content with one-third. This

Appendix, No. 21.

in itself was irregular and illegal; for, as Government had no right to cancel their first notification, they had no right to procure agreements from private landholders, and to convert men from full into part owners. In one case, a man named Naro Ballal Athawley, had entered into such an agreement whereby he had consented to become owner of only one-third of the produce of certain forests which had till then belonged entirely to himself. There was no legal consideration for his agreement. But there can be no question that he was at least part owner to the extent of a third of the produce. Some of the villagers alleged that the said Naroo had cut some wood in this forest, and, on their evidence, he was on the 2nd July 1867 convicted of theft, and sentenced to three months' rigorous imprisonment and a fine of 150 rupees, which sentence was inflicted by the district magistrate. Now, in this case there was no criminal offence at all, for even if Naroo had cut the wood, at the most it might have been deducted from his share, and yet he was condemned to jail with hard labour for three months. In this case, before the man could get copies of the proceedings, the whole sentence had been suffered, and there was no time to appeal to the High Court. Under the present code of criminal procedure there can be no appeal at all in such a case. In another case, the Mamlutdar of Dapooree convicted several persons for cutting wood belonging to the landlord of the village of Kharaoten, and punished them as criminals, and advertised the wood for sale. A lawyer's notice was then served on him, when he quietly made over the wood to the owner, who had to undergo heavy expense in defending some of his own men in the first case, and in getting legal advice in the second.

In the village of Danee Limra, near Ahmedabad, several poor villagers have recently been oppressed and heavily fined at the instance of the forest officials. These ryots had purchased from Government the trees growing on their fields, and yet they were prosecuted and fined for cutting their own trees. In December last, Kisori, a cultivator of the village of Pusonje in Duskroee near Ahmedabad, was fined 50 rupees for cutting off the branch of a tree of the value of a few annas. Four cultivators of the village of Muthakulee, in the same district, were fined 50 rupees each for cutting wild Neem trees. In confirmation of my complaint, I will quote the testimony of a Government officer of special experience, employed in the Deccan. Mr. Bell, first assistant collector of Poona, in his report to Government, says:—

"It seems to me that the Forest Department, in the use they make of their establishment, aim too much at the restriction of the rights of outsiders to cut, or in other words, at the maintenance of a monopoly, and not enough at the improvement of the jungles they have in their charge. Their peons and inspectors turn their attention more to inquiring where Bapoo or Rama got the bundle of firewood he carries home on his head, than to the dressing of promising trees, and clearance of the underwood which chokes their growth."

Faults of the Revenue Survey.

The following is a correct description of the faults and shortcomings of the New Revenue Survey as conducted in Rutnagherry, and other districts of the Bombay Presidency.

Section 27 of Bombay Act I., of 1865, provides for the preparation of "a record, showing the area and assessment of each field, and containing all necessary information in regard to landed tenures, and the obligations, rights, interests, and circumstances of the various classes of the community." So far at least as the Southern Konkan is concerned, no such record has been prepared and published, so that the rights and interests of the people have not been fixed or recorded as they ought to have been.

There are cases in which the same land has been entered in the names of three different persons on three different occasions during the survey. In other cases without any inquiry into the rights of the different classes of tenants, persons who were cultivating land only for one year, and who had no proprietary in the soil whatever, have been entered as occupants thereof to the detriment of the proprietary interests of the land-owners. These facts will be borne out by the survey papers of the village of Shevren in the Veslivi Turf, and other villages in this Peta; and to the survey records of the Khed Mahal of the present Chiploon Taluka.

That there are many kinds of land tenures, and various classes of tenants, has been admitted; but the Revenue Survey Department has sought to invest them all with an indefeasible tenant right without giving any compensation to the superior landlords.

Even the measurement has not been properly made in the case of villages along the coast, where the Kulâragi and Dharekari tenures principally prevail, the greater part of the lands are warkas or rocky lands fit for the cultivation of inferior kinds of cereals and pulses. No boundary marks of fields have been laid down in the case of warkas lands, which have been divided into lots or numbers of 50, 75 or 100 and more acres, assigning no definite boundaries of people's holdings; so that, for all practical purposes, the present survey, which has cost so much time, trouble, and annoyance to the people, is practically of no use whatever. Such lands have been entered by guesswork in the survey papers, and numerous errors have occurred in consequence. This will be made evident by an examination of the village records by an independent authority. Even in cases where the ryots have commenced to pay Government the amount of their assessments according to the mode prescribed by the Survey Department, they are not certain of the precise dimensions and boundaries of their holdings; and the proportion of warkas to other lands in this district being as ten to one, the present measurement and recordation, and demarcation, have failed

to

to effect one of the primary objects of the survey. That the measurement of warkas lands has been imperfect is now all but generally admitted. (*See* Col. Francis's deposition in the Ambergan case.) But no redress has yet been given in consequence of this material error.

KOWLEE TENURE.—Even old contracts have been set at naught by the Survey Department; as in the case of certain old Kowls. Section 25 of the Bombay Act provides that assessment may be levied on lands liable thereto, "provided that it shall not be leviable from any land held and entered in the land registers as wholly or partially exempt from payment of land revenue, except to such an amount as is in accordance with previous practice, or any law which has been or may hereafter be enacted relating to land so held." Now, Inam or rent-free lands are, of course, not amenable to the land-tax, but Kowli and lease-hold lands have always been, and ought to be, assessed according to the terms of the Kowls or leases. This has always been the mode of the assessment of such lands, both under the former Governments and under the British Government. In fact, the Survey Department cannot give retrospective operation to Bombay Act I. of 1865, and abridge grants which have been hitherto upheld and respected by the British Government. As one of the examples to prove the fact of such inequitable and illegal assessment, I would refer to the case of the Kowli lands of the Mehendalés of Rohe in the Rajpoori Talooka of the Kolaba Collectorate, decided by the High Court on 19th February 1873.

Revenue Establishments.

Rough Outline of a Scheme for the Entire Separation of Executive and Judicial Functions in the Bombay Presidency.

Existing Establishments.		Proposed Establishments.	
	Rs.		*Rs.*
2 Revenue and Police Commissioners, on a monthly salary of 3,800 rupees each	91,200	2 Revenue and Police Commissioners, on 2,000 rupees each	48,000

Appendix, No. 22.

DETAILS of PUBLIC WORKS in *Travancore* for the Year 1870-71.

ENGINEER DEPARTMENT.

THE following is the Report furnished by Mr. Barton, the chief engineer, on the operations of the department under his charge:—

1. "I have the honour to report on the administration of the Public Works Department for the year 1870-71, M. E. 1046.

2. "There has been again a steady increase over past years in the operations of the department, and this year I have to record the progress of several large and important works, and the commencement of others, which no doubt must soon have a beneficial influence in assisting communication and in developing the resources of the country.

3. "A comparison of the abstract statement of expenditure on public works for the current with that of the past year will be convenient here.

Abstract of Statements.

	1869-70.		1870-71.	
Repairs and Maintenance:	*Rs.*	*Rs.*	*Rs.*	*Rs.*
Communications	68,505		87,565	
Civil buildings	3,763		4,307	
Irrigation works	2,914		12,620	
Military buildings	2,314		948	
Miscellaneous public improvements	2,747		2,166	
		1,06,343		1,07,601
Original Works:				
Communications	3,72,404		4,92,588

Outstanding advances		1,03,541		1,09,964
Stock		81,418		91,924
Tools and plant		40,208		74,723
TOTAL *Rs.*		10,99,586		12,66,885

4. "It will be seen that in the outlay for maintenance, there has been an increase of some 20,000 rupees on communications; a slight increase on public buildings.

5. "A large decrease of irrigation works, accounted for by the absence of such heavy floods as were experienced in the previous year.

On Original Works.

6. "There is an increase of 94,400 rupees, which will be fully accounted for by an examination of the detailed statement of works.

7. "The expenditure on military buildings and irrigation works is about the same.

8. "In the item of Miscellaneous Improvements a decrease of 28,000 rupees, accounted for by the absence during the current year of such expenditure as lighting the public roads, fitting up Durbar Hall, &c.

9. "Attached to this report will be found the usual tabulated statements.
(A.)—Receipts and disbursements of the department during the current year.
(B.)—Detailed statement of expenditure on each work.
(C.)—Abstract of Statements A. and B.

10. "I will now make such notes as may illustrate the general progress upon the more important works upon which the Engineer Department has been engaged.

Repairs.

11. "Under the head of Repairs, an item of 9,000 rupees for macadamising part of the Aramboli road calls for remark. The work has been rendered absolutely necessary by the great

great increase of cart traffic through the pass, and I anticipate that before long it will be found necessary to metal other portions of the Southern road, over which, owing to the extended system of roads in the interior of Travancore, heavy traffic has now commenced.

Original Works.

Construction of Quilon and Shencottah road.—Expenditure, 1,13,000 rupees.

12. " During the year under review, operations on this line have been kept steadily going —most extensive works in the shape of rock blasting, retaining walls, embankments and bridge building have been successfully accomplished; a large amount of cart traffic is using the new road, already sufficient to prove the importance of this new route.

13. " I have it on authority that the markets of Quilon and along the road in Travancore have, during the current year, been favourably influenced by the direct communication with Tinnevelly.

Road from Nedoovengad to Thainmullay.

Estimate, 1,32,290 rupees.—Expenditure, 53,889 rupees.

14. " This is the southern line of communication through the Arienkavoo Pass, and forms the direct route between Shencottah and Trevandrum.

15. " On this line too, work has been kept steadily going, and, notwithstanding many and great difficulties, good progress has been made, and a district which before was hardly passable for coolie traffic, will soon be traversable by carts; very extensive tracts of land have been taken up for cultivation, and signs of civilization are appearing along the road side. I believe, however, it will be necessary for the Government to encourage settlement on the mid-section of this road, namely, from Pallode to Colatoorpully; the country is very wild and infested with elephants. If a good bazaar and the nucleus of a town could be established at Muddatoray Cawny (a perfectly healthy spot, I believe, at all seasons of the year), it would form an admirable halting ground, and there are in its neighbourhood valuable teak forests at present totally unworked, and land which might be laid under dry or wet cultivation.

16. " The Unjel or Tappal has been using the new route during the whole of the present season, not, however, without some adventures with elephants on the part of the runners, and protests on the part of the Unjel Department; but the distance from Trevandrum to Shencottah being now shorter by 40 miles than the old route *viâ* Quilon, it would be a great pity to disestablish the post line.

17. " It is due to the assistants and subordinates in charge of both these roads, to allude to the difficulties they have had to contend with; a section of 20 miles on either line is uninhabited, and at periods of the year unhealthy, and consequently divested of labour or supplies. Oftentimes, only with great trouble, have coolies been kept together at all, and supplies obtained for them; we have had to pay much higher rates of wages than were calculated upon at first, and I fear excess of expenditure beyond the estimate must be anticipated. We shall, however, have to show in return valuable and good work, and, on completion, a good investment of the public funds.

18. " There is still another branch road connected with the Arienkavoo Pass, from Ponalur to Kayencolum—distance 35 miles—traced out last year and commenced this season on an estimate of 1,16,549 rupees. The expenditure has been 14,000 rupees and odd; a good portion of the simpler earthworks has been done. The heavier embankments, and the collection of materials for bridges and drains all along the line are well in hand, and there is little doubt that, with sustained energy, this line will be opened for cart traffic before the end of the present year.

Road from Shorlacode to foot of the Ashamboo Hills.

19. " This line has been opened for traffic during the current year, and enabled the coffee planters to use it in the dispatch of the season's heavy crop.

20. " The road from Coolitoray to Tengaputnom has also been opened to cart traffic.

21. " Good progress has been made in the road between the Rajakamungalom salt-pans and the southern terminus of the Victoria Canal.

22. " On the Peermade Ghat road a good deal of heavy rock-cutting and clearing has been effected, and the line rendered perfectly easy for cart traffic to the crest of the ghauts, 3,500 feet above the sea. The line of country across the plateau to the Madura frontier has been surveyed, half the distance regularly traced out, and, I am happy to say, a preliminary sanction obtained for opening out a 14-feet cart road.

23. " Various new roads of short lengths, in the neighbourhood of Trevandrum, Quilon, Alleppey, Cotyam, have been constructed, and are of unquestionable convenience.

24. " The department has not been idle in preparing for the extension of road communication.

 25. " In

Appendix, No. 22.

25. "In the Southern Division several lines of short lengths, but aggregating 50 miles, have been traced and surveyed.

26. "A commencement has been made for laying down a new road from Trevandrum, passing through the central part of the Quilon Division and extending to Cotyam, the intention being to extend this through North Travancore. This road is designed not only as a main line of communication through the country, but to form connecting links between important inland towns and the nearest points of water communication. The section between Cotyam and Chunganachery, although a district road in the first instance, is a part of the system, and has been lately sanctioned.

27. "The road across the Peermade Plateau I have already referred to.

Bridges.

28. "Besides the construction of such bridges as are needed on the roads already reported upon, various other structures have been taken in hand. The large bridge at Coolitoray, 11—60 feet span, has been opened for traffic, the masonry and erecting of the iron girders and timber platform having been completed during the season under review.

29. "The bridge at Moondakayom, 3—60 feet span, has been opened for traffic.

30. "Similarly, the bridge at the old landing-place, Trevandrum—that over the Atoor river, and the two iron bridges over the Paroor Canal, have been completed and opened to traffic. Other bridges in various parts of the districts are in course of erection.

31. "There have been, I am glad to report, no failures, and the repairs needed on such work have been very small.

Canals.

32. "The Wurkullay Barrier Canal has absorbed a lac of rupees during the year. A very large amount of earthwork has been got through, but the progress has not been so rapid as I anticipated, the fact being that we cannot command as much labour as I calculated upon. The new roads in the neighbouring districts of Quilon and Trevandrum were in competition for the labour of those districts, and, without an inordinate advance of wages, with corresponding increase of the rates of cost for the work, labour from a distance could not be obtained. We have had from 2,000 to 3,000 men at work regularly, but I would wish double that number. There has also been delay in getting the needful superintendence and machinery from England; but both have now arrived, and I hope still better progress will be made in the coming season. But I must report that, although the progress has not been equal to my expectations, the work done has been by no means unsatisfactory either in extent or in the result, so far as the ultimate successful completion of this important undertaking is concerned. More water has been met with in the excavations than was anticipated, and the work is thereby delayed and a little more costly, than would otherwise have been the case; but there is no reason for any sort of doubt or anxiety.

33. "Among the items of repairs to canals have been included extensive deepenings of the canals and backwaters, and the outlay of 3,000 rupees and odd in clearing away a barrier on the Mavalicurray river; the latter work was intended specially to facilitate the passage of timber down the river, and to prevent the damage which hitherto occurred to it in transit —the object appears to have been effected. There are numbers of similar barriers in other rivers, which sooner or later may be taken in hand with advantage.

Civil Buildings.

34. "The outlay on these needs little comment.

Hospitals.

35. "The outlay has chiefly been in completing outhouses, &c., surroundings, and in the progress of work commenced last season at Mooatoopolay, Alwaye, and Shertallay. The progress on these has not, I regret to say, been as satisfactory as could be wished, but may be attributed to the removal of the third assistant from his division, to act for the second assistant while on leave. But the extensive additions to the hospital at Trevandrum have progressed fairly; additional wards have been constructed in the old building; two new wards for females, and a hospital store; cook-rooms, latrines, and dead-houses nearly completed.

Court Houses.

36. "Tasildars' Cutcherries and Moonsiffs' Courts and Registration Offices under one roof have been in steady progress at 10 different places, and during the year an outlay of nearly 30,000 rupees has been spent on them. Sanction has been received for constructing similar buildings at other places, but they are so scattered about that very rapid progress could not be made without withdrawing the supervising establishment from other important works.

Schools.

Schools.

37. "The new college at Trevandrum is progressing well; all the brickwork is completed, but some little time is still required for the stonework, for which it has been found impossible to obtain sufficient skilled labour in Travancore, and we have therefore been obliged to get down labour from the Madras Presidency. The schools at Nedoovengaud and Kotar are very nearly ready for occupation.

Residences.

38. "A large number of public bungalows rendered necessary by the opening of new roads have been taken in hand, and during the past year well advanced towards completion. The buildings afford only moderate accommodation, and are not very expensive; the estimate for second class bungalows with outhouses, aggregating 11,326 rupees, and the first class bungalows 16,824 rupees.

39. "The residency at Peermade, staff quarters, stabling and outhouses have been completed during the past year.

Military Buildings.

40. "Beyond the completion of the brigade hospital and gun-shed, nothing has been done this year.

Miscellaneous Works.

41. "*Rs.* 2,449 have been expended in extending the lighting of the main roads and interior of the fort in Trevandrum.

"There can, I think, be no question of the utility of such work in the capital, and that it requires to be extended. The lamps, when once in position, cost very little to maintain; a couple of miles more of road might with advantage be lighted.

42. "The old sea-wall at Tangacherry (Quilon), gave way during last monsoon, and serious encroachment commenced upon a valuable building there; the wall was partially re-built, but probably the whole wall will eventually have to be re-built, as no protective measures can with advantage be adopted.

43. "New beacons have been erected at various places along the lines of backwaters, their up-keep and regular lighting have been attended to, and with much assistance to the traffic.

44. "Sundry works have been undertaken at the cost of, and on behalf of the British Government; indeed these works have increased so much lately as to require the services of a special overseer, and hence, overworked as the Travancore Engineer Department is at present, I have been constrained to recommend that we should be relieved of this duty.

45. "Under the heading of

Surveying and Tracing Roads, &c.

will be found in more detail than I can give in a general Report, instances of various projects which have received the attention of the department in the shape of projected works. One large item of 10,330 rupees appears for preliminary operations in connection with the Perinjany reservoir. This is for completing the elaborate and difficult surveys and clearance of jungle necessary for such a work. Difficult and adventurous has the work been, for the locality is unhealthy and the jungle infested with wild beasts, which at times have given much trouble; indeed I have to state with regret that several deaths among coolies have occurred from the occasional raids of a rogue elephant.

46. "In the course of the ensuing year I confidently hope that a commencement of actual work on this irrigation project will be made. It is deserving, however, of consideration that already the department has its hands as full of work as possible; that from year to year instead of relief, it appears a greater demand than ever is made upon its service, and that there is a limit to the elasticity of the fixed establishment at present sanctioned. In fact, there is no doubt that, if the same rate of progress is to be continued in public works as has now for a long series of years prevailed, a much larger staff of subordinates must be entertained.

47. "During the past year there has been an expenditure of eight and a-half lacs of rupees on *bonâ fide* public works; the establishment costing with all allowances and other contingent expenses about 10 per cent. on the outlay. This is just one-half the rate obtaining in the Public Works Department of British India."

MARAHMUT DEPARTMENT.

THE following Statement exhibits the Work done by this Agency. The outlay is about 4,500 rupees less than in the previous year.

Number.	WORKS.	Expenditure.
		Rs.
1	Repairs to his Highness the Maha Rajah's palace	5,226
2	„ his Highness the Eliah Rajah's palace	2,410
3	„ the palace of their Highnesses the Ranees	2,558
4	„ his Highness the First Prince's palace	1,533
5	Minor repairs	10,513
6	Annual thatching of public buildings	21,361
7	Repairs to salt godowns	2,065
8	Repairs to Huzzoor cutcherry, court-houses, Taluq cutcherries	17,136
9	Construction of, and repairs to, vernacular district schools	1,915
10	Repairs to the Trevandrum Residency	2,772
11	„ to Quilon Residency	726
12	„ of bungalows occupied by European officers	9,074
13	Excavating and repairing irrigation works	11,791
14	Re-construction and repairs of pagodas	18,766
15	„ „ cotpoorahs	4,788
16	Repair of copper and brass utensils	1,596
17	„ boats and jangars	934
18	Construction and repair of wooden bridges and repairing village roads	26,719
		1,41,891
	Cost of Establishment	18,905
	Total *Rs.*	1,60,796

About 20,000 rupees of the amount of sanctioned estimates remained unexpended when the year ended.

Appendix, No. 22.

EXTRACT from SETTLEMENT REPORT of *Indapore* (*see* Questions 6721 and 6726).

(For Paragraphs 146 to 153, *see* Answer to Question 6512.)

154. I think it has been fully established in the review of the settlement that, at the end of the first decennial period, the cultivators were not in a position to pay a higher assessment had a revision taken place at that time. The average price of grain for the 10 years is 56 seers per rupee; consequently we may conclude that the assessment was not light when gauged by the prices of that period.

155. In our remarks upon Mr. Green's review, which took place six years after in 1852-53, we have come to the conclusion that though a decided improvement in the condition of the people was noticeable at that period, no considerable accumulation of capital had taken place. The turning point had been past, and the steady rise in prices which set in from that date soon made a marked change in the state of the district. The revenue was being regularly paid without remissions, and as indifferent seasons occurred at that time, its payment shows that the cultivators had some funds to fall back upon, and were not entirely dependent on the crop of the year.

156. I think, therefore, we may fairly assume that towards the latter end of the second decennial period the cultivators had acquired that amount of capital and that well-to-do position which we would assign to them as the measure of profit to be left after payment of the Government assessment. I am consequently of opinion that we may take the average price of grain during the latter half of the second decennial series as the index by which we may estimate from prices what our present assessment ought to be. In other words the percentage increase which has taken place during the last 10 years will represent generally the percentage addition to the present assessment which may now be made.

157. Applying this rule to the case, I find the average price of grain for the two periods indicated stood as follows, viz.:—

Average for the last five years of the second decennial series, viz., from 1851-52 (dating from the period of Mr. Green's review) to 1855-66 - - -	42
Ditto for the 10 years, from 1855-56 to 1865-66 - - - -	26
	16

We may assume approximately, therefore, that between 50 and 60 per cent. is the addition (considered solely with reference to the price of grain) which may now be made to the present assessment.

158. I find that a maximum rate of one rupee per acre, with a reduction of 2 annas for some villages and a special increase of 2 annas for Indapoor itself (details to be explained in the sequel), will give about the required amount of assessment. Twelve annas is the maximum on which the present assessment is based. An increase to a rupee is equivalent to an addition of 33 per cent. only. But it has been shown that according to the new survey a considerable extent of land has hitherto been held in excess of the assessed area. The assessment now placed upon this, and the assessment resulting from the adoption of a comparatively higher standard of valuation for the best soils, form a special fund of increase to our new settlement. And these sources, swelling the general amount, raise the percentage increase higher than is indicated by the difference between a 12 and a rupee maximum rate. That is to say by the application of the latter rate to new measurements and new classification, the assessment will be raised to 53 instead of 33 per cent., which is the actual difference between the two given rates.

STATEMENT contrasting Present and Proposed ASSESSMENT for Villages belonging to the *Indapoor* Talooka.

A.

ABKARI DUTIES. See *Excise Duties. Spirits and Drugs.*

Abyssinian Expedition. Grounds for the conclusion that India should not have been called upon to pay towards the Abyssinian Expedition, *Sir C. E. Trevelyan* 1599, 1600—— The war arose out of an Imperial sentiment affecting the whole British Empire, *ib.* 1599 ——India had nothing to do with the proceedings which brought about the war, and was not much concerned with the result, *ib.* 1600.

Increased military charge in India in 1868-69, owing to the large number of supernumeraries on the return of Native regiments from Abyssinia; question pending as to this charge being borne by the Imperial revenue, *Kellner* 3556-3564.

Full discretion specially vested in the Government of Bombay as to the preparations for the Abyssinian Expedition, *Lord Lawrence* 4658, 4659——Addition of one or two officers to each regiment which went from Bengal to Abyssinia, *ib.* 5451, 5452.

ACCOUNTS:

1. *Objections to the System of Accounts until recently in force in India.*
2. *Official Reply to the foregoing Charge; improved Finance Accounts now in Operation.*
3. *Exceptions taken to the Remittance Account; Explanations in reply.*
4. *Suggestions for the introduction of various Amendments as regards the Finance Accounts.*
5. *Improvements in the Home Accounts at the instance of the late Accountant General at the India Office.*
6. *Compulsory Retirement and Superannuation of the late Accountant General.*
7. *Recommendations as to the Period of Appointment of the Committee of the House on the Indian Accounts; also as to the Audited Accounts for the past Financial Year, and the Estimated Accounts for the Current Year being laid upon the Table on the opening of the Session.*

1. *Objections to the System of Accounts until recently in force in India:*

Exceedingly inefficient character of the former accounts in India, the system having been a very imperfect one, *Sir C. E. Trevelyan* 512-514——Conclusion that the accounts are now based on sound principles and are a great improvement on the former system, *ib.* 512, 513.

Examination to the effect that in order to ascertain the exact financial condition of each province, it would be necessary to take to pieces the existing financial accounts and put them together again on a new principle, *Sir C. E. Trevelyan* 1456-1485—— Utter confusion of the accounts, as for each province, by the preponderating item of army expenditure, *ib.* 1457——Exception taken to the credit given in the Bombay Accounts in respect of the Malwa opium; undue charge on the other hand in respect of the army, *ib.* 1472-1485.

Duty formerly of witness, as Accountant General, to add the Home transactions to the finance accounts from India; conclusion arrived at that the account system of India was thoroughly unsound and the accounts themselves unreliable, *Goodliffe* 2701-2707 ——Very imperfect information in the accounts on the revenue side, as to assessed taxes, customs, opium, &c., *ib.* 2710. 2828-2843——Evidence showing the unsatisfactory way in which the payments in England are added to the payments which appear in the finance accounts; fallacy through the former not being classified as between the different presidencies, *ib.* 2719-2740.

Objection to the accounts from India being signed by officials who are not responsible for the balances shown, *Goodliffe* 2760-2769——Serious defect in the finance accounts so dealing with extraordinary expenditure as to discredit the finances of India, *Goodliffe* 2817——Witness repudiates any desire to cast reflection on the officers in India as regards the bad system of accounts, *ib.* 2845.

Statement in detail purporting to show the exceedingly unreliable character of the finance accounts from India as regards the military charges, *Goodliffe* 2845-2847——Serious discrepancies between the total charge in India and in England as shown in different

Report, 1873—*continued.*

ACCOUNTS—continued.

1. *Objections to the System of Accounts until recently in force in India*—continued.

different accounts, *ib.* 2846, 2847——Exceptions taken to the course pursued in making transfers or adjustments, the Finance Minister thereby modifying his surplus or deficit as he pleases; illustration of this in the Finance Accounts of 1869-70, and 1870-71, *ib.* 2848, 2849.

Investigation relative to the "Statement of the Moral and Material Progress of India," laid before Parliament annually as a supplement to the finance accounts; numerous discrepancies between this statement and the Finance Accounts, whence the figures in the former are adopted, *Goodliffe* 2850-2871——Impracticability of a proper understanding of the finances of India, unless it be borne in view that the Home Treasury is but a branch of the Indian Treasury, *ib.* 2852-2855——Conclusion that no effective control is obtained through the finance accounts over the public expenditure, *ib.* 2874. 2880, 2881. 2897.

Further illustration of the insufficiency of the finance accounts in the case of a million sterling of army receipts in 1869-70; there is in fact nothing to show how this amount was dealt with, save that it was taken in aid of the general revenue of the year, *Goodliffe* 2881-2897.

Strong condemnation of the course pursued in India as regards deductions from revenues on their way to the exchequer; strict prohibition of this practice in England, *Goodliffe* 2897——Probability of the accounts in India being exceedingly elaborate; absolute necessity however of a rigid separation of the revenues from the Service Accounts, *ib.*

Admission that great efforts have been made towards a better system of accounts in India; inquiry by Mr. Whiffin and Mr. Foster adverted to hereon, *Goodliffe* 2898-2909.

2. *Official Reply to the foregoing Charge; improved Finance Accounts now in Operation:*

Full details given in the revised form of accounts under the head of revenue, *Harrison* 4159, 4160——Explanation that the revised revenue accounts have been prepared by witness in consequence of the report of the present Committee in 1871, *ib.*——Feasibility of each local government showing in its accounts the several sources whence the expenditure is made up, as for stores, &c., *ib.* 4164-4167.

Difficulty in entirely avoiding discrepancies between the Finance Accounts and the Statement of the Moral and Material Progress of India; explanation hereon as to the mode in which the latter is made up, *Harrison* 4175-4178.

Witness repeats that the objection generally as to insufficiency of detail has been met in the accounts now before Parliament; the revised form was in fact prepared by witness, while Mr. Goodliffe was still at the India Office, *Harrison* 4181. 4188. 4226. 4294-4298——Dissent from the objection raised by Mr. Goodliffe on the ground that there was n Exchequer Account as regards army receipts, *ib.* 4188-4193.

Witness submits that the net cost of the Army is readily obtainable from the accounts; examination hereon upon the question whether the charge for the Military Secretary at the India Office, and a portion of the charge for the Ecclesiastical Establishments, should not appear in the Army Accounts, *Harrison* 4194 *et seq.*——Due separation already between the revenue and service accounts, *ib.* 4282.

Statement to the effect that certain changes in the military charges at different periods have been duly shown on the face of the accounts, *Seccombe* 4404-4409.

Consideration of a suggestion for showing in a separate statement the transfers that have been made from the Home Accounts to the Indian Accounts, and from the lattter to the former, *Harrison* 4410-4415.

3. *Exceptions taken to the Remittance Account; Explanations in reply:*

Considerable defect in the case of the Remittance Account, or Account Current between England and India; grounds for the conclusion that, through the separate books in this case, there is no security for the detection of malversation, *Goodliffe* 2679. 2682-2699——Desire of witness, when Accountant General, to abolish the second set of books; the accounts in question were however removed from his charge, *ib.* 2694-2699.

Further statement as to the exceedingly unsatisfactory character of the account current between England and India; representations made by witness in 1866, with a view to its amendment, but without effect, *Goodliffe* 2844. 2930-2938.

Statement of the mode in which bills are drawn on India, there being every security against fraud or forged bills, *Seccombe* 4136——Practice not to pay bills on India until due advice has been received from England, absence of any case of forgery, *Harrison* 4137-4143.

Explanation of the origin of the separate accounts which are kept as to remittances; character of the audit of these accounts, *Seccombe* 4144-4149——Special steps taken for bringing into a satisfactory state the account current, showing the transactions between India and England; the arrears in this account will soon be cleared off, and it will be made much more complete than in former years, *ib.* 4416-4419.

4. *Suggestions*

Report, 1873—*continued.*

Accounts—continued.

4. *Suggestions for the introduction of various Amendments as regards the Finance Accounts:*

Witness contends that the form of the Finance Accounts may be much simplified so as to give more useful and reliable information without their being more voluminous, *Goodliffe* 2770, 2771. 2791. 2811. 2827—— Further recommendations as to the amended system of account desirable as regards revenue receipts from Opium, Customs, Post Office, &c., *ib.* 2828–2843.

Suggestions for the establishment in each presidency of a Head Treasury Department, which should have the cash account under its controul; details as to the mode in which this account shall be worked, *Goodliffe* 2897—— Proposition also for a system of Departmental Revenue Accounts, which should be subsidiary to the Presidency Treasury Accounts, *ib.*—— Reliable data and estimates to be furnished by the proposed Treasury Accounts coupled with the Home Accounts, *ib.*

Explanation that witness merely advocates for India a system of accounts analogous to that in this country, *Goodliffe* 2897. 2911, 2912.

5. *Improvements in the Home Accounts at the instance of the late Accountant General at the India Office:*

Revision of the Home Accounts upon witness' appointment as Accountant General in 1866, though not so completely as he should have desired, *Goodliffe* 2678, 2679—— Information relative to the actual changes and improvements introduced by witness, when at the India Office, into the Home Accounts, *ib.* 2923–2929.

6. *Compulsory Retirement and Superannuation of the late Accountant General:*

Explanation of the circumstances under which witness was appointed to the India Office, and was retired thence, his appointment having been abolished; remonstrances made by him on this occasion, *Goodliffe* 2913-2915. 2920–2922—— Statement as to witness' pension of 900 *l.* a year being all charged to India; exceptional circumstances which account for this arrangement, *ib.* 2916–2922.

7. *Recommendations as to the Period of Appointment of the Committee of the House on the Indian Accounts; also as to the Audited Accounts for the past Financial Year, and the Estimated Accounts for the Current Year, being laid upon the Table on the opening of the Session:*

Review by the Committee of the system hitherto as regards the making up of the Indian Accounts, *First Rep.* iii, iv—— Conclusions adverse to any alteration of the Indian financial year, *ib.*—— Expediency of the Committee of the House on the Indian Accounts being appointed within the first three weeks of the Session, *ib.* iv—— Recommendation also, that the audited accounts for the past financial year, and the estimated accounts for the current year, be laid on the Table, and, distributed to Members, on the opening of the Session, *ib.*

See also *Anderson, Sir William. Cash Balances. Debt of India. Military and Medical Funds. Post Office. Public Works*, 2. *Railways. Stores.*

Aden. Formation in 1868–69 of a troop of native cavalry for service at Aden; reasons for this, *Kellner and Johnson* 3566–3568. 3655, 3656.

Adjutant General (*India*). Grounds for the large increase of pay of the Adjutant General of the army of India, *Johnson* 3128–3131.

Administration of Justice. See *Law and Justice.*

Admiralty. See *Expenditure.* 5. *Navy. Troop Service.*

Adoption (*Native Princes*). Satisfaction expressed with the decision of the Governor General in Council, subject to the control of the Secretary of State in Council, in cases of adoption or disputed succession, *Lord Lawrence* 5502–5507.

Affghan War. Very costly result of the Affghan war, the East India Company having been over-ruled in the matter by the Queen's Government, *Sir C. E. Trevelyan* 960–966. 1005.

Agriculture. See *Cultivation of the Soil. Irrigation. Land Revenue.*

Ahmedabad. Grievances of the inhabitants by reason of their treatment at the hands of the Revenue collector, *Nowrozjee Furdoonjee* 4942–4984. 4987, 4988—— Influential petition, signed by 700 inhabitants of Ahmedabad, setting forth in detail the various grievances of the municipality; grounds for the statement that when the Governor of Bombay visited Ahmedabad in January last, the local officials used their influence to prevent this petition being presented to the Governor by a deputation of the inhabitants, *ib.* 4978–4984—— Numerous and oppressive fines levied upon the inhabitants for infringing petty municipal regulations; these were set aside on appeal, *ib.* 4980. 4987, 4988.

Report, 1873—*continued.*

Ajmere and Mhairwarrah. Recent transfer of Ajmere from the government of the North Western Provinces to the Supreme Government; witness is not aware of the reason for this arrangement, *Harrison* 1776, 1777.

Letters from the Chief Commissioner and Deputy Commissioner for Ajmere and Mhairwarrah in February and March 1872, relative to the imperial and local rates and taxes levied in the district, *App.* 698.

Statement of all imperial rates and taxes now levied in Ajmere and Mhairwarrah, distinguishing rates and taxes levied before, from those levied since the transfer of the government of the Indian territories to the Crown, and showing the amount of the produce of each rate or tax, *App.* 699.

Statement of certain local rates and taxes levied in Ajmere and Mhairwarrah for local purposes, distinguishing the rates and taxes levied before the scheme of provincial services and those levied subsequently, and showing the produce and estimated produce of each rate and tax, *App.* 700, 701.

Detailed statement of municipal cesses in Ajmere and Beawur for 1870–71 and 1871–72, *App.* 702, 703——Receipt and expenditure report of the municipal fund for the year 1870–71, *ib.* 704——Approximate estimate of receipts and expenditure of the municipal fund for the year 1871–72, *ib.* 705——Statement of actual and estimated receipts and expenditure of the Beawur municipality (Ajmere) for the years 1870–71 and 1871–72, *ib.*

Alienation of Land. Large alienations by zemindars in favour of bankers and creditors, *Lord Lawrence* 4432, 4433——Grounds for concluding that a permanent settlement in Upper India would not in any way tend to cause the peasant proprietors to alienate their lands to the richer classes; great mischief of alienation, as a source of disaffection, *ib.* 5669–5676——Remarkable love of the people for their land, *ib.* 5669–5672.

Approval of legislation restricting the alienation of ancestral land by process of the courts, *Lord Lawrence* 5675. 5741–5749——Further statement as to the inexpediency of restricting alienation or sale of ancestral lands; frequent instances of sale in the North Western Provinces for arrears of revenue, *ib.* 5741–5749.

Alienations (Land Revenue). Prevention of much abuse in the way of alienations of revenue if there had been local representative institutions, *Sir C. E. Trevelyan* 884, 885.

XIII. *Rules and Regulations as to Appointments, Promotions, &c.*

I. *As to the Amalgamation of the Indian Army with the Queen's Army:*

Excessive and uncalled for liberality in carrying out the amalgamation of the Indian army with the Queen's army, this being an illustration of the inadequate protection of Indian finance under the system of a Secretary of State responsible to Parliament, *Sir C. E. Trevelyan* 430–439. 530, 531——Economy in carrying out the abolition of purchase in the English army, as compared with the neglect of the Indian taxpayer in carrying out the amalgamation of the Indian army with that of the Queen, *ib.* 430, 431. 436——Several dissents by members of the Indian Council upon the question of the amalgamation of the Queen's army and the Company's army, *ib.* 1154, 1155.

Satisfactory manner in which the European troops of the former Indian army were eventually transferred to the Crown, though the first attempt at transfer was a failure, *Johnson* 3166–3180.

Explanation that witness was strongly opposed to the absorption of the local European army, but would not now advocate its re-establishment, *Lord Lawrence* 5508–5510—— Unanimous objection by the Council of India, including witness, to the abolition of the local European army; impracticability, however, of any successful opposition to the will of the Cabinet and of Parliament in the matter, *ib.* 5779. 5837–5843—— Inexpediency of a further change by a restoration of the Local European army, *ib.* 5791–5793—— Circumstances of the Governor General, as well as the Home Council, having objected to the army amalgamation scheme, but without success, *ib.* 5837–5844.

II. *As to the Strength of the European and Native Armies respectively:*

1. Official Returns and Statistics for different Years, and Explanations thereon:

Great discrepancies between the official returns whence witness has prepared statements showing in great detail, the strength of the European army and Native army in each Presidency, month by month from 1861–62 to 1871–72; how these variations may

Report, 1873—*continued.*

arise, *Kellner* 2941-2948——Explanation that invalids who have left their regiments would appear in the return for the division to which they had been removed, *Johnson* 2948, 2949.

Total of 45,522 British troops in India in 1855-57, the Native strength in the same year having been 232, 224; *Kellner* 2950-2952——Reference to a Return to Parliament in 1859 as showing the strength of the regular and irregular European and Native troops in 1856-57, *ib.* 2953-2958——Total of 60,453 European troops in 1871-72, *ib.* 2959-2961——Very large decrease in the aggregate of the army in India since 1856-57; amount of the staff present at head quarters in that year, *Johnson* 3084-3087——Further consideration of the discrepancy between certain Returns and Accounts relative to the numerical strength and the cost of the army at different periods; promised inquiry into this matter, *Kellner and Johnson* 3205-3209, 3257-3263.

Witness has prepared statements from the Quartermaster General's returns in each Presidency, showing in detail the strength of the army, European and Native, month by month, from 1862 to 1872; he submits this information to the Committee, with explanations, *Kellner* 3264-3276. 3292 *et seq.*——Exclusion of officers from witness' returns, *ib.* 3266. 3293.

Circumstance of the strength of the army in April 1857 having been much more according to a Return of the Government of India than according to the Returns as prepared in the Indian Office; strength of each arm of the service according to the former return, *Johnson* 3282-3286. 3289-3291——Information relative to the strength at various dates, distinguishing between the establishment strength and the effective strength; statement hereon as to the large number of officers and men in depôts in the United Kingdom, *ib.* 3299-3324.

Comparison between the organisation of Native cavalry and infantry regiments in 1856-57, as regards the number of European and Native officers, and the organisation at the present time, *Kellner* 3478-3487——Information relative to the average number of officers absent from Native regiments on sick leave, or on furlough, in 1855-57 and subsequent years, *Johnson* 3487-3496——The reductions in 1870-71 referred to the officers and staff, and not to the number of troops, there having been an increase of rank and file, *Kellner* 3587-3590. 3595-3601. 3647, 3648; *Colonel Johnson* 3649——Total number of troops, European and Native, in 1869-70, 1870-71, and 1871-72, distinguishing between established and effective, *Kellner* 3590.

Statement showing that, exclusive of officers, the average strength of the European force in 1862-63 was 69,732, and in 1871-72 was 58,437, *Kellner* 3605-3610——Large reduction in the strength of the Native army in 1871-72 as compared with 1862-63; average strength of 116,196 in 1871-72, *ib.* 3611-3613——Statement on the subject of the established strength being given for 1862-63 and the following years, and as to the means of ascertaining this accurately, *ib.* 3632-3638.

Explanation of the data for witness' calculation that the established strength of the European force in 1862-63 was 69,732; several modifications to which this estimate may be subject, *Kellner* 7249-7268——Data for the calculation that the established Native strength in 1862-63 was 134,246, *ib.* 7269-7271.

Statement as to the calculations of comparative cost in 1862-63 and 1871-72 having been made with reference to the effective strength; witness will endeavour to show the relation between the effective strength and the established strength at the two periods, *Kellner* 7272-7278.

Conclusion that the effective strength, as computed by witness, does not includethe boys of Bombay and Madras, *Kellner* 7535-7543——Witness undertakes to furnish corrected and verified returns in addition to those already submitted to the Committee, *ib.* 7544-7548. 7553-7563 — Character of the additional information proposed to be furnished by witness on his return to India from the data which will be then at his disposal, *ib.* 7564-7566. 7570.

Explanations with further reference to the returns prepared by witness relative to the strength of the different branches of the service; embarrassing discrepancies between the returns of the Adjutant General and the Quartermaster General, *Kellner* 7581-7584——Important difference between the established and the effective strength of the European troops, owing to various causes, *ib.* 7587.

Return showing the average effective strength of the European and Native army in India, compared with the established strength in the years 1862-63 to 1871-72, *App.* 909——Statement of the effective strength of the army in India, European and Native, from the year 1862 to the year 1872, *ib.* 910.

2. Amended

Report, 1873—*continued.*

ARMY—continued.

II. *As to the Strength of the European and Native Armies respectively*—continued.

2. Amended System proposed as regards the Returns of Strength:

Suggestion that the responsibility for the monthly returns of strength be fixed upon some officer at army head quarters, and that the returns should be checked by the Military Account and Medical Departments, *Kellner* 7585, 7586.

3. Part taken by the Indian and Home Authorities respectively, with a View to Reduction of Force:

Views urged by witness, when Finance Minister of India, in favour of reduction of the Native army, but without effect; Minutes hereon handed in, *Sir C. E. Trevelyan* 1290——Explanation in connection with correspondence between the Secretary of State and the Government of India in 1869-71, relative to the extent and character of the reduction to be effected in the Native army and in the European artillery, *ib.* 1298-1304——Larger reductions urged by the Government of India than were sanctioned by the Home Government, *ib.* 1298-1302.

Initiative taken by witness' Government in reducing the European army; obstacle on the part of the Home authorities, *Lord Lawrence* 4752-4757. 5622-5624——Concurrence generally of Sir William Mansfield with witness (when Governor General) as to the expediency of reductions, *ib.* 5377-5379——Twofold objection made by the Home Government to the reductions proposed by witness and his council in the military force, *ib.* 5756, 5757.

Schemes proposed by the Government of India in 1869 and 1870, for reducing the Native infantry and cavalry; reference hereon to a despatch from the Secretary of State in January 1869, in which a large annual saving is contemplated, *Kellner* 7503-7510——Considerable reductions proposed in the Native army in 1869-70; these however were not effected, *Johnson* 7511, 7512.

Minute by Sir Charles Trevelyan, as member of the Council of the Governor General, dated 22 July 1864, on the general question of the military force to be maintained in India; reduced establishment contemplated, *App.* 670-672.

4. How far Reduction is feasible at the present Time:

Statement as to the standard of European troops in India after the meeting having been fixed at about 70,000 men, and since reduced to 60,000, *Sir C. E. Trevelyan* 768-772. 784-787——Much less necessity for a large European force since the reduction of the Native army, *ib.* 773——Necessity, however, of a considerable European force in India, though involving an immense cost, *ib.* 1156, 1157.

Large and unnecessary increase of expenditure beyond the amount as settled by the military commission, owing to the numerical maintenance of the Native army; room for great economy by a reduction of the Madras and Bombay armies, *Sir C. E. Trevelyan* 1321-1327. 1524-1526——Belief that the European force may be further reduced though the greatest care should be observed before reduction, *ib.* 1323. 1328.

Difference of opinion among competent authorities as to the European force to be maintained in India, *Lord Lawrence* 4679——Opinion in India, after the mutiny, that the minimum European force should be about 75,000 men, *ib.* 4680-4683——Witness considers that about 60,0000 British troops are now sufficient, *ib.* 4684-4686.

Various reasons for maintaining a considerable Native army; grounds for the conclusion that for all India there should be 130,000 Native troops, *Lord Lawrence* 4687-4689——Ample sufficiency of a British army of 60,000 men for the suppression of any mutiny or insurrection, *ib.* 4756, 4757.

Witness further contends that on various grounds the Native army must be maintained at its present strength, save in Madras; multifarious duties which it is called upon to perform, *Lord Lawrence* 5334-5342——Impracticability of using the Government police in reduction of Native troops, whilst the village police are not available for Government employment at all, *ib.* 5336.

Conviction that India cannot be held without a considerable Native army, *Lord Lawrence* 5338-5340——Belief that people in England greatly depreciate the importance of the Native army, *ib.* 5342——Witness would, in fact, prefer an army half English and half Native to an exclusively English army of the same number, *ib.*

Impolicy of any reduction of the army which should in any way compromise our tenure of the country, *Lord Lawrence* 5374, 5375——Very large reduction of the native army since the time of the mutiny, *ib.* 5376. 5380-5382.

Question whether any reduction can be made in the strength of the cavaly, *Johnson* 7520.

5. Question of Reduction of the Madras Army:

Especial room for reduction in the case of the Madras army, the Madras Presidency being peculiarly peaceful; recommendations hereon, *Sir C. E. Trevelyan* 824, 825. 828,

Report, 1873—*continued.*

ARMY—continued.

II. *As to the Strength of the European and Native Armies respectively*—continued.

5. Question of Reduction of the Madras Army—*continued.*

829. 842–844——Information relative to the extensive economy effected by Sir George Balfour und witness in the Madras military expenditure, *Sir C. E. Trevelyan* 1328. 1381, 1382——Facility with which the reduction of the Madras Native army was affected after the mutiny, the European officers being the only difficulty in the way of further reduction, *ib.* 1518, 1519.

Room for reduction in the Madras Native army, *Lord Lawrence* 4689——Advantage of the Madras army as a revenue force rather than as a fighting force out of the Presidency, *ib.* 5524, 5525——Comparatively small active service of the Madras army in the last fifty years, *ib.* 5799–5802.

Minute by Sir Charles Trevelyan, as member of the Council of the Governor General, dated 17th December 1863, on the subject of the military expenditure of Madras, *App.* 667, 668.

6. Question of Reduction of the Artillery:

Great excess of artillery more especially; undue delay in the reduction of the force, *Sir C. E. Trevelyan* 773–775. 782, 783——Great saving by reducing not only the Native forces but the artillery, *ib.* 829, 830——Objections raised by the Government of India in 1870 against the number of artillery officers; large unnecessary expenditure on this score, *ib.* 1299.

Difficulty experienced by witness when Governor General in obtaining a reduction of the artillery, *Lord Lawrence* 4755.

Saving of expense in 1861–69 by the conversion of certain field batteries into garrison batteries, *Kellner and Johnson* 3572, 3573——Important reduction in 1871–72 in the number of horse artillery batteries in India, *Johnson* 3645, 3646——Doubt as to there being any room for further reduction in the artillery; there might, however, be fewer brigades with more batteries to each brigade, *ib.* 7521–7532——Large reduction to be effected by the foregoing plan, the cost of the artillery being considerable, *Kellner* 7533, 7534.

III. *As to the Expenditure:*

1. Comparative Returns for different Years, and Explanations thereon:

Statement of the gross military expenditure in 1856–57, and in each year since 1861–62, including the estimated expenditure for 1872–73 and 1873–74; large increase within this period, *Kellner* 2962–2967——Amount of the net annual charge in 1856–57, and in each year since 1868–69; increase of nearly two millions as between 1856–57, and 1873–74, *ib.* 2973, 2974.

Classification of the military expenditure in India under twenty heads or grants or services, for the purpose of administration and account; details hereon, *Kellner* 2975–2982——Classification of the expenditure in England under the heads of effective services and non-effective services; several items comprised in each, *ib.* 2981.

Several charges of a military character excluded from the total of 13,227,979 *l.* as the expenditure in India and England for 1856–57, *Kellner* 3277–3281.

Revised returns prepared by witness showing the annual military expenditure according to the figures of the Finance and Revenue Accounts; discrepancy in previous returns prepared by him by reason of his mode of dealing with the item for stores, *Kellner* 3331–3334——Several and important charges no longer borne in the Military Department, such as the charge for the Hyderabad contingent, the Topographical Department, &c., *ib.* 3335–3338.

Witness proposes to submit a printed statement showing the financial effect of all the charges since 1862–63, *Kellner* 3603, 3604——Revised statement of the military charges and receipts in England and in India connected with the army in India for the year 1856–57, and for the years from 1861–62 to 1871–72, together with the estimates for 1872–73 and 1873–74, *ib.* 3659–3661—— Total of 14,758,000 *l.*, as the estimated net charge for 1872–73, and of 14,654,000 *l.* for 1873–74, *ib.* 3961——Exception to the rule of charging in the year's accounts everything paid for within the year, *ib.* 3839–3863.

Comparison between the strength and cost of the army in 1871–72 and 1863–64, showing the increase of cost under various heads; paper submitted containing details of such increase in England and in India, *Kellner* 6990–6995——Reference to the year 1863–64 as one of severe economy, the military expenditure having been lower than in any year since the mutiny, *ib* 6990, 6991——Large increase in the charge per man since 1863–64, *ib.* 6993——Net increase of 917,000 *l.* between 1863–64 and 1871–72, *ib.* 6993–6995.

Necessity of relying upon such data as are available in the India Office for the preparation of the comparative statements now submitted by Colonel Johnson and witness relative to the annual military expenditure since 1863–64, *Kellner* 6996, 6997——

General

Report, 1873—*continued.*

ARMY—continued.

III. *As to the Expenditure*—continued.

1. Comparative Returns for different Years, &c.—continued.

General summary of the comparative tables of expenditure under the several grants, *Kellner* 7007-7115.

Preparation by witness of a comparative table for 1871-72, showing the relative cost of the British and Native soldier in India; proposed addition thereto of the military charges in the Public Works Department, *Kellner* 7474-7483.

Comparison of the expenditure in England and in India, on account of the army in India, for the years 1862-63, 1863-64, and 1871-72, with the increase and decrease in 1871-72, compared with the expenditure in 1863-64, *App.* 885.

2. Increase or Decrease of Charge in different Years for Army and Garrison Staff:

Total of 375,523 *l.* as the cost of the Army and Garrison Staff in 1856-57, the cost in 1871-72 having been 465,840 *l.*, *Kellner* 2982——Enumeration of several causes of increase or decrease in the grant for Army and Garrison Staff, *Johnson* 2983-2986.

Evidence in detail explanatory of the increase or decrease in different years since 1856-57 in the grant for Army and Garrison Staff, *Kellner* 2987 *et seq.*——Several items of increase owing to transfer from other grants, *ib.* 2987. 3032——Large increase owing to the revised scale of staff and regimental salaries in 1862-63, *ib.* 2988. 2996-2998——Important reduction subsequently to 1861-62 owing to the amalgamation of the general staff of the British and Indian forces, *ib.* 2988-2995. 3001-3003.

Important reduction in 1869 in the staff of the army, it being considered that the reductions have been brought to the lowest point, *Kellner* 3032-3038——Counterbalance of the foregoing saving by several new staff services and appointments, which have added about 60,000 *l.* or 70,000 *l.* a year to the grant for Army and Garrison Staff, *ib.* 3039, 3040——Considerable reduction made since 1857 in the divisional and brigade command, *Kellner and Johnson* 3249. 3256——Particulars with reference to the cost of the head-quarter staff of Bengal, Madras, and Bombay respectively in 1862-63 and 1873-73, *Kellner* 7565-7567.

Statement exhibiting the changes involving increase and decrease of expenditure under Grant I., "Army and Garrison Staff," in the three Presidencies, for the years from 1862-63 to 1871-72, *App.* 886-888——Comparison of charges for 1862-63 and 1871-72 as regards Army and Garrison Staff, *ib.* 895——Comparative average statement of the salaries of the appointments in Grant I. for Bengal, for the years 1856-57 and 1872-73, *ib.* 900, 901.

3. Amount of Charge in respect of the Grant for Administrative Staff:

Information in detail relative to the grant for the Administrative Staff, the transfers to and from the grant since 1856-57, and the item of increase and of decrease, *Kellner* 3339-3376. 3383-3402——Several heads of charge comprised in the Administrative Staff Grant, *ib.* 3339, 3340——Large portion of the grant which is due to the Military Account Department transferred in 1861, *ib.* 3340-3347.

Increase of the charges from 146,708 *l.* in 1856-57 to 198,634 *l.* in 1871-72; investigation as to the course of such increase, *Kellner*, 3340-3376. 3383-3402.

Statement exhibiting the changes involving increase and decrease of expenditure under Grant II., "Administrative Staff," in the three Presidencies, for the years from 1862-63 to 1871-72, *App.* 889——Comparison of charges in respect of Administrative Staff for 1862-63 and 1871-72, *ib.* 901——Comparison of charges for "Administrative Staff" in all three Presidencies in the years 1862-63 and 1872-73 respectively, *ib.* 902.

4. Details in respect of the Grant for Regimental Pay, Allowances, and Charges:

Evidence relative to the various items included in the grant for the regimental pay, allowances, and charges; aggregate of 6,503,793 *l.* as the amount in 1871-72, *Kellner* 3403 *et seq.*——Information as to the number of officers in proportion to the number of men in 1856-57, 1862-63, 1869-70, and 1872-73, and as to the relative cost of officers and men per regiment, *ib.* 3426——Statement of the numbers of officers of each rank in an infantry and a cavalry regiment in 1856-57, *ib.* 3429. 3431.

Particulars of charge of a European cavalry regiment under different heads, in 1856-57, 1869-70, and 1871-72; economy by re-organisation though the pay per head is increased, *Kellner* 3432-3462——Several items included in the contract allowances in European cavalry regiments, *ib.* 3443——Statement of the charges for a regiment of European infantry in 1856, 1869, and 1872; considerable saving since 1869 by organisation, *ib.* 3463-3473.

Further evidence in detail relative to the several causes of increase and decrease in the grant for pay, allowances, and charges for officers and men in India; increase or decrease accordingly as charges have been transferred to or from other grants, whilst the enhanced rates of pay have permanently enlarged the grant in question, *Kellner* 3497 *et seq.*——

Report, 1873—*continued.*

ARMY—continued.

III. *As to the Expenditure*—continued.

4. Details in respect of the Grant for Regimental Pay, &c.—*continued.*

Very large reduction of the grant in 1862–63, owing chiefly to the re-organisation of the army, which then came into full effect, *Kellner* 3497–3513——Expenditure of 6,677,604 *l.* for pay, &c., in 1867-68; important decrease as compared with 1865–66, *ib.* 3537——Mention of several other items of increase or decrease in the charge for 1868-69, *ib.* 3556–3572. 3574, 3575.

Expenditure of 6,662,472 *l.* for regimental pay and charges in 1869–70; items of increase and decrease in this year, there having been a reduction of 52,000 *l.* as compared with the previous year, *Kellner* 3576–3581——Decrease of 135,327 *l.* in 1870–71 as compared with 1869–70; large withdrawal and reduction of force in 1870–71, witness submitting certain reasons why the decrease of charge was not more marked, *ib.* 3582–3590——Explanartion also as to a decrease of only 24,000 *l.* in 1871–72 notwithstanding that the reduction of force then came into full effect; further particulars to be furnished on this point, *Kellner* and *Johnson* 3591–3602. 3647–3649.

Statement showing the number and cost of officers of the Indian army in 1856, 1862, 1869, and 1872; large increase of the average cost since 1862, *Kellner* 3620–3622——Total of 304 officers unemployed on 1st January 1872, their cost amounting to 232,977 *l.*, *ib.* 3623–3625——Explanation on the foregoing point, *Johnson* 3626, 3627.

Statement exhibiting the changes involving increase and decrease of expenditure under Grant III., "Regimental Pay, Allowances, and Charges," in the three Presidencies, for the years from 1863–64 to 1871–72, *App.* 890–893——Comparison of charges for officers and office establishments in all three Presidencies in the years 1862–63 and 1872–73 respectively, *ib.* 896–899——Expenditure of 1862–63 and of 1863–64 compared with that of 1871–72 for regimental pay and allowances, *ib.* 903, 904.

5. Considerable Increase on the Score of Pay, and of Bounty and Kit Money:

Details relative to the increase of pay of Europeans and Natives of various ranks in 1871–72 as compared with 1856-57, *Kellner* 3410–3414——Large item of increase in 1867–68 owing to the additional pay and bounty granted to British troops in India, *ib.* 3538–3545——Explanation relative to the increase of pay by the substitution of full batta for half batta, *ib.* 3650, 3651——Origin and amount of full batta and half batta; circumstances under which the latter was abolished, *Johnson* 3652–3654.

Amount of increase of charge by the addition of 2 *d.* per day to the pay of the European troops, *Lord Lawrence* 5388. 5393, 5394——Probability of its becoming necessary to raise the pay of the sepoys, owing to the increase of prices; difficulty of late in obtaining recruits, *ib.* 5718–5721——Partial increase of pay in the shape of good conduct money, when witness was Governor General, *ib.* 5718, 5719——Much better position of the Native officers since witness was in India, *ib.* 5718.

Estimate of, at least, 200,000 *l.* as the increased charge represented by the additional 2 *d.* a day to the British soldier, with the 1 *d.* on re-engagement, *Kellner* 7372–7374. 7382, 7383——Amount represented by the bounty and kit money; doubt as to the cause of the large increase of charge on this score in 1867-68, *ib.* 7374–7378——Question considered as to the amount of saving by improved organisation as compared with the increase of charge for the extra 2 *d.* a day, and for the bounty and kit money, *ib.* 7384–7395.

6. Miscellaneous Services:

Great fluctuation in the annual grant for miscellaneous services; explanation relative to the chief items comprised in this grant, *Kellner* 7040.

7. Rewards for Military Services:

Several items of expenditure included under the grant for rewards for military services; considerable decrease of this expenditure since 1863–64, *Kellner* 7042.

8. Retired Officers Resident in India:

Very fluctuating character of the annual expenditure under the grant for retired officers; that is, for officers resident in India, *Kellner* 7043.

9. Military Pensions:

Steady decrease since 1862–63 in the charges under the grant for military pensions; this decrease is largely owing to the reduction in the native army, *Kellner* 7044.

10. Compassionate Allowances:

Slight increase in 1871–72 as compared with 1863-64 in the charge for pensions and compassionate allowances to the widows and children of European officers, *Kellner* 7045, 7046.

11. Superannuations

Report, 1873—*continued.*

ARMY—continued.

III. *As to the Expenditure*—continued.

11. Superannuations to Uncovenanted Servants:

Amount of variation in the annual expenditure for pensions and superannuations to uncovenanted servants in the military department, *Kellner* 7047.

12. Postage:

Information relative to the military expenditure on account of postage, and the great variation of this charge since it first appeared in the military accounts, *Kellner* 7060–7073.

13. Military Account Department:

Comparative statement of the cost of the military account department in all three Presidencies in 1862–63, and 1872–73, *Kellner* 7569.

14. Military Works:

General abstract of expenditure on military works in India from 1862–63 to 1870–71, arranged under the heads exhibited in the returns prepared by the Government of India, and distinguishing between original works and repairs, *App.* 647.

15. Home Charges in respect of Recruits; Objections thereto as excessive:

Complaint as to the great and unnecessary expense imposed upon India in respect of the recruiting establishment in England; very moderate cost of recruits in the time of the East India Company, Sir *C. E. Trevelyan* 440–445——Further statement relative to the undue charge upon India in respect of recruits, witness submitting that the charge is based upon arrangements framed with a view primarily to English interests, *ib.* 641–646——Powerlessness of the Secretary of State for India to compel the removal of grievances, as in the case of the charge for recruits, *ib.* 642. 645.

Statement with further reference to the strength of the Indian Depôts in England and the excessive charge made upon India for recruits; decided injustice to India in this matter, Sir *C. E. Trevelyan* 650–659——Further reference to the charge for recruits as unduly high, *ib.* 777–781. 788–790——Witness repeats that as regards recruits for India the "actual cost" alone should be charged, *ib.* 992.

Grounds for the conclusion that India is excessively charged for recruits; particulars hereon as to the former and present systems of supply and the cost in each case, *Lord Lawrence* 4798–4808.

Expediency of India being relieved of charge in respect of recruiting expenses and certain other payments disbursed by the War Office, *Nowrozjee Furdoonjee* 6984.

Large saving which would appear to be feasible in the charge for recruits from England; much less cost when obtained formerly from the depôt at Warley, *Kellner* 7591, 7592.

16. Seconding of Officers:

Large and unnecessary expense in the "seconding" of officers; difficulty of reform unless with consent of the military authorities, *Lord Lawrence* 5342.

17. More frequent Reliefs; increased Expenditure on this Score:

About twenty British regiments are relieved annually throughout India, which will account for a large expenditure, *Kellner* 3750, 3751——Particulars with reference to the increased charge by reason of the greater frequency of reliefs, and the extensive employment of railways, *Johnson* 3759–3769. 3787–3793——Enhanced charge in consequence of the reliefs being all carried on through Bombay in connection with the troop ships between England and that port; reasons for the rejection of Calcutta and Madras for debarkation or embarkation, *ib.* 3760–3762. 3769. 3794–3809.

Further statement of the annual reliefs in India, in reference to the system of inland transport and railway conveyance; large increase of expenditure on this score, *Kellner and Johnson* 3749–3758——Adoption of more frequent reliefs for the efficiency of the army, *Johnson* 3761, 3762.

18. Commissariat and Land Transport:

Total of 1,470,391 *l.* as the expenditure of the Commissariat and Transport Department in 1856–57, the charge in 1871–72 having been 1,929,369 *l.*, *Kellner* 3662, 3663——Enumeration of the heads of charges comprised in the grant for the commissariat and land transport, *ib.* 3664, 3665——Explanations in detail relative to the causes of increase or decrease in the grant in each year from 1861–62 to 1871–72, *ib.* 3665 *et seq.*

Great disturbance of the grant in years when military operations are undertaken, and when prices are enhanced by famine or scarcity, *Kellner* 3666–3688. 3694. 3720 *et seq.*

Report, 1873—*continued.*

ARMY—continued.

III. *As to the Expenditure*—continued.

18. Commissariat and Land Transport—*continued.*

——Statement relative to the large increase (138,000 *l.*) in railway transport charges in 1868-69; explanation that the old means of transport are still maintained to some extent, *Kellner* 3694-3707——Very large item of increase in respect of inland transport, *Johnson* 3695——Greater cost of conveyance by railway than of marching to and from the port, *Kellner* 3708-3713. 3750, 3751. 3757——Means of ascertaining the effect of railway transport upon the commissariat or transport establishment, *ib.* 3714-3718.

Comparison between the charge for food, forage, &c., in 1871-72 and in 1861-62, *Kellner* 3740-3748——Very large increase since 1862-63 in the total cost of inland transport, *ib.* 3753-3758——Increase of 235,460 *l.* in the cost of the transport services of the commissariat between 1862-63 and 1871-72, *ib.*——Heavy charge in respect of the railway transport of stores and war material, *ib.* 3758.

Sundry details submitted in explanation of the large increase in the cost of inland transport under various heads, *Johnson* 3759 *et seq.*——Large addition to the cost of transport when military operations are undertaken, *ib.* 3759——Increased cost of 168,000 *l.* for transport since 1861-62, owing chiefly to the railway transport to and from Bombay, *ib.* 3769. 3795-3800. 3824-3826——Enhanced charge for transport on account of the increased use of hill stations, *ib.* 3769.

Increase of inland transport charge by reason of the increase of wages and the increased cost of feeding cattle, *Johnson* 3785, 3786——Further increase of transport charge on account of the assistance which it is found necessary to afford soldiers' families; also on account of the assistance now given to native soldiers when going on sick furlough, *ib.* 3827-3830. 3849.

Several counteracting causes, but for which the reduction of commissariat charges since 1856-57 and 1863-64 would be much larger; reference especially to the increased number of European troops and the improved rations now given, *Kellner* 3858. 3874——Decided tendency to economy in the commissiart expenditure, *ib.* 3882——Information relative to the cost of the commissariat establishment in different years; decrease for both the executive and subordinate establishments, *Johnson* 3883-3898.

Economy effected under the head of provision for European troops, *Kellner* 3899-3911——Explanation in connection with the increase of charge for compensation for the dearness of provisions for natives; want of stricter investigation of the claims for compensation, *ib.* 3912-3929. 3992-3994——Varying charge for compensation for dearness of forage for the irregular cavalry, *ib.* 3913.

Considerable diminution of the annual charge for commissiart live stock, the demand having decreased in the absence of military operations, *Kellner* 3962-3971——Information relative to the number of horses fed in different years by the commissariat, and the cost; probability of further check being required as regards the allowance or charge for forage, *ib.* 3980-3984.

Several causes which have led to an increase of charge for the movement of troops, notwithstanding the extension of the railway system, *Lord Lawrence* 4743, 4744——Great decrease in the available supply of elephants and oxen for transport purposes in time of emergency; so that it is more necssary than formerly to keep an increased establishment of animals, *ib.* 4745-4747.

Comparatively small payment formerly for carriage or transport; great difficulty in providing carriage on account of the short payments made, *Lord Lawrence* 5384——Large increase of the charge for carriage since an improved transport system has been established, *ib.* 5384, 5385——Causes of the increased expense of transport further adverted to and explained, *ib.* 5459-5461.

Comment upon the receipt of grain compensation by European, but not by native non-commissioned officers and soldiers, *Nowrozjee Furdoonjee* 5284, 5285.

Relative cost of the commissariat executive establishments in Bengal, Madras, and Bombay respectively, in 1863-64 and 1871-72; important increase in the latter Presidency, *Kellner* 7294——Addition to be made to the commissariat charges in India in respect of malt liquor and rum sent from England, *ib.* 7295-7299——Reduced cost of rations per man in 1870, as compared with 1873; improvement in their quality, *ib.* 7300-7304.

Further explanation relative to the increased compensation paid to native troops for the dearness of provisions, witness believing that there has been some laxity in this respect; recent issue of instructions on the subject, *Kellner* 7305-7317——Steps taken by Government with a view to greater promptitude and exactness in the matter of commissariat expenditure and accounts, *ib.* 7315. 7324.

Reference to certain printed statements as showing the average cost of each of the articles forming the soldiers' rations in each year, from 1857 to 1870, *Kellner* 7571,

Report, 1873—*continued.*

ARMY—continued.

III. *As to the Expenditure*—continued.

18. Commissariat and Land Transport—*continued.*

7571, 7572——Annual compensation for dearness of provisions and of forage in each year, from 1862–63 to 1871–72; stricter check now being applied, *Kellner* 7576.

Better position of the British soldier in India than elsewhere as regards rations and stoppages; list of articles comprised in the daily ration, and average cost per month, *Kellner* 7593, 7594——Discontinuance of a former check as to the cost of the troops in different districts, as affected by the cost of food, *ib.* 7596, 7597——Belief that the ration costs less in Bengal than formerly, and more in Madras and Bombay, *ib.* 7598.

19. Sea Transport and Troop Service:

Large room for economy as regards the transports and other vessels employed in connection with Bombay, *Sir C. E. Trevelyan* 845–847——Opinion that the contract system should be used exclusively for purposes of transport, *ib.* 846, 847.

Average cost of sea transport per head at different periods, *Johnson and Kellner* 3805, 3806. 3809. 3820, 3821——Information relative to the charges for sea transport in England and India respectively, in each year since 1863–64; statement hereon as to the large item for Government troop ships since 1868–69, *Johnson* 3810–3823.

Undue cost of the conveyance of troops between England and India on account of the special ships and establishment maintained for the purpose, *Nowrozjee Furdoonjee* 5272, 5273——Expediency of India being relieved in respect of the India troop service and the passage of troops, *ib.* 6984.

Investigation of the expenditure under the grant for sea transport charges; very fluctuating charge both before and since the employment of Government troop transports in 1867–68, *Kellner* 7025–7035——Statement of the charges for sea transport by chartered vessels in England and India respectively in each year from 1863–64 to 1871–72, *ib.* 7025——Large excess upon former expenditure if allowances be made for interest and depreciation of the Government transports, *ib.*

Important item represented by the larger or shorter duration of the voyage between England and India, *Kellner* 7026–7035——Several changes made in the arrangements for reliefs in India; effect thereof in enhancing the cost of sea transport, *ib.* 7035——Payment for the troop ships out of Indian revenues, whilst the money is spent under the control of the Admiralty, *ib.* 7037–7039.

Statement of the charges in India and in England in 1865–66 and in 1871–72 in respect of military transport service, *App.* 646.

20. Great Increase of the Charges in Bombay since 1856–57:

Increase of the army charges in Bombay from 1,762,413*l.* in 1856–57 to 3,122,566*l.* in 1870–71; *Nowrozjee Furdoonjee* 6983.

Very large increase of ordnance expenditure in Bombay, for which satisfactory explanation has not been given, *Kellner* 7285.

21. Several Causes of Increase of Cost concurrently with Reduction of Strength:

Reference to witness' financial statement for 1865–66, as showing the increase of military charge under various heads, the increased price of rations being an important item, *Sir C. E. Trevelyan* 1290.

Summary of the causes why reduction of military expenditure has not kept pace with reduction of military strength, *Kellner* 3410–3414. 3614, 3615——Statement as to economy having been prevented by the general increase of pay of all ranks, including non-commissioned officers and men, both in the European and Native army, *ib.* 3410–3414. 3538–3545. 3615–3619. 7372–7374. 7382, 7383——The non-reduction of charge is largely owing to various measures of military reorganisation, *ib.* 3616.

Explanation of various causes of the greater cost of the army in 1872-73 than in 1857–58; although there has been in the interval a very large reduction of the Native army, there has been a considerable increase of European troops with increased pay, *Lord Lawrence* 5380 *et seq.*——Great increase of prices since 1857–58, this being one cause of the increased military charge, *ib.* 5384. 5390——Enhanced cost of rations when witness was in India, *ib.*

Increase of charge also by reason of the greater attention paid to the comfort of the troops in several ways, *Lord Lawrence* 5384. 5387——Much greater cost per man of European troops than of Native troops, *ib.* 5386, 5387——Impression as to much additional expense having arisen from the increased pay allowed for soldiers' wives and children, *ib.* 5390–5392.

Explanation that decrease of force should not in any case imply a corresponding reduction in cost, *Kellner* 6996——Further reference to the increase between 1863-64 and 1870–71, as resulting mainly from the improved administration and organisation of the

Report, 1873—*continued.*

ARMY—continued.

III. *As to the Expenditure*—continued.

21. Several Causes of Increase of Cost, &c.—*continued.*

British and Indian forces, *Kellner* 6998–7006——Various elements of enhanced cost, such as improvement in arms, in the condition of the soldier, &c., *ib.* 7503.

22. Part taken by the Indian and Home Authorities respectively, in the Direction of Economy:

Extract from minute by witness as Governor of Madras, dated 11th July 1859, in detailed elucidation of his views as to the curtailment desirable and feasible in the military expenditure, and as to the reorganisation of the police, *Sir C. E. Trevelyan* 1282——Satisfactory reduction made in the military expenditure at the instance of Mr. Laing, assisted by Sir George Balfour and Sir George Jameson, *ib.* 1285——Injunctions sent to the Government of India by Lord Stanley (Earl of Derby) for a reduction of military expenditure; steps previously taken for this purpose by Lord Canning, *ib.* 1288, 1289.

Great increase of military expenditure since the period of the reduction therein by Lord Canning after the mutiny, *Sir C. E. Trevelyan* 1290–1294—— Instances of military administrators or officials who have been strong economists, *ib.* 1316–1320—— Explanation as to witness, when finance minister, having been adverse to the continued maintenance of the special Military Commision (Sir George Balfour and Sir George Jameson), though the Commission had done most excellent service, *ib.* 1319, 1320.

Information relative to the very extensive reductions of Madras military expenditure effected by the Madras Government and the Military Finance Commission after the mutiny, *Sir C. E. Trevelyan* 1328. 1381, 1382.

Very careful supervision and check expressed in the Financial Department upon the Military Budget, including all proposed expenditure on barracks, &c., *Lord Lawrence* 4731–4734——Military efficiency, rather than economy, had in view generally by the military members of the Council, *ib.* 4735–4737.

Statement on the subject of reductions of military expenditure having been strongly recommended by the Indian authorities but overruled by the Home authorities, *Lord Lawrence* 4752–4757. 5622–5624——Power of the Commander in Chief and the Secretary of State for War in Europe as to raising the pay of the British army, or making other changes affecting the military expenditure of India; checks upon such alterations, *ib.* 5617–5621.

Impression that it is not considered essential by the War Office always to consult the India Office before the introduction of army changes affecting the expenditure in India, *Johnson* 7453–7459——Constant effort made by the Government of India for some years past to reduce the military expenditure; non-adoption however of various reductions proposed, *ib.* 7503–7510——Initiative taken in India towards reduced expenditure on account of the deficit in the finances, *ib.* 7510.

23. Suggestions for a Curtailment of Expenditure:

Suggestions relative to the new arrangements desirable in order to effect the curtailment required in the military expenditure; advocacy more especially of a complete union of the armies of the three Presidencies, *Sir C. E. Trevelyan* 824–844. 1524–1526——Great economy by abolishing the separate head quarter staffs, &c., *ib.* 832——Importance of the hands of Government being strengthened against the constantly recurring claims of Indian officers, *ib.* 934.

Great importance of moderation in taxation as regards military expenditure, *Sir C. J. Wingfield* 2117.

Prospect of some reduction in the military charge below its former cost, when the recent changes shall have been for some time in full operation, *Lord Lawrence* 5365—— Further reference to the military expenditure as not admitting of any large immediate reduction, though economy may be applied from time to time by carefully watching for opportunities, *ib.* 5523——Expediency of every reduction and economy consistent with efficiency, *ib.* 5793–5795.

Witness considers that under ordinary conditions the expenditure is susceptible of reduction, *Kellner* 7503——Doubt as to there being room for further saving by further reorganisation of the European army, without reducing the strength, *Johnson* 7514–7519——Considerable economy by concentrating the British troops in fewer regiments of infantry and cavalry, and fewer brigades of artillery, *Kellner* 7588–7590.

24. Attention drawn by the Committee to the large Increase of Cost in proportion to the Decrease of Strength:

Reference to the evidence on the subject of the military expenditure as showing on the whole a very large increase of cost in proportion to the diminished numerical strength of the army, *Third Rep.* iii.

IV. *Question*

Report, 1873—*continued.*

ARMY—continued.

IV. *Question of the Appointment of a War Minister in India in lieu of Commander in Chief:*

Objections to the office of Commander in Chief as being an office greatly overgrown, and as involving a double set of duties which cannot be performed by one person, *Sir C. E. Trevelyan* 837–841——Suggestion that the offices of Commander in Chief and Military Member of Council be fused into one in the person of a Minister of War, and that the duty of inspection be performed by the Commanders of the local Army Corps, *ib.* 841.

Practical administration of the army by the Commander in Chief, subject however to the control of the Governor General; approval of this arrangement, *Lord Lawrence* 4748–4751——Inexpediency of a War Minister in India, with enlarged and independent power; tendency thereby to increased expediture, *ib.* 4749–4751.

V. *Question of an Amalgamation of the Armies of the three Presidencies:*

Grounds for the recommendation that there be only one army in India under the Supreme Government, and that the separate head quarters and general commands of Bengal, Bombay, and Madras be abolished, *Sir C. E. Trevelyan* 830–835——Very large saving feasible by reducing the strength of the Native army, and by amalgamating the troops of the three Presidencies, *ib.* 1524–1526.

Considerable charge for the Commander in Chief and his staff at Bombay, *Nowrozjee Furdoonjee* 5141, 5142——Grounds for the conclusion that there is no necessity for a separate Commander in Chief for Bombay or Madras; room for much economy in this direction, *ib.* 5142——Approval of an amalgamation of the Native armies, *ib.* 5143–5145.

Expediency of maintaining the separation between the Native armies of the several Presidencies, *Lord Lawrence* 4690, 4691——Illustration, during the mutiny, of the importance of a distinct and separate army, European as well as Native, for each Presidency, *ib.* 4690. 4695——Entire absence of economy or other benefit by an amalgamation of the several armies; great disadvantage in more ways than one, *ib.* 4694–4697.

Further explanation of witness' views in favour of maintaining the local Commanders in Chief of Bombay and Madras, *Lord Lawrence* 5483–5493——Approval of the native troops being made more local, as in the Punjaub; disapproval, however, of any sweeping change, *ib.* 5796–5798.

VI. *Suggested Exemption of the Indian Army from any Control on the part of the War Office:*

Opinion that the army of India should be purely local, and subject to the orders of the Government of India, without any control or jurisdiction in the Commander in Chief in England, *Nowrozjee Furdoonjee* 5146.

VII. *Question of locating the European Troops more largely in the Hills:*

Conclusion that a much larger number of the European army should be located in the hills; suggestions to this effect, *Sir C. E. Trevelyan* 1141–1152——Recommended removal of European garrisons from Vellore, Trichinopoly, and Masuliputan, *ib.* 1151.

Considerable number of European troops now being located in the hills, in permanent barracks; advantage on the score of health, whilst there is a serious disadvantage on strategical grounds, *Lord Lawrence* 5303–5307——When the arrangements are completed there will be about one-sixth of the English army, or 10,000 men in the hills, *ib.* 5303.

Extra cost by locating troops in the hills; economy on the other hand, by the saving of life, and the avoidance of recruiting, *Lord Lawrence* 5307, 5308——Very exceptional instances of any station in the plains so healthy as those in the hills, *ib.* 5355–5357——Impression that on the whole the men now prefer to be stationed in the hills, *ib.* 5358, 5359——Satisfactory employment of soldiers in the hills on road making, *ib.* 5359, 5360——More physical energy of troops direct from the hills than of those in the plains, in the event of sudden emergency, *ib.* 5361, 5362.

Argument that the plains must be held in force, and that only a small proportion (such as one-sixth) of the English army should be located in the hills; great element of danger if this rule were inverted, *Lord Lawrence* 5363, 5364.

Witness repeats that it is absolutely necessary that the plains should not be denuded of British troops, *Lord Lawrence* 5706–5708.

VIII. *Leave of Absence, Furlough Allowances, &c.:*

Limitation formerly as to the proportion of officers who might be absent in Europe, *Johnson* 3628–3630——Explanation of the former and present regulations as regards the allowances to officers of the Royal army and of the Indian army respectively, for passage money between India and England, *ib.* 4122–4129.

Dissent from the view that the extension of the furlough system has tended to widen the relations between officers and men, *Lord Lawrence* 5731, 5732.

Report, 1873—*continued.*

ARMY—continued.

VIII. *Leave of Absence, Furlough Allowances, &c.*—continued.

Allowance to be made for the half-pay of officers in England in calculating the total cost of the European officers, *Kellner* 7499-7501——Explanation that the furlough allowances in Europe of military officers in civil employment are all charged to the military department; increased home expenditure under this head, *ib.* 7501, 7502——Increased number of officers attracted to Europe by the more favourable furlough terms, *ib.* 7502.

IX. *Army Clothing:*

Varying amount of the annual charge for the clothing establishments; several causes thereof, the result showing on the whole a satisfactory diminution as compared with 1862-63 or 1863-64, *Kellner* 4078-4081——Important change of system in 1862-63, by making up the clothing in India; increased charge in consequence, *ib.* 4079-4091——Improved supply of clothing since 1861, both as regards quantity and quality, *ib.* 4092. 4098-4100——Issue of cloth and serge in alternate years since 1861; effect as regards the amount of the grant, *ib.* 4093, 4094. 4106-4108. 4130——Explanation as to the money compensation to the soldier as regards clothing, *Kellner and Johnson* 4104, 4105——Convenience of the troops consulted in providing serge and cloth clothing in alternate years, *Johnson* 4130.

X. *Army Receipts:*

Small amount of army receipts in England, whilst those in India are considerable; particulars hereon for 1856-57, and for each year since 1861-62, *Kellner* 2968-2972

XI. *Proportion of Officers in the Native Regiments:*

Evidence to the effect that there are too many officers in the local English regiments, but that the standard of the Royal English regiments as to officers must be the standard of the local regiments, *Lord Lawrence* 5345-5354——Impression that the general policy as regards the number of officers, &c., has not altered since the amalgamation of the army, *ib.* 5625-5627.

XII. *Objection to the Promotion of Natives beyond a certain Grade:*

Opinion adverse to the promotion of native officers in the army, so that up to a certain grade they might in every way take equal rank with European officers, *Lord Lawrence* 5511-5518——Instances of native commandants of military corps in the Punjaub who were most efficient; serious disadvantages however of such appointments in any number, *ib.* 5722-5730.

XIII. *Rules and Regulations as to Appointments, Promotions, &c.:*

Extract from military rules and regulations on the subject of commissions and promotions in the several branches of the service, *App.* 911-915.

Rules and regulations relative to the examination and appointment of officers in the different branches, *App.* 915-919.

Bands. Particulars as to the charge for the bands of the Governor General, and of the Governors of Madras and Bombay respectively; much larger charge at Bombay than at Madras, *Kellner and Johnson* 3349-3351. 3369-3382——Charge of 285 *l.* for Madras and of 647 *l.* for Bombay, *Kellner* 3370.

Bangalore. Approval of a complete magazine at Bangalore, properly entrenched, *Sir C. E. Trevelyan* 1520. 1522.

Report, 1873—*continued.*

Banks of Bengal, Bombay, and Madras. Comment upon the enlarged action given to the Bank of Bombay by the Bombay Government, without the knowledge or sanction of the Government of India, *Sir C. E. Trevelyan* 498. 501, 502——Examination as to the grounds for witness' conclusion that the Government of Bombay had ample authority to prevent the abuse which occurred in connection with the Bank of Bombay, *ib.* 692-711.

Opinion that no change is advisable in the relations of the Government of India to the Presidency banks, *Lord Lawrence* 5532-5535——Consideration of the causes of the failure of the Bank of Bombay; blame attributable to the Bombay Government in the matter, *ib.* 5536-5540.

Further explanations in connection with the failure of the Bank of Bombay, and the action of witness and his Council during the pressure on the Bank; blame attributable to the Bombay Government, *Lord Lawrence* 5809-5819.

Baree Doab Canal. Decided approval of this work; it will pay well in course of time, *Lord Lawrence* 4578.

Statement of the length, cost, and financial operation of the canal in 1870-71, *App.* 660.

BARRACKS:

1. *Extent and Character of the Accomodation in the Old Barracks, previously to the time of the Mutiny.*
2. *Inquiries made, and Authorities responsible, as to the Plans of the New Barracks, and the Adoption of an Upper Storey.*
3. *Relative Advantages and Disadvantages of Upper-storeyed Buildings on Sanitary Grounds.*
4. *Extent of Accommodation provided, and to be provided.*
5. *Cost; Great Excess of Estimates, and Causes thereof.*
6. *Construction and Supervision.*
7. *Allahabad, Saugor, and Nusseerabad.*
8. *Dalhousie Barracks.*
9. *Jubbulpore Barracks.*
10. *Wellington Barracks.*
11. *Less costly Buildings required in the Hills than on the Plains.*
12. *Strategical Considerations.*
13. *Barrack Furniture.*
14. *Advantage of Periodical Survey.*
15. *Complaint as to the comparative Inferiority of Accommodation for Native Troops.*

1. *Extent and Character of the Accommodation in the Old Barracks, previously to the time of the Mutiny:*

Low and narrow buildings of which the barracks for Europeans in India formerly consisted; these were but very slightly raised from the ground, and had no verandahs, *Crommelin* 3-5—— Gradual improvement, previously to 1857, in the description of barracks erected; very lofty buildings constructed in the Punjaub, and elsewhere, upon the recommendation of Sir Charles Napier, *ib.* 5-10——Very few barracks formerly for Natives, who generally hutted themselves, *ib.* 11, 12.

Difficulty as to barrack accommodation for the increased European force (about 20,000 men) thrown into India at the time of the mutiny; several temporary expedients resorted to, *Crommelin* 13-17——Very incomplete accommodation for the existing force previously to the increase through the mutiny, *ib.* 14-17.

Further statement to the effect that new barracks were required at the time of the mutiny for an additional force of about 20,000 men, the accommodation before the mutiny having still been deficient, *Crommelin* 282-290——Very good character of much of the accommodation before Lord Dalhousie left India; new and improved barracks during his administration, *ib.* 291-295.

Discovery by witness in Madras of several ancient barracks, unsuited to the present time; waste of money in keeping these in repair, *Sir C. E. Trevelyan* 1127-1138.

2. *Inquiries made, and Authorities responsible, as to the Plans of the New Barracks, and the Adoption of an Upper Storey:*

Minute of the Governor Generel in July 1863, with reference to the precautions to be taken relative to the expenditute on barracks; appointment of witness under this Minute as the officer specially to assist Government in the matter, *Crommelin* 18, 19—— Searching inquiry made by witness, and subsequent report to Government, relative to the mode of construction desirable; special reference had to the question of economy, *ib.* 20-22——Resolution passed by the Government of India, in December 1864, setting forth the conclusions arrived at, and showing the data upon which based, *ib.* 22-24. 30——Important alteration embraced in the plans finally adopted, it having been decided

Report, 1873—*continued.*

BARRACKS—continued.

2. *Inquiries made, and Authorities responsible, as to the Plans, &c*—continued.

that the upper storeys of the barracks should, as a rule, be used only as dormitories, *Crommelin* 24——Modification by the Government of India, in December 1870, of the rule laid down in December 1864 as to the exclusive use of upper storeys for dormitories, *ib.* 42, 43.

Power given, in the first instance, to the local government and officers to submit deviations from the designs adopted by the Central Government; considerable modifications in some localities, *Crommelin* 193–195——Circumstance of the local governments not having been allowed to adopt one-storeyed buildings, though in the first instance they might have suggested them; instances of double storeys having been designed before the mutiny, *ib.* 218-228—— Explanation that although the designs of the new barracks were originated by witness, they were approved by the Sanitary Commission in India and by the Home Government, *ib.* 271–273——Modification by the Government of India of the rule as to a second storey, *ib.* 274——Further reference to the important deviations from the original plans, *ib.* 364–366.

Statement as to the Home Government having been primarily responsible for the plans of the new barracks, and for the adoption of an upper storey, *Sir C. E. Trevelyan* 418–429. 532, 533. 571–577.

Examination in detail upon the question whether the pressure to construct new and expensive barracks was not first put by the Government of India upon the Home Government, instead of by the latter upon the former; attention of witness drawn to a despatch on the subject by Lord Elgin in January 1863, *Sir C. E. Trevelyan* 1009–1025—— Impression that the recommendations of the Royal Sanitary Commission formed the basis of the barrack plans prepared in India; accuracy of this view impugned, *ib.* 1014–1028.

Very slight changes made by witness in the plans, or in his report of October 1861, in consequence of the suggestions of the Royal Sanitary Commission, *Crommelin* 1026–1028.

Belief that the Royal Commission recommended that the troops should not sleep on the ground floor, *Sir C. E. Trevelyan* 1029–1032—— Report by Colonel Crommelin in October 1863 adverted to as showing that he discouraged upper storeys, save in damp parts of the country, *ib.* 1033–1036——Views expressed by Sir John Lawrence, as Governor General, in favour of the barracks with an upper storey, *ib.* 1037.

Circumstance of witness having in a Minute dated 19th March 1864, expressed a preference for upper storeyed barracks; this is entirely opposed to his present views, *Sir C. E. Trevelyan* 1038–1042.

Extracts from the last financial statements of Mr. Massey, relative to the immense expenditure to be provided for in respect of barracks; this expense was forced upon the Government of India, and rendered it absolutely necessary to enter upon a system of loans, *Sir C. E. Trevelyan,* 1203.

Strong public feeling when witness became Governor General as to the want of more healthy accommodation for the troops; special appointment of Colonel Crommelin by Lord Elgin's Government to inquire into the matter, *Lord Lawrence* 4738—— Careful inquiry by witness before deciding in favour of upper storeyed barracks in the Upper Provinces and elsewhere, *ib.*——Concurrence of all the members of Council in the foregoing view, *ib.* ——Very careful discussion also before the space per man was decided upon, *ib.* 4738, 4739.

3. *Relative Advantages and Disadvantages of Upper-storeyed Buildings on Sanitary Grounds*:

Superior accomodation by the new plans and by upper-storeyed buildings, though involving increased cost, *Crommelin* 25-29——No controversy has arisen about the scale of accommodation, *ib.* 81——Denial that any new barracks have been uninhabitable on sanitary grounds, *ib.* 127–129——Large number of upper-storeyed buildings throughout India, bricks being frequently used in construction as regards temperature, *ib.* 205–211 ——Inaccuracy of the view that the temperature is higher in the upper storey of brick barracks than in one-storeyed buildings; reference to the result of thermometrical observations on this point, *ib.* 209, 210. 213–215.

Favourable experience of witness as regards the temperature in upper storeys, *Crommelin* 229–234—— Inaccuracy of the view that the temperature is much better in bungalows made of unburnt brick than in barracks made of burnt brick; the matter depends on structural arrangements, *ib.* 237–241——Doubt whether the sanitary result will be so satisfactory in the case of barracks of one storey, *ib.* 274–281——Several purposes for which the lower storey is used where there is an upper storey for a dormitory, *ib.* 334–336.

Greater or less heat of the upper storey accordingly as the roof is constructed, *Crommelin* 337-339—— Efficiency of mud roofs considered; obstacle to making them too

Report, 1873—*continued.*

BARRACKS—continued.

3. *Relative Advantages and Disadvantages of Upper-storeyed Buildings, &c.*—contd.

too thick on account of the weight, *Crommelin* 340-345. 394, 395——Obstacle to underground rooms for soldiers, *ib.* 346-348——Limited usefulness of thermantidotes, *ib.* 349-352——Impracticability of watering the roofs, *ib.* 353.

Reference to certain returns from Bombay as showing that admissions into hospitals are much less from upper storeys than from lower storeys, *Crommelin* 382——With regard to the thermometrical experiments, these are being made in consequence of complaints about the heat; belief that the upper-storeyed barracks are however cooler than the others, *ib.* 383-388.

Entire dissent from Colonel Crommelin's opinion that a barrack with an upper storey is cooler and more comfortable than the old fashioned bungalow, *Sir C. E. Trevelyan* 418, 419. 577-579. 597, 598——The true model is the Indian bungalow, built of thatch and mud, *ib.* 418, 419——Healthy character of the three storeyed barracks at Fort William, *Lord Lawrence* 4741, 4742——Purer atmosphere by reason of an upper storey, *ib.* 4742.

4. *Extent of Accommodation provided, and to be provided:*

Rapid construction of barracks on the new plans, whilst the old barracks were modified and utilised as far as possible, so as to promptly accommodate the increased European force in the country, *Crommelin* 31-38——Calculation that further accommodation is still required for about 5,000 men, *ib.* 40-42——Reference to a statement prepared by witness showing the progress made to the end of the year 1869-70 in providing barracks for Europeans, *ib.* 317-322.

Explanation that the barrack accommodation already spoken to by witness is for rank and file only, *Crommelin* 2305-2310. 2386——Several places in which accommodation has been provided for native troops, *Innes* 2313-2315.

Statement showing, approximately, the extent of barrack accommodation for European soldiers (unmarried and married), of all arms of the service in new buildings completed, and in progress, and in old buildings, at each station in the Bengal Presidency, including the stations occupied by Bombay and Madras troops in Central India, the Central Provinces, Hyderabad, Rajpootana, and Burmah, *App.* 649-654.

5. *Cost; Great Excess of Estimates, and Causes thereof:*

Estimate in 1865 of ten millions as the cost of the new barracks and other military works, about four and a half millions being for new barracks to accommodate about 25,000 men, *Crommelin* 44-55——Large excess of the cost of accommodation per man beyond the original estimate, owing to the large increase in the price of materials and of labour; sundry particulars hereon, *ib.* 56-64. 76, 77. 108-126——Original estimate of 180 *l.* as the cost per man, whereas the actual cost will be about 250 *l.* per man, *ib.* 57-75——Exceptionally heavy cost at Mhow, *ib.* 59. 77.

Information relative to the total expenditure since 1864-65 in new barracks and other military works; further expenditure of about a million and a quarter required to complete the new system of barracks, *Crommelin* 65-78. 202-204. 296-308——Expenditure of about 3,300,000 *l.* on new barracks, by the end of the year 1872-73, *ib.* 74, 75. 297. 305——Steps recently taken by the Governor General towards reducing the cost of construction by lowering the style of buildings, *ib.* 75. 78——Witness is not aware of any official complaints about the expenditure, which he considers economical, *ib.* 79, 80.

Effect of the simultaneous construction of railways and military works since the mutiny in enhancing the demand for wood and other materials, and in raising prices, *Crommelin* 108-126——Opinion that not only the barracks but the military works generally since 1863 having been economically carried out, *ib.* 135-138——Explanation as to the payments for daily labour under departmentol work, *ib.* 212——Heavy cost doubtless of the new barracks; economy, however, on the score of repairs, *ib.* 235, 236. 257-260——Further statement as to the effect of the railways in raising the cost of materials, *ib.* 251-255.

Large cost of repairs adverted to as not arising from the new system of barracks, *Crommelin* 309-311——Much higher barrack expenditure in Bombay than in Madras, *ib.* 314, 315——Denial that the buildings are palatial in character, or that they act as "sun traps," *ib.* 367-369——Comparative cost of the barracks in India, and of barracks in China and in England; explanation hereon as to the necessity of great height in the upper storey in India, *ib.* 370-381.

Comment upon the immense and wasteful expenditure upon new barracks and other military buildings, this outlay having originated in England, and the plans of model barracks having been settled in the main by the Home authorities, *Sir C. E. Trevelyan* 418-429. 532, 533. 571-577——Palatial character of the barracks whilst they are totally unsuited to the circumstances of the country, *ib.* 418-422.

Explanation and modification of former evidence as to the actual amount thrown away

Report, 1873—*continued.*

BARRACKS—continued.

5. *Cost; Great Excess of Estimates, and Causes thereof*—continued.

on new barracks by reason of faulty construction, &c., *Sir C. E. Trevelyan* 1043–1052——Objection to a capital account of barracks, showing the expenditnre from year to year, *ib.* 1126.

Aggregate of 4,884,446 *l.* as the expenditure during the years from 1862-63 to 1870-71, on barracks; further expenditure of 371,856 *l.* in 1871–72; *Innes* 2209–2213,

Decrease of annual expenditdre since 1869–70, the charge for new barracks having since diminished, *Crommelin* 2251–2253——Sanitary considerations owing to which the large outlay on new barracks is partly owing, *ib.* 2301, 2302.

Return handed in, classifying the barracks expenditure under various heads, *Innes* 2311, 2312——Amount of annual expenditure for repairs since 1862–63; *ib.* 2319.

Obstacle to more detailed accounts than those already supplied by witness as to the cost of new barracks per head in different localities, *Crommelin* 2364, 2365——Information as to the modes in which the expenditure on barracks and other military works come under the supervision and control of the military department, *Innes* 2390–2397——Means of showing in detail the cost of repairs of European barracks, *ib.* 2401, 2402.

Strong military influence used in the direction of improved and costly barrack accommodation, *Lord Lawrence* 4732. 4737, 4738——Due consideration paid to the question of economy as well as of efficiency, *ib.* 4738–4741.

Explanations in connection with the large increase of aggregate expenditure under the Grant for Barrack Establishments, Supplies, and Services; satisfactory character of the small increase for executive establishments, *Kellner* 7016–7019.

Particulars relative to the charges in the Barrack Department in 1863–64, 1871–72, and 1872–73, and the increase on account of subordinate establishments, and of punkah pulling, &c.; transfer of certain items of charge in 1872-73, *Kellner* 7343–7357.

Further statement by Colonel Crommelin to the effect that the further sum estimated to be required is far more than a million and a quarter; the prospective outlay is more than double this amount, *App.* 601.

General abstract of expenditure on accommodation for troops in each year, from 1862–63 to 1871–72, distinguishing between original works and repairs, *App.* 647.

Statement of average cost per man for barrack accommodation, &c., at certain stations of the army, *App.* 648.

Amount of expenditure since 1862–63, in construction of barracks at stations since abandoned as military stations, *App.* 655.

Return showing the expenditure since 1862–63 on the several barracks now occupied by troops, and the number of troops at each station, *App.* 656–659——Total of 5,410,924 *l.*, *ib.*

6. *Construction and Supervision:*

Responsibility of witness as regards the plans of the barracks, &c., but not as regards the constructive details, *Crommelin* 82–84——Responsibility of the executive officers under the local governments for the work of construction, which was carried out partly departmentally and partly by contract, *ib.* 85–89——Use generally of bricks in the construction of the barracks; failure in those cases only where rubble stone has been used, *ib.* 105–107——Unfounded attacks made in the press of India as to the inferiority of the barracks in reference to their cost; temporary character of some of the defects complained of, *ib.* 130–134——Practice as to the preparation of specifications, and as to the supervision of the work, *ib.* 196–201.

7. *Allahabad, Saugor, and Nusseerabad:*

Cost of about 286 *l.* per man at Saugor, *Crommelin* 60, 61——Defective construction of an ordinance building at Allahabad; there has been no failure of the barracks, *ib.* 90, 91. 107——Serious failure of the barracks at Nusseerabad and Saugor, owing to bad masonry, the work having been done departmentally; examination as to the officers responsible for the faulty construction in these cases, *ib.* 92–104. 151–177. 183–190.

Explanation that some Ordnance buildings at Allahabad were economically constructed, though their badness of construction drew a severe reprimand from Lord Mayo, *Crommelin* 139–150.

Sacrifice of much of the money spent on barracks at Nusseerabad, *Crommelin* 248——Expectation that some of the buildings at Saugor will be utilised, though they have been condemned *en masse*, *ib.*——Occupation of the new Allahabad barracks, whilst steps have been taken to remove the complaint as to excessive heat, *ib.* 249, 250.

Memorandum submitted by Colonel Crommelin in correction of portions of his evidence relative

Report, 1873—*continued.*

BARRACKS—continued.

7. *Allahabad, Saugor, and Nusseerabad*—continued.

relative to the failures at Allahabad and Saugor; much more serious character of these failures than he had supposed, *App.* 601.

Amount of expenditure since 1862–63 in construction of barracks which are unoccupied, because they have given way, or are pronounced unsafe, or too hot for habitation for soldiers; these items refer to Saugor, Allahabad, and Nusseerabad, *App.* 655—— Total loss of 129,000 *l.* arising from bad work; 95,000 *l.* of this amount arising in respect of the barracks at Saugor, *ib.*

8. *Dalhousie Barracks:*

With regard to the very cheap character of some one-storeyed barracks at Dalhousie, these are in the nature of huts and cannot be compared with the new barracks as to accommodation, *Crommelin* 261–270.

9. *Jubbulpore Barracks:*

Occurrence of some complaints about the Jubbulpore barracks, *Crommelin* 178–182.

10. *Wellington Barracks:*

Inspection by witness of the Wellington barracks in the Neilgherries; suitable accommodation in these for European troops, *Sir C. E. Trevelyan* 1134–1136——Explanation as to these barracks being used for convalescents; regret expressed that they are not properly utilised, *ib.* 1137–1140.

11. *Less costly Buildings required in the Hills than on the Plains:*

Information as to the relative accommodation and cost of barracks in the hills and on the plains; less space given on the hills, and less substantial buildings deemed necessary, *Crommelin* 323–333——Opinion that it would be more economical eventually to build substantial and inexpensive barracks in the hills, *ib.* 333.

12. *Strategical Considerations:*

Value of barracks in the plains on strategical grounds, *Crommelin* 354–356——Particulars as to the barracks being so constructed as to be defensible; instances of fortified barracks, *ib.* 356–363——New sites selected for many of the new barracks, with reference mainly to strategical reasons, *ib.* 389–392——Probability of the barracks at Morar not being very healthily situated; strategical importance of the site, *ib.* 392, 393.

13. *Barrack Furniture:*

Practice as to the supply of barrack furniture; this item not being included in witness' returns of cost, *Innes* 2320–2326.

14. *Advantage of Periodical Survey:*

Importance attached to a periodical survey of barracks, stores, &c., *Sir C. E. Trevelyan* 1127. 1152.

15. *Complaint as to the comparative Inferiority of Accommodation for Native Troops:*

Great contrast between the accommodation provided for Native and for European soldiers; several grounds for complaint on this score, *Nowrozjee Furdoonjee* 5277–5283.

Beer and Spirits (*Army*). Evidence explanatory of the mode of charge for the transport of malt liquor and spirits, and the large cost thus incurred under the head of inland transport, *Johnson and Kellner* 3770–3784. 3831–3848——Particulars relative to the partial substitution of malt liquor for spirits, and the amount and cost of consumption under each head in different years, *ib.* 3827–3830. 3875–3881. 3930–3937. 3947–3961.

Reduction of the allowance of spirits from two drams to one dram in 1864, malt liquor having been substituted, *Johnson* 3827——Reduced profits of the canteens since the reduced consumption of spirits, *ib.* 3827. 3940.

Sale of malt liquor to the men in the canteen free of transport charge, *Kellner* 3831–3838——Encouragemeut given by Government to the production of beer in India for the use of the troops; extent and cost of such production, *ib.* 3839–3848. 3932——Considerable profit from the Government sale of spirit in the canteens; how this item of receipt is dealt with, *Johnson and Kellner* 3927, 3928. 3938–3946.

Circumstances of the charge for beer being less than it was in 1862–63, *Lord Lawrence* 5388–5390.

Further information relative to the quantity and cost of malt liquor supplied from England in each year, from 1866–67 to 1871–72, *Kellner* 7573——Since 1866–67, the entire cost has been paid in England, and adjusted in the Home Accounts, *ib.*——

Report, 1873—*continued.*

Beer and Spirits (*Army*)—continued.

Amount of expenditure in England in the years 1867–73 for rum sent out to the Bombay Presidency, *Kellner* 7574.

Further returns promised to be furnished relative to malt liquor and spirits; gain by the retail of the latter in the canteens and loss by the sale of the former, *Kellner* 7599–7604.

Behar. Statement of the area and population of each district of Behar province; total population of nearly twenty millions, *App.* 605, 606.

BOMBAY:

I. *As to the Presidency generally:*
1. Independent Position assumed, financially, by the Government of Bombay; excessive Expenditure on Public Works, &c., in disregard of the Supreme Government.
2. Immense Increase of Expenditure since 1856-57.
3. Illegal action of Government, in anticipation of Legislation.
4. Discontent in the Presidency.
5. Local Taxation for Roads, Education, Police, &c.; Grievances urged.
6. Non-agricultural Cess; Objections thereto.
7. Cotton Frauds Act; useless Expense involved.
8. Statistics of Taxation in the Presidency.
9. Effect, as regards Bombay, of the Decentralisation Scheme of Finance.

II. *As to Bombay Municipality:*
1. Taxation and Expenditure generally; Grievances urged.
2. Immense Increase of Taxation since 1864.
3. Water and Sewage Rates.
4. Police Expenditure; Complaint on this Score.
5. Esplanade Fee Fund.
6. Expenditure on Private Road at Malabar Hill.
7. Exemption of Government Property from Taxation.
8. Statistics of Municipal Taxation.

III. *Legislative Council.*

IV. *Executive Council.*

V. *As to the Foreshore and Wharfage of Bombay Island or City, and the action of Government in the matter:*
1. Complaint as to injudicious and extravagant Expenditure generally.
2. Bunder Fees Act, and Receipts from Bunders.
3. Back Bay Reclamation Scheme.
4. Elphinstone Land Company.
5. Foreshore at Mazagon.
6. Moody Bay Estate.

VI. *Expenditure on Government House near Poonah.*

VIII. *Bombay High Court and Small Cause Court.*

I. *As to the Presidency generally:*
1. Independent Position assumed, financially, by the Government of Bombay excessive Expenditure on Public Works, &c., in disregard of the Supreme Government:

Several instances under the new *regime*, of the Government of Bombay having acted, financially, in direct opposition to the views of the Government of India; this could not have occurred under the East India Company, *Sir C. E. Trevelyan* 503–508——Instance of the Government of Bombay having ordered very expensive public works without the sanction of the Government of India, *ib.* 503. 558——Way in which under the East India Company the Government of Bombay would have been precluded from setting the Government of India at defiance, *ib.* 540–542. 671–675. 686–691. 697–699.

Evidence in further illustration of the disregard of financial control by the Government of Bombay, whilst the Government of India was powerless to prevent the mischief, *Sir C. E. Trevelyan* 558–566. 601–603——Great necessity for reduction of expenditure in the Bombay Presidency, *ib.* 570.

Evidence

Report, 1873—*continued.*

BOMBAY—continued.

I. *As to the Presidency generally*—continued.

1. Independent Position assumed, financially, by the Government, &c.—*contd.*

Evidence in further support of the conclusion that the Government of Bombay has shown an impatience of control and an independence of action, as regards public works, &c., which would never have been allowed in the time of the East India Company, *Sir C. E. Trevelyan* 671–675. 686–691. 697–699——Admission that the higher prices in Bombay than in Madras offer some reason, but not a sufficient one, for the larger proportionate expenditure in the former Presidency, *ib.* 801–804.

Examination with further reference to the insufficient action of the Home Government in regard to the financial extravagance of the Government of Bombay in 1863, *Sir C. E. Trevelyan* 1062–1066——Circumstance of witness having, as Finance Minister at Calcutta, recommended that certain of the works proposed by Sir Bartle Frere in 1863 in excess of the money at his disposal should be proceeded with, *ib.* 1064——Quotations from minutes, dated 11th January 1864, in strong condemnation of the action of the Bombay Government in ordering large expenditure without the sanction of the Central Government, *ib.* 1202——Bombay has always been our financial difficulty, and has been sucking the rest of India for years, *ib.* 1472–1474.

Comment upon the pressure put upon witness during a previous examination to express the opinion that theGovernor of Bombay (Sir Bartle Frere), a contemporary officer with witness, should under certain circumstances have been recalled, *Sir C. E. Trevelyan* 1638.

Extraordinary discretion assumed by the Bombay Government in commencing expenditure on works without the previous sanction of the Government of India, *Sir C. J. Wingfield* 2180.

Explanatory statement relative to the improved control now exercised by the Government of India over works at Bombay, *Innes* 2390.

Opinion of the public in Bombay as to the Governor rather than the Legislative Council being responsible for measures involving increased expenditure, *Maclean* 2443–2449——Statement as to the Bombay Government having systematically set the Government of India at defiance as regards local expenditure, *ib.* 2582. 2657–2662.

Arrangement in witness' time as to the Governments of Bombay and Madras being allowed to undertake works up to a limit of 20,000 *l.*; previous limit up to 10,000 *l.*; *Lord Lawrence* 4660–4662——Frequent collision with the Government of Bombay, as taking too much power into its hands in the matter of public works, *ib.* 4663–4665.

Decided check through the Government of India and the Secretary of State upon expenditure by the Governor of Bombay, though the latter is to some extent independent of the Governor General in the matter, *Lord Lawrence* 5608–5616——Collision between the Supreme Government and the Bombay Government on several questions in witness' time, *ib.* 5613. 5750–5755.

Minute by Sir Charles Trevelyan, as Member of the Council of the Governor General, dated 11th January 1864, on the subject of Public Works Expenditure in Bombay, and the Supplementary Estimate of the Presidency involving a large outlay; checks suggested, *App.* 673–678.

Communications between Sir C. Trevelyan at Calcutta and Sir Bartle Frere at Bombay in November and December 1863, on the subject of economy in the public works expenditure, *App.* 678.

2. Immense Increase of Expenditure since 1856–57:

Increase from 4,814,356 *l.* in 1856–57 to 8,266,178 *l.* in the total expenditure in the Bombay Presidency; per-centage of increase under separate heads, *Nowrozjee Furdoonjee* 6983.

3. Illegal action of Government, in anticipation of Legislation:

Instances of the Government of Bombay having carried out measures for which there was no legal sanction; *ex post facto* legislation in these cases, *Nowrozjee Furdoonjee* 4886, 4887.

4. Discontent in the Presidency:

Concurrence in the view as to the serious and extensive discontent throughout Bombay by reason of the costly administration of the Presidency and of the pressure of taxation, *Nowrozjee Furdoonjee* 4840, 4841, 6029–6044; *Dadabhai Naoroji* 6599–6623. 6744, 6745.

5. Local Taxation for Roads, Education, Police, &c.:

Total of 242,272 *l.* produced in Bombay in 1871–72 by the cess for roads and education; particulars as to the local administration of these funds, *Harrison* 1850–1858.

Exceptions taken to the Act of 1869 for imposing a road and education cess in Bombay; contravention of the Government settlement thereby, *Sir C. J. Wingfield* 2053, 2054. 2086–2088.

Report, 1873—*continued.*

BOMBAY—continued.

I.—*As to the Presidency generally*—continued.

5. Local Taxation for Roads, Education, Police, &c.—*continued.*

Strong opposition made in Bombay to three proposals in 1871 for new taxation, *Nowrozjee Furdoonjee* 4851-4859——Representation made in the Legislative Council against the proposal in 1871 for levying a contribution on the municipalities of the large towns in Bombay for the expenditure of the police; this tax was, however, passed, *ib.* 4858, 4859. 4864.

Evidence in strong disapproval of the Bombay Local Funds Act of 1869 for raising cesses for roads, schools, &c.; complaint, especially, as to the administration by the district collectors of the funds thus raised, *Nowrozjee Furdoonjee* 4932 *et seq.*——Argument that money raised under the Local Funds Act is frequently applied to Imperial purposes, *ib.* 4936, 4937.

Statement in strong condemnation of the action of the revenue collectors as regards cesses for roads, schools, and other local purposes; instances of the municipal committees being entirely superseded in the administration of the funds, and of complaints against collectors being altogether disregarded, *Nowrozjee Furdoonjee* 4938, 4939. 4985-4990.

Information relative to the large diversion of local funds or cesses in Surat, and several other collectorates, for certain roads and other public works of an Imperial character; misappropriation, also, in the local funds of one district being partially expended in another, *Nowrozjee Furdoonjee* 5029-5042. 5062-5065——Complaint also as to the undue haste with which the local taxation measures of 1871 were pushed through the Council without the inhabitants of the Presidency having been given any opportunity of considering or opposing them, *ib.* 5126.

Misappropriation involved in the local cesses not having been applied to strictly local purposes; concurrence with Mr. Nowrozjee on this point, *Dadabhai Naoroji* 6718, 6719.

Act of 1871 for providing for the cost of the police in towns and suburbs where the Act of 1850 is in force, *App.* 795.

6. Non-agricultural Cess; Objections thereto:

Act passed in 1871 imposing duties upon the non-agricultural classes in the Presidency, in the form of an income tax; threefold classification of incomes for the purposes of the Act, *Harrison* 1985-1991. 2015-2019——Production of 53,509 *l.* under the foregoing Act in 1871-72; *ib.* 1987. 1990——Suspension of the application of the Act; the Act, however, has not been repealed, and is still liable to be applied to incomes exceedingly small, *ib.* 1987-1991. 2015-2021.

Strong disapproval of the Bombay Bill for taxing the non-agricultural rural population, *Sir C. J. Wingfield* 2119. 2186——Very objectionable character of the tax on the rural non-agricultural population; all incomes down to 5 *l.* a year come under this impost, *Maclean* 2426-2429——Numerous communications received by witness showing the widespread discontent caused by the non-agricultural cess among the Natives, *ib.* 2429-2441——Fruitless character of the representations made in the Bombay Legislative Council against the non-agricultural cess, *ib.* 2609-2613.

Condemnation of the local tax in Bombay upon the non-agricultural community, *Lord Lawrence* 4531, 4532.

Information relative to the non-agricultural cess, under the Act of 1871, and the arguments for and against the measure; considerable hardship involved in this tax, which was, however, passed in the face of much public opposition, *Nowrozjee Furdoonje* 4859-4864——Uselessness of the Native petitions and remonstrances against the Bills in 1871 for new taxation, *ib.* 4862-4864.

Evidence in support of the statement that great hardship and injustice are inflicted in levying the non-agricultural tax, whilst those aggrieved are practically without redress, *Nowrozjee Furdoonjee* 5067-5077.

Copy of Act of 1871 for imposing duties on certain of the non-agricultural classes in the territories subordinate to the Presidency of Bombay, *App.* 795-797.

7. Cotton Frauds Act; useless Expense involved:

Strong remonstrance made in 1869 against the Cotton Frauds Bill of that year, *Nowrozjee Furdoonjee* 5078, 5079——Failure of the Cotton Frauds Act to remedy the evils for the suppression of which it was passed; representation by the Bombay Chamber of Commerce to this effect, *ib.* 5079. 5085-5090. 5104——Argument as to the impolicy of the Act, and the inexpediency of the large expenditure incurred in the maintenance of the Cotton Frauds Department, *ib.* 5079-5104.

Further particulars in elucidation of the very unsatisfactory working of the Cotton Frauds Department, *Nowrozjee Furdoonjee* 5222, 5223. 5227-5229.

8. Statistics

Report, 1873—*continued.*

BOMBAY—continued.

I.—*As to the Presidency generally*—continued.

8. Statistics of Taxation in the Presidency:

Papers and Returns, containing sundry details relative to taxation in the Bombay Presidency, and showing the local and municipal taxation, as distinguished from taxation for Imperial purposes, *App.* 844–863.

9. Effect, as regards Bombay, of the Decentralisation Scheme of Finance:

Statement showing the unduly large share received by Bombay out of the common fund, under the new system of provincial assignment, *Sir C. E. Trevelyan* 791—— Popularity of excessive expenditure in Bombay under the present system, whereas, if any deficiency were to be made good out of local resources, there would be every motive to economy, *ib.* 1219–1221.

Deficiency of 65,965 *l.* to be made up in the Bombay Presidency under the scheme of 1871, *Harrison* 1985.

Great zeal for expenditure, and very little desire for economy, in the Bombay Presidency under the Decentralisation Scheme, *Maclean* 2421–2425——Deficit of about 100,000 *l.* to be made good in Bombay through the application of the Decentralisation system, *ib.* 2425——Proposals of the Governor of Bombay in 1871 for making good this deficit by additional taxation, instead of by reduction of expenditure, *ib.* 2425, 2426.

Complaint that the deficit under the Decentralisation Scheme was not met by reduction of expenditure; strong local feeling excited by the new and increased taxation imposed, *Nowrozjee Furdoonjee* 4851 *et seq.*; 5126. 6029–6044.

II. *As to Bombay Municipality:*

1. Taxation and Expenditure generally; Grievances urged:

Indirect pressure of municipal expenditure in Bombay, as the money has been largely borrowed, *Sir C. E. Trevelyan* 1260.

Estimate of 323,346 *l.* as the municipal income of the city of Bombay in 1872–73, the chief receipts being from a rate on houses for water, lighting, and police, and from town duties, licenses, &c., *Harrison* 1861–1870——Particulars as to the expenditure of the municipal taxation of Bombay City; considerable sum required for interest on debt, and for sinking fund, *ib.* 1871–1876.

Reference to the municipal finance authority in Bombay as in no respect representative of the municipal taxpayers, *Harrison* 1923. 2039——Doubt as to the municipality of Bombay being representative, *Sir C. J. Wingfield* 2116.

Expediency of such communities as Bombay being given the control of their own affairs, *Maclean* 2559. 2563——Inadequate control exercised by the members of the local council in matters of expenditure, *ib.* 2662–2664.

Very great dissatisfaction of the inhabitants of the city of Bombay by reason of the local Acts for the management of the affairs of the municipality; details as to the grievances under certain Acts in 1865, 1869, and 1872, *Nowrozjee Furdoonjee* 4899–4931 —— Great grievances in respect of Act II. of 1865; exceedingly expensive establishment created thereby for municipal administration, the financial effect being most unsatisfactory owing to the recklessness of the municipal commissioner (Mr. Crawford), *ib.* 4899–4903.

Repeated and urgent representations made by the inhabitants against the administration under the Act of 1865; delay and neglect on the part of Government before inquiry was instituted, *Nowrozjee Furdoonjee* 4899–4903——Strong remonstrances also against the certain provisions of the Bombay Municipal Bill of 1872, which was however passed into law, with some modification, *ib.* 4899. 4901. 4918, 4919.

Great increase of the local taxation of Bombay for municipal purposes, eight new rates and taxes having been imposed since 1864; the people cannot bear this heavy burden, which now amounts to from 15 to 20 per cent. on the rental, *Nowrozjee Furdoonjee* 4903–4917——Definition of the burden by Sir Seymour Fitzgerald as "almost crushing," *ib.* 4917.

Several objections urged against the Bombay Municipal Act of last year, as regards the qualification of members of the corporations, the power of Government to control and increase the police expenditure, the imposition of fresh liabilities on the municipality, &c., *Nowrozjee Furdoonjee* 4919–4931.

Witness submits a return showing the municipal rates and taxes levied in the city of Bombay under the Acts of 1865 and 1872 respectively, *Nowrozjee Furdoonjee* 5189, 5190——Full rents in Bombay as a consequence of the crisis of 1866, *ib.* 5209, 5210.

Further reference to the large per-centage of the total rates in proportion to the assessed rental, under the Act of 1872, *Nowrozjee Furdoonjee* 5211——Short period within which the Act is expected to come into operation, *ib.* 5212.

Report, 1873—*continued.*

BOMBAY—continued.

II. *As to Bombay Municipality*—continued.

1. Taxation and Expenditure generally; Grievances urged—*continued.*

Statement of municipal rates and taxes imposed in the city of Bombay under various local Acts of 1865, 1867, 1869, and 1872, *App.* 870, 871.

2. Immense Increase of Taxation since 1864:

Enhancement of nearly 250 per cent. in Bombay municipal taxation since 1864, *Nowrozjee Furdoonjee* 1917.

3. Water and Sewage Rates:

Great increase of the sewage cess, *Nowrozjee Furdoonjee* 5199——Particulars in connection with the water supply of Bombay and the water rate; the latter is very high and unequal, *ib.* 5200–5209.

4. Police Expenditure; Complaint on this Score:

Great hardship on the municipality of Bombay in having now to provide the whole cost of the police, whilst Madras and Calcutta still receive police grants from the Central Government, *Maclean* 2451–2453——Diversion to other purposes of the Imperial Grant formerly made towards the cost of the Bombay police, *ib.* 2557, 2558.

Complaint as to the large increase of municipal taxation for the police, whilst the administration is entirely under Government, *Nowrozjee Furdoonjee* 4904–4909——Unfairness in Government no longer contributing to the police charge; different practice at Calcutta and Madras, *ib.* 4905——Illustration of the absence of control in the municipality over the police expenditure for which they are liable, *ib.* 4906.

Prospect of increased charge for the police as the population of the city increases, *Nowrozjee Furdoonjee* 5193, 5194——Several public buildings under the supervision of the police, whilst some only are under the charge of soldiers, *ib.* 5195–5197.

5. Esplanade Fee Fund:

Comment upon the refusal of Government to allow the Esplanade Fee Fund of Bombay to be amalgamated with the General Municipal Fund, *Nowrozjee Furdoonjee* 5229–5231.

6. Expenditure on Private Road at Malabar Hill:

Comment upon the outlay of public money in widening a private road leading to the Government House at Malabar Hill, *Nowrozjee Furdoonjee* 5273, 5274.

7. Exemption of Government Property from Taxation:

Grounds for objecting to the exemption of Government lands and buildings from municipal taxation, *Nowrozjee Furdoonjee* 4917–4919.

8. Statistics of Municipal Taxation:

Papers and returns (submitted by Mr. Nowrozjee Furdoonjee) relative to municipal rates and taxes in the city of Bombay, and throughout the Presidency in different years, *App.* 870, 871.

III. *Legislative Council:*

Complaint as to the constitution of the Legislative Council of Bombay, the non-official element being in a minority, and there being only four Native numbers out of thirteen, *Nowrozjee Furdoonjee* 4842–4846——Circumstance of one or two of the Native members being utterly unacquainted with the English language, *ib.* 4846.

Expediency of enlarging the Legislative Council in the direction of native representation as a means of securing efficient legislation; willingness of natives of position to serve without pay, *Nowrozjee Furdoonjee* 4847–4849——Argument that the Legislative Council should, if properly re-constructed, control the expenditure of the Government of Bombay, *ib.* 4850, 4851.

Further conclusion as to the necessity of enlarging the Legislative Council of Bombay, and of giving adequate representation to the Natives, *Nowrozjee Furdoonjee* 5129——Suggestions relative to the mode of election of Native members of the Council, so that the principal towns and districts throughout the Presidency may be elected, *ib.* 5129. 5137–5139——Expediency of the annual budget being framed by a duly qualified functionary, and being fully discussed by a properly constituted Council, *ib.* 5129.

Contemplated power of the Governor in Council to veto any resolution of the Council for reasons to be publicly assigned, *Nowrozjee Furdoonjee* 5129–5136.

Further proposals for the re-construction of the Legislative Council on a broader basis, and for the introduction of a much larger non-official element in the shape of Native representatives properly chosen, *Nowrozjee Furdoonjee* 6983, 6984.

IV. *Executive*

Report, 1873—*continued.*

BOMBAY—continued.

IV. *Executive Council:*

Several exceptions taken to the constitution of the Executive Council of Bombay, and the mode in which the business is conducted, *Nowrozjee Furdoonjee* 5141, 5142——Great delay in the transaction of business in the Executive Council; great dissatisfaction caused, *ib.* 5142——Expediency of more frequent and regular meetings of the Council, and of due deliberations before decisions are arrived at, *ib.*

V. *As to the Foreshore and Wharfage of Bombay Island or City, and the action of Government in the matter:*

1. Complaint as to injudicious and extravagant Expenditure generally:

Strong distrust of the Public Works Department in Bombay, by reason of the course pursued as regards the purchase and reclamation of foreshore properties round the city; details showing the injudicious and extravagant expenditure incurred, without a single dock being yet provided, *Maclean* 2456-2514. 2563-2566. 2620-2649——Formation of a port trust with a view to their administering all the foreshore properties of Government, *ib.* 2470-2474.

Enormous expenditure, amounting in the aggregate to nearly six millions, upon foreshore reclamation, wharves, &c., at Bombay, whilst another million is still required for docks, *Maclean* 2474-2477. 2489. 2491. 2563-2566——Long pending dispute between the Government of India and the Government of Bombay relative to the foreshore purchases in question; sole responsibility of the latter, *ib.* 2489, 2490. 2513, 2514.

2. Bunder Fees Act, and Receipts from Bunders:

Exception taken to the Bunder Fees Act, and the dues levied on goods and packages in Bombay harbour, *Maclean* 2477-2482.

Great dissatisfaction in Bombay by reason of the bunder fees or wharfage dues charged under the Bunder Fees Act of 1870; belief as to increased facilities not having been afforded in consideration of these charges, *Nowrozjee Furdoonjee* 5105-5126.

Advantage to the merchants of Bombay by the purchase of bunders from the Natives, with a view to improved wharfage accommodation, *Fleming* 6143-6148——Statement as to the gross and net revenue derived in 1871-72 from the whole of the Government bunders in Bombay, *ib.* 6420-6425.

3. Back Bay Reclamation Scheme:

Attempt made to involve Government in the scheme for the reclamation of Back Bay at Bombay; rejection of this proposal, *Sir C. E. Trevelyan* 498-500——Information relative to the action of Government and the Public Works Department in reference to the Back Bay reclamation scheme; grounds for complaint in this case, *Maclean* 2457. 2474. 2495-2506. 2639-2645——Explanation as to the Back Bay reclamation scheme, and the action of the Government of Bombay in the matter, *Lord Lawrence* 4769-4772.

4. Elphinstone Land Company:

Comment upon the transfer of the Elphinstone Land Company at Bombay to Government, and the heavy cost involved; *Sir C. E. Trevelyan* 498, 499——Large rise in the value of the shares of the Elphinstone land scheme on its becoming known that Government was likely to be a purchaser, *ib.* 668.

Evidence relative to the scheme and works of the Elphinstone Land Company, and the eventual purchase of the property by Government for 1,800,000 *l.*, or about three times the value of the shares at one period; improvident and extravagant course pursued in this case, *Maclean* 2458-2470. 2483-2494. 2513, 2514. 2606-2608. 2620-2638. 2668, 2669.

Statement as to witness having objected in 1867 to the purchase by Government of the Elphinstone reclamation works, and as to the concern having been subsequently bought over in Lord Mayo's time, *Lord Lawrence* 4773-4776.

Witness (whose firm managed the Elphinstone Company) submits a written statement explanatory of the circumstances under which the company was formed, and showing in detail the operations of the company in reclaiming foreshore, &c., at Bombay, the expenditure and income, the value of the works in the interests of commerce and shipping, and the terms of their sale to Government, *Fleming* 6069-6071.

Depreciated value of the Elphinstone's Company shares in the market previously to their purchase by Government; evidence hereon in denial that the purchase was a prodigal one, *Fleming* 6071. 6103-6110. 6369 *et seq.*——Circumstance of no protest having been made on the part of the public during the long period pending the final acceptance of the offer of Government, *ib.* 6071——Payment of 1,859,082 *l.* by Government for the company's property; extensive and varied character thereof, *ib.* 6071. 6114-6118——Views of Colonel Fraser as to the value of the property, and the expediency of the prosecution of the works, *ib.* 6071. 6129-6132.

BOMBAY—continued.

V. *As to the Foreshore and Wharfage of Bombay Island or City, &c.*—continued.

4. Elphinstone Land Company—*continued.*

Probability of Mr. Russell Aitkin, Executive Engineer to the Municipality, having been the first to suggest the Government purchase of the Elphinstone Company's property; letter from him on the subject, dated 6th September 1866, *Fleming* 6078–6086——Repudiation of the statement that witness or his firm used their influence to bring about the sale of the property to Government; reference hereon to the failure of an application to Government for a loan to complete the works, *ib.* 6087. 6093–6102——Due publication of a list of shareholders in the company, *ib.* 6088.

Acquisition of the foreshore land by the company from the natives who had leases, Government eventually buying up the property out and out, *Fleming* 6089–6094——Condition originally as to the company supplying a large space for a railway terminus, *ib.* 6111–6113.

Advantages of completing the Elphinstone's Company's scheme rather than the Moody Bay scheme; requirement of about three quarters of a million for the former, including a large tidal basin, *Fleming* 6127–6139. 6434, 6435.

Examination showing that the net income from the works of the Elphinstone Company in 1867, 1868, 1869 was not more than from one to two per cent.; this was owing to the unfinished state of the works, *Fleming* 6345–6347. 6401–6404.

Question further considered as to the financial position of the company in regard to the depreciated value of its shares and the want of a loan of 600,000 *l.* previously to the purchase of the shares at par by Government, *Fleming* 6388 *et seq.*

Inability of Government to have brought the concern under its par value; statement hereon as to witness having been instrumental in refusing an offer of 3,000,000 *l.* for the property during the financial excitement of 1865, *Fleming* 6368. 6406–6419——Better return from the works if properly developed; delay on this score pending the construction of the Port Trust, *ib.* 6426–6435.

5. Foreshore at Mazagon:

Reference to the sale by Government of some foreshore land at Mazagon (Bombay); subsequent speculation in this land, *Maclean* 2646-2649.

6. Moody Bay Estate:

Grounds for complaint as to the course pursued by Government in reference to the Moody Bay Estate, *Maclean* 2457, 2458. 2470. 2486–2488. 2563.

VI. *Expenditure on Government House near Poonah:*

Information relative to an addittonal charge of 23,000 *l.* for military works in connection with the Government House near Poonah, *Crommelin* 2258–2264. 2273, 2274——Doubt as to the cost of furniture, over and above the total expenditure of 157,836 *l.* for the Government House, *ib.* 2265——Responsibility respectively of the Government of Bombay and the Government of India in respect of the excess of estimates and the irregularities of expenditure in the foregoing case, *ib.* 2266–2270. 2279–2285. 2297–2300——The expenditure of 157,836 *l.* comes down to the 31st March 1871, *ib.* 2271. 2276–2278——This expenditure is now nearly closed, *Innes* 2271. 2278.

Explanation that the outlay of 157,836 *l.* on the Bombay Government House including the charge for guard rooms, &c., *Crommelin* 2387——The cost of furniture is not included, *ib.* 2388——Steps have been taken by the Government of India to check the expenditure in question, *ib.* 2389.

Independent position assumed by the late Governor of Bombay and his predecessor as regards the expenditure on the Government House at Gunnesh Kind, and other works, *Maclean* 2657–2662.

Explanation of the circumstances under which the Governor of Bombay expended a very excessive sum on the Government House near Poonah in defiance of the representations of witness and his council; this did not call for a recommendation that the Governor should be dismissed, *Lord Lawrence* 5612–5616. 5750, 5751——Sale in the first instance of the old Government House for some 35,000 *l.*; this was a very good price, but the matter should first have been brought before witness as Governor General, *ib.* 5612, 5613. 5615——Sanction given to the expenditure of the sum realised by the sale of the old house, *ib.* 5613—— The Governor of Bombay spent, however, 90,000 *l.* (or some such sum) without previous reference to witness, and this expenditure did not suffice, *ib.* 5613, 5614.

VII. *Staff and Household Expenses of the Governor of Bombay:*

Explanation as to the separate body guard of the Governor of Bombay, *Johnson* 3657.

Report, 1873—*continued.*

BOMBAY—continued.

VII. *Staff and Household Expenses of the Governor of Bombay*—continued.

Large salaries and expenses of the Governor and his staff, *Nowrozjee Furdoonjee* 5141——Comment upon the increase of about 350 per cent. in the staff and household expenses of the Governor of Bombay since 1856–57, *ib.* 6013-6033.

Detailed statement of expenses of the household of the Governor of Bombay in 1856–57 compared with those in 1870–71, and explaining fully the large additional charge in the latter year, *App.* 868, 869.

VIII. *Bombay High Court and Small Cause Court:*

Probable room for saving in the High Court of Bombay, by dispensing with one judge, *Lord Lawrence* 5482.

Great expense of the high court and district courts as compared with the expense of the subordinate courts, in proportion to the amount of work done, *Nowrozjee Furdoonjee* 5846–5850. 5862——Considerable surplus of receipts over expenditure in the Bombay Small Cause Court, *ib.* 5846,

Statement relative to the exceedingly costly establishment of the High Court of Bombay, the very heavy costs of suitors, and the failure of justice in more ways than one, *Nowrozjee Furdoonjee* 5878–5889——Very heavy fees of counsel in the court, *ib.* 5879–5885——Large salaries of the judges, eight in number, *ib.* 5879.

Conclusion as to the expediency of a limitation upon the double fees to counsel in the high court, *Nowrozjee Furdoonjee* 5879-5885——Appointment of Europeans to all the well-paid posts in the court, *ib.* 5885——Several highly-paid appointments attached to the court which should be reduced or abolished, *ib.* 5885, 5886.

Expediency of a large extension of the jurisdiction of the Bombay Small Cause Court, and of a reduction of the institution fee, *Nowrozjee Furdoonjee* 5890.

See also *Ahmedabad. Army. Bands. Banks of Bengal, Bombay, and Madras. Broach. Carwar Railway. Condition of the People, Education (Bombay Establishment). Feasts (Local Taxation). Forced Labour. Governors of Presidencies. Hydraulic Lift. India Commission. Indapore. Land Revenue,* II. *Law and Justice. Municipal Taxation. Ordnance Stores, &c. Police. Public Works. Salt Tax.*

Bombay Bank. See *Banks of Bengal, Bombay, and Madras.*

Bombay (Land Revenue). See *Land Revenue,* II.

Bombay Marine. See *Navy.*

Borradaile, Mr. Strong complaint against Mr. Borradaile as collector of Ahmedabad; several occasions on which he has altogether set aside the acts of the municipal committee, whilst there are practically no means of redress, *Nowrozjee Furdoonjee* 4942–4984. 4987, 4988.

Boundary Marks (Land Revenue Survey). Heavy fines sometimes inflicted for not keeping the boundry marks in proper repair, *Nowrozjee Furdoonjee* 6943–6945.

British Burmah. See *Burmah (British Provinces).*

British Rule. Argument and statistics in support of the view that the English connection is financially advantageous to India, *Maclean* 2530–2556. 2590. 2615–2619. 2665–2667.

Tendency to progressive improvement over the whole country, under British rule, *Lord Lawrence* 4481——Primary importance of the contentment of the agricultural population as being the main security for the maintenance of British rule, *ib.* 5661, 5662.

Great misfortune to India if the British connection were cut off; it is essential however that the cost of administration be reduced, *Dadabhai Naoroji* 6729. 6866, 6867. 6867, 6898.

Witness disclaims being actuated by any hostile motives towards the English Government; on the contrary, he thinks it would be a great calamity to India if the connection between the two countries were broken off, *Nowrozjee Furdoonjee* 6984.

See also *Condition of the People. Debt of India. Expenditure. Taxation.*

Broach. Strong complaint of the conduct of Mr. Waite in carrying out the City Survey Act in Broach; numerous prosecutions and fines to which inhabitants have been subjected without any practical redress, general discontent being the result, *Nowrozjee Furdoonjee* 4889-4896.

Total of twenty-five municipal commissioners of Broach, of whom eleven are Government officials; several *ex-officio* commissioners, *Nowrozjee Furdoonjee* 5026——Great complaint by the inhabitants as to the large increase of municipal taxation, *ib.* 5216——Mischievous effect of the removal in June 1869 of the Subordinate Judges' Court from Broach to Wagga, *ib.* 5845, 5846. 5853.

Report, 1873—*continued.*

Budget of India. Comment upon the omission in 1871–72 to submit the budget for India to the Legislation Council, *Nowrozjee Furdoonjee* 6983——Conclusion as to the necessity of a revision of the financial arrangements, and of the application of an effectual check in India upon the annual budget, *ib.*—— Suggestion that the budget be prepared by an independent and well-trained financier, and be submitted to a properly-constituted council, *ib.* 6983, 6984.

Bullion. Large import of bullion by India since 1833; inference therefrom as to the improved condition of the people, *Maclean* 2590–2603.

Bunder Fees Act (Bombay). See *Bombay*, V. 2.

Bungalows. Absence of analogy between the cost of bungalows and of permanent barracks; large increase, moreover, in the cost of bungalows, *Crommelin* 216, 217. 235.

Complaint as to the large expenditure out of local funds or cesses upon the erection of bungalows for Europeans, *Nowrozjee Furdoonjee* 4992–4998——Necessary sanction on the part of the superior authority before local monies are expended on bungalows, or other objects, *ib.* 4999–5001.

Further charge upon local funds in respect of travellers' bungalows on Imperial lines of roads; comparatively small expense of dhurumsalas maintained out of local funds, *Nowrozjee Furdoonjee* 5224–5226.

Burmah (British Provinces):

Cess of five per cent. for local purposes, in addition to the land revenue demand, in British Burmah; how apportioned, *Harrison* 1715——Total of 59,096 *l.* derived from municipal taxation in British Burmah in 1871-72; reference more especially to the receipts from market-places, *ib.* 1715–1719. 1722. 1763——Municipal tax on houses in lieu of a capitation tax in Rangoon and other towns, *ib.* 1717. 1763——Considerable sum realised by the sale of townlands in British Burmah, *ib.* 1720, 1721.

Varying amount of the capitation tax in British Burmah; satisfaction given generally by the tax, *Harrison* 1763–1768——Popularity of the tax on market stalls, *ib.* 1769—— Explanation as to certain charges in respect of local police, the Mhairwarra battalion, &c., appearing in the accounts as civil charges, *ib.* 1771–1774.

Explanation as to British Burmah having been relieved from any contribution under the decentralisation scheme, no fresh taxation having been imposed upon the province, *Harrison* 1942, 1943——The amount thus remitted is 19,199 *l.*, *ib.* 1942——A municipal tax is contemplated in the province in respect chiefly of the towns of Rangoon and Akyab, *ib.* 1943, 1944.

Statement showing the area and population of each district under the administration of the chief commissioner of the province of British Burmah, taken from the Administration Report for 1871–72; total population of 2,562,323. *App.* 611.

Letter from the Officiating Secretary to the Chief Commissioner, British Burmah, to the Secretary of the Government of India, Financial Department, dated 25th October 1872, relative to the rates and taxes levied in British Burmah at different periods, *App.* 754 ——Letter from the Officiating Deputy Accountant General, British Burmah, dated 13th September 1872, containing explanations in reference to certain returns or accounts of local and Imperial taxes, *ib.* 754, 755.

Statement of discrepancies in the amount of revenue shown in the district returns as compared with that credited in the books of the Accountant General's office for 1871–72, *App.* 755–757.

Detailed statement of Imperial rates and taxes for the years 1858–59 and 1871–72, *App.* 758–767——Abstract of Imperial rates and taxes for 1858–59 as compared with 1871–72, *ib.* 768, 769.

Statement showing in detail the net revenue on account of local rates and taxes for 1870–71, and as estimated for 1871 and 1872, *App.* 770–773.

C.

Calcutta and South Eastern Railway. Evidence in explanation and strong condemnation of the project known as the Mutlah Railway, witness submitting that this scheme was forced upon the Government of India by the Home Government, under the pressure brought to bear by Home districts, *Sir C. E. Trevelyan* 480–491——Circumstance of some minutes by witness relative to the Mutlah Railway not having been included with the Parliamentary Papers published on the subject, *ib.* 663–667.

Camp Equipage. Information relative to the charges for the Camp Equipage Department in Madras and in Bombay, in each of the years from 1865–66 to 1871–72, *Kellner* 7022.

Report, 1873—*continued.*

Campbell, Sir George (Bengal). Views of Sir George Campbell (Lieutenant Governor of Bengal), as to the great advantages of the system of provincial finance, and local self-taxation for local benefits, *Sir C. E. Trevelyan* 866——Suggestions by Sir George Campbell for an extension of the decentralisation system of finance; that is, as regards the funds assigned for the uncovenanted services, *ib.*

Campbellpore. Objections to Campbellpore as a military station, *Lord Lawrence* 5357.

Canals. Statement relating to the several canals in operation during 1870–71, in the North Western Provinces, and the Punjaub, showing the length of each canal, the cost, the receipts, &c., *App.* 660.——*See* also *Ganges Canal. Irrigation.*

Capital. Approval of liberal encouragement to the investment of English capital in India, though there should be no munificence at the expense of India, *Sir C. E. Trevelyan* 528, 529——Facility of raising public loans cheaply, the difficulty being to attract surplus private capital from England for investment in India, *ib.* 1430–1432——Way in which the introduction of British enterprise and capital is barred by the system and operation of the Public Works Department, *ib.* 1575–1577.

Great benefit to India by the large amount of English enterprise and capital, *Maclean* 2547. 2616, 2617——Conclusion that the greatly increased production in Bengal is due mainly to the enterprise of English capitalists, *Lord Lawrence* 4442–4444.

Carnatic, Nawaub of. Instance of uncalled-for liberality in the large addition made to the stipend of the Nawaub of the Carnatic and of his numerous dependents, *Sir C. E. Trevelyan* 459, 460. 556, 557.

CARWAR (KARWAR) RAILWAY:

1. *Exceptions taken to this Project.*
2. *Detailed Explanation and Defence of the Project.*

1. *Exceptions taken to this Project:*

Examination in detail relative to, and in disapproval of, the Carwar Railway project of the Bombay Government, *Maclean* 2515 *et seq.*——Data for the conclusion that the financial returns from the foregoing line have been greatly over-estimated, that a port of Carwar is not needed, and that there should be most careful investigation before the project is allowed to go forward a second time, *ib.* 2516–2529. 2567–2570. 2585–2589. 2650–2656. 2670–2674.

2. *Detailed Explanation and Defence of the Project:*

Interest of the firm of Nicol & Company in property at Carwar, and in the construction of the proposed railway thence to the interior, *Fleming* 6072–6074——Written statement submitted in explanation of the project, and of the great advantages therefrom, *ib.* 6077——Great natural advantages of the harbour of Carwar, *ib.* 6077. 6170–6179. 6186, 6187. 6195–6211. 6223–6229. 6457——Letter from the Rev. Dr. Wilson in August 1872, strongly advocating the projected railway, *ib.* 6077. 6449, 6450——Considerable export of cotton from Carwar direct to Europe, *ib.* 6077.

Public demand on the Madras Government in former years for a harbour at Carwar, and for a railway thence to Dharwar; large cultivation of cotton and other produce in this district, *Fleming* 6149–6156——Political importance of the proposed line, *ib.* 6166–6169——Difficulty at present owing to the action of the Home Government; favourable report by an official committee in India, *ib.* 6180. 6188. 6230. 6321–6325——Belief that the opposition at Bombay arises chiefly from fear of rivalry with that port, *ib.* 6181. 6215–6217. 6264–6269——Desire of the merchants of Compta for the Carwar Railway, *ib.* 6182, 6183——Absence of difficulty on the part of the Great India Peninsular Railway Company, *ib.* 6188–6194——Engineering facilities for carrying out the project, *ib.* 6213, 6214. 6218–6222——Very little opposition offered in the first instance by the press or by the public, *ib.* 6264–6275.

Suggestion that the line might be carried out by a company if Government would advance the required capital at four per cent.; contemplated deposit by the company by way of security, *Fleming* 6230–6260——Improbability of the merchants of Bombay or of Manchester merchants combining to find the money for the railway, although witness fully believes it would pay from four to six per cent., *ib.* 6253–6263.

Statement as to the resolution of the Bombay Chamber of Commerce having pointed to further investigation of the Carwar scheme; the adverse memorial on the subject was never submitted to the Chamber as a body, *Fleming* 6269. 6460–6467——Denial that there is any analogy between the Carwar project and the Mutlah or Port Canning scheme, *ib.* 6276–6283.

Further defence and advocacy of the proposal that Government should find the money for the line, and that a company should undertake the construction, and should lodge a deposit, *Fleming* 6283–6299. 6315–6320. 6326–6344——Hesitation of Government to

Report, 1873—*continued.*

CARWAR (KARWAR) RAILWAY—continued.

2. *Detailed Explanation and Defence of the Project*—continued.

sanction the project lest it should be a burden upon the public revenue; favourable result, however, of repeated investigations of the project, *Fleming* 6298. 6341. 6344——Effect of the proposed railway in benefiting the owners of property at Carwar and the growers of cotton and other produce in the Dharwar district, *ib.* 6300-6314 —— Benefit more especially to Government as the great landowner of India, *ib.* 6326.

Small cost per mile estimated for the Carwar railway, so that there is every reason to believe that a good profit would be returned, *Fleming* 6337-6344. 6438-6440——Way in which the railway would tend to the prevention of salt smuggling, *ib.* 6437——Explanation as to Carwar not having been long since developed in preference to Compta, there being no railway at either place, *ib.* 6441-6448——Difficulties of access from the interior to Carwar, until recent years, owing to the unsettled state of the country, *ib.* 6441. 6451-6456.

Positive inaccuracy of certain statements that Carwar is not a good port, and that there would be no direct trade with Europe if the railway were made, *Fleming* 6457-6459——Between Bombay and Cape Comorin there is not another sheltered harbour, *ib.* 6457——Interest of the firm of Ritchie, Stewart, & Co., as well as of William Nicol & Co., in property at Carwar, *ib.* 6468-6472.

Cash Balances. Consideration of the subject of cash balances, and the confusion caused thereby in the accounts and finances generally; obstacle to simplification under this head unless by a decentralisation of Indian finance, *Sir C. E. Trevelyan* 1578-1590. 1606——Confusion more especially by reason of loans, or "debt," going to swell the cash balances, *ib.* 1583-1588——Opinion that the cash balances are much too large in amount, *ib.* 1591-1594——Temptation to a cooking of the accounts by reason of the account of cash balances, *ib.* 1606.

Exception taken to the balances of Public Monies Account for 1869-70, showing a cash balance in the Treasury of 13,940,451 *l.*; conclusion as to large portion of this balance not being public money at all, *Goodliffe* 2750-2760. 2797-2810.

Very efficient precautions taken in order to check the actual cash balances in the numerous treasuries throughout India, *Harrison* 4402, 4403.

Castor Oil Seed. Letter from Mr. R. Davies, late castor oil manufacturer, Lucknow, to the Secretary of the Chief Commissioner, Oude, dated 9th March 1872, praying for a reduction of the duty on castor oil seed, *App.* 747——Memorandum by the Officiating Secretary to the Chief Commissioner of Oude notifying the reduction of the duty, *ib.*

Cattle. Decrease of the number of cattle in some parts of the Deccan, owing to the absorption of the grazing lands, *Nowrozjee Furdonjee* 6939. 6946.

Cauvery Anicut. Very ancient anicut on the Cauvery, of excellent construction, *Sir C. E. Trevelyan* 1548, 1549.

Central Control. See *Local Taxation and Finance.*

CENTRAL PROVINCES:

Charge of 29,569 *l.* on the land in the Central Provinces for local purposes, *Harrison* 1704, 1705——Information relative to the Pandhri tax, which is a form of local income tax, and the amount derived from it in the Central Provinces; modification of this tax at different periods, *ib.* 1705-1707——Several miscellaneous charges in the Central Provinces defrayed out of local receipts, *ib.* 1708, 1709——Total of 55,246 *l.* received from municipal taxation in sixty-eight towns; how this sum is expended, *ib.* 1710-1714.

Total of 19,600 *l.* as to the amount to be made up by local taxation in the Central Provinces under the scheme of local finance, *Harrison* 1935——Objections raised by the Chief Commissioner against any additional charge upon land in the Central Provinces *ib.* ——Evidence relative to the operation of the Pandharee tax, or local income tax, *ib.* 1937-1941.

Statement showing the civil divisions, area, population, &c. of each district under the administration of the Commissioner of the Central Provinces, according to the Administration Report for 1871-72, founded on the census taken in 1866; total population of about 9,000,000, *App.* 610.

Letter from the Officiating Secretary, Central Provinces, to the Secretary to the Government of India (Financial Department), dated 30th December 1872, containing explanation in connection with returns of Imperial and local taxation, *App.* 774, 775.

Returns showing for 1859-59, 1870-71, and 1871-72, the amount derived from land revenue and from excise revenue, *App.* 776——Statement of the receipts of the Forest Department for the years 1870-71 and 1871-72, *ib.* 777——Also of the receipts from income tax, *ib.*

Particulars of local rates and taxes, and other taxes, and the receipts therefrom in 1870-71 and 1871-72, *App.* 778——Particulars of income and of charges in respect of municipal rates and taxes in 1870-71 and 1871-72, *ib.* 779.

Report, 1873—*continued.*

Chinese War. Explanation that witness had no voice as to the number of officers with the regiments sent from India to China; he considers that too many were added to each regiment, *Lord Lawrence* 5446–5450.

City Surveys (*Bombay*). Lapse of a considerable time before legality was given to the City Survey operations carried out in Ahmedabad and Surat, *Nowrozjee Furdoonjee* 4887. 4889——Evidence in detail relative to the City Survey Act of Bombay, the circumstances under which it was passed, and the immense dissatisfaction caused by its operation in Ahmedabad, Surat, Broach, and other large towns; great grievance of the people, without any practical redress in the shape of appeal, *ib.* 4888–4898.

See also *Broach.*

Civil Buildings. Discrepancy in the Finance Accounts for 1867–68 in respect of an item of expenditure of 55,000 *l.* for Civil Service buildings, *Goodliffe* 2848.

Civil Engineers. See *Cooper's Hill Engineering College. Poonah Civil Engineering College. Public Works.. Roorkee College.*

Civil Service. Separate Civil Service contemplated for each province, *Sir C. E. Trevelyan* 1505.

Twofold increase since 1858 in the number of covenanted civilians in the Bombay Presidency, *Nowrozjee Furdoonjee* 6983.

See also *Expenditure. Natives* (*Public Employment*). *Patronage. Salaries.*

Clothing (*Army*). See *Army*, IX.

Coffee. Comment upon the objection of the Secretary of State in 1865 to an export duty of three per cent. on Indian coffee, *Sir C. E. Trevelyan* 979, 980.

COLONELS' ALLOWANCES:

Comment upon the colonels' allowances and the unprecedented liberality in this respect under the staff corps system, *Sir C. E. Trevelyan* 430–439——Uselessness of remonstrances made at the time against the colonels' allowances and other parts of the army organisation scheme, *ib.* 634–636.

Statement as to the older officers in the staff corps getting colonels' allowances and gradually rising in the Imperial list of generals; these are not now doing any duty, *Johnson* 3134–3144——Increase of cost owing to the re-organisation of staff salaries in 1862, and the increase in the number of officers with colonels' allowances; further information promised hereon, *Kellner and Johnson* 3240–3248.

Undue expense involved in the large increase of the colonels' allowances; belief that the arrangement applies only to the old officers of the Indian army, and that officers who have joined since 1858 are subject to special rules, *Lord Lawrence* 5455–5458.

Large increase going on in the number of officers in receipt of colonels' allowances; estimate of 513 such officers in the year 1892, at a cost of 577,000 *l.*, *Kellner* 6995——Provisions in the first instance as to one officer in every thirty succeeding to colonels' allowances or off reckonings, *Johnson* 7094——Regulation issued in 1862 regarding the succession to off reckonings, *ib.* 7108.

Evidence relative to the effect of Lord Cranborne's Despatch in 1866 as regards the removal of the previous limitation upon the number of colonels' allowances; great boon thereby, *Johnson* 7112–7114. 7132–7144——Object of the two additional pension rates of 650 *l.* and 753 *l.* a year to induce the retirement at an earlier date of these officers who would obtain their colonels' allowances by succession and not by length of service, *ib.* 7130.

Great inducement to men to cling to the service by reason of the prospect of succeeding to colonels' allowances, *Johnson* 7144-7146. 7151, 7152——Belief that officers on the general list, who entered the service between 1858 and 1861, succeed to colonels' allowances after thirty-eight years' service, in the same way as those admitted to the staff corps in 1866, *ib.* 7161–7179——Power of Government to lay down new rules affecting the prospects of the general list of officers who have entered the staff corps; that is, as regards their succeeding to colonels' allowances, *ib.* 7169, 7170. 7176–7179.

Further reference to the calculations (by General Hannyngton) relative to the future cost of the staff corps, and the charge for colonels' allowances; much larger estimate by Sir Henry Durand, *Johnson* 7180–7193. 7234-7243——Number of local officers who will be eligible, if they survive, for colonels' allowances in each year from 1874 to 1884, *Kellner* 7183——Calculations of General Hannyngton adverted to as being far more moderate than those of General Broome; that is, as regards the future charge for colonels' allowances, *ib.* 7184-7186.

Several instances of officers having obtained the colonels' allowances under thirty-eight years' service, *Johnson* 7244-7248——Succession of general officers in time to colonels' allowances, the amount being about 1,124 *l.* a year, *ib.* 7439–7444——Receipt of the allowance of 1,124 *l.* a year after thirty-eight years' service, although at the time there is no service in return, *ib.* 7441-7451.

Report, 1873—*continued.*

COLONELS' ALLOWANCES—continued.

Statement of the number and cost of the officers of the Indian staff corps, of those on the general list of cavalry and infantry, and on the cadres of old regiments, in the years 1857, 1868, and 1873 respectively, *App.* 908.

Regulation as to the employment of officers of the staff corps on succeeding to colonels' allowances, *App.* 915.

Colonisation (*Hill Districts*). Expediency of every encouragement being given to colonisation of the hill tracts; efforts of witness to this end, *Sir C. E. Trevelyan* 1142——Obstacles to European settlements in India by localising pensioned soldiers in the hills; considerable expense involved, whilst collisions with the natives would assuredly result, *Lord Lawrence* 4698, 4699.

COMMISSARIAT (*Rations, Forage, &c.*):

Practice as to deductions from the pay of the European troops and Native troops respectively, *Kellner* 3415-3424——Total of 1,470,391 *l.* as the expenditure of the Commissariat and Transport Department in 1856–57, the charge in 1871–72 having been 1,929,369 *l.*, *ib.* 3662, 3663——Enumerations of the heads of charges comprised in the grant for the Commissariat, &c., *ib.* 3664, 3665——Explanations in detail relative to the causes of increase or decrease in the grant in each year, from 1861–62 to 1871–72, *ib.* 3665 *et seq.*

Great disturbance of the grant in years when military operations are undertaken, and when prices are enhanced by famine or scarcity, *Kellner* 3666–3688. 3694–3720 *et seq.* ——Comparison between the charge for food, forage, &c. in 1871–72 and in 1862–63, *ib.* 3740–3748——Several counteracting causes but for which the reduction of Commissariat charges since 1856–57 and 1863–64 would be much larger; reference especially to the increased number of European troops and the improved rations now given, *ib.* 3858. 3874——Decided tendency to economy in the Commissariat expenditure, *ib.* 3882.

Information relative to the cost of the Commissariat establishments in different years; decrease for both the executive and subordinate establishments, *Johnson* 3883–3898.

Economy effected under the head of Provisions for European Troops, *Kellner* 3899–3911——Explanation in connection with the increase of charge for compensation for the dearness of provisions for natives; want of stricter investigation of the claims for compensation, *ib.* 3912-3929. 3992-3994.

Varying charge for compensation for dearness of forage for the irregular cavalry, *Kellner* 3913——Considerable diminution of the annual charge for Commissariat live stock, the demand having decreased in the absence of military operations, *ib.* 3962–3971——Information relative to the number of horses fed in different years by the Commissariat, and the cost; probability of further check being required as regards the allowance or charge for forage, *ib.* 3980–3994.

Receipt of grain compensation by European, but not by native non-commissioned officers and soldiers, *Nowrozjee Furdoonjee* 5284, 5285.

Relative cost of the Commissariat executive establishments in Bengal, Madras, and Bombay respectively, in 1863-64 and 1871–72; important increase in the latter Presidency, *Kellner* 7294——Addition to be made to the Commissariat charges in India, in respect of malt liquor, and of rum sent from England, *ib.* 7295–7299——Reduced cost of rations per man in 1870 as compared with 1863; improvement in their quality, *ib.* 7300–7304.

Further explanation relative to the increased compensation paid to native troops for the dearness of provisions, witness believing that there has been some laxity in this respect; recent issue of instructions on the subject, *Kellner* 7305-7317—— Steps taken by Government with a view to greater promptitude and exactness in the matter of Commissariat expenditure and accounts, *ib.* 7315–7324.

Reference to certain printed statements as showing the average cost of each of the articles forming the soldiers' ration in each year from 1857 to 1870, *Kellner* 7571, 7572——Charges of the Commissariat and of the Cattle Department further adverted to; details required from India, *ib.* 7575. 7577–7580——Annual amount of compensation for dearness of provisions, and of forage, in each Presidency, in each year from 1862–63 to 1871–72; stricter check now being applied to this expenditure, *ib.* 7576.

Better position of the British soldier in India than elsewhere as regards rations and stoppages; list of articles comprised in the daily rations, and average cost per month, *Kellner* 7593, 7594—— The daily ration comprises bread, meat, rice, tea, coffee, sugar, salt, vegetables, and firewood, *ib.* 7594——Discontinuance of a former check relative to the cost of the troops in different districts, as affected by the cost of food, *ib.* 7596, 7597 ——Belief that the ration costs less in Bengal than formerly, and more in Madras and Bombay, *ib.* 7598.

Rules and regulatons relative to appointments in the Commissariat Department, *App.* 916, 917.

Communications

Report, 1873—*continued.*

Communications (*Roads, &c.*) Great deficiency of communications in India; urgent requirement of improved means of transport, *Fleming* 6327–6336.

Concan. Instances of opressive assessments of villages in the Concan, *Nowrozjee Furdonjee* 6972.

CONDITION OF THE PEOPLE:

Large influx of bullion to India since 1833, there being every reason for concluding that the people are much better off than formerly, *Maclean* 2590–2603——Wretchedly poor character of the urban population in many of the large cities, *Lord Lawrence* 4477.

Large portion of the people of Bombay whose condition is wretched exceedingly, their income being so low that many are compelled to live on half diet, and many are reduced to a state of starvation, *Nowrozjee Furdoonjee* 5926–5955——Instances of the natives being obliged to mix their food with earth saturated with salt, *ib.* 5944–5949.

Statement as to the scale of diet necessary for labouring men, this being very different from their actual diet, *Dadabhai Naoroji* 6585–6591——Reference made in an official report by Mr. W. S. Peddar to the increasing wretchedness of the people, *ib.* 6615–6621.

Exorbitant interest paid by cultivators for loans in order to prevent the land being sold for arrears of revenue; statement hereon on the subject of their improvident expenditure on social customs, notwithstanding their poverty, *Dadabhai Naoroji* 6701. 6703–6710——Reference to a calculation by witness showing the total production of Bombay per head as a means of arriving at the general condition of the people, *ib.* 6711–6715.

Decided opinion that the material prosperity of India is diminishing year by year, and will continue to diminish unless the drain upon her resources be checked, *Dadabhai Naoroji* 6729–6733. 6864–6867——Rare instances of very wealthy men in India, in Bombay or elsewhere; belief moreover that the number of these is diminishing, *ib.* 6891–6894.

Further evidence as to the impoverished condition of the people of Bombay, and the heavy pressure of the land tax, so that they are quite unable to pay an increased duty on salt, or to bear other increase of taxation, *Nowrozjee Furdoonjee* 6901–6907.

Very short-lived prosperity of the agricultural classes in Western India on account of the American war; the profits then made from the enhanced prices went partly in payment of former debts, and partly in luxury and extravagance, *Nowrozjee Furdoonjee* 6922–6925——Relapse of the inhabitants into their normal condition of poverty and want; witness can testify to this from observation in Guzerat and the Concan, where numbers of the people are in debt, are without proper clothing, and are half famished, *ib.* 6922–6939—— Very few gold or silver ornaments now possessed by the mass of the population in Western India, *ib.* 6922. 6928.

See also *Bombay. Irrigation. Land Revenue. Taxation. Wages.*

Cooper's Hill Engineering College. Exception taken to the establishment of the college at Cooper's Hill, *Sir C. E. Trevelyan* 1546——Remonstrances made by witness at the time of the establishment of the Engineering College at Cooper's Hill; burden thereby upon the finances of India, *Dadabhai Naoroji* 6735, 6736. 6768–6775. 6814–6818. 6778, 6779.

Prospectus of the Indian Civil Engineering College for 1873, showing in detail the objects of the college, the system of examinations and of admission, the financial arrangements, the conditions as to leave of absence, pensions, &c., *App.* 616–624.

Coorg. Return showing the area, population, &c., of the province of Coorg, *App.* 602——Returns relative to the land revenue, excise revenue, and forest revenue in different years, *ib.* 751——Absence of addition to the local taxes since 1870–71, *ib.* 753.

Correspondence. Explanation and defence of the plan (originated by witness in Madras), whereby the transmission of a large amount of information to this country by the local governments has been dispensed with, *Sir C. E. Trevelyan* 755–758.

Expediency of the direct correspondence from Bombay and Madras on all important questions being referred by the Secretary of State to the Governor General before a decision is given, *Lord Lawrence* 5652, 5653——Satisfaction expressed with the system of the Council of India in the matter of correspondence and accounts, *ib.* 5764–5766.

Cossipore Gun Foundry. Opinion that the maintenance of the Cossipore gun foundry is a great mistake, *Sir C. E. Trevelyan* 775–777.

Information relative to the charge for the gun foundry, there being only one in India, *Kellner* 7022.

Cotton (*Export Duty*). Decided objection to an export duty on Indian cotton, *Sir C. E. Trevelyan* 929.

Report, 1873—*continued.*

Cotton Frauds Act (Bombay). Strong remonstrances made in 1869 against the Cotton Frauds Bill of that year, *Nowrozjee Furdoonjee* 5078, 5079——Failure of the Cotton Frauds Act to remedy the evils for the suppression of which it was passed; representation by the Bombay Chamber of Commerce to this effect, *ib.* 5079. 5085-5090. 5104——Argument as to the impolicy of the Act, and the inexpediency of the large expenditure incurred in the maintenance of the Cotton Frauds Department, *ib.* 5079-5104.

Further particulars in elucidation of the very unsatisfactory working of the Cotton Frauds Department, *Nowrozjee Furdoonjee* 5222, 5223. 5227-5229.

COUNCIL OF INDIA:

Much less direct and influential representation of Indian interests through the Council of India than in the time of the East India Company; examination as to the grounds for this conclusion, *Sir C. E. Trevelyan* 400-414. 472-479. 503-508. 637. 640. 671-675. 686-691. 697-699——More influential and independent check in the Council of India if its members, or some of them, had seats in Parliament, *ib.* 585-596. 599, 600.

Grounds upon which, on further consideration, witness is opposed to the members of the Council of India having seats in Parliament, *Sir C. E. Trevelyan* 647. 676——Doubt as to its being possible so to reconstruct the Indian Council as to make it a safe guardian of the interests of India, *ib.* 678.

Examination as to witness' grounds for the conclusion that the Council of India has failed to exercise an effectual check in several instances of large and questionable expenditure; rare instances of the Council being overruled by the Secretary of State, *Sir C. E. Trevelyan* 946-959. 975——Stronger mercantile influence brought to bear upon the Queen's Government than upon the Company; objection to any larger mercantile element in the Council of India, *ib.* 987-991.

Free admission by witness that the officers under the Council of India do the utmost in their power for Indian interests, *Sir E. C. Trevelyan* 1001-1004——Disapproval of publicity of the debates of the Indian Council; in such case the Council would be still more subject to English influences, as against India, *ib.* 1158-1161.

Obstacles to an amended constitution of the Council of India by an introduction of the mercantile and commercial element, such as formerly pervaded the Court of Directors, *Sir C. E. Trevelyan* 1527-1531.

Evidence relative to the functions of the Council of India (apart from the Secretary of State) in matters of finance and of policy respectively; grounds for the conclusion that an exceedingly salutary control is exercised by the Council, though in very rare cases is the Secretary of State overruled, *Lord Lawrence* 4553-4579——Grounds for approving of the present constitution of the Council of India, rather than of the introduction of commercial men, *ib.* 4580-4593.

Comparatively weak political influence of the Council of India; it is something like tyranny in the Imperial Government to abuse this weakness to the prejudice of the revenues of India, *Lord Lawrence* 4804-4807. 4812-4819——Numerous cases in which the Council successfully resist the imposition of expenditure on India, although in special cases they feel constrained to give way to the political pressure which is brought to bear, *ib.* 5597-5605——Disapproval of the proceedings of the Council being public, *ib.* 5606, 5607——Immense value attached to the Council of India, though obliged at times to succumb to the pressure or influence of the Cabinet, *ib.* 5758-5763.

Report of cases where the Council of India has been overruled by the Secretary of State, *App.* 615.

See also *Accounts. Expenditure. Indo-European Telegraph. Under Secretaries of State.*

Councils (India). Support generally of the governors by their Councils in the event of collision with the Supreme Government, *Lord Lawrence* 4670——Objection to any enlargement of the local Councils, *ib.* 4671——Approval of the system of lieutenant govenors without Councils, though witness would not disturb the plan of a governor with a Council in Bombay and Madras, *ib.* 4672-4676.

Open question whether it is advisable to have any Council for Bombay; different opinions on the subject, *Nowrozjee Furdoonjee* 5143-5145.

Further disapproval of an abolition of the existing Councils at Bombay and Madras, though if they were now to be established for the first time there might be question for consideration, *Lord Lawrence* 5371-5373. 5462-5473——Limited extent to which a Council necessarily involves increase of expense, *ib.* 5471-5480.

Crommelin, Colonel William Arden, R.E., C.E. (Analysis of his Evidence.)—Is Inspector General of Military Works, and Deputy Secretary to the Government of India in the military branch of the Public Works Department 1, 2——Low and narrow buildings of which the barracks for Europeans in India formerly consisted; these were but very slightly raised from the ground, and had no verandahs, 3-5——Gradual improvement previously to 1857 in the description of barracks erected; very lofty buildings constructed

in

Report, 1873—*continued.*

Crommelin, Colonel William Arden, R.E., C.B. (Analysis of his Evidence)—*continued.*

in the Punjaub and elsewhere, upon the recommendation of Sir Charles Napier, 5-10——Very few barracks formerly for natives, who generally hutted themselves, 11, 12.

Difficulty as to barrack accommodation for the increased European force (about 20,000 men) thrown into India at the time of the Mutiny; several temporary expedients resorted to, 13-17——Very incomplete accommodation for the existing force previously to the increase through the Mutiny, 14-17——Minute of the Governor General in 1863 with reference to the precautions to be taken relative to the expenditure on barracks; appointment of witness under this Minute as the officer specially to assist Government in the matter, 18, 19——Searching inquiry made by witness, and subsequent report to Government, relative to the mode of construction desirable; special reference had to the question of economy, 20-22.

Resolution passed by the Government of India in December 1864 setting forth the conclusions arrived at, and showing the data upon which based, 22-24. 30——Important alteration embraced in the plans finally adopted, it having been decided that the upper storeys of the barracks should as a rule be used only as dormitories, 24——Superior accommodation by the new plans; increased cost involved in respect of the upper-storey buildings, 25-29——Rapid construction of barracks on the new plans, whilst the old barracks were modified and utilised as far as possible, so as to promptly accommodate the increased European force in the country, 31-38——Calculation that further accommodation is still required for about 5,000 men, 40-42.

Modification by the Government of India, in December 1870, of the rule laid down in 1864, as to the exclusive use of upper storeys for dormitories, 42, 43——Estimate in 1865 of ten millions as the cost of the new barracks and other military works, about four and a half millions being for new barracks to accommodate about 25,000 men, 44-55——Large excess of the cost of accommodation per man beyond the original estimate, owing to the large increase in the price of materials and of labour; sundry particulars hereon, 56-64. 76, 77. 108-126——Original estimate of 180 *l.* as the cost per man, whereas the actual cost will be about 250 *l.* per man, 57-75——Exceptionally heavy cost at Mhow, 59. 77——Cost of 286 *l.* per man at Saugor, 60, 61.

Information relative to the total expenditure since 1864-65, in new barracks and other military works; further expenditure of about a million and a quarter required to complete the new system of barracks, 65-78. 202-204. 296-308——Expenditure of about 3,300,000 *l.* on new barracks, by the end of the year 1872-73; 74, 75. 297. 305——Steps recently taken by the Governor General towards reducing the cost of construction by lowering the style of buildings, 75. 78——Witness is not aware of any official complaints about the expenditure, which he considers economical, 79, 80——Nor has any controversy arisen about the scale of accommodation, 81.

Responsibility of witness as regards the plans of the barracks, &c., but not as regards the constructive details, 82-84——Responsibility of the executive officers under the local governments for the work of construction, which was carried out partly departmentally and partly by contract, 85-89——Defective construction of an ordnance building at Allahabad; there has been no failure of the barracks, 90, 91. 107——Serious failure of the barracks at Nusserabad and Saugor owing to bad masonry, the work having been done departmentally; examination as to the officers responsible for the faulty construction in these cases, 92-104. 151-177. 183-190.

Use, generally, of bricks in the construction of the barracks; failure in those cases only where rubble stone has been used, 105-107——Effect of the simultaneous construction of railways and military works since the Mutiny in enhancing the demand for wood and other materials and in raising prices, 108-126——Denial that any new barracks have been uninhabitable on sanitary grounds, 127-129——Unfounded attacks made in the press in India as to the inferiority of the barracks in reference to their cost; temporary character of some of the defects complained of, 130-134.

Opinion that not only the barracks but the military works generally, since 1863, have been economically carried out, 135-138——Explanation that some ordnance buildings at Allahabad were economically constructed, though their badness of construction drew a severe reprimand from Lord Mayo, 139-150——Occurrence of some complaints about the Jubbulpore barracks, 178-182——Costly and faulty construction of certain barracks adverted to in connection with the immense expenditure proposed by the Public Works Department in irrigation and other works, 183-192.

Power given in the first instance to the local government and officers to submit deviations from the designs adopted by the Central Government; considerable modifications in some localities, 193-195——Practice as to the preparation of specifications, and as to the supervision of the work, 196-201——Large number of upper-storeyed buildings throughout India, bricks being frequently used in construction as regards temperature, 205-211——Inaccuracy of the view that the temperature is higher in the upper storey of brick barracks than in one-storeyed buildings; reference to the result of thermometrical observations on this point, 209, 210. 213-215.

Report, 1873—*continued.*

Crommelin, Colonel William Arden, R.E., C.B. (Analysis of his Evidence)—*continued.*

Explanation as to the payments for daily labour under departmental work, 212——Absence of analogy between the cost of bungalows and of permanent barracks; large increase moreover in the cost of bungalows, 216, 217. 235——Circumstance of the local governments not having been allowed to adopt one-storeyed buildings, though in the first instance they might have suggested them; instances of double storeys having been designed before the Mutiny, 218–228——Favourable experience of witness as regards the temperature in upper storeys, 229–234.

Heavy cost doubtless of the new barracks; economy, however, on the score of repairs, 235, 236. 257–260——Inaccuracy of the view that the temperature is much better in bungalows made of unburnt bricks than in barracks made of burnt brick; the matter depends entirely on structural arrangements, 237–241——Sacrifice of much of the money spent on the barracks at Nusseerabad, 248——Expectation that some of the buildings at Saugor will be utilised, though they have been condemned *en masse, ib.*——Occupation of the new Allahabad barracks, whilst steps have been taken to remove the complaints as to excessive heat, 249, 250.

Further statement as to the effect of the railways in raising the cost of materials, 251–255——With regard to the very cheap character of some one-storeyed barracks at Dalhousie, these are in the nature of huts, and cannot be compared with the new barracks as to accommodation, 261–270——Explanation that although the designs of the new barracks originated with witness they were approved by the Sanitary Commission in India and by the Home Government, 271–273.

Modification by the Government of India of the rule as to two-storeyed buildings; doubt, however, as to whether the sanitary result will be so satisfactory in the case of barracks of one storey, 274–281——Further statement to the effect that new barracks were required at the time of the Mutiny for an additional force of about 20,000 men, the accommodation before the Mutiny having still been deficient, 282–290——Very good character of much of the accommodation before Lord Dalhousie left India; new and improved barracks during his administration, 291–295——Very large expenditure (more than 5,000,000 *l.*) upon military works, other than new barracks, since 1863; 296–301. 305–308.

Responsibility of witness for the general supervision of all military works, 302–304——Large cost of repairs adverted to as not arising from the new system of barracks, 309–311——Witness has not visited any of the barracks in Bombay or Madras, 312. 313——Much larger barrack expenditure in Bombay than in Madras, 314, 315——Reference to a statement prepared by witness showing the progress made to the end of the year 1869–70 in providing barracks for Europeans, 317–322.

Information as to the relative accommodation and costs of barracks in the hills and on the plains; less space given on the hills, and less substantial buildings deemed necessary, 323–333——Opinion that it would be more economical, eventually, to build substantial barracks in the hills, 333——Several purposes for which the lower storey is used where there is an upper storey for a dormitory, 334–336——Greater or less heat of the upper storey accordingly as the roof is constructed, 337–339——Efficiency of mud roofs considered; obstacle to making them too thick on account of the weight, 340–345. 394, 395.

Objection to underground rooms for soldiers, 346–348——Limited usefulness of thermantidotes, 349–352——Impracticability of watering the roofs, 353——Value of barracks in the plains on strategical grounds, 354–356——Particulars as to the barracks being so constructed as to be defensible; instances of fortified barracks, 356–363——Further reference to the important deviations from the original plan, 364–366——Denial that the buildings are palatial in character, or that they act as "sun-traps," 367–369.

Comparative cost of the barracks in India and of barracks in China and in England; explanation hereon as to the necessity of great height in the upper storey in India, 370–381——Reference to certain returns from Bombay as showing that admissions into hospital are much less from upper storeys than from lower storeys, 382——With regard to the thermometrical experiments, these are being made in consequence of complaints about the heat; belief that the upper-storeyed barracks are, however, cooler than the others, 383–388——New sites selected for many of the new barracks with reference mainly to strategical reasons, 389–392——Probability of the barracks at Morar not being very healthily situated: strategical importance of the site, 392, 393.

Crommelin, Colonel William Arden, R.E., C.B. [Second Examination], and *Lieutenant Colonel James John M'Leod Innes,* R.E. (Analysis of their Evidence.)—(*Colonel Innes.*) Is Accountant General of the Public Works Department and Deputy Secretary, 2197——Total of 9,311,957 *l.* as the expenditure of the Government of India on military works, &c. from 1862-63 to 1870-71; 2198–2204——Expenditure in this period of 725,160 *l.* on small works costing under 250 *l.* each, 2205–2208——Aggregate of 4,884,446 *l.* as the expenditure during these years on barracks; further expenditure of 371,856 *l.* in 1871-72; 2209–2213——Various other heads of expenditure, together with the outlay under each head, 2214–2238. 2245–2247.

Expenditure

Report, 1873— *continued.*

Crommelin, Col. W. A., and *Lieut.-Col. M'Leod Innes.* (Analysis of their Evidence)—*cont^d.*

Expenditure of 110,090 *l.* on the defensive works at Hog Island up to the end of 1871-72; expenditure also of 236,000 *l.* on the hydraulic lift, 2233-2238.——(*Colonel Crommelin.*) Recent completion of the hydraulic lift at Hog Island; good service already rendered, 2239-2244.——(*Colonel Innes.*) Average of 1,000,905 *l.* as the annual expenditure on military works during the years ending 1871-72; 2248-2250.——(*Colonel Crommelin.*) Decrease of annual expenditure since 1869-70, the charge for new barracks having since diminished, 2251-2256.

Information relative to an additional charge of 23,000 *l.* for military works, in connection with the Government House near Bombay, 2258-2264. 2273, 2274——Doubt as to the cost of furniture over and above the expenditure of 157,836 *l.* for the Government House, 2265——Responsibility, respectively, of the Government of Bombay, and of the Government of India, in respect of the excess of estimates and the irregularities of expenditure in the foregoing case, 2266-2270. 2279-2285. 2297-2300——The expenditure of 157,836 *l.* comes down to the 31st March 1871; 2271. 2276-2278.——(*Colonel Innes.*) This expenditure is now nearly closed, 2271. 2278.

(*Colonel Crommelin.*) Statement on the subject of the hydraulic lift at Bombay having been erected at the cost of the revenues of India; doubt as to the returns to be derived, 2286-2296. 2303, 2304——Sanitary considerations owing to which the large outlay on new barracks is partly owing, 2301, 2302——Explanation that the barrack accommodation already spoken to by witness, is for rank and file only, 2305-2310. 2386.

(*Colonel Innes.*) Return handed in, classifying the barrack expenditure under various heads, 2311, 2312——Several places in which accommodation has been provided for native troops, 2313-2315——Amount of annual expenditure for repairs since 1862-63; 2319——Practice as to the supply of barrack furniture, this item not being included in witness' returns, 2320-2326.

Examination relative to the establishment charges in reference to barracks and other public works; grounds for the calculation, that the proportion of the whole cost of salaries to the whole outlay on works from 1862-63 to 1870-71 is 14 per cent., 2327-2363. 2366-2385——Increase of the expenditure on military works, by the charge for tools, plant, &c., 2352-2356.

(*Colonel Crommelin.*) Obstacle to more detailed accounts than those already supplied by witness, as to the cost of new barracks, per head, in different localities, 2364, 2365.

[Third Examination.]—(*Colonel Crommelin.*) Explanation that the outlay of 157,836 *l.* on the Bombay Government House includes the charge for guard rooms, &c., 2387——The cost of furniture is not included, 2388——Steps have been taken by the Government of India to check the expenditure in question, 2389.

[Second Examination.]—(*Colonel Innes.*) Explanatory statement relative to the improved control now exercised by the Government of India over works at Bombay, 2390——Information as to the modes in which the expenditure on barracks and other military works comes under the supervision and control of the Military Department, 2390-2397.

Reference to an official inquiry into the system of accounts in India some years ago, when it was decided that the expenditure on military and other works carried out by the Public Works Department should be accounted for by that department, 2398-2400——Means of showing, in detail, the cost of repairs of European barracks, 2401, 2402——Annual outlay on military works in the Straits Settlements from 1862-63 to 1866-67; considerable decrease since the former year, 2403.

Crommelin, Colonel. Memorandum by Colonel Crommelin in correction of portions of his evidence as regards failure of barracks at Allahabad and Saugor, and as regards the further total sum estimated for barrack accommodation, *App.* 601.

Cultivation of the Soil. Concurrence of evidence as to the valuable impetus given by the permanent settlement (as in Bengal) to the improved cultivation of the soil, *Sir C. E. Trevelyan* 1209-1216. 1271, 1272; *Lord Lawrence* 4423. 4427. 4442-4444——Great impetus to cultivation by moderation in the taxation of land; illustration of this in the Madras Presidency, *Sir C. J. Wingfield* 2120-2122.

See also *Capital.* *Irrigation.* *Land Revenue.* *Loans to Cultivators.*

Customs Duties. Evidence as to the total inadequacy of the Customs duties with reference to the great and growing trade of India, witness strongly advocating a revision of export duties, *Sir C. E. Trevelyan* 923-933——Several respects in which, by the abolition or reduction of taxes, the ground has been cleared for a good Customs revenue, *ib.* 923-925.

Past experience in the matter of town duties averted to in illustration of the importance of keeping the Customs revenue under the Supreme Government, Sir *C. E. Trevelyan* 1380——General supervision to be exercised by the Central Government overthe Customs Department in each province, under the decentralisation scheme, *ib.* 1506, 1507.

Report, 1873—*continued.*

Customs Duties—continued.

Expected increase of Customs revenue from increased consumption of dutiable articles as the people become better off under a permanent settlement, *Lord Lawrence* 4486-4488. 4490-4493——Limited increase of revenue to be obtained by an increase of Customs duties unless the people become richer, *ib.* 5579.

Great increase of charge in the Customs Department in Bombay since 1864-65, *Nowrozjee Furdoonjee* 6983.

See also *Exports, and Export Duties.* *Imports, and Import Duties.*

D.

Dadabhai Naoroji. (Analysis of his Evidence.)—Since 1855 has been chiefly resident in England as a merchant trading with India; was previously Professor of Mathematics in the Elphinstone College at Bombay, 6473-6476——Submits that the taxation upon the productions of India is "crushing" in its effect upon the mass of the people, 6477-6485——Has calculated that whilst the total production of the country is only about 40*s.* per head the total incidence of taxation is about 6*s.* a head, 6485, 6486.

Examination as to the proportion of the total taxation which is levied upon the mass of the people; incidence of the income tax, and of portions of other taxes upon the higher classes, 6487-6505——Argument that, so small are the means of the poorer classes, the taxation upon them, even though light, is necessarily crushing, 6505——Satisfaction expressed generally with the late land revenue settlement in Bombay, 6506——Grounds for the conclusion that the revised settlement now going on will be very oppressive upon the cultivators, 6506 *et seq.*

Particulars relative to the re-settlement of Indapore, witness contending that the settlement officer, in largely enhancing the previous assessment (by some thirty-five per cent.), has based his calculations as to prices on fallacious data, 6507-6532——Fallacy in basing the assessment upon an average of prices in the preceding ten years; conclusion, moreover, that prices have been enhanced from exceptional and temporary causes, that the rise has not been general, and will not continue, 6509-6532——Increased difficulty in paying the land revenue in Indapore since the re-settlement, 6532-6534.

Examination upon the general proposition that the land revenue is really paid by the landowner, and does not fall directly or indirectly upon the mere cultivator or ryot; dissent from this view, witness holding that the mass of the people are affected, 6535-6560.

Evidence in support of the conclusion that the average rate of wages of the common agricultural labourer throughout India is two annas a day, 6562-6579 — Higher wages in the town districts than the agricultural districts, 6571, 6572. 6579——Rate of wages in Bombay city for men, women, and boys respectively; decrease since 1863; 6572-6577——Rate of wages on public works in Bengal in 1866-67; tendency to lower rates since that year, 6579-6583.

Statement as to the scale of diet necessary for labouring men, this being very different from their actual diet, 6585-6591——Average of one and a-half annas a day as the earnings of women, and of one anna as the earnings of children, 6592-6598——Very general discontent among the people of the Bombay Presidency by reason of the burden of taxation; data for the conclusion that such discontent actually exists, 6599-6623.

Reference made in an official report by Mr. W. S. Peddar to the increasing wretchedness of the people, 6615-6621——Calculation by Mr. Peddar as to the very small production of the land in five districts of Nagpore, 6621.

Evidence in detail relative to the financial administration of the native state of Travancore during the period from 1863-64 to 1870-71, and the exceedingly satisfactory results thereof as compared with British administration in India; large accumulation of surplus revenue during the period in question, 6624-6697——Increase of twenty per cent. in the revenue of Travancore between 1863-64 and 1870-71, whilst there has been a reduction of taxation, 6628-6681. 6695.

Increase of about fifteen per cent. in the revenue of British India between 1863-64 and 1870-71, nearly the whole of which is due to additional taxation; question hereon as to the amount of increase of land revenue from increased cultivation, 6681-6695——Summary of the chief increments of taxation, 6695——Great mischief apprehended from the revised settlement going on in the Bombay Presidency, 6696-6698——Entire absence of legal address in the cultivators against exactions on the part of the Government collectors; documentary evidence submitted in support of this statement, 6698-6700.

Great pressure upon the cultivator to pay the assessment punctually; excessive interest to which liable for arrears, 6698. 6701-6703——Exorbitant interest paid by cultivators for loans in order to prevent the land being sold for arrears of revenue; statement hereon on the subject of their improvident expenditure on social customs notwithstanding their poverty, 6701. 6703-6710——Large number of cases in 1867-68 in which excessive interest

Report, 1873—*continued.*

Dadabhai Naoroji—continued.

interest was imposed by Government in respect of arrears, 6701-6703——Reference to a calculation by witness showing the total production of Bombay per head as a means of arriving at the general condition of the people, 6711-6715.

With regard to the anna cess imposed in the Bombay Presidency by the Act of 1869, witness submits that the imposition of the tax during the current settlement was a direct breach of faith; extracts cited from various official documents in support of this conclusion, 6716-6718——Misappropriation involved in the local cesses not having been applied to strictly local purposes; concurrence with Mr. Nowrozjee on this point, 6718, 6719——Argument that there is no law in force which justifies the forced hire or use of labour, carts and provisions; clauses of various Acts cited hereon, 6720.

[Second Examination.]—Witness hands in sundry papers containing statistics in support of former evidence, 6721——He further submits that the Settlement Report of Indapore is altogether erroneous in principle, as dealing with an average of prices, irrespectively of quantities and of temporary causes of increased prices, 6722-6726——Fallacy generally in basing assessments upon an average of prices in different districts without taking into consideration the very large quantities of produce in some districts and the very small quantities in others, 6722-6726——Expediency also of any local and temporary rise of prices being duly considered, 6725——Reference to a speech of Lord Mayo in March 1871 in which the taxation of the people of India is computed at 1*s.* 10*d.* per head; assumption of Lord Mayo that this taxation cannot be considered "crushing," 6727——Witness submits, however, that the immense difficulty experienced in finding any new tax which is not oppressive, and the exceedingly wretched condition of the people (as deposed to by Lord Lawrence), are proofs of over-taxation, *ib.*

Calculation intended to show that the Indian Government is infinitely more expensive as regards its ordinary wants and administration than is the Government of Great Britain; that is, taking into consideration the respective resources of the two countries, 6727——Sundry returns and statistics submitted relative to the exports and imports of India and other countries, witness contending that for many years past there has been an immense drain of the resources of India and a gradual improvement of the people to the benefit of England, 6729-6733——Great misfortune to India if the British connection were cut off; it is essential, however, that the cost of administration be reduced, 6729. 6866, 6867. 6897, 6898——Inability of India to stand the constant drain on her resources arising from the continual increase of European agency in the administration, 6729-6731. 6733.

Grievance in Government having entirely ignored the just claims of natives to appointments in the higher departments of the Civil Service; violation of the pledges given on the subject in the Royal Proclamation, 6734, 6735——Complaint also as to the very unfair treatment of the natives as regards the lower appointments in the uncovenanted service; policy rather to restrict still further the number of such appointments, 6735.

Remonstrances made by witness at the time of the establishment of the Engineering College at Cooper's Hill; burden thereby upon the finances of India, 6735, 6736. 6768-6775. 6778, 6779. 6814-6818——Complaint also as to the great discouragement of natives for service in the engineering department of India, 6736——Very unfavourable footing upon which the native sub-assistant surgeons have been placed as compared with the apothecaries, *ib.*——Grievance in the discontinuance of the Government of India scholarships which were granted at the request of the East India Association, 6737-6739. 6780-6786.

Statement as to claims not lying against Government in the civil courts as regards exemption from land revenue, 6740-6743——Comment upon the almost unvariable discharge of European criminals by juries; better feeling created thereby, 6744——Views expressed by Lord Lawrence and Lord Napier as to the discontent of the people on the score of taxation, 6744, 6745.

Good claim of India to the guarantee of her public debt by England; the saving of interest thereby would pay off the debt in a reasonable time, 6746——Estimate of about 5,000,000*l.* a year as the local taxation of India, to be added to the burden of the general taxation, 6747-6750——Very small value per head of the useful products or manufactures of England which are consumed in India, 6751-6754. 6766——Large expenditure out of India of the liberal salaries and pensions of European officials; grievance thereby, 6755-6760. 6839-6845——Contrast between the immense value of useful products exported from the country and the exceedingly costly civil and military administration under British rule, 6761-6767.

Large saving to be made in the cost of the civil administration by an extensive employment of qualified natives at lower salaries than are given to Europeans, 6776, 6777——Doubt as to Government employment having ever been offered to the able administrator of Travancore, Sir Madhava Rao, 6787-6791——Unfairness in India being charged with the cost of the new India Office; different principle adopted in the case of the Colonial Office, 6792-6797.

Report, 1873—*continued.*

Dadabhai Naoroji. (Analysis of his Evidence)—*continued.*

Advantage, so far, of the military expenditure in former times, under native rule, having all taken place in the country, 6798, 6799——Opinion that a large sum is wasted in the inefficient construction of public works, and that there is a great deal of corruption, 6800, 6801——Diversity of feeling in India as to the least oppressive mode of raising new taxation; doubt as to an increase of import duties being the least objectionable mode, 6802-6804.

Further advocacy of an Imperial guarantee of the debt of India, in the interests of both countries; large annual saving thereby which should be appropriated to the repayment of debt, 6805-6813. 6846-6863. 6896——Expediency of the railway debt being included under Imperial guarantee; probable objection by Parliament, 6810. 6896——Improved financial condition of Travancore further adverted to; question hereon whether the revenue of Madras has not increased in a still greater ratio, 6819-6830——Difficulty in computing what the general administration ought to cost; belief that there might be a reduction of twenty per cent. on the present cost, 6831-6838.

Consideration of certain objections to the working of the proposition for reducing the debt of India by means of the saving of interest under an Imperial guarantee, 6850-6863——Decided opinion that the material prosperity of India is diminishing year by year, and will continue to diminish unless the drain upon her resources be checked, 6864-6867.

Improbability of the natives investing in the debt under an Imperial guarantee, as they look for much higher rates of interest, 6868-6883. 6895——Very high rates of interest in transactions among the natives, 6880-6889——Rare instances of very wealthy men in India, in Bombay, or elsewhere; belief, moreover, that the number is diminishing, 6891-6894.

Dalhousie Barracks. See *Barracks*, 8.

DEBT OF INDIA:

Expediency of its being made perfectly clear that England is in no way liable for the guarantees or loans of the Indian Government, *Sir C. E. Trevelyan* 1595-1598.

Considerable saving to India in being enabled to raise public loans at low rates of interest, as a consequence of the connection with England, *Maclean* 2553.

Bad and incomplete form of the Finance Accounts illustrated in the case of the account of 1869-70, purporting to show the amount of the debt of India, *Goodliffe* 2708-2710——Details submitted in support of the conclusion as to the deficieney of the Finance Accounts of 1869-70, as regards the funded and unfunded debt of India, *ib.* 2711-2719.

Cause of difference between the amount of interest on "Loans" and on "Funded and Unfunded Debt;" in the Accounts for 1871-72, this difference does not appear, *Harrison* 4150——Inconvenience of the distinction formerly observed in India between registered debt and funded debt; this is now remedied, *ib.* 4150-4158.

Approval of the plan of paying off debt whenever there is surplus income, and of creating fresh debt whenever there is a deficiency, *Lord Lawrence* 4789. 4791-4794——Great financial advantage to India if there were an Imperial guarantee for the public debt; conclusion, however, that Parliament would not consent, *ib.* 5521, 5522——Witness has a great dislike to increasing the debt of India, *ib.* 5592.

Further expression of the opinion that it would be exceedingly advantageous if England were to recognise the debt of India by a direct guarantee of the interest, *Lord Lawrence* 5644-5651——Large saving of interest under an Imperial guarantee, *ib.* 5650, 5651.

Good claim of India to the guarantee of her public debt by England; the saving of interest thereby would pay off the debt in a reasonable time, *Dadabhai Naoroji* 6746.

Further advocacy of an Imperial guarantee of the debt of India in the interests of both countries; large annual saving thereby, which should be appropriated to the repayment of debt, *Dadabhai Naoroji* 6805-6813. 6846-6863. 6896——Consideration of certain objections to the working of the proposition for reducing the debt of India by means of the saving of interest under an Imperial guarantee, *ib.* 6850-6863.

Impossibility of the natives investing in the debt under an Imperial guarantee, as they look for much higher rates of interest, *Dadabhai Naoroji* 6868-6883. 6895.

See also *Expenditure. Revenue. Taxation.*

Deccan. Admission as regards increase of the assessment on land in the Deccan, that the original assessment by Sir George Wingate was at a very low rate, *Maclean* 2571-2578.

Report, 1873—*continued.*

Deccan—continued.

Very general indebtedness of the peasantry throughout the Deccan, save in Khandeish, *Nowrozjee Furdoonjee* 6974–6976——Great pressure of the land revenue, and wretched condition of the people, *ib.* 6974.

See also *Bombay. Cattle. Condition of the People. Inam Commission.*

Decentralisation of Finance. See *Local Taxation and Finance.*

Direct Taxation. See *Income Tax. Taxation.*

Discontent. Discontent produced in many ways by the manner in which the administration of Bombay is carried on; reference more especially to the increased local taxation since the decentralisation scheme, *Nowrozjee Furdoonjee* 4840, 4841. 6029–6044——Very general discontent among the people of the Bombay Presidency by reason of the burden of taxation; data for the conclusion that such discontent actually exists, *Dadabhai Naoroji* 6599–6623——Testimony borne by Lords Lawrence and Napier to the discontent of the people of India on the score of taxation, *ib.* 6744, 6745.

District Road Cess Act, 1871 (*Bengal*). Information in connection with the District Road Cess Act of 1871, and the procedure under the Act for raising the sum required locally in Bengal; imposition of the cess upon land, houses, &c., *Harrison* 1945–1958. 2023–2027——Estimated production of 170,000 *l.* from the application of the Act, at maximum rates, in nineteen districts of the province in 1873–74, *ib.* 1948, 1959.

Copy of this Act, its object being to provide for local rating for the construction and maintenance of roads, and other means of communication in Bengal, *App.* 780–794.

Dockyards. Importance of bringing dockyards in India under strict control and limitation, *Sir C. E. Trevelyan* 845, 846.

E.

Ealing Lunatic Asylum. Expediency of India being relieved of charge in respect of Ealing Lunatic Asylum, *Nowrozjee Furdoonjee* 6984.

East India Association. See *Native Evidence.*

East India Company. Much greater weakness in Indian finance since the disruption of the East India Company, that body having been frugal and independent, and having stoutly opposed all external or Imperial claims which were unduly pressed, *Sir C. E. Trevelyan* 400–414——Mercantile origin and mercantile habits of the Company, whilst it was very careful in expenditure, and scarcely ever imposed new taxation, *ib.* 403–414——Conviction of witness that the East India Company would never have consented to an expenditure of 10,000,000 *l.* or 11,000,000 *l.* on new barracks, &c., *ib.* 424, 425. 580——Larger discretion of the local governments in India, when under the Company, as to the mode of carrying out new measures, *ib.* 425–427. 942.

Examination in support of the conclusion that excess of local expenditure in Bombay would have been more effectually checked under the East India Company, *Sir C. E. Trevelyan* 472–479. 503–508. 671–675. 686–691. 697–699——Absence at the Council of India of any such representative of Indian interests as Sir James Melvill in the time of the Company, *ib.* 472–479——Entirely independent character originally of the East India Company, whilst to the last they preserved a very large measure of independence, *ib.* 537——Important defence of Indian interests in the time of the Company, through many of the Directors having seats in Parliament, *ib.* 582–585——Identity formerly between the mercantile interests of England and the interests of India, whereas, since the abolition of the Company, the mercantile interests operate to the detriment of Indian finance, *ib.* 604–607.

Further statement as to the salutary opposition of the Company to taxation, *Sir C. E. Trevelyan* 617, 618——Policy of the Company to keep in their own hands the supervision of the local government, whereas, in more recent years, the theory has sprung up that India should be governed in India and not in England, *ib.* 748–754——Disregard formerly of the representations of the East India Company adverse to the Affghan war and other matters involving large Indian expenditure; stout and effectual resistance frequently made, however, against undue burdens being thrown upon the Indian exchequer by the Queen's Government, *ib.* 960–966. 1005——Frugality of the East India Company in their public dinners and entertainments; statistics hereon, *ib.* 966–971.

Argument in further support of the conclusion that on the score of frugality the administration of India was much more satisfactory under the Company than under the Crown, *Sir C. E. Trevelyan* 981–986.

Report, 1873—*continued.*

East India Company—continued.

Further statement as to the more independent position and action of the Company than of the Indian Council in all detailed financial matters; illustration of this in the financial controversies between Sir James Melvill and witness, *Sir C. E. Trevelyan* 993–1000——Impression that the Company made no serious objection to the annexation of Oude, *ib.* 1007, 1008——Approval of the policy which led to the entertainments formerly given by the Company to their civil servants, *ib.* 1383.

East India Irrigation and Canal Company. See *Orissa and Behar Irrigation Works.*

Ecclesiastical Establishment. Statement on the subject of the ecclesiastical establishment of India not being treated as a military charge to any extent, *Harrison* 4208 *et seq.*——Reason for the Presbyterian and Roman Catholic clergy attached to regiments being a military charge, whilst the general ecclesiastical establishment is treated as a civil charge, *ib.* 4237–4247.

Exception taken to the expenditure of about 180,000 *l.* a year for ecclesiastical establishments for Europeans in India, *Nowrozjee Furdoonjee* 6024–6028——Statement as to the Grant for Army Ecclesiastical Establishments not including the Church of England chaplains; decrease of this Grant between 1862–63 and 1871–72, *Kellner* 7023.

Education (*Army*). Particulars relative to the charges for military education, and the causes of the increase of the Grant in 1871–72 as compared with 1862–63; increase from 17,288 *l.* to 34,711 *l.* in this period, *Kellner* 7024.

Education (*Bombay Establishment*). Evidence as to the excessive expenditure on superintendance and inspection in the educational department of Bombay, witness submitting that the work of inspection should be largely entrusted to Natives, and that on this score much more economy might be effected, *Nowrozjee Furdoonjee* 5968–5992——The cost of inspection amounts to much more than one-third of the sum actually spent on education, *ib.* 5968——Very large salaries of the education inspectors, who are exclusively Europeans; just claim of Natives to some of those appointments, for which they are perfectly well qualified, *ib.* 5968–5992.

Comment upon the large salary and allowances (33,000 rupees a year) of the Director of Public Instruction in Bombay, the salary being larger than that of the same office in Bengal and Madras, *Nowrozjee Furdoonjee* 5992–5997——The Government of India recommended the reduction of the salary in Bombay some three years ago, but nothing has yet been done in this direction, *ib.* 5995–5997——Advantage if the Director of Public Instruction in Bombay were not taken from the Civil Service of India, *ib.* 5997–6001.

Further statement as to the large reduction feasible in the Bombay establishment, *Nowrozjee Furdoonjee* 6983.

Education (*Local Cesses*). Considerable proportion of the educational expenditure which is raised by local educational cesses; allocation from the Imperial revenue of half the amount required, *Harrison* 2041–2044.

Levy of the education cess in Bombay upon the agricultural classes only, whilst all classes benefit by the schools, *Nowrozjee Furdoonjee* 5002–5009.

Assignments to be made from Imperial funds for provincial services in respect of education in each Presidency or province under the Decentralisation Scheme, *App.* 841.

See also *Bombay*, I., 5.

ELPHINSTONE LAND COMPANY (*BOMBAY*):

Heavy cost involved in the transfer of the Elphinstone Land Company's scheme to Government, *Sir C. E. Trevelyan* 498, 499——Large rise in the value of the shares in the Elphinstone Land Scheme on its becoming known that Government was likely to be a purchaser, *ib.* 668.

Details relative to the scheme and works of the Elphinstone Land Company, and the eventual purchase thereof by Government for 1,800,000 *l.*, or about three times the value of the shares at one period; improvident and extravagant action of Government in the matter, *Maclean* 2458–2470. 2483–2494. 2513, 2514. 2606–2608. 2620–2638. 2668, 2669.

Statement as to witness having objected in 1867 to the purchase of the Elphinstone reclamation works, and as to the purchase having been subsequently effected in Lord Mayo's time, *Lord Lawrence* 4773–4776.

Witness was formerly a partner in the firm of Nicol & Company, of Bombay, which firm managed the works of the Elphinstone Company, *Fleming* 6064–6068——He submits a written statement, explanatory of the circumstances under which the Elphinstone

Report, 1873—*continued.*

ELPHINSTONE LAND COMPANY (BOMBAY)—continued.

stone Company was formed, and showing in detail the operations of the company in reclaiming foreshore, &c., at Bombay, the expenditure and income, the value of the works in the interests of commerce and shipping, and the terms of their sale to Government, *Fleming* 6069-6071.

Depreciated value of the company's shares in the market previously to their purchase by Government; evidence hereon in denial that the purchase was a prodigal one, *Fleming* 6071. 6103-6110. 6369 *et seq.*——Circumstance of no protest having been made on the part of the public during the long period pending the final acceptance of the offer of Government, *ib.* 6071——Payment of 1,859,082 *l.* by Government for the company's property; extensive and varied character of this, *ib.* 6071. 6114-6118.

Views of Colonel Fraser as to the value of the property, and the expediency of the prosecution of the works, *Fleming* 6071. 6129-6132——Probability of Mr. Russell Aitken, executive engineer to the municipality, having been the first to suggest the Government purchase of the Elphinstone Company's property; letter from him on the subject, dated 6th September 1866, *ib.* 6078-6086——Repudiation of the statement that witness or his firm used their influence to bring about the sale of the property to Government; reference hereon to the failure of an application to Government for a loan to complete the werks, *ib.* 6087. 6095-6102——Due publication of a list of shareholders, *ib.* 6088.

Acquisition of the foreshore land by the company from the natives who had leases, Government eventually buying the property out and out, *Fleming* 6089-6094——Condition originally as to the company supplying a large space for a railway terminus, *ib.* 6111-6113——Advantages of completing the Elphinstone Company's scheme rather than the Moody Bay scheme; requirement of about three quarters of a million for the former, including a large tidal basin, *ib.* 6127-6139. 6434, 6435.

Examination showing that the net income from the works of the Elphinstone Company in 1867,1868 and 1869, was not more than from one to two per cent.; this was owing to the unfinished state of the works, *Fleming* 6345-6347. 6401-6404——Question further considered as to the financial position of the company in regard to the depreciated value of its shares, and the want of a loan of 60,000 *l.*, previously to the purchase of the shares at par by Government, *ib.* 6368 *et seq.*

Inability of Government to have bought the concern under its par value; statement hereon as to witness having been instrumental in refusing an offer of 3,000,000 *l.* for the property during the financial excitement of 1865, *Fleming* 6368. 6406-6419——Better return from the works if properly developed; delay on this score pending the construction of the Port Trust, *ib.* 6426-6435.

Employment (Public Service). See *Natives (Public Employment).*

Engineer Officers (Army). Apparent decrease in the military expenditure by the pay of engineer officers now appearing under the Public Works Grant, *Kellner* 7484-7491.

Engineers. Public Works. See *Public Works.*

Evidence (Natives). See *Native Evidence.*

Examinations (Public Appointments). Rules and regulations as to the examinations for appointments in different branches of the army, &c., *App.* 911-920——Extract from military rules and regulations on the subject of civil and political appointments, *ib.* 919.

Exchange, Rate of. Unsatisfactory character of the Finance Accounts as regards the item of gain or loss by exchange, *Goodliffe* 2847, 2848.

Excise Duties. Much less popular character of the Excise on spirits and drugs than the salt tax, *Sir C. E. Trevelyan* 915——Approval of the duty on spirits and drugs by all well-disposed natives; witness considers the tax an excellent one, *ib.*

Statement in official letter from the Secretary to the Government of Bengal in June 1873, relative to the revenue from country spirits, ganja, &c., *App.* 685-687.

Detailed statement of Excise revenue in Bengal for the years 1856–57, 1870–71, and, as estimated, for 1871-72, *App.* 692, 693.

Particulars of receipts of Excise revenue in the North Western Provinces for 1870–71, *App.* 724, 725——Estimate of Excise revenue for 1871-72, *ib.* 726.

Return relative to the Excise revenue of the Central Provinces in 1858–59, 1870–71, and 1871-72, *App.* 776.

Return showing the rate and amount of Excise duties in Bombay in 1856–57 and 1870–71, *App.* 844.

Statement of Abkari or Excise revenue in Madras in 1857–58 and in 1870-71, *App.* 852.

Exemption from Land Tax. See *Rent-free Lands.*

Report, 1873—*continued.*

EXPENDITURE:

1. *Excessive Cost of the Administration of India; great Increase within the last Twenty Years.*
2. *Advocacy of the Policy of Reduction of Expenditure, as opposed to Increase of Taxation.*
3. *Degree of Responsibility of the Home Government as regards enhanced Expenditure.*
4. *Local Check in India.*
5. *Apportionment of Expenditure between India and England; Complaint on this Score.*

1. *Exeessive Cost of the Administration of India; great Increase within the last Twenty Years.*

Calculation intended to show that the Indian Government is infinitely more expensive as regards its ordinary wants and administration than is the Government of Great Britain; that is, taking into consideration the respective resources of the two countries, *Dadabhai Naoroji* 6727:

Inability of India to stand the constant drain on her resources arising from the continual increase of European agency in the administration, *Dadabhai Naoroji* 6731. 6733 —— Advantage, so far, of the military expenditure in former times, under native rule, having all taken place in the country, *ib.* 6798, 6799——Difficulty in computing what the general administration ought to cost; belief that there ought to be a reduction of 20 per cent. on the present cost, *ib.* 6831–6838.

Conclusion that the great increase of the expenditure in India is the main cause of the financial deficits which have occurred, *Nowrozjee Furdoonjee* 6894—— Sundry suggestions for the reduction or abolition of highly paid officers, the establishments generally having been increased excessively, *ib.* 6983——Increase of 20,000,000 *l.* in the annual expenditure of India sine the transfer of the Government to the Crown, *ib.*

2. *Advocacy of the Policy of Reduction of Expenditure as opposed to Increase of Taxation:*

Reversal in recent years of the old rule of Indian finance, whereby the income was dealt with as a certain quantity by which the expenditure was regulated; present rule of first fixing the expenditure and bringing the taxation up to it, *Sir C. E. Trevelyan* 818.

Extracts from Minute by witness, when in India, dated 10th June 1859, advocating the policy of reduction of expenditure instead of increase of taxation, *Sir C. E. Trevelyan* 1281——Extract from further Minute, dated 1st December 1859, in which witness again advocates the policy of reduction of military and other expenditure, *ib.* 1282.

Special reference to witness' Minute of 20th March 1860 (the publication of which led to his recall), in which he strongly impugns the policy of new or increased taxation, and strenuously urges a reduction of establishments, *Sir C. E. Trevelyan* 1282, 1283—— Conviction of witness that the policy of reduction of expenditure advocated by him in 1859 and 1860 would have been adequate to restore the equilibrium of the finances, *ib.* 1284.

Extract from Minute by witness dated 1st May 1860, showing that the reduction of military expenditure in 1860–61 was far less than what might have been effected, *Sir C. E. Trevelyan* 1645——Attention of witness called to a despatch from the Governor General in Council to the Secretary of State, dated 17th April 1860, commenting in strong terms upon the Minute of witness (as Governor of Madras) in which he charged the Government of India with yielding to the policy of a reduction of expenditure, *ib.*

Complaint that the deficit under the decentralisation scheme in Bombay was not met by reduction of expenditure instead of by new taxes, *Maclean* 2421–2426; *Nowrozjee Furdoonjee* 4858, 4859. 6037, 6038.

Personal efforts of witnes in the direction of economy, though in view of representations from England this was not always feasible, *Lord Lawrence* 4599, 4600.

3. *Degree of Responsibility of the Home Government as regards enhanced Expenditure:*

Instances of large expenditure in India, originated by the Secretary of State under Home pressure, *Sir C. E. Trevelyan* 942–945——Admission as to the Secretary of State for India having in 1859 repeatedly enjoined a reduction of expenditure, *ib.* 1641–1644 —— Denial however that the reduction of expenditure was the policy of the Government of India after the mutiny; comment hereon upon the inadequate reduction of military expenditure in 1860–61, *ib.* 1641–1645.

Statement to the effect that the Secretary of State is kept fully and sufficiently informed as

Report, 1873—*continued.*

EXPENDITURE—continued.

3. *Degree of Responsibility of the Home Government as regards, &c.*—continued.

as to the expenditure and financial arrangements of the Governor General in Council, and has every means of exercising a proper control in the matter, *Lord Lawrence* 4541–4552——Difficulties experienced by witness at the hands of the Home authorities as regards proposals for retrenchment, *ib.* 4599, 4600.

Obstacle to reduction of expenditure by reason of the submission of all proposals to the Imperial authorities, *Nowrozjee Furdoonjee* 5146, 5147.

4. *Local Check in India:*

Expediency in India of a departmental and independent control similar to the Treasury control in England, *Sir C. E. Trevelyan* 817, 818.

Effectual check generally by the Supreme Government upon financial questions referred to them by the local Governments, *Lord Lawrence* 4652——Sufficiency of the central check, providing the regulations be properly carried out, *ib.* 4668, 4669.

5. *Apportionment of Expenditure between India and England; Complaint on this Score:*

Evidence in detail in support of the conclusion that the interests of India, as regards expenditure, are not sufficiently protected under the system of the Council of India; much better protection in the time of the East India Company, *Sir C. E. Trevelyan* 400–414. 424, 425. 472–480. 585 *et seq.*——Argument that under the direct administration of India by the Secretary of State in Council, no sufficient barrier exists against official or popular pressure in the direction of liberal expenditure, *ib.* 415–417. 426. 581.

Way in which India suffers from class interests in England; moreover the War Department and the Admiralty screw as much as they can out of India, *Sir C. E. Trevelyan* 628——Strong temptation to the English Government to throw upon India more than its fair share of expenditure, *ib.* 637, 638.

Opinion that the revenue of India is overcharged in various ways in favour of the Imperial revenue; cases in illustration, *Lord Lawrence* 4795–4819.

Want of a careful re-adjustment of the financial charges as between England and India; various instances in which the former is unfairly relieved at the expense of the latter, *Nowrozjee Furdoonjee* 6984——Just claim of India to be treated financially by the Imperial Government with as much consideration as the Colonies, *ib.*——Great relief to the finances of India if certain suggested rectifications be carried out, *ib.*

Local Taxation and Finance. Native States. North Western Provinces. Persian Mission. Police. Prices. Public Opinion (England). Public Works. Railways. Salaries. Sultan's Ball. Taxation. Transport of Troops (Inland Transport). Navy. Travancore. Troop Service (Sea Transport).*

Exports, and Export Duties. Strong advocacy of a revision of Customs duties, *Sir C. E. Trevelyan* 923–933——Circumstance of Mr. Wilson having approved of export duties, *ib.* 926, 927——Views expressed by Mr. M'Culloch in 1859 in favour of duties on exports under certain circumstances, *ib.* 927——High authorities in India in favour of export duties on certain articles; local mercantile feeling also favourable thereto, *ib.* 930–933.

Limit to the export trade of India by reason only of the limited amount of labour and capital applicable to production, *Sir C. E. Trevelyan* 933——Large increase in the principal articles of export between 1862 and 1871, *ib.* 980.

Views expressed by Mr. Remfry and Mr. Bullen at a meeting of the Calcutta Chamber of Commerce in March 1859, in favour of an export duty on certain articles, *Sir C. E. Trevelyan* 980——Similar views expressed by Mr. Maitland at a public meeting at Calcutta on the Customs duties in April 1859, *ib.*——Similar course advocated by Mr. Bullen Smith in the Legislative Council of India in March 1871, *ib.*

Further statement that an export duty on any article should apply to the whole of India, and not to be confined to Bengal or any other province, *Sir C. E. Trevelyan* 1208–1217.

Light export duties might be imposed if there were an absolute necessity, *Lord Lawrence* 5569——Great opposition likely to be raised in England against export duties, *ib.* 5580–5582.

Contrast between the immense value of useful products exported from the country, and the exceedingly costly civil and military administration under British rule, *Dadabhai Naoroji* 6761–6767.

See also *Coffee. Cotton. Customs Duties. Hides. Jute.*

Report, 1873—*continued*.

F.

Famines. Protection against famines by the irrigation of even a third or fourth of the area of the districts threatened, *Lord Lawrence* 5681.

Feasts (Local Taxation). Strong objections raised against a proposed tax on feasts in Bombay, so that it was withdrawn, *Maclean* 2425, 2426 —— Rejection by the Bombay Council of a proposed tax on marriage and religious feasts, *Nowrozjee Furdoonjee* 4855–4858. 4864–4869.

Finance Accounts (India). See *Accounts.*

Finance Ministers. Effect of the appointment of a Finance Minister in weakening the financial responsibility of the Governor General and the local governors, *Sir C. E. Trevelyan* 819–822.

Practice as to the consultation of witness by the Finance Minister, and as to the latter first reviewing all questions which involved expenditure; excellent results therefrom, without any prejudicial diminution of the responsibility of the Governor General, *Lord Lawrence* 4594–4607.

Valuable influence of the Finance Minister as a check upon the other members of the Council, *Lord Lawrence* 4602, 4603. 4607—— Inability of the Governor General to undertake the work of the Finance Department in addition to his own work, *ib.* 4604, 4605.

Firewood. Undue obstacles to cutting firewood in the Deccan, &c., *Nowrozjee Furdoonjee* 6943.

Fleming, John. (Analysis of his Evidence:)—Was formerly a partner in the firm of William Nicol & Company, of Bombay, which firm managed the works of the Elphinstone Company, 6064–6068—— Submits a written statement explanatory of the circumstances under which the Elphinstone Company was formed, and showing in detail the operations of the company in reclaiming foreshore, &c. at Bombay, the expenditure and income, the value of the works in the interests of commerce and shipping, and the terms of their sale to Government, 6069–6071.

Depreciated value of the Elphinstone Company's shares in the market previously to their purchase by Government; evidence hereon in denial that the purchase was a prodigal one, 6071. 6103–6110. 6369 *et seq.*—— Circumstance of no protest having been made on the part of the public during the long period pending the final acceptance of the offer of Government, 6071—— Payment of 1,859,082 *l.* by Government for the company's property; extensive and varied character of this, 6071. 6114–6118—— Great value of the works and property in question; when completed and developed, the value will be largely increased, 6071. 6119–6139—— Views of Colonel Fraser as to the value of the property and the expediency of the prosecution of the works, 6071. 6129–6132.

Interest of the firm of Nicol & Company in property at Carwar, and in the construction of the proposed railway thence to the interior, 6072–6074—— Written statement submitted in explanation of this project, and of the great advantages therefrom, 6077—— Very little opposition offered in the first instance by the press or by the public to the project in question, 6077. 6264–6275—— Great natural advantages of the harbour of Carwar, 6077. 6170–6179. 6186, 6187. 6195–6211. 6223–6229. 6457—— Letter from the Rev. Dr. Wilson in August 1872, strongly advocating the projected railway, 6077. 6449, 6450—— Considerable export of cotton from Carwar direct to Europe, 6077.

Probability of Mr. Russell Aitken, executive engineer to the municipality, having been the first to suggest the Government purchase of the Elphinstone Company's property; letter from him on the subject, dated 6th September 1866; 6078–6086—— Repudiation of the statement that witness or his firm used their influence to bring about the sale of the property to Government; reference hereon to the failure of an application to Government for a loan to complete the works, 6087. 6095–6102—— Due publication of a list of shareholders in the company, 6088—— Acquisition of the foreshore land by the company from the natives who had leases, Government eventually buying the property out and out, 6089–6094—— Condition originally as to the company supplying a large space for a railway terminus, 6111–6113.

Advantages of completing the Elphinstone Company's scheme rather than the Moody Bay scheme; requirement of about three quarters of a million for the former, including a large tidal basin, 6127–6139. 6434, 6435—— Improbability of the merchants of Bombay, or of Manchester merchants combining to find the money for the projected Carwar railway, although witness fully believes it would pay from four to six per cent., 6140–6142. 6253–6263—— Advantage to the merchants of Bombay by the purchase of bunders from the natives with a view to improved wharfage accommodation, 6143–6148.

Public demand on the Madras Government in former years for a harbour at Carwar, and for a railway thence to Dharwar; large cultivation of cotton and other produce in this

Report, 1873—*continued.*

Fleming, John. (Analysis of his Evidence)—*continued.*

this district, 6149-6165——Political importance of the proposed line, 6166-6169——Difficulty at present owing to the action of the Home Government; favourable report by an official committee in India, 6180. 6188. 6230. 6321-6325.

Belief that the opposition at Bombay arises chiefly from fear of rivalry with that port, 6181. 6215-6217. 6264-6269——Desire of the merchants of Compta for the Carwar railway, 6182, 6183——Absence of difficulty on the part of the Great India Peninsular Railway Company, 6188-6194——Engineering facilities for carrying out the project, 6213, 6214. 6218-6222——Suggestion that the line might be carried out by a company if the Government would advance the required capital at 4 per cent.; contemplated deposit by the company by way of security, 6230-6260.

Statement as to the resolution of the Bombay Chamber of Commerce having pointed to further investigation of the Carwar scheme; the adverse memorial on the subject was never submitted to the Chamber as a body, 6269. 6460-6467——Denial that there is any analogy between the Carwar project and the Mutlah or Port Canning scheme, 6276-6283——Further defence and advocacy of the proposal that Government should find the money for the line, and that a company should undertake the construction, and should lodge a deposit, 6283-6299. 6315-6320. 6326-6344——Hesitation of Government to sanction the project, lest it should be a burden upon the public revenue; favourable result, however, of repeated investigations of the project, 6298. 6341. 6344.

Effect of the proposed railway in benefiting the owners of property at Carwar, and the growers of cotton and other produce in the Dharwar district, 6300-6314——Benefit more especially to Government, as the great landowner of India, 6326——Great deficiency of commnnications in India; urgent requirement of improved means of transport, 6327-6336——Small cost per mile estimated for the Carwar railway, so that there is every reason to believe that a good profit would be returned, 6337-6344. 6438-6440.

Examination showing that the net income from the works of the Elphinstone Company in 1867, 1868, and 1869 was not more than from 1 to 2 per cent.; this was owing to the unfinished state of the works, 6345-6367. 6401-6404——Question further considered as to the financial position of the company in regard to the depreciated value of its shares, and the want of a loan of 600,000 *l.*, previously to the purchase of the shares at par by Government, 6368 *et seq.*——Inability of Government to have bought the concern under its par value; statement hereon as to witness having been instrumental in refusing an offer of 3,000,000 *l.* for the property during the financial excitement of 1865; 6368. 6406-6419.

Statement as to the gross and net revenue derived in 1871-72 from the whole of the Government bunders in Bombay, 6420-6425——Better return from the works if properly developed; delay on this score pending the constitution of the Port Trust, 6426-6435——Way in which the Carwar railway would tend to the prevention of salt smuggling, 6437——Explanation as to Carwar not having been long since developed in preference to Compta, there being no railway at either place, 6441-6448.

Difficulties of access from the interior to Carwar until recent years, owing to the unsettled state of the country, 6441. 6451-6456——Positive inaccuracy of certain statements that Carwar is not a good port, and that there would be no direct trade with Europe if the railway were made, 6458, 6459——Interest of the firm of Ritchie, Stewart & Co., as well as of William Nicol & Co., in property at Carwar, 6468-6472.

Forced Labour, &c. Statement as to its being prohibited by law, under heavy penalties, to impress labourers, or to seize carts or bullocks, notwithstanding which prohibition, these practices are systematically resorted to by Government officials; instances of great abuse and hardship on this score, *Nowrozjee Furdoonjee* 5890, 5891——Widespread discontent throughout the Bombay Presidency by the prevalence of forced labour and compulsory supplies, *ib.* 5890.

Doubt as to the abuse in question being due to the exertions of mere subordinates and servants, *Nowrozjee Furdoonjee* 5897-5904——Dissent from the view that forced supplies and forced transport may be legally obtained at certain fixed rates, or at market rates, *ib.* 5905-5923.

Argument that there is no law in force which justifies the forced hire or use of labour carts and provisions; clauses of various Acts cited hereon, *Dadabhai Naoroji* 6720.

Forests. Doubt as to educated natives being well fitted for employment in the Forest Department, special training and instruction being apparently necessary for this service, *Lord Lawrence* 5314-5320——Large destruction of forests in the Simla Hills owing to the recklessness of the natives, *ib.* 5318. 5302.

Great increase in the cost of the forest establishment in Bombay, and the other Presidencies, *Nowrozjee Furdoonjee* 6983.

Statement or letter from the Secretary to the Government in Bengal, dated 3rd June 1872

Report, 1873—*continued.*

Forests—continued.

1872, relative to the forest revenue of the Presidency; reference to the administration of the department as not at all satisfactory, *App.* 684, 685.

Statement of forest revenue in Bengal in 1857–58, 1870–71, and as estimated for 1871–72, *App.* 691.

Statement showing the rates at which timber and other minor forest produce in the North West Provinces was sold during the years 1858–59 and 1871–72, *App.* 712.

Detailed price list of produce in the Oude forests, *App.* 748–750.

Statement of the receipts of the Forest Department, Central Provinces, for the years 1870–71 and 1871–72, *App.* 777.

Statement showing the forest revenue in Bombay in 1856–57 and 1870–71, *App.* 845.

Statement of the receipts from forests in Madras in 1857–58 and in 1870–71, *App.* 852.

Memorandum by Mr. Nowrozjee Furdoonjee on the working of the Forest Department in Bombay; strong exceptions taken thereto, *App.* 922–924.

Frere, Sir Bartle. Valuable services rendered by Sir Bartle Frere in the direction of military ecomy, *Sir C. E. Trevelyan* 1286, 1287.——*See* also *Bombay.*

Frontier Policy. Minute by Sir Charles Trevelyan, as member of the Council of the Governor General, dated 25th January 1864, with reference to the subject of Punjab frontier policy, *App.* 669.——*See* also *Punjab. Pathan Troops.*

Furlough (*Army*). See *Army*, VIII.

G.

Ganges Canal. Dead loss on the Ganges Canal if the account be properly taken, *Sir C. E. Trevelyan* 813.

Great disadvantages under which the canal was constructed; grounds for concluding that it has nevertheless been a good financial enterprise, *Lord Lawrence* 4758——Authority further cited for the conclusion that the Ganges Canal is a remunerative work, *ib.* 5562-5567.

Statement of the length, cost, and financial operation of the canal for 1870–71, *App.* 660.

Gay, Edward. See *Harrison, Edward Francis, and Edward Gay.*

Godavery Navigation Works. Strong interest taken by witness, when in India, in the opening up of the Godavery; great importance attached to the completion of this object, *Sir C. E. Trevelyan* 1236–1244——Explanation that no complete estimate of the cost had been formed when witness took the matter up, *ib.* 1244.

Defence of the opposition offered by witness to the Godavery Navigatien Works; excessive cost involved, whereas witness contends that for a large portion of the year the river would not be navigable, *Lord Lawrence* 5824–5833——Limited value of the anacut across the river, *ib.* 5831–5833.

Goodliffe, William Gimber. (Analysis of his Evidence.)—Was Accountant General at the India Office from 1866 until the end of 1871; had the general control of the Home Accounts, 2675–2677——Revision of these accounts upon witness' appointment, though not so completely as he should have desired, 2678, 2679——Defect of the accounts as regards the guaranteed railway companies; amendment required 2679–2681——Considerable defect also in the case of the Remittance Account, or account current between England and India; grounds for the conclusion that through the separate books in this case there is no security for the detection of malversation, 2679. 2682–2699——Desire of witness when Accountant General to abolish the second set of books; the accounts in question were however removed from his charge, 2694–2699.

Duty of witness as Accountant General to add the Home transactions to the Finance Accounts from India; conclusion arrived at that the account system of India was thoroughly unsound and the accounts themselves unreliable, 2701–2707——Bad and uncomplete form of the Finance Accounts illustrated in the case of the Account of 1869–70, purporting to show the amount of the debt of India, 2708–2710.

[Second Examination.]—Details submitted in support of the conclusion as to the deficiency of the Finance Accounts of 1869–70, as regards the funded and unfunded debt of India, 2711–2719——Very imperfect information in the accounts on the revenue side, as to assessed taxes, customs, opium, &c., 2719. 2828–2843——Facility to the investigations

Report, 1873—*continued.*

Goodliffe, William Gimber. (Analysis of his Evidence)—*continued.*

investigations of the Committee if some particulars of receipt and payment had been set forth in connection with the revenue from opium, 2719.

Evidence showing the unsatisfactory way in which the payments in England are added on to the payments which appear in the Finance Accounts; fallacy through the former not being classified as between the different Presidencies, 2719-2740——Suggested classification of the payments made in England for superannuation, 2731-2740. 2826, 2827.

Statement to the effect that the Finance Accounts give no satisfactory information to Parliament, or to the public, relative to the military and medical funds taken over by the Government of India, 2740-2750.

Exception taken to the balances of public monies account of 1869-70, showing a cash balance in the treasury of 13,940,451 *l.*; conclusion as to a large portion of this balance not being public money at all, 2750-2760. 2797-2810——Objection to the accounts from India being signed by officials who are not responsible for the balances shown, 2760-2769——Witness contends that the form of the Finance Accounts may be much simplified, so as to give more useful and reliable information without their being more voluminous, 2770, 2771. 2791. 2811. 2827.

Examination in support of objections to the mode in which stores paid for in England are brought into the account, witness contending that the payments in the year should be charged within the year, and should be apportioned among the different Presidencies, 2733-2796—— Suggestions relative to the amended system of account desirable as regards extraordinary expenditure on public works, 2812-2819—— Serious defect in the Finance Accounts so dealing with extraordinary expenditure as to discredit the finances of India, 2817.

Further explanation of the amendments required in the accounts as regards the military funds and medical funds, so that the capital may be clearly shown as well as the annual charge for pensions, 2820-2825—— Suggestions with further reference to the amended system of account desirable as regards revenue receipts from opium, customs, post office, &c., 2828-2843——Very unsatisfactory character of the remittance account further adverted to, 2844.

Witness repudiates any desire to cast reflection on the officers in India as regards the bad system of accounts, 2845——Statement in detail purporting to show the exceedingly unreliable character of the Finance Accounts from India as regards the military charges, 2845-2847—— Serious discrepancies between the total charge in India and England as shown in different accounts, 2846, 2847.

Comments upon the account of the Public Works Department for the year 1867-68; reference more especially to the item of loss by exchange on railway transactions, 2847——Unsatisfactory character of the Finance Accounts as regards the item of gain or loss by exchange, 2847, 2848—— Discrepancy in the Finance Accounts for 1867-68 in respect of an item of expenditure of 55,000 *l.* for civil buildings, 2848.

Exceptions taken to the course pursued in making transfers or adjustments, the Finance Minister thereby modifying his surplus or deficit as he pleases; illustration of this in the Finance Accounts of 1869-70 and 1870-71; 2848, 2849.

[Third Examination.]—Investigation relative to the "Statement of the Moral and Material Progress of India," laid before Parliament annually as a supplement to the Finance Accounts; numerous discrepancies between this statement and the finance accounts, whence the figures in the former are adopted, 2850-2871——Impracticability of a proper understanding of the finances of India, unless it be borne in view that the Home Treasury is but a branch of the Indian Treasury, 2852-2855——Important discrepancy as regards the Post Office Accounts, 2858-2861.

Exceptions taken to the Finance Accounts for 1869-70, as regards the item of extraordinary expenditure on public works; deceptive effect of the powers of transferring expenditure from "ordinary" to "extraordinary works," 2861-2871—— Entire inadequacy of the information obtainable from the Finance Accounts as to the cost of the Indo-European Telegraph, and the sources whence the money was provided, 2871-2880——Conclusion that no effective control is obtained through the Finance Accounts over the public expenditure, 2874. 2880, 2881. 2897.

Further illustration of the insufficiency of the Finance Accounts in the case of a million sterling of army receipts in 1869-70; there is in fact nothing to show how this amount was dealt with, save that it was taken in aid of the general revenue of the year, 2881-2897—— Impossibility of ascertaining from the Finance Accounts how much of the public works expenditure has been defrayed from current revenue, and how much from borrowed money, 2897.

Strong condemnation of the course pursued in India as regards deductions from revenues on their way to the exchequer; strict prohibition of this practice in England, 2897——Probability of the accounts in India being exceedingly elaborate; absolute necessity however of a rigid separation of the revenues from the service accounts, *ib.*

Report, 1872—*continued.*

Goodliffe, William Gimber. (Analysis of his Evidence)—*continued.*

Suggestions for the establishment in each Presidency of a Head Treasury Department, which should have the cash account under its control; details as to the mode in which this account should be worked, 2897——Proposition also for a system of departmental revenue accounts, which should be subsidiary to the presidency treasury accounts, *ib.* ——Reliable data and estimates to be furnished by the proposed Treasury Accounts, coupled with the Home Accounts, *ib.*——Belief that Sir William Anderson would entirely confirm witness in his condemnation of the system in India, of mixing up the revenue receipts with the service payments, *ib.*

Explanation that witness merely advocates for India a system of accounts analagous to that in this country, 2897. 2911, 2912——Admission that great efforts have been made towards a better system of accounts in India; inquiry by Mr. Whiffin and Mr. Foster adverted to hereon, 2898–2909.

Enumeration of witness' services in different public departments; he has been selected on four different occasions for special and arduous work in connection with accounts, 2913 ——Explanation of the circumstances under which witness was appointed to the India Office, and was retired thence, his appointment having been abolished; remonstrance made by him on this occasion, 2913–2915. 2920–2922——Statement as to witness' pension of 900 *l.* a year being all charged to India; exceptional circumstances which account for this arrangement, 2916–2922.

Information relative to the actual changes and improvements introduced by witness, when at the India Office, into the Home Accounts, 2923–2929——Further statement as to the exceedingly unsatisfactory state of the account current between England and India; representations made by witness in 1866 with a view to its amendment, but without effect, 2930–2938.

Goruckpoor. Great value of the thirty years' settlement in Goruckpoor, *Lord Lawrence* 4423.

Government of India. Important advantage of the decentralisation system of administration advocated by witness, inasmuch as the Supreme Government would become detached from its exclusive connection with Bengal, and would be built up of intelligence derived from all India instead of from one Presidency, *Sir C. E. Trevelyan* 885–889——Impracticability, in the past, of the Governor General overruling the local official interest and the strong Bengal tradition by which the constitution of the Supreme Government was determined, *ib.* 887–889——Misnomer involved in the term "Government of India," the main portion of the Government resting with the eight provincial administrations, *ib.* 888, 889.

Information relative to the general conduct of business in witness' time as between the Governor General and the Members of Council; effective control exercised by witness over all financial questions of any importance, as well as over questions in each department of the Council, *Lord Lawrence* 4594–4610.——Exception taken to the course adopted by Lord Dalhousie in nominally working all the departments, *ib.* 4605–4607.

Satisfactory division of the business among the members of Council in witness' time; explanation hereon as to the circumstances under which the papers were circulated to the whole Council, *Lord Lawrence* 4608–4610——Expediency of predominant influence in the Executive Council; statement hereon as to this not being in any way a representative body, *ib.* 4637–4440.

See also *Army*, I. III., .22 *Barracks*, 2. *Expenditure.* *Finance Minister.* *Local Taxation and Finance.* *Public Works.* *Simla.* *Taxation.*

Governors of Presidencies. Inexpediency of reducing the status of the Governments of Bombay and Madras to that of the other local governments, *Sir C. E. Trevelyan* 567–570.

System in witness' time whereby the Governments of Bombay and Madras carried on the general administration exactly as they thought proper, *Lord Lawrence* 4647——Reference by the local governments to the central governments on questions of any great difficulty, and on all questions involving new permanent expenditure, *ib.* 4647–4651.

Frequent instances of the local governments coming again and again to the central governments for sanction of proposed expenditure, *Lord Lawrence* 4653——Occasional instances of direct application by the local governments to the Secretary of State; exception taken to this course, *ib.* 4654, 4655——Discretion and responsibility in the local governments, as well as in the Governor General, *ib.* 4656, 4657.

Expediency of the local governors being subordinate to the Governor General, and of their obeying him, *Lord Lawrence* 4674——Preference for the appointment of men trained in India as Governors of Madras and Bombay, *ib.* 5464–5468.

See also *Bombay.* *Councils (India).* *Local Taxation and Finance.*

Grazing Land. See *Bombay*, I., 1. *Cattle.* *Land Revenue.*

Report, 1873—*continued.*

Guarantee System. Evil of the guarantee system in connection with canals or railways, *Lord Lawrence* 4760. 4777–4781.——*See* also *Railways.*

Guzerat. Grievance in Guzerat through the imposition of a water cess on lands irrigated from wells not constructed by Government; instances of official condemnation of this impost, *Nowrozjee Furdoonjee* 6972.

Guzerat Irregular Horse. Suggestions in Report by the Inspector General of Police in India, in January 1863, for the abolition of the Guzerat Irregular Horse, *App.* 681, 682.

H.

Harness (*Government Manufacture*). Opinion that the maintenance of the Government tannery at Cawnpore for harness is a great mistake, *Sir C. E. Trevelyan* 775–777.

Harrison, Edward Francis, and Edward Gay. (Analysis of their Evidence).—(*Mr. Harrison*). Is Comptroller General to the Government of India, 1646——(*Mr. Gay*). Is Deputy Comptroller General, 1647.

(*Mr. Harrison.*) Reference to the Report to the Government of India on Town Duties, in 1833, as showing the objections then urged against these duties; subsequent abolition of this system of finance, 1648, 1649——Financial statements by Mr. Laing in 1861 and 1862, adverted to in explanation of the views then entertained by the Government of India in favour of giving to the provincial governments powers of local taxation and increased financial control, 1650——Reason for the failure of the proposal made in 1861 for transferring 500,000 *l.* of expenditure to local budgets; grant, in lieu thereof, of 250,000 *l.* out of Imperial resources for expenditure on local works, under control of the Supreme Government, 1650–1653.

Views of the Government of India in 1864, in favour of returning to the municipal system of police formerly in force, 1654——Nature of the objections made by the Government of India in 1864 to the system of town duties, *ib.*——Explanations in connection with an Act of 1868, legalising the octroi system of taxation for towns in the North Western Provinces; this Act may be applied where there is a municipality, 1655–1665——Consideration by Sir William Muir of certain objections raised against the octroi system in the North Western Provinces; disapproval by him of the plan of farming the town duties, as in the Central Provinces, 1666–1670.

Reference to the resolution adopted by the Government of India on the 14th December 1870 on the subject of Provincial Services, a sum of 4,688,711 *l.* having been granted out of Imperial revenue as a permanent assignment for certain departments, 1671, 1672——Nature of the restrictions imposed by the Central Government in making the assignment in question; that is, on the score of accounts, new appointments, superannuations, &c., 1672——Statement of the amount assigned to each province, and of the basis of the assignment, 1673–1681——Views expressed by Lord Mayo in March 1871 in justification of the system of local finance, as inaugurated by the assignments for provincial services, 1682.

Particulars in connection with the several sums levied in the province of Oude by local taxation; total of 109,354 *l.* thus raised in 1871–72; 1683-1703 —— Receipt of 32,479 *l.* in Oude in 1871–72 by a cess of 2½ per cent., for local purposes, on the amount fixed as the Government revenue from land, 1683–1685——Appropriation of the proceeds by the Lieutenant Governor with reference to the realisations in each district, 1686, 1687——Receipt of 12,247 *l.* from ferry tolls in Oude in 1871–72; how this receipt is assigned, 1690–1692——Total of 39,244 *l.* derived from municipal taxation; particulars hereon, 1695–1703.

Charge of 29,569 *l.* on the land in the Central Provinces for local purposes, 1704, 1705——Information relative to the pandhri tax, which is a form of local income tax, and the amount derived therefrom in the Central Provinces; modification of this tax at different periods, 1705–1707——Several miscellaneous charges in the Central Provinces defrayed out of local receipts, 1708, 1709——Total of 55,246 *l.* received from municipal taxation in sixty-eight towns; how this sum is expended, 1710–1714.

Cess of 5 per cent. for local purposes, in addition to the land revenue demand, in British Burmah; how apportioned, 1715——Total of 50,096 *l.* derived from municipal taxation in British Burmah in 1871–72; reference more especially to the receipts from market places, 1715–1719. 1722. 1763–1769——Municipal tax on houses in lieu of a capitation tax, in Rangoon and other towns, 1717. 1763——Considerable sum realised by the sale of town lands in British Burmah, 1720, 1721.

Several items of local taxation in Bengal, there being some charges upon land but no general cess on the land, as in other provinces, 1723–1726——Receipt of 130,178 *l.* from tolls and ferries in Bengal in 1871–72; 1727–1731——Miscellaneous local receipts to the amount of 31,000 *l.* but not in the nature of taxation, 1731, 1732——Total municipal levy of 624,080 *l.* in Bengal, of which 273,127 *l.* arises in the Calcutta municipality; particulars as to the modes of assessment and distribution of these amounts, 1733–1743.

Report, 1873—*continued.*

Harrison, Edward Francis, and Edward Gay. (Analysis of their Evidence)—*continued.*

Statement of the amounts produced in the North Western Provinces by the road cess, the education cess, and the district postal cess respectively, 1744, 1745. 1755——Explanation relative to the cess in the North Western Provinces, now realising 181,240 *l.*, for the maintenance of the village watch, 1745——Local cases also, to the amount of 161,000 *l.* in 1870-71, for the payment of the village accountants, *ib.*——Total of 165,000 *l.* raised in the North Western Provinces in 1870-71 by municipal taxes, including octroi duties; particulars hereon, 1745-1754——Aggregate of 628,943 *l.* levied in the North Western Provinces from local funds, 1756.

Large cost of collection of municipal taxes in Oude, 1757. 1759——Doubt as to the actual cost of collection in the other provinces, 1758, 1759——Circumstance of the Bengal Road Cess Act of 1871 not having yet come into operation, 1760-1762 —— Varying amount of the capitation tax in British Burmah; satisfaction given generally by the tax, 1763-1768——Popularity of the tax on market stalls in Burmah, 1769—— Explanation as to certain charges in respect of local police, the Mhairwarra battalion, &c., appearing in the accounts as civil charges, 1771-1774.

Doubt whether the Province of Oude may not be advantageously comprised in the administration of the North Western Provinces, 1775——Recent transfer of Ajmere from the Government of the North Western Provinces to the Supreme Government; witness is not aware of the reason for this transfer, 1776, 1777.

Examination to the effect that under the scheme of local finance the Governor in Council of any province might expend an excessive sum out of local taxation on a Governor's residence, or on other buildings; direct responsibility to be incurred for any such expenditure, 1778-1788——Nature of the limitation upon the raising of loans by municipalities; practice in recent years for Government to advance loans to the municipalities for public works or improvements, 1789-1794.

Mention of several municipalities which have obtained Government loans; rate of interest and amount of debt in each case, 1795-1806——Impression that the loans to the municipality of Bombay have all been discharged, 1799——Circumstance of Government having advanced money to the municipality of Calcutta at 4 per cent. whilst the municipality has had to pay 6 per. cent. for loans raised from the public, 1801-1804—— Power of the local government of Oude to levy taxation upon the chief articles of consumption in the Province, 1805-1807.

[Second Examination.]—Statement of the local taxation cess levied upon the land revenue in the Punjaub for roads, education, and the district post respectively; total of 58,330 *l.* thus raised in 1870-71; 1808-1811 —— Information in connection with the municipal taxation in the Punjaub, and the purposes for which imposed; particulars more especially as to the octroi duties and the large proportion thus raised by the municipalities, 1812-1816——Considerable sums raised for village accountants, rural police, &c., the total of these sums and of the municipal taxation amounting to 226,000 *l.* in 1870-71; 1817-1822——Exceptional cases in which there is a house tax in the Punjaub, 1823-1827——Explanation as regards the house tax in Burmah, that Europeans pay such tax in lieu of a capitation tax as paid by the natives, 1827-1831.

Production of 359,683 *l.* by local taxes in Madras in 1870-71, exclusive of municipal taxation; the chief items are 192,027 *l.* produced by road cesses, and 160,032 *l.* produced by cesses for village service, 1832-1835——Particulars relative to municipal taxation in Madras, the amount produced under the heads of house tax, tolls, &c., and the regulations as to application of the receipts, 1836-1849.

Total of 242,272 *l.* produced in Bombay in 1871-72 by the cess for roads and education; particulars as to the local administration of these funds, 1850-1858——Doubt as to any complaints having been made in Bombay that it was a breach of faith to impose a road cess on the land revenue after the completion of the settlement, 1853-1860——Estimate of 323,346 *l.* as the municipal income of the city of Bombay in 1872-73, the chief receipts being from a rate on houses for water, lighting, and police, and from town duties, licenses, &c., 1861-1870——Particulars as to the expenditure of the municipal taxation of Bombay city; considerable sum required for interest on debt and for sinking fund, 1871-1876.

Statement of the receipts from taxation in the municipalities generally in the Bombay Presidency; particulars more especially relative to the town duties in Poonah, Surat, and other towns, 1877-1883——Nature of the check exercised by the Governor in Council before taxes are levied by the municipalities in Bombay, 1884-1889——Examination to the effect that loans have not been, and are not, raised by the town of Bombay or other municipalities without the previous sanction of the Government of India; exception in the case of Surat, 1890-1919.

Circumstance of there being no direct prohibition, under the decentralisation scheme, upon the raising of loans by municipalities without the sanction of the Supreme Government, 1893-1906——Absence of any provision for showing in the local financial statement under the decentralisation scheme, the amount of indebtedness in respect of municipal

Report, 1873—*continued.*

Harrison, Edward Francis, and Edward Gay. (Analysis of their Evidence)—*continued.*

municipal loans, 1920–1922——Reference to the municipal finance authorities in Bombay as in no respect representative of the municipal taxpayers, 1923. 2039.

With regard to the operation of the decentralisation scheme in Oude, the amount to be provided locally was fixed at 15,000 *l.*, 1924——Power given by Act No. 17, of 1871, to levy an additional rate of 1¼ per cent. on the annual value of land in Oude, in order to carry out the policy of the Provincial Services Scheme, and to improve the roads in the province, 1924-1928——Provisions in the foregoing Act as to the assignment of the money to the districts, and as to its expenditure by local committees, 1925. 1929–1932.

Views expressed by the Chief Commissioner of Oude in February 1871, as to the importance of local expenditure on roads, 1933——Statement made by Mr. Strachey in the Governor General's Council in March 1871, relative to the great increase in the value of land in Oude and throughout India, and the propriety of charging chiefly upon land the local expenditure required for roads and other communications, 1933, 1934——Realisation of about 26,000 *l.* by the additional cess in Oude in 1871–72; 1934——Considerable increase derived from octroi duties in Oude, *ib.*

Total of 19,600 *l.* as the amount to be made up by local taxation in the Central Provinces under the scheme of local finance, 1935——Objections raised by the Chief Commissioner against any additional charge upon land in the Central Provinces, *ib.*——Remarks by the Chief Commissioner upon the emigration from the Nagpore Province into Berar and the Hyderbad assigned districts; question considered as to this resulting in any way from the new scheme of local taxation and finance, 1935. 1996–2005. 2037, 2038.

Statement by the Chief Commissioner of the Central Provinces in favour of the pandharee tax, or local income tax, as the chief means of raising the sum required locally under the decentralisation scheme, 1937——Consideration of the circumstance of an income tax at a comparatively high limit being impracticable for all India, whilst in the Central Provinces an income tax embracing very small incomes is deemed the best resource for increased taxation, 1938–1941.

Explanation as to British Burmah having been relieved from any contribution under the decentralisation scheme, no fresh taxation having been imposed upon the Province, 1942, 1943——The amount thus remitted is 19,199 *l.*; 1942——A municipal tax is contemplated in the Province in respect chiefly of the towns of Rangoon and Akyab, 1943, 1944.

Item of 88,199 *l.* as the amount to be made good in Bengal under the arrangement of 1871; 1945——Information in connection mith the District Road Cess Act of 1871, and the procedure under the Act for raising the sum required locally in Bengal; imposition of the cess upon land, houses, &c., 1945–1958. 2023–2027——Estimated production of 170,000 *l.* from the application of the Act, at maximum rates, in nineteen districts of the Province in 1873–74; 1948. 1959——Fresh taxation proposed in towns in Bengal under Mr. Campbell's Municipal Bill; reasons for the rejection of the Bill by the Governor General, 1960–1963. 2014.

Deficiency of 48,030 *l.* to be made up in the North Western Provinces from local sources under the scheme of 1871; local estimate of 102,000 *l.* as the amount really required, the additional sum being chiefly in respect of roads and buildings, 1964——Explanation as to the cess proposed to be levied respectively on land in the permanently settled districts, and on land in the districts whose term of settlement had expired; amount produced by the cess, 1964–1967. 1973——Several heads of expenditure of the new cess in the North Western Provinces, the amount for each district being assigned by the Lieutenant Governor, 1968–1971.

Item of 39,000 *l.* to be made up in the Punjaub under the decentralisation scheme; increase beyond this amount considered necessary by the local government, 1972——Additional cess imposed upon land in the Punjaub, in order to raise the required amount, such cess to be divided equitably between the landlord and tenant; produce of 118,062 *l.* by this cess in 1871–72; 1972, 1973.

Sum of 55,428 *l.* to be provided by local taxation in Madras under the arrangement of 1871; 1974——Particulars relative to the Madras Local Funds Act of 1871, and the rates imposed thereby on land, houses, and tolls in reference to the decentralisation scheme, 1974–1983——Provision that the taxes levied in each district are to be spent within the district, 1984.

Deficiency of 65,965 *l.* to be made up in the Bombay Presidency under the scheme of 1871; 1985——Act passed in 1871, imposing duties upon the non-agricultural classes in the Presidency, in the form of an income tax; threefold classification of incomes for the purposes of the Act, 1985–1991. 2015–2019——Production of 53,509 *l.* under the foregoing Act in 1871–72; 1987. 1990——Suspension of the application of the Act in 1872–73, and for 1873–74; the Act however has not been repealed, and is still liable to be applied to incomes exceedingly small, 1987–1991. 2015–2021.

Report, 1873—*continued.*

Harrison, Edward Francis, and Edward Gay. (Analysis of their Evidence)—*continued.*

Extent of disturbance or re-adjustment of taxation caused in India by the scheme of 1871, relieving the Central Government of 350,000 *l.* of Imperial taxation, 1992–1995——Impression that employment, and the rate of wages, rather than the new system of local finance, account for the migration from certain parts of India to other parts, 1996–2013. 2037, 2038——Migration to British Burmah adverted to in connection with the incidence of taxation in the Province, 2007–2010——Complication in levying some of the local cesses required under the scheme of 1871; 2022–2027.

Necessity of imposing new cesses locally, or increasing existing ones, if, as is anticipated by some competent authorities, the local expenditure under the decentralisation scheme should increase in future years, 2028–2036——Provision made in some cases for the election of the municipal authorities which has charge of the municipal taxation, 2039, 2040——Considerable proportion of the educational expenditure which is raised by local educational cesses; allocation from the Imperial revenue of half the amount required, 2041–2044——Further explanation on the subject of the cess of 3 per cent. on the rental for the payment of the village accountants in the North Western Provinces, 2046–2048.

For third examination of Mr. Harrison. See *Seccombe, Thomas Lawrence,* C.B., *and Edward Francis Harrison.*

Hides. Suggestion that a moderate export duty might be laid on hides, *Sir C. E. Trevelyan* 1201.

High Courts. Unnecessarily expensive character of the High Courts at Calcutta, Madras, and Bombay, *Sir C. E. Trevelyan* 1515–1517.

See also *Bombay,* VIII. *Law and Justice.*

Hog Island (*Bombay*). Expenditure of 110,090 *l.* on the defensive works at Hog Island up to the end of 1871–72; very large expenditure also on the hydraulic lift, *Innes* 2233–2238.——*See* also *Bombay,* V. *Hydraulic Lift.*

Horses. Means of improving the breed of horses in India, otherwise than by Government establishments, *Johnson* 4073–4077.——*See* also *Stud Establishments.*

Hospitals (*Army*). Information in connection with the charge for general hospitals and for station hospitals respectively, in each Presidency in each year from 1864-65 to 1871–72, *Kellner* 7021.

House Tax. Comment upon the abolition of the house tax in Madras, when the muhtarafa was abolished, *Sir C. E. Trevelyan* 923——Exceptional cases in which there is a house in the Punjaub, *Harrison* 1823–1827——Explanation as regards the house tax in Burmah, that Europeans pay such tax in lieu of a capitation tax as paid by the Natives, *ib.* 1827–1831.

Explanation that an apparent reduction in the house rate in Bombay, under the Act of last year, is not a real reduction, *Nowrozjee Furdoonjee* 5191, 5192.

Return showing the taxes raised from houses, or from land covered by houses, in British Burmah, *App.* 770.

Provisions of the District Road Cess Act of 1871 (Bengal), relative to the mode of assessment and levy of the road cess on houses, *App.* 785, 786——Schedule of annual rates of road cess on houses in Bengal, *ib.* 794.

Provisions of Madras Local Funds Act of 1871, relative to the taxation of houses, *App.* 804, 805——Schedule of rates according to the class of house, *ib.* 807.

Amount received from the house rate in Bombay City in 1864 and in 1871, *App.* 849——Amount received from the house tax in the district municipalities of Bombay in 1856-57 and in 1871–72, *ib.* 850.

Hgderabad. Statement showing the area, population, &c., of the assigned districts of the province, *App.* 602.

Hyderabad Contingent. Explanation as to the enhanced military expenditure in respect of the Hyderabad Contingent, and certain other forces which are paid for by contributions from Native States, *Kellner* 7358–7371.

Hydraulic Lift (*Bombay*). Expenditure of 236,000 *l.* on the hydraulic lift at Hog Island, *Innes* 2238——Recent completion of the hydraulic lift; good service already rendered, *Crommelin* 2239–2244——Statement on the subject of the hydraulic lift at Bombay having been erected at the cost of the revenue of India; doubt as to the returns to be derived, *ib.* 2286–2296. 2303, 2304.

Report, 1873—*continued.*

Hydraulic Lift (Bombay)—continued.

Complaint as to the great expense incurred upon the Hydraulic Lift Dock at Hog Island, without previous discussion locally, whilst there is good ground for concluding that the result will be a total failure, *Nowrozjee Furdoonjee* 5268–7271.

Abstract of the estimates of the cost of the Hydraulic Lift Dock at Hog Island, *App.* 661——Abstract of the expenditure actually paid for the lift; excess of about 83,000 *l.* beyond the estimate, *ib.*——Note explanatory of the discrepancy between the estimate and the actual cost, *ib.* 661, 662.

I.

Imperial Government. Evidence as to the ineffectual check exercised by the Indian Council for the protection of Indian interests; much better check in the time of the East India Company, *Sir C. E. Trevelyan* 400–414. 472–480. 585–600. 637. 640. 946–959. 975. 987–991——Entire inability of the Government of India to resist the Home Government, backed by the Home public, *ib.* 489, 490. 546——Advantage to India by the transfer of Government to the Crown, provided the adverse influences complained of by witness be remedied, *ib.* 509–511.

Grounds for the conclusion that an exceedingly salutary control and check are exercised by the Council of India, though sometimes overruled by the Imperial Government, *Lord Lawrence* 4553–4579. 5597–5665——Instances of surcharge of the revenues of India in favour of Imperial interests, *ib.* 4795–4819——Statement as to its being something like tyranny on the part of the Imperial Government to abuse the weak political influence of the Council of India to the prejudice of the revenues of India, *ib.* 4804–4807. 4812–4819.

Various instances in which the Imperial Government is unfairly relieved at the expense of the Government of India; re-adjustment required, *Nowrozjee Furdoonjee* 6984.

See also *Army. Council of India. Debt of India. Expenditure. India Office. Indo-European Telegraph. Navy. Taxation.*

Imports, and Import Duties. Expediency of giving every possible encouragemnnt to the imports of India, *Sir C. E. Trevelyan* 925——Important reduction of import duties on numerous articles by witness when Finance Minister of India, *ib.* 979.

Argument in denial that the balance of trade against India represents the tribute paid by India to England; witness adduces sundry statistics in support of the view that the English connection is financially advantageous to India, and shows that the opium revenue nearly wipes out the whole annual deficit of imports as compared with exports, *Maclean* 2530–2556. 2592. 2615–2619. 2665–2667.

Sundry returns and statistics submitted relative to the exports and imports of India and other countries, witness contending that for many years past there had been an immense drain of the resources of India, and a gradual impoverishment of the people to the benefit of England, *Dadabhai Naoroji* 6726–6733——Very small value per head of the useful products or manufactures of England which are consumed in India, *ib.* 6751–6754. 6766.

See also *Customs Duties.*

Inam Commission (Bombay). Strong condemnation of the constitution and operation of the Inam Commission of Bombay; wholesale confiscation of proprietary rights thereby, *Nowrozjee Furdoonjee* 4870–4879——Views expressed by several officials of high position and authority as to the arbitrary procedure of the Commission, *ib.* 4870——Necessary abolition of the Commission on account of the excessive disaffection which it created, *ib.* 4879.

Question considered whether when Government originally confirmed by proclamation the rights then existing in the Deccan, reservation was not expressly made as regards cases which required investigation, *Nowrozjee Furdoonjee* 4881–4886.

Income and Expenditure. See *the Headings generally throughout the Index.*

INCOME TAX:

1. *Evidence in strong Disapproval of the Income Tax.*
2. *Views of Lord Lawrence in favour of the Tax.*
3. *Satisfactory Operation of a local Income Tax.*
4. *Extended Incidence of new Taxation in lieu of the Tax.*
5. *Receipts from the Tax in the different Presidencies and Provinces.*

1. *Evidence in strong Disapproval of the Income Tax:*

Repugnance of the people of India to the principle of the income tax rather than to its amount, *Sir C. E. Trevelyan* 620——Injurious effect of the tax in India as offering facilities

Report, 1873—*continued.*

INCOME TAX—continued.

1. *Evidence in strong Disapproval of the Income Tax*—continued.

for increased taxation in order to meet profuse expenditure on public works, &c., *Sir C. E. Trevelyan* 815——Conclusions in strong condemnation of any Imperial income tax, the assessment being most unequal and unjust, and the collection of the tax being attended with great extortion and peculation, *ib.* 896-910.

Statement showing that an income tax based upon the principle of self-assessment is entirely unsuited to the people of India, *Sir C. E. Trevelyan* 896——Small produce of the income tax if fixed high, whereas, if fixed low, it causes wide-spread irritation, *ib.* 897, 898——Reference to the income tax as a portentous instrument of extortion, although, as now levied, it may affect only one in a thousand, *ib.* 1080-1082.

Circumstance of there being a strong official opinion in Bengal and the North Western Provinces in favour of the income tax; the Madras collectors are, on the other hand, very generally opposed to the tax, *Sir C. E. Trevelyan* 1103-1107——Objection to the income tax even though the limit were placed at 10,000 rupees a year, *ib.* 1173——In such case the tax would not be worth the trouble it entailed, *ib.*

Further evidence opposed to a low income tax, although less abuse would doubtless arise accordingly as the operation of the tax was restricted, *Sir C. E. Trevelyan* 1362-1368——The tax is suitable only to times of great emergency, *ib.* 1366——Belief that in the emergency of a Russian invasion the people of India would willingly pay a reasonable income tax, *ib.*

Great pressure of the income tax in Bombay, in addition to which the natives abhor the tax on account of its demoralising tendency; if the tax be a necessity it should be confined to the well-to-do classes, *Nowrozjee Furdoonjee* 6913-6922.

2. *Views of Lord Lawrence in favour of the Tax:*

Argument in support of the income tax; provided it be not extended too far down among the masses, and the rate be not too high, witness would like to see it permanent, *Lord Lawrence* 4489. 4494-4502——Very little complaint made against the old income tax, *ib.* 4498——Michievous effect in renewing the tax subsequently by the year, *ib.*——Opinion that it would have been far better to retain the income tax generally than to introduce a system of petty local taxation all over India, *ib.* 4534.

Witness further contends that if the income tax were kept at a moderate rate, and were levied without extortion, it might well be resorted to rather than that additions should be made to the debt of India, *Lord Lawrence* 5569. 5584-5592. 5663, 5664——In an emergency witness would re-impose the income tax, *ib.* 5569——Slight weight attached to the arguments of three successive finance ministers against the tax, *ib.* 5586.

3. *Satisfactory Operation of a Local Income Tax:*

Popularity in Bengal of the rude form of income tax assessed by the heads of villages for local purposes, *Sir C. E. Trevelyan* 895. 908——Successful application of the principle of the income tax by the natives in the form of a municipal tax, *ib.* 1165, 1166.

Statement by the Chief Commissioner of the Central Provinces in favour of the pandharee tax, or local income tax, as the chief means of raising the sum required locally under the decentralisation scheme, *Harrison* 1937——Consideration of the circumstance of an income tax at a comparatively high limit being impracticable for all India, whilst in the Central Provinces an income tax embracing very small incomes is deemed the best resource for levying increased taxation, *ib.* 1938-1941.

4. *Extended Incidence of new Taxation in lieu of the Tax:*

Relief of the few at the expense of the many, by the repeal of the Imperial income tax; illustration of this in Bombay in the case of the non-agricultural cess imposed under the decentralisation scheme, *Sir C. J. Wingfield* 2118, 2119.

5. *Receipts from the Tax in the different Presidencies and Provinces:*

Extracts from witness' last financial statement, as Finance Minister, showing the gross and net receipts from the first income tax in the five years from 1860, the rate of assessment, and the appropriation of the proceeds, *Sir C. E. Trevelyan* 909, 910.

Statement of final income tax assessments in the North Western Provinces, under Act XVI. of 1870, during the financial year of 1870-71, *App.* 730——Statement of estimated income tax assessments during the financial year 1871-72, *ib.* 731.

Return showing the returns from income tax in the Central Provinces in 1870-71 and 1872-72, *App.* 777.

Total of 426,255 *l.* derived from the income tax in Bombay in 1870-71, *App.* 845.

Statement of the receipts from income tax in Madras in 1870-71, *App.* 852.

Report, 1873—*continued.*

Indapore (Bombay). Particulars relative to the re-assessment of Indapore, witness contending that the settlement officer, in largely enhancing the previous assessment (by some 35 per cent.), has based his calculations as to prices on fallacious data, *Dadabhai Naoroji* 6507-6532——Increased difficulty in paying the land revenue in Indapore since the re-settlement, *ib.* 6532-6534.

Witness further submits that the settlement report of Indapore is altogether erroneous as dealing with an average of prices, ir respectively of quantities and of temporary causes of increased prices, *Dadabhai Naoroji* 6722-6726.

Increase of the assessment of the Indapore Talooka by 53 per cent.; in twenty-one villages in this Talooka the assessment has been enhanced by from 75 to 149 per cent., *Nowrozjee Furdoonjee* 6946-6954. 6959——Large balance of revenue, amounting to about 25,000 rupees, which could not be recovered from the ryots in 1872, *ib.* 6959.

Extract from settlement report of Indapore (submitted by Mr. Nowrozjee Furdoonjee), *App.* 937——Statement contrasting the present and proposed assessment for villages belonging to the Indapore Talooka; per-centage of increase in each village, *ib.* 938.

India Office. Unfairness in India being charged with the cost of the new India Office; different principle adopted in the case of the Colonial Office, *Dadabhai Naoroji* 6792-6797——Argument that the cost of the India Office establishment should be borne by England in the same way as the cost of the Colonial Office is borne, *Nowrozjee Furdoonjee* 6984.—— *See* also *Council of India.*

Indo-European Telegraph. Statement relative to the mismanagement and failure in the case of the Indo-European Telegraph, and the perpetual charge thereby upon the finances of India; belief that under the East Indian Company the interests of India would have been much more closely looked after, *Sir C. E. Trevelyan* 464-479. 534-536——Grounds for the conclusion that the East India Company would probably have prevented the arrangement made about the Red Sea Telegraph, *ib.* 1053, 1054.

Examination in detail with further reference to the authorities responsible for the heavy charge upon Indian revenue by reason of the imprudent contract for the Red Sea Telegraph, and the omission to hold the contractors to the terms of the contract; admission as to the Court of Directors having concurred in the contract, though it was managed by the Queen's Government, *Sir C. E. Trevelyan* 1623-1637. 1639, 1640.

Entire inadequacy of the information obtainable from the Finance Accounts as to the cost of the Indo-European Telegraph, and the sources whence the money was provided, *Goodliffe* 2871-2880.

Argument as to the injustice and the hardship of saddling India with the whole cost of the Indo-European Telegraph, *Lord Lawrence* 4803-4819. 5332, 5333——Statement as to the obstacles to the Council of India successfully resisting the proposal to throw the whole of the expense on India, *ib.* 5597-5601.

Indore. Returns relative to the land revenue, excise revenue, and forest revenue, in different years, *App.* 751.

Innes, Lieutenant Colonel James John M'Leod, R.E. See *Crommelin, Colonel William Arden, &c.*

Insolvency Law. Want of a properly framed insolvency law for the Mofussil, *Nowrozjee Furdoonjee* 6974. 6983.

Interest on Debt. See *Debt of India.*

Interest (Loans to Cultivators). Exorbitant interest paid by cultivators in Bombay for loans, *Dadabhai Naoroji* 6701. 6703——Very high rates of interest in transactions among the natives, *ib.* 6880-6889.

Effect of the excessive assessments in driving the cultivators into the hands of the village sowcars, so that they largely become victims to usurious rates of interest as well as to ruinous litigation, *Nowrozjee Furdoonjee* 6972-6974——Suggested power in the civil courts to disallow usurious rates of interest, *ib.* 6974.

IRRIGATION:

1. *Disapproval of large and costly Irrigation Schemes; Financial Failure involved.*
2. *Defence of Government Action and Expenditure in the matter; excellent Results therefrom.*
3. *Expediency of Encouragement to private Enterprise.*
4. *Value attached by the People to Irrigation.*
5. *Disapproval of compulsory Water Rates.*
6. *Cost and Operation of various Irrigation Canals.*

1. *Disapproval of large and costly Irrigation Schemes; Financial Failure involved:*

Belief that large and costly irrigation schemes are a great mistake, and that village tanks

Report, 1873—*continued.*

IRRIGATION—continued.

1. *Disapproval of large and costly Irrigation Schemes, &c.*—continued.

tanks are the most useful and profitable means of supplying water for irrigation, *Sir C. E. Trevelyan* 813——Advantage of anicuts, or dams across rivers, as a means of providing irrigation, *ib.*——Especial advantage of the system of local or provincial finance in the case of irrigation works, *ib.* 884——Question of a stock taking adverted to with reference to the great loss incurred in respect of canal and navigation works, &c.; decided objection to a stock account, *ib.* 1089-1095.

Great efficiency displayed formerly by natives in irrigation works, whilst our own canals have been, financially, dead failures, *Sir C. E. Trevelyan* 1547-1550——Advantage if the money spent in recent years on costly canals had been applied to the restoration of the ancient tanks scattered throughout the country, *ib.* 1548.

2. *Defence of Government Action and Expenditure in the matter; excellent Results therefrom:*

Statement in detail in strong support of the expenditure incurred on irrigation canals, *Lord Lawrence* 4758——Belief that the Government of India should have done more rather than less in this direction, *ib.*——Decided approval of the policy of constructing canals on a large scale, such as the Ganges Canal, the Baree Doab Canal, &c., *ib.*——Immense importance of extension irrigation works in developing production, *ib.*

Grounds for concluding that irrigation canals and other large industrial works should be carried out by Government, *Lord Lawrence* 4759, 4760——Decided objection to large canal works being entrusted to companies, *ib.* 4759, 4760. 4763.

Further statement in support of the view that irrigation works properly carried out, would pay largely; exceptional instances to the contrary, *Lord Lawrence* 5558-5561——Very large revenue expected from irrigation rates where there is the incentive to increased cultivation under a permanent settlement, *ib.* 5557, 5558——Protection against famines by means of irrigation, *ib.* 5681.

Great value of irrigation works in Madras, as shown by the enhanced revenue where the water is used, *Lord Lawrence* 5820-5823.

3. *Expediency of Encouragement to private Enterprise:*

Importance of every encouragement being given to the formation of irrigation works by private enterprise; approval of the system of Government advances for the purpose, *Lord Lawrence* 4761-4763.

Proposed exemption from payment of extra cess in respect of water from wells constructed by private enterprise, *Nowrozjee Furdoonjee* 6983.

4. *Value attached by the People to Irrigation:*

Willingness evinced by the people to give their labour on irrigation works, *Sir C. J. Wingfield* 2123, 2124——Ready payment of water rates by the people when the value of irrigation is brought home to them, *Lord Lawrence* 4455-4460.

5. *Disapproval of compulsory Water Rates:*

Comment upon the principle of compulsory water rate as applied in connection with irrigation canals, *Sir C. E. Trevelyan* 813——Unduly independent position of the officers who administer the irrigation system, *ib.*——Comment upon the power of the department to compel the ryots to take irrigation water at a fixed price, *ib.* 1616.

Decided objection to irrigation or water rates being compulsory in permanently settled districts; ready use of the water in course of time, when its value has been appreciated, *Lord Lawrence* 4455-4460.

6. *Cost and Operation of various Irrigation Canals:*

Statement showing the cost and operation of each canal in the North Western Provinces and the Punjaub in the year 1870-71, *App.* 660.

See also *Ganges Canal. Guzerat. Madras Irrigation and Canal Company. Orissa and Behar Irrigation Works. Oude*, 5. *Punderpoor. Saone Irrigation Works.*

J.

Jameson, Sir George. Testimony to the excellent public services of Sir George Jameson, *Sir C. E. Trevelyan* 1316. 1319.

Jeypore, Rajah of. Strong opinion expressed against the income tax by the Rajah of Jeypore, *Sir C. E. Trevelyan* 1399.

Johnson,

Report, 1873—*continued.*

Johnson, Colonel Allen Bayard, and George Welsh Kellner. (Analysis of their Evidence.) —(*Colonel Johnson.*) Is Assistant Secretary to the Government of India in the Military Department, 2939——(*Mr. Kellner.*) Is Military Accountant General to the Government of India, 2940.

Great discrepancies between the official returns whence witness has prepared statements showing in great detail the strength of the European army and native army in each Presidency, month by month, from 1861-62 to 1871-72; how these variations may arise, 2941-2948——(*Colonel Johnson.*) Explanation that invalids who have left their regiments would appear in the return for the division to which they had been removed, 2948, 2949.

(*Mr. Kellner.*) Total of 45,522 British troops in India in 1856-57, the native strength in the same year having been 232,224; 2950-2952——(*Colonel Johnson.*) Reference to a Return to Parliament in 1859 as showing the strength of the regular and irregular European and native troops in 1856-57; 2953-2958——(*Mr. Kellner.*) Total of 60,453 European troops in 1871-72; 2959-2961.

Statement of the gross military expenditure in 1856-57, and in each year since 1861-62, including the estimated expenditure for 1872-73 and 1873-74; large increase within this period, 2962-2967——Small amount of army receipts in England, whilst those in India are considerable; particulars hereon for 1856-57, and for each year since 1861-62; 2968-2972——Amount of the net annual charge in 1856-57, and in each year since 1868-69; increase of nearly two millions as between 1856-57 and 1873-74; 2973, 2974.

Classification of the military expenditure in India under twenty heads or grants, for the purpose of administration and account; details hereon, 2975-2980—— Classification of the expenditure in England under the heads of effective services and non-effective services; several items comprised in each, 2981.

Total of 375,523 *l.* as the cost of the army and garrison staff in 1856-57, the cost in 1871-72 having been 465,840 *l.*; 2982——(*Colonel Johnson*). Enumeration of several causes of increase or decrease in the grant for army and garrison staff, 2983-2986.

(*Mr. Kellner.*) Evidence in detail explanatory of the increase or decrease in different years since 1856-57 in the grant for army and garrison staff, 2987 *et seq.*——Several items of increase owing to transfers from other grants, 2987. 3032——Large increase owing to the revised scale of staff and regimental salaries in 1862-63; 2988. 2996-2998 ——Important reduction subsequently to 1861-62 owing to the amalgamation of the general staff of the British and Indian forces, 2988-2995. 3001-3003.

Effect of the system of promotion in the staff corps to increase the rank and pay of the officers holding staff appointments, 3014, 3015. 3029-3031. 3041, 3042——Important reductions in 1869 in the staff of the army, it being considered that the reductions have been brought to the lowest point, 3032-3038——Counterbalance of the foregoing saving by several new staff services and appointments, which have added about 60,000 *l.* or 70,000 *l.* a year to the grant for army and garrison staff, 3039, 3040.

(*Colonel Johnson.*) Belief that the cost of the staff corps has nearly reached its maximum; official calculations are being prepared on this point, 3043, 3044. 3083. 3240-3244——Explanations relative to the financial operation of the staff corps system; nearly all staff appointments carry with them a salary in addition to the pay of the rank which the officer holds, 3045-3057. 3088-3096——Examination upon the question of the Henley clause in the Act of 1858 applying to those officers subsequently embraced in the staff corps; belief that the protection under this clause does apply to those officers, 3057-3073. 3152-3165.

(*Mr. Kellner.*) Regulations in force whereby the staff pay of each appointment is limited, there being an established scale which cannot be altered without the sanction of the Government of India and the Home Government, 3074-3078——Double sanction also necessary before any new staff appointments are created, 3079, 3080——Fewer number of staff appointments, excluding the station staff appointments, than in 1856-57 or 1861-62; 3081——Large increase of cost owing to officers of the higher ranks now holding staff appointments, which were formerly held by captains and subalterns, 3082, 3083.

(*Colonel Johnson.*) Very large decrease in the aggregate of the army in India since 1856-57; amount of the personal staff at head quarters in that year, 3084-3087 —— Explanation that the staff corps is recruited entirely from British regiments, as distinct from the Indian service, and that an officer leaving his regiment for the staff corps does not return to it, 3095-3102. 3124, 3125——Qualifications and conditions necessary before an officer is appointed to the staff corps, 3103-3106——Three distinct staff corps, one for each presidency, 3106——Necessity of going through the staff corps to the Indian army, 3107.

Selection by the Commander in Chief for military staff appointments, subject to veto by the Government, 3108-3113——Selection also for certain appointments without the

Report, 1873—*continued.*

Johnson, Col. Allen Bayard, and G. W. Kellner. (Analysis of their Evidence)—*continued.*

necessity of going through the staff corps; restriction of the pay by the regulations, 3114-3118——Statement relative to the portion and number of local officers of the Indian army who did not elect to enter the staff corps; these are in process of extinction, 3119-3127——Grounds for the large increase of pay of the Adjutant General of the army in India, 3128-3131——Circumstance of the Punjaub frontier force not being under the Commander in Chief, 3132, 3133.

Statement as to the older officers in the staff corps getting colonels' allowances, and gradually rising in the imperial list of generals; these are not now doing any duty, 3134-3144——Officers of all ranks hold staff appointments, 3145——Limited number of nominations given to the sons of distinguished Indian officers, in lieu of the former system of patronage cadetships, 3146-3149——Vacancy created in the regiment when an officer leaves it for the staff corps, 3150, 3151——Satisfactory manner in which the European troops of the former Indian army were eventually transferred to the Crown, though the first attempt at transfer was a failure, 3166-3180.

(*Mr. Kellner.*) Calculations relative to the number and cost of officers of cavaly, of infantry, and of the staff corps in 1862 and 1872; large decrease of officers whilst the cost has much increased, 3181-3191——Increase of cost owing to the increased number of officers in the higher ranks, 3189-3191.

(*Colonel Johnson.*) Reference to a letter from Colonel Norman to the Secretary of State for India in February 1860, as having probably led eventually to the formation of the staff corps, 3192-3204.

Mr. Kellner and Colonel Johnson). Further consideration of the discrepancy between certain returns and accounts relative to the numerical strength and the cost of the army at different periods; promised inquiry into this matter, 3235-3239. 3257-3263—— Increase of cost owing to the re-organisation of staff salaries in 1862, and the increase in the number of officers with colonels' allowances; further information promised hereon, 3240-3248——Considerable reduction made since 1857 in the divisional and brigade commands, 3249-3256.

[Second Examination.]-(*Mr. Kellner.*) Witness has prepared statements from the Quartermaster General's Returns in each Presidency, showing in detail the strength of the army, European and Navy, month by month, from 1862 to 1872; he submits this information to the Committee, with explanations, 3264-3276. 3292 *et seq.*——Exclusion of officers from witness' returns, 3266-3293——Several charges of a military character excluded from the total of 13,227,879 *l.* as the expenditure in India and England for 1856-57; 3277-3281.

(*Colonel Johnson.*) Circumstance of the strength of the army in April 1857 having been much more according to a Return of the Government of India than according to the Returns as prepared in the India Office; strength of each arm of the service according to the former Returns, 3282-3286. 3289-3291.

(*Mr. Kellner.*) Information relative to the strength at various dates, distinguishing between the establishment strength and the effective strength; statement hereon as to the large number of officers and men in depôts in the United Kingdom, 3299-3324—— (*Colonel Johnson and Mr. Kellner.*) Further comparative returns to be rendered, including in each case all officers of the same class, 3325-3330.

(*Mr. Kellner.*) Revised returns prepared by witness showing the annual military expenditure, according to the figures of the Finance and Revenue Accounts; discrepancy in previous returns prepared by him by reason of his mode of dealing with the item for stores, 3331-3334—— Several and important charges no longer borne in the Military Department, such as the charge for the Hyderabad Contingent, the Topographical Department, &c., 3335-3338.

Information in detail relative to the Grant for the Administrative Staff, the transfers to and from the grant since 1856-57, and the items of increase and of decrease, 3339-3376. 3383-3402——Several heads of charge comprised in the Administrative Staff Grant, 3339, 3340——Increase of the charges from 146,708 *l.* in 1856-57 to 198,634 *l.* in 1871-72; investigation as to the causes of such increase, 3340-3376. 3383-3402—— (*Mr. Kellner and Colonel Johnson.*) Particulars as to the charge for the bands of the Governor General and of the Governors of Madras and Bombay respectively; much larger change at Bombay than at Madras, 3349-3351. 3369-3382.

(*Mr Kellner.*) Evidence relative to the various items included in the Grant for the Regimental Pay, Allowances, and Charges; aggregage of 6,503,793 *l.* as the amount in 1871-72; 3403 *et seq.*——Details relative to the increase of pay of Europeans and Natives of various ranks in 1871-72, as compared with 1856-57; 3410-3414——Practice as to deductions from the pay of the European troops and Native troops respectively, 3415-3424——Information as to the number of officers in proportion to the number of men in 1856-57, 1862-63, 1869-70, and 1872-73, and as to the relative cost of officers and men per regiment, 3426 *et seq.*

(*Colonel*

Report, 1873—*continued.*

Johnson, Col. Allen Bayard, and G. W. Kellner. (Analysis of their Evidence)—*continued.*

(*Colonel Johnson.*) Statement of the number of officers of each rank in an infantry and a cavalry regiment in 1856-57; 3429. 3431——(*Mr. Kellner.*) Particulars of charge of a European cavalry regiment under different heads in 1856-57, 1869-70, and 1871-72; economy by re-organisation though the pay per head is increased, 3432-3462——(*Colonel Johnson.*) Several items included in the contract allowances in European cavalry regiments, 3443——(*Mr. Kellner.*) Statement of the charges for a regiment of European infantry in 1856, 1869, and 1872; considerable saving since 1869 by organisation, 3463-3473.

[Third Examination.]—(*Mr. Kellner.*) Comparison between the organisation of Native cavalry and infantry regiments in 1856-57, as regards the number of European and Native officers, and the organisation at the present time, 3478-3487——(*Colonel Johnson.*) Information relative to the average number of officers absent from Native regiments on sick leave or on furlough in 1856-57, and subsequent years, 3487-3496.

(*Mr. Kellner.*) Further evidence in detail relative to the several causes of increase and decrease in the grant for pay, allowances, and charges for officers and men in India; decrease or increase accordingly as charges have been transferred to or from other grants, whilst the enhanced rates of pay have permanently enlarged the grant in question, 3497 *et seq.*——Very large reduction of the grant in 1862-63, owing chiefly to the re-organisation of the army which then came into full effect, 3497-3513——Special causes of decrease and of increase in 1863-64, 1864-65, and subsequent years, 3514 *et seq.*

Expenditure of 6,677,604 *l.* for pay, &c. in 1867-68; important decrease as compared with 1865-66; 3537——Large item of increase in 1867-68, owing to the additional pay and bounty granted to British troops in India, 3538-3545——Further item of increase in 1867-68, owing to the effect of promotions in the staff corps, 3546-3548——(*Colonel Johnson.*) The staff corps was by the new scheme thrown open to all officers of the Indian army who chose to enter it, 3549.

(*Mr. Kellner*). Increased charge in 1868-69 owing to the large number of supernumeraries on the return of native regiments from Abyssinia; question pending as to this charge being borne by the Imperial revenue, 3556-3564——Permanent increase in 1868-69 in the strength of the Punjaub frontier regiments, 3564, 3565——(*Mr. Kellner and Colonel Johnson.*) Formation in 1868-69 of a troop of Native cavalry for service at Aden, 3566-3568——(*Mr. Kellner.*) Mention of several other items of increase or decrease in the charge for 1868-69; 3569-3572. 3574, 3575——(*Mr. Kellner and Colonel Johnson.*) Saving of expense in 1868-69 by the conversion of certain field batteries into garrison batteries, 3572, 3573.

(*Mr. Kellner.*) Expenditure of 6,662,472 *l.* for regimental pay and charges in 1869-70; items of decrease and increase in this year, there having been a reduction of 52,000 *l.*, as compared with the previous year, 3576-3581——Decrease of 135,327 *l.* in 1870-71 as compared with 1869-70; large withdrawal and reduction of force in 1870-71, witness submitting certain reasons why the decrease of charge was not more marked, 3582-3590——(*Mr. Kellner and Colonel Johnson.*) Explanation also as to a decrease of only 24,000 *l.* in 1871-72, notwithstanting that the reduction of force then came into full effect; further particulars to be furnished on this point, 3591-3602. 3647-3649.

(*Mr. Kellner.*) Witness proposes to submit a printed statement showing the financial effect of all the changes since 1862-63; 3603, 3604——Statement showing that, exclusive of officers, the average strength of the European force in 1862-63 was 69,732, and in 1871-72 was 58,437; 3605-3610——Large reduction in the strength of the Native army in 1871-72, as compared with 1862-63; average strength of 116,169 in 1871-72; 3611-3613.

Summary of the causes why reduction of military expenditure has not kept pace with reduction of military strength, 3614, 3615——The non-reduction of charge is largely owing to various measures of military re-organisation, 3616——Further statement also as to economy having been prevented by the general increase of pay of all ranks, including non-commissioned officers and men, both in the European and Native army, 3615-3619.

Statement showing the number and cost of officers of the Indian army in 1856, 1862, 1869, and 1872; large increase of the average cost since 1862; 3620-3622——Total of 304 officers unemployed on 1st January 1872, their cost amounting to 232,977 *l.*; 3623-3625——(*Colonel Johnson.*) Explanation on the foregoing point, 3626, 3627——Limitation formerly as to the proportion of officers who might be absent in Europe, 3628-3630.

(*Mr. Kellner.*) Statement on the subject of the established strength being given for 1862-63 and following years, and as to the means of ascertaining this accurately, 3632-3638——Further reference to the re-organisation of the army as having taken place in 1861, and not in 1862-63; 3642-3644——(*Colonel Johnson.*) Important reduction in 1871-72 in the number of horse artillery batteries in India, 3645, 3646.

(*Mr. Kellner.*) Explanations relative to the increase of pay by the substitution of full batta for half batta, 3650, 3651——(*Colonel Johnson.*) Origin and amount of full batta

Report, 1873—*continued.*

Johnson, Col. Allen Bayard, and G. W. Kellner. (Analysis of their Evidence)—*continued.*

and half batta; circumstances under which the latter was abolished, 3652-3654—— Reasons for the establishment of a troop of cavalry at Aden, 3655, 3656——Explanation as to the separate body-guard of the Governor of Bombay, 3657.

(*Mr. Kellner.*) Witness submits a revised statement of the military charges and receipts in England and in India, connected with the army in India, for the year 1856–57, and for the years from 1861–62 to 1871–72, together with the Estimates for 1872–73 and 1873–74; 3659–3661.

Total of 1,470,391 *l.* as the expenditure of the Commissariat and Transport Department in 1856–57, the charge in 1871–72 having been 1,929,369 *l.*; 3662, 3663—— Enumerations of the heads of charge comprised in the grant for the Commissariat, &c., 3664, 3665—— Explanations in detail relative to the causes of increase or decrease in the grant in each year from 1861–62 to 1871–72; 3665 *et seq.*——Great disturbance of the grant in years when military operations are undertaken, and when prices are enhanced by famine or scarcity, 3666-3688. 3694. 3720 *et seq.*

Statement relative to the large increase (138,000 *l.*) in railway transport charges in 1868–69; explanation that the old means of transport are still maintained to some extent, 3694–3707——(*Colonel Johnson.*) Very large item of increase in respect of inland transport, 3695——(*Mr. Kellner.*) Greater cost of conveyance by railway than of marching to and from the ports, 3708-3713. 3750, 3751. 3757——Means of ascertaining the effect of railway transport upon the Commissariat or Transport Establishment maintained, 3714–3718——Comparison between the charge for food, forage, &c. in 1871-72, and in 1882-63; 3740–3748.

(*Mr. Kellner and Colonel Johnson.*) Statement of the annual reliefs in India in reference to the system of inland transport and railway conveyance; large increase of expenditure on this score, 3749–3758——(*Mr. Kellner.*) Very large increase since 1862–63 in the the total cost of inland transport, 3753-3758—— Heavy charge in respect of the railway transport of stores and war material, 3758.

[Fourth Examination.]—(*Colonel Johnson.*) Sundry details submitted in explanation of the large increase in the cost of inland transport under various heads, 3759 *et seq.*—— Particulars with further reference to the increased charge by reason of the greater frequency of reliefs, and the extensive employment of railways. 3759–3769. 3787-3793—— Enhanced charge in consequence of the reliefs being all carried on through Bombay, in connection with the troop ships between England and that port; reasons for the rejection of Calcutta and Madras for debarkation or embarkation, 3760–3762. 3769. 3794–3809.

Advantage to the public finances on account of the railway receipts for transport, 3762–3766——Conclusion as to the necessity of the railways in order to carry out the required movements of troops, 3767——Increased cost of 168,000 *l.* for transport since 1861–62, owing chiefly to the railway transport to and from Bombay, 3769. 3795-3800. 3824-3826——Enhanced charge for transport on account of the increased use of hill stations, 3769.

(*Colonel Johnson and Mr. Kellner.*) Evidence explanatory of the mode of charge of the transport of malt liquor and spirits, and the large cost thus incurred under the head of inland transport, 3770–3784. 3831–3848——(*Colonel Johnson and Mr. Kellner.*) Average cost of sea transport per head at different periods, 3805, 3806. 3809. 3820, 3821——(*Colonel Johnson.*) Increase of inland transport charge by reason of the increase of wages, and the increased cost of feeding cattle, 3785, 3786——(*Mr. Kellner.*) Information relative to the charges for sea transport in England and India, respectively, in each year since 1863-64; statement hereon as to the large item for Government troop ships since 1868–69; 3810–3823—— Increase of transport charge on account of the assistance which it is found necessary to afford soldiers' families; also on account of the assistance now given to native soldiers when going on sick furlough, 3827-3830. 3849.

(*Colonel Johnson and Mr. Kellner.*) Particulars relative to the partial substitution of malt liquor for spirit, and the amount and cost of consumption under each head in different years, 3827–3830. 3875–3881. 3930–3937. 3947–3961——Considerable profit from the Government sale of spirits in the canteens; how this item of receipt is dealt with, 3827, 3828. 3938–3946——(*Mr. Kellner.*) Sale of malt liquor to the men in the canteens free of transport charge, 3831–3838——Encouragement given by Government to the production of beer in India for the use of the troops; extent and cost of such production, 3839–3848. 3933.

(*Colonel Johnson.*) Considerable increase of cost since 1864-65 for the carriage of stores and materials, 3849–3851——Explanation in connection with the items of charge for the provision of cholera camps, 3851–3857.

(*Mr. Kellner.*) Several counteracting causes, but for which the reduction of Commissariat charges since 1856–57 and 1863–64 would be much larger; reference especially to the increased number of European troops, and the improved rations now given, 3858. 3874——Exceptions to the rule of charging in the year's accounts everything paid for within the year, 3839–3863——Reduction effected in recent years in the stock of Commissariat

Report, 1873—*continued.*

Johnson, Col. Allen Bayard, and G. W. Kellner. (Analysis of their Evidence)—*continued.*

missariat stores owing to the advantage of quicker means of transport; effect of such reduction as regards the annual expenditure, 3864-3873. 3972-3979.

Decided tendency to economy in the Commissariat expenditure, 3882——Information relative to the cost of the Commissariat establishments in different years; decrease of charge for both the executive and subordinate establishments, 3883-3898——Economy effected under the head of provisions for European troops, 3899-3911——Explanations in connection with the increase of charge for the dearness of provisions for natives; want of stricter investigation of the claims for compensation, 3912-3929. 3992-3994——Varying charge for compensation for dearness of forage for the irregular cavalry, 3913.

Considerable diminution of the annual charge for Commissariat live stock, the demand having decreased in the absence of military operations, 3962-3971——Information relative to the number of horses fed in different years by the Commissariat, and the cost; probability of further check being required as regards the allowance or charge for forage, 3980-3994.

Evidence in detail relative to the Grant for the Stud and Remount Establishments, the system under which the studs in Bengal are conducted, the practice as to buying or importing horses, and the cost in different years and in the several Presidencies, 3998 *et seq.*——Calculations as to the excessive cost of horses produced through the studs in Bengal, as compared with the cost of remounts in Bombay and Madras, 4033-4051. 4057-4064——(*Mr. Kellner and Colonel Johnson.*) Investigation now being made by Government into the whole system of the stud establishments, 4035-4037. 4054-4056.

(*Colonel Johnson.*) Regular depôt of remounts maintained in Madras, but not in Bombay, whilst in Bengal there is a totally different system, there being but studs and depôts, 4052-4054—— Origin of the studs, through the difficulty of finding a sufficiency of suitable horses in India, 4066——Considerable supply now being imported from Australia, as well as from the Persian Gulf, 4067-4070——Facility of importing supplies at a much less cost than under the stud system, 4071, 4072——Means of improving the breed of horses in India, otherwise than by Government establishments, 4073-4077.

(*Mr. Kellner.*) Varying amount of the annual charge for the clothing establishments; several causes thereof, the result showing on the whole a satisfactory diminution as compared with 1862-63 or 1863-64; 4078-4081——Important change of system in 1862-63, by making up the clothing in India; increased charge in consequence, 4079-4091—— Improved supply of clothing since 1861, both as regards quantity and quality, 4092. 4098-4100——Issue of cloth and of serge in alternate years, since 1861; effect as regards the amount of the Grant, 4093, 4094. 4106-4108. 4130.

(*Mr. Kellner and Colonel Johnson.*) Explanation as to the money compensation to the soldier in respect of clothing, 4104, 4105.

(*Colonel Johnson.*) Explanation of the former and present regulations as regards the allowances to officers of the Royal Army and of the Indian Army respectively, for passage money between India and England, 4122-4129——Convenience of the troops consulted in providing serge and cloth clothing in alternate years, 4130.

[Fifth Examination.]—(*Mr. Kellner.*) Comparison between the strength and cost of the army in 1871-72 and 1863-64, showing the increase of cost under various heads; paper submitted containing details of such increase in England and in India, 6990-6995 ——Reference to the year 1863-64, as one of severe economy, the military expenditure having been lower than in any year since the mutiny, 6990, 6991——Large increase in the charge per man since 1863-64; 6993——Net increase of 917,000 *l.* between 1863-64 and 1871-72; 6993-6995.

Explanation that decrease of force should not in any case imply a corresponding reduction of cost, 6994——Large increase going on in the number of officers in receipt of colonels' allowances; estimate of 513 such officers in the year 1892, at a cost of 577,000 *l.*, 6995.

Necessity of relying upon such data as are available in the India Office for the preparation of the comparative statements now submitted by Colonel Johnson and witness relative to the annual military expenditure since 1863-64; 6996, 6997——Further reference to the increase between 1863-64 and 1870-71, as resulting mainly from the improved administration and organisation of the British and Indian forces, 6998-7006 ——General summary of the comparative Tables of expenditure under the several Grants, 7007-7015.

Explanations in connection with the large increase of aggregate expenditure under the Grant for Barrack Establishments, Supplies, and Services; satisfactory character of the small increase for executive establishments, 7016-7019——Information relative to the Grant for the Administration of Martial Law, and the staff employed in 1861-62 and 1871-72 respectively; re-organisation of this branch, important reductions of staff having been arranged, 7020.

Report, 1873—*continued.*

Johnson, Col. Allen Bayard, and G. W. Kellner. (Analysis of their Evidence)—*continued.*

Sundry details in connection with the Grant for Medical Establishment, Supplies, and Services, and the causes of increase or decrease in each Presidency under subordinate heads, in each year from 1865-66 to 1872-72; 7021.

Particulars relative to the annual expenditure in each Presidency under the subordinate heads of the Grant for Ordnance Establishments, Stores, and Equipage; increase of the gross expenditure from 356,873 *l.* in 1862-63, to 599,075 *l.* in 1871-72; 7022.

Statement as to the Grant for Army Ecclesiastical Establishments not including the Church of England chaplains; decrease of this Grant between 1862-63 and 1871-72; 7023——Particulars relative to the charges for Military Education, and the causes of the increase of the Grant in 1871-72, as compared with 1862-63; increase from 17,288 *l.* to 34,711 *l.* in this period, 7024.

Investigation of the expenditure under the Grant for Sea Transport charges; very fluctuating charge, both before and since the employment of Government troop transports in 1867-68; 7025-7035——Large excess upon former expenditure, if allowance be made for interest and depreciation of the Government transports, 7025——Important item represented by the longer or shorter duration of the voyage between England and India, 7026-7035——Several changes made in the arrangements for reliefs in India; effect thereof in enhancing the cost of sea transport, 7035——Payment for the troop ships out of Indian revenues, whilst the money is spent under the control of the Admiralty, 7037-7039.

Great fluctuation in the annual Grant for Miscellaneous Services; explanation relative to the chief items comprised in this Grant, 7040——Considerable increase in the Grant for Volunteer Services, the strength of the force having more than doubled since 1865-66; 7041——Several items of expenditure included under the Grant for Rewards for Military Services; considerable decrease of this expenditure since the year 1863-64; 7042.

Very fluctuating character of the annual expenditure under the Grant for Retired Officers; that is, for officers resident in India, 7043——Steady decrease, since 1862-63, in the charges under the Grant for Military Pensions; this decrease is largely owing to the reductions in the native army, 7044——Slight increase in 1871-72, as compared with 1863-64, in the charge for pensions and compassionate allowances to the widows and children of European officers, 7045, 7046——Amount of variation in the annual expenditure for pensions and superannuations to uncovenanted servants in the Military Department, 7047.

(*Colonel Johnson.*) Witness has made careful inquiry into the orgin of the staff corps, and explains the successive steps taken in the matter, the first inquiry on the subject having been set on foot by the Court of Directors in 1857; 7050-7054——Evils experienced in former years from the system of withdrawing officers from their regiments for unlimited periods, when required for detached duties, 7050——Nature of the inquiries and recommendations by the authorities in England and in India during the years 1858-60, pointing to the establishment of the staff corps, 7051, 7052.

Further statement as to the circumstances under which in February 1860 Lieutenant Colonel Norman submitted recommendations to the Secretary of State for the formation of an unattached list; important defference between this proposal and the subsequent scheme for the staff corps, 7052-7054——Subsequent appointment of a Military Committee with reference to the amalgamation of the European and Indian forces, this Committee reporting in August 1860, and submitting rules for the formation of the staff corps, 7053, 7054——Issue eventually of a Royal Warrant in January 1861, establishing a separate staff corps in Bengal, Madras, and Bombay, 7054.

Formation of the staff corps as a means of supplying officers for the native army, and for employment in political and civil capacities; witness cannot now produce any actual code of staff corps rules, 7055-7059——Explanation that officers of the old Indian army who have not joined the staff corps are eligable for staff employment, 7059——Particulars as to the conditions of admission to, and of promotion in, the staff corps; distinct rule now in force whereby an officer is only admitted when there is a vacancy, 7059-7073.

Absence of any fixed establishment for the staff corps, 7074-7081——Principle on which the system of promotion by length of service rather than by succession was established, 7081——Operation of the rule whereby no officer can enter the staff corps of more than seven years' service; extent to which officers already in the corps are superseded by senior officers who enter, 7082-7087——Very few exchanges of late between officers of the staff corps and officers in British regiments, 7088, 7089.

Restriction as to the number or class of staff appointments which officers taken from the European regiments can hold, 7090-7093——Modifications subject to which the furlough rules of 1854 were adopted as the rules of the staff corps, 7094——Explanation of the regulations as to the pay of the corps, distinguishing between the different ranks and the periods of service, *ib.*——Provisions in the first instance as to one officer in every thirty succeeding to Colonels' allowances or off-reckonings, *ib.*——Condition of admission originally

Report, 1873—*continued.*

Johnson, Col. Allen Bayard, and G. W. Kellner. (Analysis of their Evidence)—*continued.*

originally as to each officer having served already in a staff appointment within a certain period, and having qualified in the languages, 7094.

Statement of the relative number of officers of the staff corps, and not of the staff corps in January 1862; large increase, subsequently, of the proportion of the former to the latter, 7095——Amended conditions introduced relative to admission to the corps; necessity of each officer passing a sufficiently stringent examination, and possessing special qualifications, whilst in no case is there an indefeasible right of admission, 7095-7107.

Considerable changes in 1862 as to the constitution of the staff corps, 7108——Regulation issued in 1862 regarding the succeseion to off-reckonings, *ib.*——Appointment of a commission of inquiry in 1864 which resulted in the Secretary of State placing all officers serving in India on precisly the same footing, irrespectively of their being, or not being, in the staff corps, 7109-7111——Further inquiry by a military commission, which resulted in an order by Lord Cranborne (as Secretary of State) in 1866 to the effect that the staff corps should be open to the whole of the Indian army, without probation or restriction of any kind, 7112-7114.

Removal by Lord Cranborne's order of all limit as to the number of colonels' allowances, 7113——Very few officers who did not join the staff corps after the regulations issued by Lord Cranborne, 7114——New rule in 1868 as to officers not being admitted whose service exceeded seven years, *ib.*——(*Mr. Kellner.*) Great increase in the number of officers in the staff corps in 1867 and 1868 as compared with 1866, before the issue of Lord Cranborne's order, 7115-7117.

(*Colonel Johnson.*) Original formation of the staff corps without any idea of such a swamping as it received in 1866; 7118——Liability of officers to be removed if unemployed for a certain time and if unfit for their duties, 7119——Regulation of the promotion and pension by length of service, and not by the rank in which the service has been performed, 7120-7129——Object of the two additional pension rates of 650 *l.* and 750 *l.* a year to induce the retirement at an earlier date of those officers who would attain their colonels' allowances by succession and not by length of service, 7130.

[Sixth Examination.]—(*Colonel Johnson.*) Witness has received from India, and delivers to the Committee, the military rules and regulations by which the staff corps is now administrated, 7131.

Further evidence relative to the effect of Lord Cranborne's Despatch of 1866, more especially as regards the removal of the previous limitation upon the number of colonels' allowances; immense boon thereby, 7132-7144——Great inducement to men to cling to the service by reason of the prospect, or certainly, of succeeding to colonels' allowances; prospect of exceedingly large expense in course of years, though it is difficult to estimate this with any certainty, 7142-7144. 7151, 7152——Considerable number of officers of staff corps who are not employed at all, or are doing general duty, 7145-7149.

Very few officers compulsorily retired by reason of their having been pronounced unfit for employment, 7149, 7150——Recent rule by which an officer cannot lose his appointment in the staff corps save by special removal, 7153——Explanation in regard to many officers acting for others in the native regiments; necessity of a year's service in a native regiment before entering into a civil department, 7154-7157——Less desire evinced by officers to get away from the native regiments under the staff corps system than under the previous system, 7157-7160.

Belief that officers on the general list who entered the service between 1858 and 1861 succeed to colonels' allowances after thirty-eight years' service, in the same way as those admitted to the staff corps in 1866; impression that these officers have only succeeeed to vacancies on cadres, 7161-7179——Power of Government to lay down new rules affecting the prospects of the general list officers who have entered the staff corps; that is, as regards their succeeding to colonels' allowances, 7169, 7170. 7176-7179.

Further reference to the calculations (by General Hannyngton) relative to the future cost of the staff corps, and the charge for colonels' allowances; much larger estimate made by Sir Henry Durand, 7180-7183. 7234-7243.——(*Mr. Kellner.*) Number of local officers who will be eligible, if they survive, for colonels' allowances in each year from 1874 to 1884; 7183——Calculations of General Hannyngton adverted to as being far more moderate than those of General Broome; that is, as regards the future charge for colonels' allowances, 7184-7186.

(*Colonel Johnson.*) Examination upon the general question, whether the reduction of the native army did not largely obviate the necessity of a staff corps, and whether a modified system might not have been adopted far less productive of inconvenience and expense, 7187 *et seq.*——Admission that much inconvenience now arises from staff corps officers, general list officers, and native infantry officers, all serving in the same regiment, 7205-7220.

Statement as to Lord Lawrence having, when in India, suggested the formation of a staff corps somewhat similar to that now in operation, 7230-7233——Expectation that

Report, 1873—*continued.*

Johnson, Col. Allen Bayard, and G. W. Kellner. (Analysis of their Evidence)—*continued.*

in course of years the cost of officers serving with regiments will be less than the cost under the regular system, irrespectively of the staff corps; greater cost at present in the former case, 7234-7243——Several instances of officers having obtained the colonels' allowances under thirty-eight years' service, 7244-7248.

(*Mr. Kellner.*) Explanation of the data for witness' calculation that the established strength of the European force in 1862-63 was 69,732; several modifications to which this estimate may be subject, 7249-7268——Data for the calculation that the estimated native strength in 1862-63 was 134,246; 7269-7271——Statement as to the calculations of comparative cost in 1862-63 and 1871-72 having been made with reference to the effective strength; witness will endeavour to show the relation between the effective strength and the established strength at the two periods, 7272-7278.

Further explanations relative to the cost of the Medical Department in 1862-63 and at subsequent periods, and the causes of the enhanced amount of the Medical Grant in the former year, 7279-7283——Very large increase of the charge for Ordnance establishments and for stores; increase more especially in Bombay, for which no satisfactory explanation appears to have been given, 7284-7293——Relative cost of the Commissariat executive establishments in Bengal, Madras, and Bombay respectively, in 1863-64 and 1871-72; important increase in the latter Presidency, 7294——Addition to be made to the Commissariat charges in India, in respect of malt liquor and of rum sent from England, 7295-7299.

Reduced cost of rations per man in 1870 as compared with 1863; improvement in their quality, 7300-7304——Explanation relative to the increased compensation paid to native troops for the dearness of provisions, witness believing that there has been some laxity in this respect; recent issue of instructions on the subject, 7305-7317——Steps taken by Government with a view to greater promptitude and exactness in the matter of Commissariat expenditure and accounts, 7315-7324.

(*Mr. Kellner and Colonel Johnson.*) Further information relative to the charges for the Medical Department in 1862-63, 1863-64, and 1871-72; and the causes of increase under several sub-heads, 7325-7342——Considerable increase, more especially, in respect of the British Medical Staff, 7325-7329——(*Colonel Johnson.*) Strong opposition made by the India Office to the large increase of the British Medical Establishment; prospect of reduction, 7330-7332.

(*Mr. Kellner.*) Particulars relative to the charges in the barrack department in 1863-64, 1871-72, and 1872-73, and the increase on account of subordinate establishments, and of punkah pulling, &c.; transfer of certain items of charge in 1872-73; 7343-7357——Explanation as to the enhanced military expenditure in respect of the Hyderabad Contingent and certain other forces which are paid for by contributions from Native States, 7358-7371.

Estimate of at least 200,000 *l.* as the increased charge represented by the additional two pence a day to the British soldier, with the penny on re-engagement, 7372-7374. 7382, 7383——Amount represented by the bounty and kit money; doubt as to the cause of the large increase of charge on this score in 1867-68; 7374-7378——Question considered as to the amount of saving by improved organisation as compared with the increase of charge for the extra two pence a day and for the bounty and kit money, 7384-7395.

Statement to the effect that officers of the staff corps employed in the Public Works or other civil duties receive the pay of the appointment independently of their rank; essential distinction between the payments for civil and military duties, 7399-7410——Necessity of service for three years with a native regiment before officers can rise by promotion to the upper ranks in the staff corps, 7411-7414.

(*Colonel Johnson.*) Consideration of objections to the system whereby officers who have been for many years in civil employment may be deputed to do military duty, 7415-7420——Admission that it is anomalous that men employed in civil life should continue to rise in rank, and should receive the same pay and obtain the same rank as those doing active military work, 7420-7422——Provision by the regulations for the removal to the half-pay or pension list of officers who have been unemployed for three years, 7423-7426——(*Mr. Kellner.*) Statement relative to the proportion of officers unemployed in India and England, these forming a reserve force for any demand or emergency that may arise, 7427-7437.

(*Colonel Johnson.*) Decreasing number of the proportion of unemployed officers, 7437, 7438——Succession of general officers in time to the colonels' allowances, the amount being about 1,124 *l.* a year, 7439-7444——Receipt of the allowance of 1,124 *l.* a year after thirty-eight years' service, although at the time there is no service rendered in return, 7445-7451——Impression that is not considered essential by the War Office always to consult the India Office before the introduction of army charges affecting the expenditure in India, 7453-7459.

(*Mr.*

Report, 1873—*continued.*

Johnson, Col. Allen Bayard, and G. W. Kellner. (Analysis of their Evidence)—*continued.*

(*Mr. Kellner.*) Further information relative to the military expenditure on account of postage, and the great variation of this charge since it first appeared in the military accounts, 7460-7473——Preparation by witness of a comparative table for 1871-72, showing the relative cost of the British and Native soldier in India; proposed addition thereto of the military charges in the Public Works Department, 7474-7483——Apparent decrease in the military expenditure by the pay of engineer officers now appearing under the Public Works Grant, 7484-7491.

Very large sum (probably a million) represented by the charge for the entire medical establishment, including the regimental staff; increased pay of all ranks of the service, 7492-7496——Important increase in the cost of native infantry regiments by reason of the higher rank of the officers now employed from the staff corps, 7497, 7498——Allowance to be made for the half-pay of officers in England in calculating the total cost of the European officers, 7499-7501——Explanation that the furlough allowances in Europe of military officers in civil employment are all charged to the Military Department; increased home expenditure under this head, 7501, 7502.

Constant effort made by the Government of India for some years past to reduce the military expenditure; non-adoption however of various reductions proposed, 7503-7510——Various elements of enhanced cost, such as improvement in arms, in the condition of the soldier, &c., 7503——Witness considers that under ordinary conditions the expenditure is susceptible of reduction, *ib.*——Schemes proposed by the Government of India in 1869 and 1870, for reducing the native infantry and cavalry; reference hereon to a despatch from the Secretary of State in January 1869, in which a large annual saving is contemplated, 7503-7510.

(*Colonel Johnson.*) Initiative taken in India towards reduced expenditure, on account of the deficit in the finances, 7510——Considerable reductions proposed in the native army in 1869-70; these, however, were not reduced, 7511, 7512——Large economy likely to be soon effected in the Medical Department, 7513——Doubt as to there being room for further saving by further re-organisation of the European army, without reducing the strength, 7514-7519——Question whether any reduction can be made in the strength of the cavalry, 7520.

Doubt as to there being room for reduction in the artillery; there might, however, be fewer brigades with more batteries to each brigade, 7521-7532——(*Mr. Kellner.*) Large reduction to be effected by the foregoing plan, the cost of the artillery being considerable, 7533, 7534——Conclusion that the effective strength as computed by witness does not include the boys of Madras and Bombay, 7535-7543——Witness undertakes to furnish correct and verified returns in addition to those already submitted to the Committee, 7544-7548. 7553-7563——(*Colonel Johnson.*) Inability of witness to supply any figures or returns beyond those produced by Mr. Kellner, 7549-7552.

(*Mr. Kellner.*) Character of the additional information proposed to be furnished by witness on his return to India from the data which will then be at his disposal, 7564-7566. 7570——Particulars with further reference to the cost of the head-quarter staff of Bengal, Madras, and Bombay respectively, in 1862-63 and 1872-73; 7565-7567——Comparative statement of the cost of the Military Account Department in all three Presidencies, in 1862-63 and 1872-73; 7569.

Reference to certain printed statements as showing the average cost of each of the articles forming the soldier's ration in each year from 1857 to 1870; 7571, 7572——Further information relative to the quantity and cost of malt liquor supplied from England in each year from 1866-67 to 1871-72; 7573——Amount of expenditure in England in the years 1867-73 for rum sent out to the Bombay Presidency, 7574——Charges of the Commissariat and of the Cattle Department further adverted to; details required from India, 7575. 7577-7580——Annual amount of compensation for dearness of provisions and of forage in each Presidency in each year from 1862-63 to 1871-72; stricter check now being applied to this expenditure, 7576.

Explanations with further reference to the returns prepared by witness relative to the strength of the different branches of the Service; embarrassing discrepancies between the returns of the Adjutant General and of the Quartermaster General, 7581-7584——Suggestion that the responsibility for the monthly returns of strength be fixed upon some officer at army head quarters, and that the returns should be checked by the Military Account and Medical Departments, 7585, 7586——Important difference between the established strength and the effective strength of the European troops, owing to various causes, 7587.

Considerable economy by concentrating the British troops in fewer regiments of infantry and cavalry and fewer brigades of artillery, 7588-7590——Large saving which would appear to be feasible in the charge for recruits from England; much less cost when obtained formerly from the depôt at Warley, 7591, 7592.

Better position of the British soldier in India than elsewhere as regards rations and stoppages; list of articles comprised in the daily ration, and average cost per month, 7593, 7594——Discontinuance of a former check relative to the cost of the troops in

Report, 1873—*continued.*

Johnson, Col. Allen Bayard, and G. W. Kellner. (Analysis of their Evidence)—*continued* different districts, as affected by the cost of food, 7596, 7597——Belief that the ration costs less in Bengal than formerly, and more in Madras and Bombay, 7598——Further returns promsed to be furnished relative to malt liquor and spirits; gain by the retail of the latter in the canteens, and loss by the sale of the former, 7599–7604.

Johnson, Colonel, and Mr. Kellner. Sundry Papers and Returns laid before the Committee by Colonel Johnson and Mr. Kellner relative to army expenditure, &c., in different years, *App.* 885 *et seq.*

Jubbulpore Barracks. See *Barracks*, 9.

Judge Advocates. Information relative to the Grant for the Administration of Martial Law, and the staff employed in 1861-62 and 1871-72 respectfvely; re-organisation of this branch, important reductions of staff having been arranged, *Kellner* 7020.

Judicial Functions. Outline of a scheme for the entire separation of executive and judicial functions in the Bombay Presidency; large annual saving thereby, *Nowrozjee Furdoonjee* 5853–5857. 6983; and *App.* 926.

Judicial Service. See *Law and Justice. Natives* (*Public Employment*), 1, 2. 6.

Jumna Conals. Statement showing the length, cost, and financial operation of the Eastern Jumna Canal and the Western Jumna Canal in 1870–71, *App.* 660.

Jute. Entire monopoly of jute possessed by India, so that an export duty of three or five per cent. might well be imposed, *Sir C. E. Trevelyan* 926. 929.

LAND REVENUE:

I. *Bengal:*
1. Views of Sir Charles Trevelyan and Lord Lawrence as to the great Value of the Permanent Settlement.
2. Mode in which the Settlement was carried out; Mistakes made.
3. Returns relative to the Rate of Assessment, and the Amount of Revenue in different Years.

II. *Bombay:*
1. Complaints relative to the Basis of the Assessment and the action of the Collectors.
2. Suggested Payment in four Instalments.
3. Amendment required as regards the Rate of Interest on Arrears.
4. Great Increase in the Cost of Collection; Economy feasible in this respect.
5. Amendment required as regards Survey Operations.
6. Sundry other Sugestions on various Points.
7. Amount of Revenue in 1856-57 and 1870-71.

III. *North Western Provinces.*
IV. *Amount of Revenue in Madras.*
V. *Disadvantages of a Thirty Years' Settlement as compared with a Permanent Settlement.*
VI. *Area now under Permanent Settlement.*
VII. *Means of Revision of Permanent Settlements.*
VIII. *Question of Redemption of Land Revenue.*
IX. *Approval of the Exemption of some Land for Grazing Purposes.*
X. *Comparative Popularity of the Land Tax.*
XI. *Suggestion that the Land Revenue be under the Local Governments.*
XII. *Advantage of Permanent Settlement in conjunction with the Scheme of Local Taxation and Finance.*
XIII. *Views of the Council of India and the Secretary of State upon the Question of Permanent Settlement.*

1. *Bengal:*

Report, 1873—*continued.*

LAND REVENUE—continued.

I. *Bengal:*

1. Views of Sir Charles Trevelyan and Lord Lawrence as to the great Value of the Permanent Settlement:

Immense development of wealth in Bengal under the permanent settlement, the surplus revenue being greatly in excess of the revenue from any other province, *Sir C. E. Trevelyan* 1209–1216——Conclusion as to the immense extension of cultivation in Bengal under the permanent settlement, *ib.* 1271, 1272.

Examination in support of the conclusion that, including the revenue from salt and customs, the increase of indirect revenue from Bengal through the permanent settlement of the land revenue more than compensates for the apparent loss consequent upon such settlement; comparison with the North Western Provinces as regards income tax, stamps, excise, &c., *Sir C. E. Trevelyan* 1329–1344——Increased receipts from existing taxes, other than the land revenue, in the event of a continued rise of prices under the permanent settlement, *ib.* 1358. 1453–1455.

Examination upon the question whether, by the permanent settlement in Bengal, Government has not sacrificed an immense annual revenue; further argument to a contrary purport, *Sir C. E. Trevelyan* 1607–1613.

Great value of the settlement in Bengal in conferring security of tenure and giving a great impetus to improved cultivation, *Lord Lawrence* 4423. 4427. 4442–4444——Creation also of a wealthy class having a strong interest in the maintenance of British rule, *ib.* 4423——Special advantages of the permanent settlement conditionally authorised by the Secretary of State in 1862, *ib.*

Great famine in Bengal, and great misrule, previously to the British settlement, so that there was much room for increased production, *Lord Lawrence* 4445–4449——Much less tendency to the development of wealth if the settlement had been for a period of years, *ib.* 4449, 4450——Improved position of the land near the railways as compared with land at a distance; this should not prevent permanent settlement, *ib.* 4482–4485.

2. Mode in which the Settlement was carried out; Mistakes made:

Great mistake in not making the settlement in Bengal with the real proprietors of the land; also in applying the settlement to uncultivated land, *Sir C. E. Trevelyan* 1251. 1255. 1278, 1279——Statement in further disapproval of making permanent settlements with middle-men, or zemindars, so called, *ib.* 1278–1280.

Very imperfect data upon which the permanent settlement in Bengal and Behar was made, *Lord Lawrence* 4423——Numerous instances of the settlement having been made with the wrong parties, *ib.*——Circumstance of the permanent settlement in Bengal having been made with the zemindars who were not cultivators, and were frequently only the collectors of the revenue, *ib.* 4424–4426.

Frequent instances of the zemindars having made settlements with those under them, thus giving an impetus to improvel cultivation; illustration in the case of the Rajah of Burdwan, *Lord Lawrence* 4428–4431——Continued struggle between the zemindars and the occupiers in Bengal since the time of the permanent settlement, *ib.* 4434, 4435——Limited extent to which steps have been taken by Government to ascertain or define the rights of those holding under the zemindars, *ib.* 4436, 4437.

Better position of the cultivators of the soil under the zemindars than if they had been under the revenue collectors, *Lord Lawrence* 4451——Limited powers of the zemindars in Bengal as to the extortion of exorbitant rents, save in the case of tenants at will; defect of the settlement in Bengal and Behar in not providing against extortion, *ib.* 5548–5551. 5665–5667.

3. Returns relative to the Rate of Assessment, and the Amount of Revenue in different Years:

Official information relative to the land revenue settlement in various provinces of Bengal, and the amount derived therefrom, *App.* 683, 684. 696, 697.

Statement of land revenue in the several provinces of Bengal in 1857–58, 1870–71, and 1871–72, *App.* 690.

Statement showing, approximately, the rate of land revenue per acre of cultivation in certain districts of the provinces of Behar and Bengal, *App.* 691.

II. *Bombay:*

1. Complaints relative to the Basis of the Assessment, and the action of the Collectors:

Arbitrary manner in which the land revenue in Bombay is dealt with, without being ever brought under the notice of the Legislature, *Maclean* 2454, 2455.

Report, 1873—*continued.*

LAND REVENUE—continued.

II. *Bombay*—continued.

1. Complaints relative to the Basis of the Assessment, &c.—*continued.*

Fear of the people to prefer complaints against the collectors, as being so much in their power, any complaints being referred to the collectors themselves for explanation, *Nowrozjee Furdoonjee* 4957–4974——Approval of the ryotwaree settlement in Bombay, save that it should not be subject to frequent changes and revisions, *ib.* 6055-6057.

Satisfaction expressed generally with the late land revenue settlement in Bombay, *Dadabhai Naoroji* 6506——Grounds for the conclusion that the revised settlement now going on will be very oppressive upon the cultivators, *ib.* 6506 *et seq.*

Fallacy in basing the assessment upon an average of prices in the preceding ten years; conclusion, moreover, that prices have been enhanced from exceptional and temporary causes, and that the rise has not been general and will not continue, *Dadabhai Naoroji* 6509–6532——Examination upon the general proposition that the land revenue is really paid by the landowner, and does not fall directly or indirectly upon the mere cultivator or ryot; dissent from this view, witness holding that the mass of the people are affected, *ib.* 6535-6560.

Great mischief apprehended from the revised settlement going on in the Bombay Presidency, *Dadabhai Naoroji* 6696-6698——Entire absence of legal address in the cultivators against exactions on the part of the Government collectors; documentary evidence submitted in support of this statement, *ib.* 6698-6700.

Fallacy, generally, in basing assessments upon an average of prices in different districts without taking into consideration the very large quantities of produce in some districts, and the very small quantities in others, *Dadabhai Naoroji* 6722–6726——Expediency also of any local and temporary rise of prices being duly considered, *ib.* 6725.

Denial of the accuracy of statements by Mr. Massey and others, that the new settlement in Bombay is very low; sundry instances of immense increase by previous assessments, *Nowrozjee Furdoonjee* 6943. 6946–6972——Ruin of many by their lands being sold by auction for arrears of assessment, *ib.* 6943——Fallacy in basing the assessment upon an average of prices in past years, *ib.* 6946.

Excessive assessment in numerous talookas, so that the ryots have been unable to pay the revenue, numerous distress warrants, and sales of land in consequence, *Nowrozjee Furdoonjee* 6946–6959. 6971, 6972——Erroneous calculations by the settlement officers as to the produce of the fields, *ib.* 6971, 6972.

Witness submits a Paper in conformation of his evidence as to the enhancement of the assessment in the Bombay Presidency, *Nowrozjee Furdoonjee* 6988; *App.* 921, 922.

Statement by Mr. Nowrozjee Furdoonjee relative to the faults of the revenue survey in different districts of Bombay, *App.* 924, 925.

2. Suggested Payment in four Instalments:

Very inconvenient practice in Bombay as to the payment of the land assessments in two instalments; relief if there were four instalments as formerly, *Nowrozjee Furdoonjee* 6045, 6046. 6983.

3. Amendment required as regards the Rate of Interest on Arrears:

Complaint relative to the levy of interest at the rate of 9¼ per cent. upon arrears of Government revenue; 54,000 persons were thus charged in 1867-68, the interest amounting to 43,481 rupees, *Nowrozjee Furdoonjee* 6046-6054.

Great pressure upon the cultivator to pay the assessment punctually; excessive interest to which liable for arrears, *Dadabhai Naoroji* 6698. 6701–6703——Large number of cases in 1867-68 in which excessive interest was imposed by Government in respect of arrears, *ib.* 6701–6703.

Very large reduction proposed in the rate of interest charged by Government on overdue instalments of land revenue, *Nowrozjee Furdoonjee* 6983.

4. Great Increase in the Cost of Collection; Economy feasible in this respect:

Increase of more than 100 per cent. in the expenditure for the realisation of the land revenue in Bombay between 1864-65 and 1869-70, *Nowrozjee Furdoonjee* 6983——Scheme suggested whereby a very large saving may be effected in the cost of collection, *ib.*

5. Amendment required as regards Survey Operations:

Excessive charge in respect of revenue survey, land settlement, and alienation; suggestions for a large reduction of this expense, *Nowrozjee Furdoonjee* 6983——Expediency of bringing to an end the revenue survey and settlement operations which are constantly going on in the Presidency, *ib.*

6. Sundry

Report, 1873—*continued.*

LAND REVENUE—continued.

II. *Bombay*—continued.

6. Sundry other Suggestions on various Points:

Objection to the fee charged for notice when arrears of revenue are being called in, *Nowrozjee Furdoonjee* 6058——Complaint as to the great difficulty of cultivators in the Deccan in obtaining remission of assessment when their crops fail from want of rain; more liberal treatment formerly, *ib.* 6940-6943——Expediency of the exemption of land and agricultural cattle and implements from sale, *ib.* 6974. 6983——Several causes for which remissions should be made, *ib.* 6983——Proposed reduction of the enhanced rates of assessment imposed on the recent re-settlement of culturable lands, *ib.*——Sundry ether suggestions for the relief of the ryots in Bombay in various ways, *ib.*

7. Amount of Revenue in 1856-57 and 1870-71:

Abstract of statements of land revenue in Bombay for 1856-57 and 1870-71; aggregate of 2,873,000 *l.* in the former year and 3,595,000 *l.* in the latter, *App.* 844.

III. *North Western Provinces:*

Comparative satisfaction given by the thirty years' settlement in the North Western Provinces, *Sir C. E. Trevelyan* 1278–1280——Admission that a thirty years' lease, as in the North Western Provinces, is effectual in bringing waste land into cultivation; denial, however, that it is equally effectual with permanent settlement, as in Bengal, in causing the application of capital and improvement to the land, *ib.* 1344-1349. 1613.

Immense boon conferred by the thirty years' settlement in the North Western Provinces in the year 1833-34, *Lord Lawrence* 4423——Great increase of cultivation and of revenue as a consequence of this settlement, *ib.*——Very complete system of registration of holdings in the North West Provinces whilst all rights, from the highest to the lowest, are carefully recorded, *ib.* 4438–4441.

Information relative to the inquiries and arrangements in connection with the settlement made in the North Western Provinces with the talookdars, or if not with them, with the old village proprietors, *Lord Lawrence* 4452–4454——Entire dissent from the view that under the late settlement in Upper India the Government assessment has been fixed too low, *ib.* 5677–5680.

Official statement on the subject of the land revenue of the North West Provinces, *App.* 713, 714.

Statement showing the several districts and collections of land revenue in the North Western Provinces for 1858–59, *App.* 717, 718——Detailed statement showing the land revenue collections for the year 1870-71, *ib.* 719——Estimates of land revenue, including surplus and miscellaneous revenue, for 1871–72, *ib.* 720.

Statement in detail of land revenue, and its incidence, for 1851–52 in the several divisions and districts of the North West Provinces, *App.* 721——Similar statement of land revenue and its incidence for 1870-71, *ib.* 722, 723.

Abstracts of final assessments in each division under the several schedules, for the year 1860–61, *App.* 727–729.

IV. *Amount of Revenue in Madras:*

Statement of land revenue receipts in Madras Presidency in 1856–57 and in 1870–71; increase from 3,543,000 *l.* in the former year to 4,393,000 *l.* in the latter, *App.* 851.

V. *Disadvantages of a Thirty Years' Settlement as compared with a Permanent Settlement:*

Grave objections to which a thirty years' settlement is open; evil of the absence of security as compared with the sense of security under Government settlement, *Sir C. E. Trevelyan* 1251——Argument in detail in strong support of the system of permanent settlement of the land revenue as a means towards the increased prosperity of the people, *ib.* 1251–1258——Political value of the permanent settlement as a sure means of attaching the people of India to the British Government, *ib.* 1253.

Further statement as to the much less confidence and contentment under a thirty years' settlement than under a permanent settlement, *Sir C. E. Trevelyan* 1273–1277——Evidence further submitted as to the disadvantages of a thirty years' lease in comparison with a permanent settlement; satisfactory operation however of the thirty years' settlement in Upper India, *ib.* 1278–1280. 1344–1349. 1613.

Examination upon the question whether customary tenants are not liable under the permanent settlement to have their rents raised by the proprietors, by reason of the increased value of the soil; deprecation of the exercise of any such power, *Sir C. E. Trevelyan* 1350–1357——Reference to the rise of prices as the only argument against a permanent settlement, whilst this argument is outweighed by the great security and contentment given by such settlement, *ib.* 1358. 1453–1455——Effect of the permanent settlement further adverted to in connection with the question of the right of

Report, 1873—*continued.*

LAND REVENUE—continued.

V. *Disadvantages of a Thirty Years' Settlement, as compared with, &c.*—continued.

the proprietors to raise the tenants' rents, *Sir C. E. Trevelyan* 1447–1449——Expediency of confining permanent settlement to fully cultivated districts, *ib.* 1455.

Several disadvantages of a thirty years' settlement as compared with a permanent settlement; preference of witness for the latter on several grounds, *Lord Lawrence* 4423——Great importance of a permanent settlement of the land revenue in India generally (exclusive of Bengal); the proprietor being for the most part the cultivator, and having the strongest interest in the security of British rule, *ib.* 4423. 5302.

Expediency of a permanent settlement with the income tax, if necessary, rather than of a limited settlement without such tax, *Lord Lawrence* 4489. 4494——Slight extent to which proprietors under a permanent settlement are influenced thereby as regards their demands from tenants at will, *ib.* 5548–5551. 5665–5667.

Approval of a permanent settlement based upon a money assessment, although possibly there may be in course of time a great depreciation in the value of the precious metals; counterbalance of this drawback by the great increase of cultivation under such settlement, *Lord Lawrence* 5552–5557. 5568.

VI. *Area now under Permanent Settlement:*

Mention of the several districts in India in which there has been a permanent settlement of the land revenue; the settlement is at present limited to Bengal Proper, Behar, Benares, Jeonpoor, and certain tracts in Madras, *Lord Lawrence* 4423.

VII. *Means of Revision of Permanent Settlements:*

Suggestion that in cycles of years the money assessment under a permanent settlement might be re-considered with reference to the produce; much less disturbance thereby than under a thirty years' settlement, *Lord Lawrence* 5553–5556.

VIII. *Question of Redemption of Land Revenue:*

Disapproval of a permanent redemption of the land revenue, *Sir C. E. Trevelyan* 1450–1452——Propriety of any redemption of the land revenue being applied in the reduction of debt, *ib.* 1523.

Unduly low price at which the fee-simple has in many cases been sold; amendment desirable in this respect, *Lord Lawrence* 4620–4624.

IX. *Approval of the Exemption of some Land for Grazing Purposes:*

Statement in explanation and approval of the instructions in Sir Charles Wood's Despatch of 1862 in regard to one-fifth of the land in villages being dealt with as uncultivated, or as grazing land, and being exempt from Government rent under the permanent settlement, *Lord Lawrence* 4464–4473.

X. *Comparative Popularity of the Land Tax:*

Cheerful payment of the land tax by the people as compared with the payment of direct taxation, *Sir C. E. Trevelyan* 1357–1361.

XI. *Suggestion that the Land Revenue be under the Local Governments:*

Conclusion that the land revenue should be entirely under the local Governments, *Sir C. E. Trevelyan* 1186.

XII. *Advantage of Permanent Settlement in conjunction with the Scheme of Local Taxation and Finance:*

Great importance of an extension of permanent settlements in conjunction with the plan of local finance and provincial administration; much better position of the people thereby as regards municipal taxation for local purposes, *Sir C. E. Trevelyan* 1253–1258.

XIII. *Views of the Council of India and the Secretary of State upon the Question of Permanent Settlement:*

Large portion of the Council of India favourable in 1862 to the extension of the permanent settlement; doubt as to the present views of the majority of the Council on the subject, *Lord Lawrence* 5541–5544——Belief that a majority of the Council in 1862 approved of Sir Charles Wood's instructions relative to a permanent settlement, *ib.* 5541, 5542——Great improbability of the Secretary of State in Council totally disregarding the opinion of the Government of India upon the question of the permanent settlement, *ib.* 5545–5547.

See also *Alienation of Land. Inam Commission (Bombay). Indapore. Interest (Loans to Cultivators). Irrigation. Local Taxation and Finance*, 7. *North-Western Provinces. Oude*, 2. *Punjaub. Soopa (Bombay). Unkleser (Bombay). Village Commons. Waste Lands.*

Report, 1873—*continued.*

Law and Justice (*Bombay Presidency*). Evidence in strong condemnation of the withdrawal from the courts of justice in Bombay of the jurisdiction which they possessed for many years in cases relating to alienated or rent-free lands of various kinds, and in cases of pensions, &c., *Nowrozjee Furdoonjee* 4870–4878.

Increase of forty per cent. in the cost of administration of justice in the Bombay Predency between 1865-66 and 1870–71, *Nowrozjee Furdoonjee* 5845——Reduction in the number of courts since 1869, the provision of justice being inadequate, notwithstanding the excessive increase of charge, *ib.* 5845–5853——Great arrear of cases for trial at Surat, Broach, and other places, owing to the inadequacy of the establishments, *ib.* 5845–5853.

Considerable surplus derived from the stamps and fees in the courts of the lower grade, or small cause courts throughout the Presidency; suggested reduction of these, *Nowrozjee Furdoonjee* 5846. 5850, 5851——Deficiency on the other hand in respect of the Bombay High Court and the district courts, the salaries being very high, and the amount of work small, *ib.* 5846–5850. 5862——Exceedingly small proportion of the criminal cases in the Bombay Presidency in 1871 which were tried and committed by the district magistrates, *ib.* 5857–5862.

Statement as to claims not lying against Government in the civil courts as regards exemption from land revenue, *Dadabhai Naoroji* 6740–6743—— Comment upon the almost invariable discharge of European criminals by juries; bitter feeling created thereby, *ib.* 6744.

Statistics and explanations thereon, purporting to show that the stamp tax, court fees, and other costs of justice, not only press excessively on the upper classes, but fall with crushing severity on the mass of the people, *Nowrozjee Furdoonjee* 6983——Great increase of charge under the head of law and justice in the Bombay Presidency, *ib.*

See also *Bombay*, VIII. *High Courts. Natives* (*Public Employment*). *Stamps.*

Lawrence, The Right Hon. John Laird Mair, Lord. (Analysis of his Evidence.)—Varied services of witness in India, over a period of thirty-two years; he was for five years in the Council of India, and was Governor General from 1863 to 1869; 4420, 4421.

Mention of the several districts of India in which, as in Bengal, there has been a permanent settlement of the land revenue, 4423——Very imperfect data upon which the permanent settlement in Bengal and Behar was made, *ib.*——Numerous instances of the settlement having been made with the wrong parties, *ib.*——Great value of the settlement in conferring security of tenure and giving an impetus to improved cultivation, 4423. 4427. 4442–4444——Creation also of a wealthy class having a strong interest in the maintenance of British rule, 4423——Special advantages of the permanent settlement conditionally authorised by the Secretary of State in 1862, *ib.*

Immense boon conferred by the thirty years' settlement in the North Western Provinces in the years 1833-34; 4423——Great increase of cultivation and of revenue as a consequence of this settlement, *ib.*—— Several disadvantages, however, of a thirty years' settlement as compared with a permanent settlement; preference of witness for the latter on several grounds, *ib.*——Circumstance of the permanent settlement in Bengal having been made with the zemindars who were not cultivators, and were frequently only the collectors of the revenue, 4424–4426.

Frequent instances of the zemindars having made settlements with those under them, thus giving an impetus to improved cultivation; illustration in the case of the Rajah of Burdwan, 4428–4431——Large alienations by zemindars in favour of bankers and other creditors, 4432, 4433——Continued struggle between the zemindars and the occupiers in Bengal since the time of the permanent settlement, 4434, 4435——Limited extent to which steps have been taken by Government to ascertain or define the rights of those holding under the zemindars, 4436, 4437——Very complete system of registration of holdings in the North West Provinces, whilst all rights, from the highest to the lowest, are carefully recorded, 4438–4441.

Conclusion that the greatly increased production in Bengal is due mainly to the permanent settlement, and only exceptionally to the enterprise of English capitalists, 4442–4444——Great famine in Bengal, and great mis-rule, previously to the British settlement, so that there was much room for increased production, 4445-4449——Much less tendency to the development of wealth, if the settlement had been for a period of years, 4449, 4450——Better position of the cultivators of the soil under the zemindars than if they had been under the revenue collectors, 4451.

Information relative to the inquiries and arrangements in connection with the settlement made in the North Western Provinces with the talookdars, or if not with them with the old village proprietors, 4452–4454——Decided objection to irrigation or water rates being compulsory in permanently settled districts; ready use of the water in course of time, when its value has been appreciated, 4455–4460.

Grounds for the conclusion that cesses for roads and other local improvements may fairly be imposed under the permanent settlement in Bengal; it is essential, however, that moderation be observed, and that no cess be imposed for Imperial purposes, 4461–

Report, 1873—*continued.*

Lawrence, The Right Hon. John Laird Mair, Lord. (Analysis of his Evidence)—*continued.*

4463——Statement in explanation and approval of the instructions in Sir Charles Wood's Despatch of 1862, in regard to one-fifth of the land in villages being dealt with as uncultivated or as grazing land, and being exempt from Government rent under the permanent settlement, 4464-4473.

Great rise in the price of labour in the neighbourhood of railways and other public works, but not in the more remote parts of the country, 4474, 4475. 4484——Effect of the railways in equalising the prices of produce, 4476——Wretchedly poor character of the urban population in many of the large cities, 4477——Considerable rise of prices in the military and civil stations, 4478——Tendency to decrease of prices as irrigation is extended and more produce is brought into the market, 4479.

Better ability of Government as the people are more prosperous under a permanent settlement of the land revenue, to meet in other ways the increased demands upon them through increase of prices, 4480. 4486-4493——Tendency to progressive improvement over the whole country under British rule, 4481——Improved position of land near the railways as compared with land at a distance; this should not prevent permanent settlement, 4482-4485.

Expected increase of Customs revenue from increased consumption of dutiable articles as people become better off under a permanent settlement, 4486-4488. 4490. 4493——Approval of an increase of excise duties as the people become more prosperous, 4488. 4490-4492——Expediency of a permanent settlement with an income tax, if necessary, rather than of a limited settlement without such tax, 4489. 4494——Argument in support of the income tax; provided it be not extended too far down among the masses, and the rate be not too high, witness would like to see it permanent, 4494-4502.

Long and intimate experience of witness as to the salt tax, 4503——Several changes made in the amount of the salt duty in Bengal and the Punjaub, the present rate in the Punjaub being three rupees a maund, and in Bengal three rupees four annas, *ib.*——Conclusion that a duty of three rupees per maund is an enormous rate; great dissatisfaction on the subject in the Punjaub, 4503-4509——Very light duty in the Trans-Indus districts as compared with the rate of three rupees upon the Cis-Indus salt, 4503. 4506——Approval of the salt tax being retained, though witness would gladly see it reduced in Northern India and Bengal, 4504-4510——Considerable expense in maintaining the customs salt line in Central India, 4510, 4511.

Very large loss of revenue if Government were to abandon the Bengal system of opium cultivation and to introduce the excise system, as in Malwa, 4512-4516——Better position of the cultivator in Bengal under the system of advances from Government than if he were to cultivate under advances from traders, 4517-4519——Greater difficulty in working an excise system in Bengal than in Malwa, 4520, 4521——Disapproval of succession duties in India, 4522——Objection also to a tobacco tax, as being really an additional tax on the land, 4522, 4523.

Careful consideration given by witness before leaving India, to the question of decentralisation of taxation; grounds for his decision adverse to the system, 4524-4527——Expediency of a central check upon the local governments in the matter of taxation; inexpediency moreover of two taxing powers in India, 4525-4530——General effect of the decentralisation system that there has been additional local taxation rather than retrenchment, 4527-4532——Condemnation of the local tax in Bombay upon the non-agricultural community, 4531, 4532——Disapproval also of two additional taxes imposed in Madras, 4532——Decided objection also to the per-centage added to the land revenue in the Punjaub just after the settlement had been made, 4532, 4533.

Opinion that it would have been far better to retain the income tax generally than to introduce a system of petty local taxation all over India, 4534——Evidence strongly opposed to Sir Charles Trevelyan's proposition that the local governments should manage the taxation, paying over to the Central Government such a sum in gross as might be prescribed as necessary for the general charges of administration, 4536-4540——Expected breakdown of the foregoing scheme in the event of war, 4539, 4540.

Statement to the effect that the Secretary of State for India is kept fully and sufficiently informed as to the expenditure and financial arrangements of the Governor General in Council, and has every means of exercising a proper control in the matter, 4541-4552——Evidence relative to the functions of the Council of India (apart from the Secretary of State) in matters of finance and of policy respectively; grounds for the conclusion that an exceedingly salutary control is exercised by the Council, though in very rare cases is the Secretary of State overruled, 4553-4579——Grounds for approving of the present constitution of the Council of India, rather than of the introduction of commercial men, 4580-4593.

Unsatisfactory results apprehended if the question of railways were dealt with by a Council consisting largely of commercial men, 4585-4593——Great extravagance under the system of construction of the railways; several causes to which owing, 4589-4592. ——Imperfect

Report, 1873—*continued.*

Lawrence, The Right Hon. John Laird Mair, Lord. (Analysis of his Evidence)—*continued.*

——Imperfect qualifications of the railway engineers for the work required of them; difficulty of efficient control through Government officials, 4589–4592.

Information relative to the general conduct of business in witness' time, as between the Governor General and the members of Council; effective control exercised by witness over all financial questions of any importance, as well as over questions in each department of the Council, 4594–4610——Practice as to the consultation of witness by the Finance Minister, and as to the latter first reviewing all questions which involve expenditure; excellent results therefrom, without any prejudicial diminution of the responsibility of the Governor General, 4594–4607.

Personal efforts of witness in the direction of economy, though in view of representations from England this was not always feasible, 4599, 4600——Valuable influence of the Finance Minister as a check upon the other members of the Council, 4602, 4603. 4607——Inability of the Governor General to undertake the work of the Finance Department in addition to his own work, 4604, 4605——Exception taken to the course adopted by Lord Dalhousie in nominally working all the departments, 4605–4607——Saisfactory division of the business among the members of Council in witness' time; explanation hereon as to the circumstances under which the papers were circulated to the whole Council, 4608–4610.

[Second Examination.]—Consideration of objections to the practice of allowing English capitalists to buy the fee simple of waste land, whereby they are for ever exempt from land tax; advantage of the system as attracting capital and increasing production, 4611–4624——Power also of the natives to purchase rent-free land, under certain conditions, 4618, 4619——Unduly low price at which the fee simple has in many cases been sold; amendment desirable in this respect, 4620–4624.

Explanatory statement as to the functions of the Legislative Council in reference to the Executive Council, and as to the information before the former when considering questions of taxation, 4625–4636——Expediency of predominant influence in the Executive Council; statement hereon as to this not being in any way a representative body, 4637–4640——Doubt as to the expediency of increasing the number of members of the Legislative Council, and of introducing more representative members otherwise than by selection, 4641–4646.

System in witness' time whereby the Governments of Bombay and Madras carried on the general administration exactly as they thought proper, 4647——Reference by the local governments to the central governments on questions of any great difficulty, and on all questions involving new permanent expenditure, 4647–4651——Effectual check by the Supreme Government upon financial questions referred to them, 4652——Frequent instances of the local governments coming again and again to the central government for sanction of proposed expenditure, 4653——Occasional instances of direct application by the local governments to the Secretary of State; exception taken to this course, 4654, 4655——Discretion and responsibility in the local governors as well as in the Governor General, 4656, 4657——Full discretion specially vested in the Government of Bombay as to the prepartions for the Abyssinian Expedition, 4658, 4659.

Arrangement in witness' time as to the Governments of Bombay and Madras being allowed to undertake works up to a limit of 20,000 *l.*; previous limit up to 10,000 *l.*, 4660–4662——Frequent collision between the centra land local governments through the large excess of estimates for works; several causes of such excess, 4663–4665——Collision more especially with the Government of Bombay as taking too much power into its hands, 4666, 4667——Sufficiency of the central check, providing the regulations be properly carried out, 4668, 4669—— Support generally of the Governors by their Councils in the event of collision with the Supreme Government, 4670——Objection to any enlargement of the local councils, 4671.

Approval of the system of Lieutenant Governors without Councils, though witness would not disturb the plan of a Governor with a Council in Bombay and Madras, 4672–4676——Expediency of the local Governors being subordinate to the Governor General and of their obeying him, 4674——Decided objection to any conversion of a civil government, as in the Punjab, into a military government, 4677, 4678.

Difference of opinion among competent authorities as to the European force to be maintained in India, 4679——Opinion in India after the mutiny that the minimum European force should be about 75,000 men, 4680–4683——Witness considers that about 60,000 British troops are now sufficient, 4684–4686——Various reasons for maintaining a considerable native army; grounds for the conclusion that for all India there should be 130,000 native troops, 4687–4689——Room for reduction in the Madras native army, 4689.

Expediency of maintaining the separation between the native armies of the several Presidencies, 4690, 4691——Illustration during the mutiny of the importance of a distinct and separate army, European as well as Native, for each Presidency, 4690. 4695——Strong testimony to the value of the frontier force, which should be maintained intact; admirable

Report, 1873—*continued.*

Lawrence, The Right Hon. John Laird Mair, Lord. (Analysis of his Evidence)—*continued.*

service rendered by the force during the mutiny, 4692, 4693——Entire absence of economy or other benefit by an amalgamation of the several armies; great disadvantage in more ways than one, 4694-4697——Obstacles to European settlements in India by localising pensioned soldiers in the hills; considerable expense involved whilst collisions with the natives would assuredly result, 4698, 4699.

Grounds for preferring the present system of the staff corps, and the mode of officering the native regiments therefrom, to the system formerly in force, 4700-4711——Large present expenditure in connection with the staff corps; financial advantage eventually as the old officers or colonels are reduced in number, 4703, 4704. 4712-4719——Large increase of charge owing to the enlarged character of the system of pensions, 4718——Inadequacy of the former pension system, *ib.*——Consideration of the constitution of the staff corps as regards the qualifications of the officers admitted thereto; suggestions for the prevention of abuse in this respect, 4720-4730.

Very careful supervision and check exercised in the Financial Department upon the military budget, including all proposed expenditure on barracks, &c., 4731-4734——Several bad cases, since witness left India, in which much discredit has been thrown on the Public Works Department in connection with barracks, 4732——Strong military influence used in the direction of improved and costly barrack accommodation, 4733. 4737, 4738——Military efficiency, rather than economy, had in view generally by the military members of Council, 4735-4737.

Strong public feeling, when witness became Governor General, as to the want of more healthy accommodation for the troops; special appointment of Colonel Crommelin by Lord Elgin's Government to inquire into the matter, 4738——Careful inquiry by witness before deciding in favour of upper-storeyed barracks in the Upper Provinces and elsewhere, *ib.*——Concurrence of all the members of Council in the foregoing view, *ib.*——Very careful discussion also before the space per man was decided upon, 4738, 4739——Due consideration paid to the question of economy as well as of efficiency, 4738-4741——Healthy character of the three storeyed barracks at Fort William, 4741, 4742——Purer atmosphere by reason of an upper storey, 4742.

Several causes which have led to an increase of charge for the movement of troops, notwithstanding the extension of the railway system, 4743, 4744——Strong objection of men in the Punjaub Frontier force to be moved from their own country, 4744——Great decrease in the available supply of elephants and oxen for transport purposes in time of emergency, so that it is more necessary than formerly to keep an increased establishment of animals, 4745-4747.

Practical administration of the army by the Commander in Chief, subject however, to the control of the Governor General; approval of this arrangement, 4748-4751——Inexpediency of a War Minister in India with enlarged and independent powers; tendency thereby to increased expenditure, 4749-4751——Initiative taken by witness' Government in reducing the European army; obstacle on the part of the Home authorities, 4752-4757——Difficulty also experienced by witness in obtaining a reduction of the artillery, 4755——Ample sufficiency of a British army of 60,000 men for the suppression of any mutiny or insurrection, 4756, 4757.

Statement in detail in strong support of the expenditure incurred on irrigation canals, 4758——Belief that the Government of India should have done more, rather than less, in this direction, *ib.*——Decided approval of the policy of constructing canals on a large scale, such as the Ganges Canal, the Baree Doab Canal, &c., *ib.*——Immense importance of extensive irrigation works, as developing production, *ib.*

Grounds for concluding that irrigation canals, and other large industrial works, should be carried out by Government, 4759, 4760——Decided objection to large canal works being entrusted to companies, 4759, 4760. 4763——Evil of the guarantee system in connection with canals or railways, 4760. 4777——Expediency of every encouragement being given to the formation of irrigation works by private enterprise; approval of the system of Government advances for the purpose, 4761-4763.

Explanation and justification of the action of Government in the purchase of the Orissa irrigation works; denial that the terms were unduly favourable to the Company, 4764-4768——Information relative to the Back Bay Reclamation Scheme at Bombay, and the action of the Government of Bombay in the matter, 4769-4772——Statement as to witness having objected in 1867 to the purchase by Government of the Elphinstone Reclamation Works, and as to the concern having been subsequently bought over in Lord Mayo's time, 4773-4776.

Much to be said in favour of railway construction through private enterprise, 4777——Great mischief, however, in the operation of the guarantee system, as largely enhancing the cost, 4777-4781——Preference for a subvention, as compared with a guarantee; failure, however, of an attempt to introduce the former, 4777——Opinion that it would be better and cheaper for Government to make the railways rather than to rely upon the guarantee system, 4777-4779——Approval of the guaranteed railways being purchased

if

Report, 1873—*continued.*

Lawrence, The Right Hon. John Laird Mair, Lord. (Analysis of his Evidence)—*continued.*

if this can be done on certain terms, as calculated by Mr. Thornton, 4780, 4781. 4832.

Respects in which the administration and working of the railways by Government would be more satisfactory than by the companies, 4781–4783——Careful estimates by Government before undertaking the independent construction of lines like that between Mooltan and Kotri, 4784——Much less cost per mile of the new narrow gauge lines than of those on the broad gauge; advocacy of the former, witness attaching very little importance to the question of break of gauge in India, 4785–4788.

Disapproval of a limitation of public works to surplus income, as retarding the development of the country; expediency, however, of not raising loans save for really important works, 4789, 4790——Approval of the plan of paying off debt whenever there is surplus income, and of creating fresh debt whenever there is a deficiency, 4789..4791–4794——Disadvantage in stinting the annual expenditure on any large work once begun, 4789, 4790.

Opinion that the revenue of India is overcharged in various ways in favour of the Imperial revenue; cases in illustration, 4795–4819——Grounds for the conclusion that India is excessively charged for recruits; particulars hereon as to the former and present systems of supply, and the cost in each case, 4798–4808——Argument as to the injustice and the hardship of saddling India with the whole cost of the Indo-European telegraph, 4808–4819——Comparatively weak political influence of the Council of India; it is something like tyranny in the Imperial Government to abuse this weakness to the prejudice of the revenues of India, 4804–4807. 4812–4819.

Approval of large employment of natives in the public service, so long as due regard is had to efficiency and to the security of British rule, 4820, 4821. 4823——Fairness of a lower remuneration of Natives than of Europeans in the same offices, 4822. 4826——Expediency of due check upon appointments by patronage as distinct from appointments by merit, 4823–4825——Very small salaries in the lower grades of the public service, 4826.

Increased disposition in civil and military servants to come to England on leave of absence; objection to this practice as tending to wean them from Indian interests, 4827, 4828.

Satisfaction of public opinion in India by calling native witnesses before the present Committee, 4829——Suggestion that it be left to the Governor General and the local Governors to select the native witnesses, without receiving applications from the latter, 4829–4831.

[Third Examination.]—Great importance of a permanent settlement of the land revenue in India generally (exclusive of Bengal), the proprietor being for the most part the cultivator, and having the strongest interest in the security of British rule, 5302.

Considerable number of European troops now being located in the hills in permanent barracks; advantage on the score of health, whilst there is a serious disadvantage on strategical grounds, 5303–5307——Extra cost by locating troops in the hills; economy on the other hand by the saving of life and the avoidance of recruiting, 5307, 5308.

Opinion that a reasonable standard of remuneration should be fixed for native employés, and that Europeans in India desirous of entering the public service should come under the same standard, 5309–5313——Doubt as to educated natives being well fitted for employment in the Forest Department, special training and instruction being apparently necessary for this service, 5314–5320.

Bias in some departments, but not in all, against the employment of natives, 5321——Satisfactory administration of the local treasuries when witness was in India; employment of native treasurers as well as of English officers, 5321–5323.

Disapproval of any rule as to the exclusion of Europeans in India from appointment to the uncovenanted service, and from promotion thence to the covenanted service; approval, however, of a check upon the number or proportion of such appointments, 5324–5331——Advantage of witness' power to promote men from the uncovenanted service who had behaved well during the mutiny, 5326.

Belief that abuse of patronage by promotion of European uncovenanted servants has been of rare occurrence, 5326. 5328–5330——Approval of some check whereby the proportion of natives in the higher class of uncovenanted appointments should not be unduly limited, 5330, 5331——Further reference to the Indo-European Telegraph, and the fairness of a division of the charge between England and India, 5332, 5333.

Witness further contends that on various grounds the native army must be maintained at its present strength, save in Madras; multifarious duties which it is called upon to perform, 5334–5342——Impracticability of using the Government police in reduction of native troops, whilst the village police are not available for Government employment at all, 5336——Conviction that India cannot be held without a considerable native army, 5338–5340——Obstacles to any disarmament of the native chiefs and their troops, 5340.

Report, 1873—*continued.*

Lawrence, The Right Hon. John Laird Mair, Lord. (Analysis of his Evidence)—*continued.*

Room for economy by having but one medical staff for the Royal army and Native army; objection on the part of the military authorities to any change in this direction, 5342——Large and unnecessary expense in the "seconding" of officers; difficulty of reform unless with consent of the military authorities, *ib.*——Belief that people in England greatly depreciate the importance of the native army, *ib.*——Witness would, in fact, prefer an army half English and half native to an exclusively English army of the same number, *ib.*

Grounds for concluding that danger does not arise from Affghanistan, through the Pathan troops maintained on the North West frontier, 5343, 5344——Evidence to the effect that there are too many officers in the local English regiments, but that the standard of the Royal English regiments as to officers must be the standard of the local regiments, 5345-5354.

Very exceptional instances of any stations on the plains so healthy as those in the hills, 5355-5357——Objections to Campbellpore as a military station, 5357——Impression that on the whole the men now prefer to be stationed in the hills, 5358, 5359——Satisfactory employment of soldiers in the hills on road making, 5359, 5360——More physical energy of troops direct from the hills than of those in the plains, in the event of sudden emergency, 5361, 5362.

Argument that the plains must be held in force, and that only a small proportion (such as one-sixth) of the English army should be located in the hills; great element of danger if this rule were inverted, 5363, 5364——Prospect of some reduction in the military charge below its former cost, when the recent changes shall have been for some time in full operation, 5365.

Great discontent to be created by giving a much larger salary to a European than to a native holding the same appointment, 5366-5370——Inexpediency of less pay of military men than of civilians when the former fill the same offices as the latter, 5367, 5368——Disapproval of an abolition of the existing Councils at Bombay and Madras, though if they were now to be established for the first time there might be question for consideration, 5371-5373.

Impolicy of any reduction of the army which should in any way compromise our tenure of the country, 5374, 5375——Very large reduction of the native army since the time of the mutiny, 5376. 5380-5382——Concurrence generally of Sir William Mansfield with witness (when Governor General) as to the expediency of reductions, 5377-5379——Explanation of various causes of the greater cost of the army in 1872-73 than in 1857-58; although there has been in the interval a very large reduction in the native army there has been a considerable increase of European troops, 5380 *et seq.*

Great increase of prices since 1857-58, this being one cause of the increased military charge, 5384. 5390——Comparatively small payment formerly for carriage or transport; great difficulty in providing native carriage, on account of the short payment made, 5384——Large increase of the charge for carriage since an improved transport system has been established, 5384, 5385——Enhanced cost of rations when witness was in India, 5384. 5390——Increase of charge, also, by reason of the greater attention paid to the comfort of the troops in several ways, 5384. 5387.

Much greater cost per man of European troops than of native troops, 5386, 5387——Amount of increase of charge by the addition of 2 *d.* per day to the pay of the European troops, 5388. 5393, 5394——Circumstance of the charge for beer being less than it was in 1862-63; 5388-5390——Impression as to much additional expense having arisen from the increased pay allowed for soldiers' wives and children, 5390-5392——Explanation as regards the great increase of the medical establishment during witness' time, that he objects to a double medical staff, but that otherwise the establishment did not appear to be excessive, 5395-5399.

Consideration of the objects and operation of the staff corps system, its effect as regards the number of officers attached to regiments, and the expenditure; dissent from certain views expressed on the subject by Sir Henry Durand, 5400 *et seq.*——Reduction of the expense of the staff corps as the higher officers fall off in numbers, 5401——Explanations relative to the origination of the staff corps, and the financial effect of subsequent regulations, 5403 *et seq.*

Explanation that witness had no voice as to the number of officers with the regiments sent from India to China; he considers that too many were added to each regiment, 5446-5450——Addition of one or two officers to each regiment which went from Bengal to Abyssinia, 5451, 5452——Undue expense involved in the large increase of the colonels' allowances; belief that the arrangement applies only to the old officers of the Indian army, and that officers who have joined since 1858 are subject to special rules, 5455-5458.

Causes of the increased expense of transport further adverted to and explained, 5459-5461——Further approval of the continuance of Councils at Bombay and Madras; statement as to there being no staff or secretariat attached expressly to the Council, 5462-5473

Report, 1873—*continued.*

Lawrence, The Right Hon. John Laird Mair, Lord. (Analysis of his Evidence)—*continued.*

5473——Preference for the appointment of men trained in India as Governors of Madras and Bombay, 5464-5468——Limited extent to which a Council necessarily involves increase of expense, 5471-5480.

Probable room for saving in the High Court at Bombay by dispensing with one judge, 5482——Further explanation of witness' views in favour of maintaining the local commanders in chief of Bombay and Madras, 5483-5493——Separate treaties with the several Native States, the general rule being not to interfere in the interior administration of any of the large States; approval of this system, 5494-5497——Breach of faith if the Native States were asked to share in the military expenditure, 5497——Disapproval for the present of any alteration of the practice of dealing separately and directly with each State, 5498, 5499.

Approval of the appeal to the Secretary of State in Council from decisions in India affecting the native chiefs; objection to a judicial appeal in such cases, 5500, 5501—— Satisfaction expressed also with the decision of the Governor General in Council, subject to the control of the Secretary of State in Council, in cases of adoption or disputed succession, 5502-5507——Value attached by the natives to the power of Parliament to interfere in their behalf, 5506.

Explanation that witness was strongly opposed to the absorption of the local European army, but would not now advocate its re-establishment, 5508-5510——Opinion adverse to the promotion of native officers in the army, so that up to a certain grade they might in every way take equal rank with European officers, 5511-5518——Information relative to the proportion of native and European officers in the Punjaub military police and the Punjaub cavalry; high class of native officers in the latter, 5518. 5526-5529——Great difficulty in working the civil administration of the country if natives were allowed to rise in large numbers to the higher positions in the Civil Service, 5519, 5520.

Great financial advantage to India if there were an Imperial guarantee for the public debt; conclusion, however, that Parliament would not consent, 5521, 5522——Further reference to the military expenditure as not admitting of any large immediate reduction, though economy may be applied from time to time by carefully watching for opportunities, 5523——Advantage of the Madras army as a reserve force rather than as a fighting force out of the Presidency, 5524, 5525.

[Fourth Examination.]—Impression that the opium revenue is likely to decrease in course of time, as cultivation is extended in China and Persia, 5530, 5531. 5576-5578 ——Opinion that no change is advisable in the relations of the Government of India to the Presidency banks, 5532-5535——Consideration of the causes of the failure of the Bank of Bombay; blame attributable to the Bombay Government in the matter, 5536-5540.

Large portion of the Council of India favourable in 1862 to the extension of the permanent settlement; doubt as to the present views of the majority of the Council on the subject, 5541-5544——Great improbability of the Secretary of State in Council totally disregarding the opinion of the Government of India upon the question of the permanent settlement, 5545-5547——Limited powers of the zemindars in Bengal as to the extortion of exhorbitant rents save in the case of tenants at will; defect of the settlement in Bengal and Behar in not providing against extortion, 5548-5551.

Approval of a permanent settlement based upon a money assessment, although possibly there may be, in course of time, a great depreciation in the value of the precious metals; counterbalance of this drawback by the great increase of cultivation under such settlement, 5552-5557. 5568——Suggestion that in cycles of years the money assessment under a permanent settlement might be reconsidered with reference to the prices of certain produce; much less disturbance thereby than under a thirty years' settlement, 5553-5556.

Very large revenue expected from irrigation rates where there is the incentive to increased cultivation under a permanent settlement, 5557, 5558——Further statement in support of the view that irrigation works properly carried out would pay largely; exceptional instances to the contrary, 5558-5561——Authority further cited for the conclusion that the Ganges Canal is a remunerative work, 5562-5567.

Less difficulty in suddenly raising an increased taxation if the general poverty of the country be relieved by a permanent settlement, 5569——In an emergency witness would reimpose the income tax, *ib.*——Light export duties might be imposed if there were an absolute necessity, *ib.*——The salt tax should certainly be not increased until the people are better able to bear an enhanced rate, 5570-5575——More cannot be expected from the opium duty, 5576-5578.

Limited increase of revenue to be obtained by an increase of customs duty unless the people become richer, 5579——Great opposition likely to be raised in England against increased export duties, 5580-5582——Very little room, if any, for an increase of the stamp duties, 5583——Witness further contends that if the income tax were kept at a

Report, 1873—*continued.*

Lawrence, The Right Hon. John Laird Mair, Lord. (Analysis of his Evidence)—continued.

moderate rate, and were levied without extortion, it might well be resorted to rather than that additions should be made to the debt of India, 5584–5592. 5663, 5664——Slight weight attached to the arguments of three successive Finance Ministers against the tax, 5586.

Statement to the effect that from the time of the expiry of the income tax in 1865 there was a bias in the direction of increased local taxation, and of a decentralisation system as regards the expenditure on police, &c., 5593–5596——Further statement as to the obstacles to the Council of India successfully resisting the proposal to throw the whole of the expense of the Indo-European telegraph on India, 5597–5601——Numerous cases in which the Council successfully resist the imposition of expenditure on India, although in special cases they they feel constrained to give way to the political pressure which is brought to bear, 5597–5605——Disapproval of the proceedings of the Council being public, 5606, 5607.

Decided check through the Government of India and the Secretary of State upon expenditure by the Governor of Bombay, though the latter is to some extent independent of the Governor General in the matter, 5608–5616——Explanation more especially of the circumstances under which the Governor of Bombay expended a very excessive sum on the Government House near Poona, in defiance of the representations of witness and his Council; this did not call for a recommendation that the Governor should be dismissed, 5612–5616. 5750, 5751—— Collision between the Supreme Government and the Bombay Government on several questions in witness' time, 5613. 5750–5755.

Power of the Commander in Chief and Secretary of State for War in England as to raising the pay of the British army, or making other changes affecting the military expenditure of India; checks upon such alterations, 5617–5621——Statement on the subject of reductions of military expenditure having been strongly recommended by the Indian authorities but overruled by the Home authorities, 5622–5624—— Impression that the general policy as regards the number of officers, &c., has not altered since the amalgamation of the army, 5625–5627.

Argument that notwithstanding the promises held out in the Queen's Proclamation relative to the full and free admission of the natives to the public service, it is not sound policy to carry into practical operation the promises in question, 5628–5632——Expediency of so much impartiality towards the natives as is consistent with our hold on India, 5631, 5632.

Exceptional and unimportant cases in which legislation takes place at Simla; opportunity of the representative members of Council to be present, 5633–5636——Witness used to be about seven months at Simla, 5637——Estimate of from 30,000 *l.* to 40,000 *l.* a year as the cost of the migration to Simla; a large portion goes to enlarge the railway receipts, 5638——Allowances made to the members of Council and subordinate officers for the visit to Simla, 5639, 5640——Circumstance of the expenses of former Governors General in moving about having been equal to witness' expenses, including the cost of the sojourn at Simla, 5639.

Explanation in reference to the course pursued in carrying to income the proceeds of the sales of waste land, 5641–5643——Further expression of the opinion that it would be exceedingly advantageous if England were to recognise the debt of India by a direct guarantee of the interest, 5644–5651——Large saving of interest under an Imperial guarantee, 5650, 5651.

Expediency of the direct correspondence from Bombay and Madras on all important questions being referred by the Secretary of State to the Governor General before a decision is given, 5652, 5653——Entire concurrence in the view that where the cesses are comprised in the terms of the settlement it would be a breach of faith to compulsorily impose new cesses, whether Imperial or local; this does not apply to Bengal, 5654–5660 ——Primary importance of the contentment of the agricultural population as being the main security for the maintenance of British rule, 5661, 5662.

Slight extent to which proprietors under a permanent settlement are influenced thereby as regards their demands from tenants-at-will, 5665–5667——Better position of cultivators in rent-free villages than of cultivators in revenue-paying villages, 5668—— Grounds for concluding that a permanent settlement in Upper India would not in any way tend to cause the peasant proprietors to alienate their lands to the richer classes; great mischief of alienation as a source of disaffection, 5669–5676——Approval of legislation restricting the alienation of ancestral lands by process of the courts, 5675. 5741–5749——Entire dissent from the view that under the late settlement in Upper India the Government assessment has been fixed too low, 5677–5680.

Protection against famines by the irrigation of even a third or fourth of the area of districts threatened, 5681——Inexpediency of a certain scheme for an irrigation canal in Oude, the local authorities being opposed thereto, and the natives appearing to have an ample natural supply of water for all purposes, 5682–5689——Approval of a large employment

Report, 1873—*continued.*

Lawrence, The Right Hon. John Laird Mair, Lord. (Analysis of his Evidence)—*continued.*

employment of native judges, great care being taken in their selection, 5690-5693——Expediency of the chief administrator of a district being an Englishman; full admission, however, as to the efficiency of natives as magistrates or deputy collectors, 5691. 5694-5698.

Causes of the increased tendency of the English officials to look more to home interests, and to sympathise less than formerly with the natives, 5699-5703——Great importance of the European officers commanding the affection or the respect of the natives, 5704, 5705——Witness repeats that it is absolutely necessary that the plains should not be denuded of British troops, 5706-5708——Incentive to the mutiny through the natives reporting at the time that there was a clear space between Calcutta and Delhi, 5707. 5787.

Opportunity of the commanders in chief to modify the mischief of too frequent removal of officers from one regiment to another, 5709——Tendency of some authorities to overvalue the importance of an officer being a long time with his regiment; arrangement by which too frequent changes may be checked, 5709-5713——Importance of officers with staff appointments, as being on a kind of probation, 5713——Disapproval of officers in native regiments having no prospect of getting promotion out of their regiments; advantage of the arrangement whereby from six to eight officers in a native regiment were allowed to get away from it, 5714-5717.

Probability of its becoming necessary to raise the pay of the sepoys, owing to the increase of prices; difficulty of late in obtaining recruits, 5718-5721——Partial increase of pay in the shape of good conduct money when witness was Governor General, 5718, 5719——Much better position of the native officers since witness was in India, 5718——Instances of native commandants of military corps in the Punjaub who were most efficient; serious disadvantages, however, of such appointments in any number, 5722-5730.

Dissent from the view that the extension of the furlough system has tended to widen the relations between officers and men, 5731, 5732——Much quicker promotion than formerly in the junior ranks; under the staff corps rules a man gets his company in twelve years, 5733, 5734——Further approval of the extended appointment of native judges, under limitations, 5735-5740——Further statement as to the expediency of restricting alienation or sale of ancestral lands; frequent instances of sale in the North Western Provinces for arrears of revenue, 5741-5749.

Exceptionable conduct of Sir Charles Trevelyan, as Governor of Bombay, in the matter of the income tax; testimony, however, to his meritorious public services, witness having been very sorry that he was recalled, 5752, 5753.

Twofold objection made by the Home Government to the reductions proposed by witness and his Council in the military force, 5756, 5757——Immense value attached to the Council of India, though obliged at times to succumb to the pressure or influence of the Cabinet, 5758-5763——Satisfaction expressed with the system of the Council in the matter of correspondence and accounts, 5764-5766.

Further statement that native witnesses to give evidence before the Committee can best be procured through the Governor General; way in which he might select them, 5767-5773——Different classes of public opinion in India; expediency of the opinion of the interior of the country as well as of the Presidency towns being represented before the Committee, 5774-5778.

Unanimous objection by the Council of India, including witness, to the abolition of the local European army; impracticability, however, of any successful opposition to the will of the Cabinet and of Parliament in the matter, 5779. 5837-5843——Undue reduction of the English force in India at the time of the mutiny; great advantage if there had been 5,000 more Europeon troops, the regiments having been short of their complement by about this number, 5780-5790——Peaceful state of the country before the mutiny; witness had, however, urged upon Lord Canning the reduction of the native army and the increase of the British force, 5788, 5789.

Inexpediency of a further change by a restoration of the local European army, 5791-5793——Expediency, however, of every reduction and economy consistent with efficiency, 5793-5795——Approval of the native troops being made more local, as in the Punjaub; disapproval, however, of any sweeping change, 5796-5798——Comparatively small active service of the Madras army in the last fifty years, 5799-5802——Comment upon the dissatisfaction still expressed by the officers serving in India, notwithstanding all that has been done for them, 5803-5808.

Further explanations in connection with the failure of the Bank of Bombay, and the action of witness and his Council during the pressure on the bank; blame attributable to the Bombay Government, 5809-5819——Great value of irrigation works in Madras as shown by the enhanced revenue where the water is used, 5820-5823——Defence of the opposition offered by witness to the Godavery navigation works; excessive expenditure involved,

Report, 1873—*continued.*

Lawrence. The Right Hon, John Laird Mair, Lord. (Analysis of his Evidence)—*continued.*
involved, whereas witness contends that for a large portion of the year the river would not be navigable, 5824-5833——Objection to the expenditure of even 10,000 *l.* a mile on railways, 5827.

Immense evil of the mutiny, far beyond the value of any lessons it has taught, 5834-5836——Circumstance of the Governor General, as well as the Home Council, having objected to the army amalgamation scheme, but without avail, 5837-5844.

Leave of Absence. Increased disposition in civil and military servants to come to England on leave of absence; objection to this practice as tending to wean them from Indian interests, *Lord Lawrence* 4827, 4828.——*See* also *Army*, VIII.

Legislative Council (*Calcutta.*) Explanatory statement as to the functions of the Legislative Council in reference to the Executive Council, and as to the information before the former when considering questions of taxation, *Lord Lawrence* 4625-4636——Doubt as to the expediency of increasing the number of members of the Legislative Council, and of introducing more representative members otherwise than by selection, *ib.* 4641-4646.

Legislative Councils (*Bombay and Madras*). Approval of separate legislative councils at Madras and Bombay, *Sir C. E. Trevelyan* 1512-1514.——*See* also *Bombay*, III.

License Tax. Odium caused by a license tax as an Imperial tax, though when assessed by municipalities there is not the same aversion, *Sir C. E. Trevelyan* 892-895. 908.

See also *Taxation.*

Litigation. Ruinous litigation frequently forced upon the natives in the Bombay Presidency in order to recover their lands from attachment by the collectors, *Nowrozjee Furdoonjee* 6972.

Loans to Cultivators. Proposition that Tuccavee advances be made freely by Government to the landlords and ryots; ample security for the money, which would be repaid with interest, *Nowrozjee Furdoonjee* 6976-6983.

Loans (*Debt of India*). See *Debt of India.*

Loans to Municipalities. Advantage of the plan adopted by Lord Mayo of making public loans to municipalities in aid of local improvements, *Sir C. E. Trevelyan* 1614, 1615.

Nature of the limitation upon the raising of loans by municipalities; practice in recent years for Government to advance loans to the municipalities for public works or improvements, *Harrison* 1789-1794——Mention of several municipalities which have obtained Government loans; rate of interest and amount of debt in each case, *ib.* 1795-1800——Impression that the loans to the municipality of Bombay have all been discharged, *ib.* 1799.

Circumstance of Government having advanced money to the municipality of Calcutta at 4 per cent., whilst the municipality has had to pay 6 per cent. for loans raised from the public, *Harrison* 1801-1804—— Examination to the effect that loans have not been, and are not, raised by the town of Bombay or other municipalities without the previous sanction of the Government of India; exception in the case of Surat, *ib.* 1890-1919.

Circumstance of there being no direct prohibition, under the decentralisation scheme, upon the raising of loans by municipalities without the sanction of the Supreme Government, *Harrison* 1893-1906——Absence of any provision for showing in the local financial statements, under the decentralisation scheme, the amount of indebtedness in respect of municipal loans, *ib.* 1920-1922——Imperfect information in the Finance Accounts for 1869-70 as regards losses from irrecoverable loans to municipalities, *ib.* 4182-4187.

LOCAL TAXATION AND FINANCE (DECENTRALISATION SCHEME)—continued.

1. *As to the Introduction of the Decentralisation Scheme of Finance, and the Resolution of the Government of India on the Subject in December 1870:*

Steps taken by witness and subsequent Finance Ministers of India in the direction of decentralisation, *Sir C. E. Trevelyan* 855—Decided approval of the principle of Lord Mayo's resolution of 14th December 1870, handing over certain branches of administration to the local governments, and assigning them a certain sum out of the general revenue for carrying on the service; conclusions nevertheless as to the very inadequate and defective character of this arrangement, *ib.* 855-857. 1566, 1567.

Financial statements by Mr. Laing in 1861 and 1862 adverted to in explanation of the views then entertained by the Government of India in favour of giving to the provincial governments powers of local taxation and increased financial control, *Harrison* 1650—Reason for the failure of the proposal made in 1861 for transferring 500,000 *l.* of expenditure to local budgets; grant in lieu thereof of 250,000 *l.* out of Imperial resources for expenditure on local works under control of the Supreme Government, *ib.* 1650-1653.

Reference to the resolution adopted by the Government of India on the 14th December 1870, on the subject of provincial services, a sum of 4,688,711 *l.* having been granted out of Imperial revenue as a permanent assignment for certain departments, *Harrison* 1671, 1672—Nature of the restrictions imposed by the Central Government in making the assignment in question; that is, on the score of accounts, new appointments, superannuations, &c., *ib.* 1672—Statement of the amount assigned to each province, and of the basis of the assignment, *ib.* 1673-1683.

Examination to the effect that under the scheme of local finance the Governor in Council of any province might spend an excessive sum out of local taxation on a governor's residence, or on other buildings; direct responsibility to be incurred for any such expenditure, *Harrison* 1778-1788.

Statement that from the time of the expiry of the income tax in 1865 there was a bias in the direction of increased local taxation, and of a decentralisation system, as regards the expenditure on police, &c., *Lord Lawrence* 5593-5596.

Statement in Minute by Sir Charles Trevelyan in February 1864, as to the necessity of confining the Imperial expenditure to objects which are of common interest to the whole of India, *App.* 681.

Resolution by the Government of India, under date 14th December 1870, laying down certain principles and rules as to enlarged powers of local taxation and expenditure on the part of the governments of presidencies and provinces, *App.* 837-840.

Assignments to be made for "Provincial Services," in accordance with the Resolution of 14th December 1870, *App.* 841—Schedule of works for which separate funds will be hereafter provided by the Imperial revenue, *ib.* 842.

Letter from the Government of India, dated 14th December 1870, submitting the Resolution of that date to the Secretary of State for India, *App.* 842.

Despatch from the Secretary of State (Duke of Argyll) to the Governor General in Council, dated 23rd February 1871, reviewing the terms of the Resolution of 14th December 1870, and approving of the principles laid down therein, *App.* 842, 843.

2. *Views of Sir Charles Trevelyan in strong Approval of the Principle of Local Taxation and Finance:*

Much larger discretion left in the local governments in India by the East India Company than by the Secretary of State in Council, *Sir C. E. Trevelyan* 425-427. 942—Expediency of full development of the decentralisation system, *ib.* 546, 547.

Argument showing the great evils consequent upon the over-centralisation of finance, *Sir C. E. Trevelyan* 791-799—Impossibility of making any effectual revision of the annual estimates under the system of centralisation; experience of witness, as Finance Minister, to this effect, *ib.*—Strong motive to economy by each presidency administering its own finances, *ib.* 791.

Object at present of the local administrations to get the largest possible share of the common fund, *Sir C. E. Trevelyan* 791. 794—Opinion that the main administration, both of income and of expenditure, must reside in the local governments, *ib.* 792—Great importance of decentralisation as the principal remedy for the derangement of the finances, *ib.* 800-805—Contemplated initiative in the local governments in the matter of taxation, *ib.* 805-809.

Statement as to the local governors having now nothing to do with finance, whereas, when they were responsible, the finances were conducted in a very regular and satisfactory manner, *Sir C. E. Trevelyan* 822, 823—Conclusion further expressed as to the primary importance of the decentralisation of the finances as a security for economy, *ib.* 855.

Report, 1873—*continued.*

LOCAL TAXATION AND FINANCE (DECENTRALISATION SCHEME)—continued.

2. *Views of Sir Charles Trevelyan in strong Approval of Local Taxation, &c.*—cont^{d}.

Great advantage of full discussion of all questions of finance, and of the initiation of taxation at the seats of the eight provincial administrations, although no new taxation should be permitted without the previous sanction of the Supreme Government, *Sir C. E. Trevelyan* 872-884——Inexpediency of the intervention of the Supreme Government until after full local discussion, *ib.* 873-880——Full responsibility to be vested in the local executive government as to the initiation of taxation, the Budget for the presidency being submitted to the provincial council before going to the Supreme Government, *ib.* 881–884.

Minute by witness, dated 13th July 1859, relative to the evils of over-centralisation and the remedies required, *Sir C. E. Trevelyan* 1282.

3. *Condemnation of the New System by Lord Lawrence, Sir Charles Wingfield, and Mr. Maclean:*

Evil of the decentralisation scheme as putting the local governments under a direct motive to screw as much as possible out of the people, *Sir C. J. Wingfield* 2073–2077——Great danger in giving the local governments power to levy local rates without the consent of the Supreme Government, *ib.* 2074–2076——Approval of the local governments being allowed whatever surplus remains after defraying Imperial expenditure and civil establishments, *ib.* 2075. 2077——Increasing expenditure for the special services made over to the local governments, *ib.* 2100.

Doubt as to the local governments really obtaining much increase of independent control under the decentralisation scheme, *Sir C. J. Wingfield* 2101, 2102. 2178–2180——Limited extent to which the local governments have a direct interest in economy under the scheme, *ib.* 2103——Argument that the constitution of the local bodies is not of a representative character and does not afford a fair limit to the amount of local taxation, *ib.* 2107–2116——Onus thrown upon the landowner under the decentralisation scheme to make up the required deficits of taxation, *ib.* 2182, 2183.

Main defect of the decentralisation of finance, that it removes the only available check on the ambition and extravagance of the local governors and subordinate officials, *Maclean* 2420–2424. 2442——Careful supervision formerly exercised by the Government of India over the provincial budgets; transfer of responsibility in the matter by the decentralisation policy, *ib.* 2442. 2604, 2605——Great value attached to a central check upon expenditure by the local governments, unless it is possible to apply an effectual check through the taxpayers, *ib.* 2559–2562. 2609. 2614.

Careful consideration given by witness, before leaving India, to the question of decentralisation of taxation; grounds for his decision adverse to the system, *Lord Lawrence* 4524-4527——Expediency of a central check upon the local Governments in the matter of taxation; inexpediency moreover of two taxing powers in India, *ib.* 4525-4535.

4. *Suggestions by Sir Charles Trevelyan for a large Extension of the Policy of Decentralisation:*

Argument in support of the view that the work of decentralisation, inaugurated by Lord Mayo, is of a very fragmentary character, and requires large extension, *Sir C. E. Trevelyan* 546, 547. 855–857. 1566, 1567——Opinion that the proper arrangement is to define the services to be administered by the Supreme Government, for which a sum should be taken out of the general revenue, whilst all the rest should be left to the Local Governments, *ib.* 857–860——Importance of the question of the disposal of the balance or surplus under the decentralisation system; suggestions hereon, *ib.* 857–860.

Suggestions as regards the decentralisation of the finances, that whilst the Local Governments should have elastic budgets, the Supreme Government should have certain fixed services and charges allotted to it, *Sir C. E. Trevelyan* 1108–1110——Mention of the eight Local Governments contemplated under the decentralisation system, *ib.* 1176–1178——Definition of the functions to be discharged by the Supreme and Local Governments respectively, and of the several heads of service to fall to the administration of each, *ib.* 1179–1186.

Explanation of the heads of revenue proposed to be appropriated to the Supreme Government in order to enable it to defray the expenditure on general services, *Sir C. E. Trevelyan* 1184, 1185——Strong motive to economy in the Supreme Government as well as in the provincial Governments by the proposed allocation of services and of funds wherewith to defray the expense thereof, *ib.* 1185.

Further explanation that under the proposed system of local finance the Supreme Government should have a veto upon new taxation and upon borrowing by the provincial Governments, *Sir C. E. Trevelyan* 1218–1215——Expediency of central control over salaries and other local expenditure affecting the general administration of India, *ib.* 1322.

Further explanation as to the model contemplated by witness in applying to India the plan of decentralisation; he would give to each Local Government autonomy in every

Report, 1873—*continued.*

LOCAL TAXATION AND FINANCE (DECENTRALISATION SCHEME)—continued.

4. *Suggestions by Sir Charles Trevelyan, &c.*—continued.

every respect not inconsistent with the general interest, which should still be guarded by the Supreme Government, *Sir C. E. Trevelyan* 1501–1504——Necessity of the introduction conjointly of the plan of decentralisation and the plan of representative institutions advocated by witness; difficulty in the case of Bengal adverted to hereon, *ib.* 1568–1570.

5. *Disapproval by Lord Lawrence of the foregoing Proposition:*

Evidence strongly opposed to Sir Charles Trevelyan's proposition that the Local Governments should manage the taxation, paying over to the Central Government such a sum in gross as might be prescribed as necessary for the general charges of administration, *Lord Lawrence* 4536-4540——Expected breakdown of the foregoing scheme in the event of war, *ib.* 4539, 4540.

6. *Effect of Decentralisation as regards the Amount of Local Taxation:*

Belief that if the plan were carried out as contemplated by witness the necessity for new local taxation would disappear, *Sir C. E. Trevelyan* 861——Further statement of the grounds for concluding that the necessity for additional or local taxation would not arise under a well-matured plan of decentralisation, *ib.* 862——Denial that the extension of provincial or local taxation was a necessary result of the reduction of the income tax; it has arisen rather from the incomplete inauguration of the decentralisation system, *ib.* 1368–1372.

Extent of disturbance or re-adjustment of taxation caused in India by the scheme relieving the Central Government of 350,000 *l.* of Imperial taxation, *Harrison* 1945. 1992–1995——Item of 88,199 *l.* as the amount to be made good in Bengal under the arrangement of 1871, *ib.* 1945——Complication in levying some of the local cesses required under the scheme of 1871, *ib.* 2022–2027——Necessity of imposing new cesses locally, or increasing existing ones, if, as is anticipated by some competent authorities, the local expenditure under the decentralisation scheme should increase in future years, *ib.* 2028–2036.

Decided effect of the decentralisation scheme in causing the levying of more taxation, *Sir C. J. Wingfield* 2064. 2098, 2099. 2118, 2119——Further disapproval of the great extension of local taxation to the poorer classes in relief of Imperial taxation, *ib.* 2184–2186.

General effec[redacted]lisation system, that there has been additional local taxation rather than [redacted] *Lawrence* 4527–4532.

Instance in 1871 of [redacted]nancial statement of the Government of Bombay under the decentralisation scheme having been submitted to the Legislative Council; strenuous opposition then made by the native members to three proposals for fresh taxation, *Nowrozjee Furdoonjee* 4851–4859——Total of one anna in the rupee on the Government assessment as the amount of the cesses for all purposes in Bombay, *ib.* 5010–5014.

Constant agitation and discontent among the natives of Bombay by reason of the unsatisfactory system in regard to local taxation, more especially since the decentralisation scheme, *Nowrozjee Furdoonjee* 6029-6044——Imposition of new local taxes in spite of the remonstrances of the people, the feeling being that there is no necessity for them, and that the great and growing expenditure should be reduced, *ib.* 6037, 6038.

7. *Question of Local Taxation in disregard of the Land Revenue Settlement:*

Several items of local taxation in Bengal, there being some charges upon land, but no general cess on the land, as in other provinces, *Harrison* 1723–1726——Miscellaneous local receipts in Bengal to the amount of 31,000 *l.*, but not in the matter of taxation, *ib.* 1731, 1732——Doubt as to any complaints having been made in Bombay that it was a breach of faith to impose a road cess on the land revenue after the completion of the settlement, *ib.* 1853–1860.

Statement made by Mr. Strachey in the Governor General's Council in March 1871, relative to the great increase in the value of land in Oude and throughout India, and the propriety of charging chiefly upon land the local expenditure required for roads and other communications, *Harrison* 1933, 1934.

Evidence in strong disapproval of the levy of new or increased cesses in Oude, as involving a breach of the terms under which the land revenue settlement was made, *Sir C. J. Wingfield* 2050 *et seq.*——Contravention of the settlement in Bombay by the local cess for roads and education, *ib.* 2053, 2054. 2086–2088——Obstacles to a reservation of the right of Government to levy cesses apart from land revenue, *ib.* 2070–2072. 2088——Breach of contract equally involved, whether the land revenue be exceeded for local or for Imperial purposes, *ib.* 2173, 2174.

Mischievous effect of the decentralisation policy as stimulating the district officers in Bombay to increase the assessments on the land, in spite of the thirty years' settlement; instances of this in the Deccan, *Maclean* 2453, 2354.

Report, 1873—*continued.*

LOCAL TAXATION AND FINANCE (DECENTRALISATION SCHEME)—continued.

7. *Question of Local Taxation in disregard of the Land Revenue Settlement*—cont^{d}.

Grounds for the conclusion that cesses for roads and other local improvements may fairly be imposed under the permanent settlement in Bengal; it is essential, however, that moderation be observed, and that no cess be imposed for Imperial purposes, *Lord Lawrence* 4461-4463——Entire concurrence in the view that where the cesses are comprised in the terms of a settlement, it would be a breach of faith to compulsorily impose new cesses, whether Imperial or local; this does not apply to Bengal, *ib.* 5654-5660.

Hardship and injustice in the imposition of new cesses upon the ryots in Bombay, who hold under the thirty years' settlement, and upon owners of rent-free lands, *Nowrozjee Furdoonjee* 4932, 4933.

With regard to the anna cess imposed in the Bombay Presidency by the Act of 1869, witness submits that the imposition of the tax during the current settlement was a direct breach of faith; extracts cited from various official documents in support of this conclusion, *Dadabhai Naoroji* 6716-6718.

In support of the statement that the exaction of local cesses in Bombay involves a breach of faith, witness quotes the testimony of the Government itself, *Nowrozjee Furdoonjee* 6989.

8. *Suggestions for Representative Institutions in connection with Local Taxation:*

Expediency of representation being commensurate with taxation in India as in European countries, *Sir C. E. Trevelyan* 863——Suggestions in detail for giving practical effect to the foregoing view, *ib.* 863 *et seq.*——Statement that in proposing to remit the income and expenditure of India into the hands of the people of India, witness refers to the higher and educated class, who are under the influence of a wholesome public opinion, *ib.* 1077——Solid basis on which the finances would rest, if there were a strong popular element round the local centres, under the decentralisation system, *ib.* 1164.

Defence of the proposal for vesting a large discretion in the proposed representative councils in the matter of local taxation; that is, subject to the veto of the Provincial Government and of the Governor General, *Sir C. E. Trevelyan* 1440-1446.

Concurrence in the view that representative bodies should be constituted, and that they should have the power to impose local taxes; this would not involve any breach of faith, *Sir C. J. Wingfield* 2181. 2188-2196.

9. *Returns and Statistics of Local and Municipal T[redacted]ughout India:*

Letter from the Secretary to the Government of [redacted]epartment, dated 3rd June 1872, relative to the local and municipal taxes [redacted]e provinces of Bengal (as well as the Imperial taxes), *App.* 683-690.

Official information, showing in detail the local and municipal taxation of Bengal before and since the scheme of provincial services, *App.* 689, 690——Statement in letter from the Secretary to the Government of Bengal, in June 1872, relative to the Bill for increasing the powers of municipal bodies in the matter of local taxation, *ib.* 690.

Statement of local rates and taxes, other than municipal, existing in the provinces of Bengal in 1870-71, *App.* 695——Annual statistics relative to local rates and taxes in Ajmere, *ib.* 700, 701.

Official information in detail relative to local taxation in the North Western Provinces, Oude, British Burmah, the Central Provinces, and the Punjaub, down to the year 1871-72, *App.* 713 *et seq.*

Statement showing the credits on account of local cesses in the North Western Provinces during the years 1669-70 and 1870-71, *App.* 732——Estimates of local cesses on temporarily and permanently settled estates for 1871-72, and 1872-73, *ib.* 733.

Statement showing the actual receipts during 1870-71, and the estimated yield during 1871-72, from taxes other than the octroi, house, and license tax, in the municipalities of the North Western Provinces in which they are levied, *App.* 737——Statement showing the credits on account of local cesses under the Municipal Chowkeedaree Fund, under Act XX. of 1856, in the North Western Provinces, during the years 1869-70, 1870-71, and as estimated for 1871-72, *ib.* 738.

Detailed return of local rates and taxes in the Central Provinces in 1870-71 and 1871-72, *App.* 778.

Copy of Act No. X. of 1871, to provide for local rating for the construction and maintenance of roads and other means of communication in Bengal, *App.* 780-794.

Act No. IV. of 1871, of the Government of Madras, to provide funds for the expenditure on objects of local public utility and improvement, and to constitute local boards for the due administration of such funds, *App.* 799-807.

Act of the Madras Government of 1871, to make better provision for the conservancy and improvement of towns in the Presidency of Fort Saint George; for the diffusion of education

Report, 1873—*continued.*

LOCAL TAXATION AND FINANCE (DECENTRALISATION SCHEME)—continued.

9. *Returns and Statistics of Local and Municipal Taxation throughout India*—cont^d.

education therein, and for other objects of public utility calculated to promote the health, comfort, or convenience of the inhabitants of the said towns, *App.* 808–830.

Acts of 1871 for levying rates on land in the North Western Provinces, in Oude, and in the Punjab, for local purposes, *App.* 831–836.

Statement of local rates and taxes in the Bombay Presidency, as levied before 14th December 1870, and since that date, *App.* 848——Statement of other local funds raised (not properly taxation), in 1856–57, and in 1871–72, *ib.*

Statement showing the local and municipal receipts and expenditure of Madras for 1870–71 and 1871–72, *App.* 853——Official memorandum relative to various local funds and rates or taxes in Madras, *ib.* 862, 863.

Extract from the Municipal Taxation Act of the Government of Bengal on the 27th July 1872; together with schedules of rates to be levied, *App.* 864–866.

Papers relative to municipal rates and taxes in the city of Bombay, under Acts of 1865, 1867, 1869, and 1872, *App.* 870, 871——Produce of municipal rates and taxes in the Bombay Presidency in 1856–57 and 1870–71, *ib.* 871.

10. *Large Aggregate of Local Taxation:*

Estimate of about 5,000,000 *l.* a year as the local taxation of India, *Dadabhai Naoroji* 6747–6750.

See also *Bombay. Burmah. Campbell, Sir George. Central Provinces. Education (Local Cesses). Feasts. Government of India. House Tax. Land Revenue*, XI. XII. *Madras (Local Taxation). North Western Provinces. Oude. Police. Public Works*, 1, 9. *Punjaub. Representative Institutions. Roads. Taxation. Tolls and Ferries. Trades and Professions.*

M.

Maclean, James Mackenzie. (Analysis of his Evidence.)—Is a Journalist in Bombay; has been connected with India for several years, and has paid much attention to the administration of the country, 2416–2419——Main defect of the decentralisation of finance that it removes the only available check on the ambition and extravagance of the local governors and subordinate officials, 2420–2424. 2442——Great zeal for expenditure, and very little desire for economy, in the Bombay Presidency, under the decentralisation scheme, 2421–2425.

Deficit of 100,000 *l.* to be made good in Bombay, through the application of the decentralisation system, 2425——Proposals of the Governor of Bombay, in 1871, for making good this deficit by additional taxation, instead of by reduction of expenditure, 2425, 2426——Strong objections raised against a proposed tax on feasts, so that it was withdrawn, 2425, 2426. 2450——Very objectionable character of the tax on the rural non-agricultural population; all incomes down to 5 *l.* a year come under this impost, 2426–2429——Numerous communications received by witness showing the wide-spread discontent caused by the non-agricultural cess among the natives, 2429–2441.

Careful supervision formerly exercised by the Government of India over the provincial budgets; transfer of responsibility in the matter by the decentralisation policy, 2442. 2604, 2605——Opinion of the public in Bombay as to the Governor, rather than the Legislative Council, being responsible for measures involving increased expenditure, 2443–2449——Great hardship on the municipality of Bombay in having now to provide the whole cost of the police, whilst Madras and Calcutta still receive police grants from the Central Government, 2451–2453.

Mischievous effect of the decentralisation policy, as stimulating the district officers in Bombay to increase the assessments on the land, in spite of the thirty years' settlement; instance of this in the Deccan, 2453, 2454——Circumstance of there being now a heavy fall in rents and prices in Bombay, 2454——Arbitrary manner in which the land revenue is dealt with, without being ever brought under the notice of the Legislature, 2454, 2455.

Strong distrust of the Public Works Department in Bombay, by reason of the course pursued as regards the purchase and reclamation of foreshore properties round the city; details showing the injudicious and extravagant expenditure incurred, without a single dock being yet provided, 2456–2514. 2563–2566. 2620–2649——Information relative to the action of Government and the Public Works Department in reference to the Back Bay reclamation scheme; grounds for complaint in this case, 2457. 2474. 2495–2506. 2639–2645——Grounds for complaint also as to the course pursued by Government in reference to the Moody Bay estate, 2457, 2458. 2470. 2486–2488. 2563.

Evidence relative to the scheme and works of the Elphinstone Land Company, at Bombay, and the eventual purchase of the property by Government for 1,800,000 *l.*, or

Report, 1873—*continued.*

Maclean, James Mackenzie. (Analysis of his Evidence)—*continued.*

about three times the value of the shares at one period; improvident and extravagant course pursued in this case, 2458–2470. 2483–2494. 2513, 2514. 2606–2608. 2620–2638. 2668, 2669——Formation of a Port Trust, with a view to their administering all the foreshore properties of Government, 2470–2474.

Enormous expenditure, amounting in the aggregate to nearly six millions, upon foreshore reclamation, wharves, &c., at Bombay, whilst another million is still required for docks, 2474–2477. 2489–2491. 2563–2566——Exception taken to the Bunder Fees Act, and the dues levied on goods and packages in Bombay Harbour, 2477–2482——Long-pending dispute between the Government of India and the Government of Bombay, relative to the foreshore purchases in question; sole responsibility of the latter, 2489, 2490. 2513, 2514.

Examintion in detail relative to, and in disapproval of, the Carwar railway project of the Pombay Government, 2515 *et seq.*——Data for the conclusion that the financial returns from the foregoing line have been greatly over-estimated, that a port at Carwar is not needed, and that there should be most careful investigation before the project is allowed to go forward a second time, 2516–2529. 2567–2570. 2585–2589. 2650–2656. 2673–2674.

Argument in denial that the balance of trade against India represents the tribute paid by India to England; witness adduces sundry statistics in support of the view that the English connection is financially advantageous to India, and shows that the opium revenue nearly wipes out the whole annual deficit of imports, as compared with exports, 2530–2556. 2590. 2615–2619. 2665–2667——Great benefit to India by the large amount of English enterprise and capital, 2547. 2616, 2617——Large saving to India by her connection with England, in not being required to support a navy, 2552——Considerable saving also in being enabled to raise public loans at low rates of interest, 2553.

Diversion to other purposes of the Imperial Grant formerly made towards the cost of the Bombay police, 2557, 2558——Great value attached to a central check upon expenditure by the local governments, unless it be possible to apply an effectual check through the taxpayers, 2559–2562. 2609. 2614——Expediency of such communities as Bombay being given the control of their own affairs, 2559. 2562——Conclusion as to the Government of India being really desirous of preventing all unnecessary outlay on public works, 2560. 2579–2584. 2659, 2660.

Admission as regards increase of the assessment on land in the Deccan that the original assessment was made by Sir George Wingate at a very low rate, 2571–2578——Circumstance of Sir George Wingate having in the first instance advocated the permanent settlement in Bombay, 2571–2578——Statement as to the Bombay Government having systematically set the Government of India at defiance as regards local expenditure, 2582. 2657–2662——Large influx of bullion to India since 1833, there being every reason for concluding that the people are much better off than formerly, 2590–2603.

Fruitless character of the representations made in the Bombay Legislative Council against the non-agricultural cess, 2609–2613——Reference to the sale by Government of some foreshore land at Mazagon (Bombay); subsequent speculation in this land, 2646–2649——Independent position assumed by the late Governor of Bombay and his predecessor as regards the expenditure on the Government House at Gunnesh Khind, and other works, 2657–2662——Inadequate control exercised by the members of the local council in matters of expenditure, 2662–2664.

M'Leod, Sir Donald Friell (the late). Weight attached to the views of Sir Donald M'Leod as to the impolicy of new taxes without any consultation of the people of India, *Nowrozjee Furdoonjee* 6034–6036.

Madras Army. See Army.

Madras Irrigation and Canal Company. Public-spirited manner in which the Madras Irrigation Company was originated, though the scheme is likely to entail a heavy loss upon the finances of India, *Sir C. E. Trevelyan* 538, 539——Apparent failure hitherto of the works of this Company, *Lord Lawrence* 5560.

Madras (Land Revenue). Comparative receipts from land revenue in Madras in 1856–57 and 1870–71; increase from 3,543,000 *l.* in the former year to 4,393,000 *l.* in the latter, *App.* 851.

Madras (Local Taxation). Unexceptionable conduct of the Government of Madras in financial matters, *Sir C. Trevelyan* 562. 566.

Production of 359,683 *l.* by local taxes in Madras in 1870–71, exclusive of municipal taxation; the chief items are 192,627 *l.* produced by road cesses, and 160,032 *l.* produced by cesses for village service, *Harrison* 1832–1835——Particulars relative to municipal taxation in Madras, the amounts produced under the heads of house tax, tolls, &c., and the regulations as to application of the receipts, *ib.* 1836–1849.

Report, 1873—*continued.*

Madras (*Local Taxation*)—continued.

Sum of 55,428 *l.* to be provided by local taxation in Madras under the arrangement of 1871, *Harrison* 1974——Particulars relative to the Madras Local Funds Act of 1871, and the rates imposed thereby on land, houses, and tolls, in reference to the decentralisation scheme, *ib.* 1974–1989——Provision that the taxes levied in each district are to be spent within the district, *ib.* 1984.

Disapproval of two additional taxes imposed in Madras under the decentralisation system, *Lord Lawrence* 4532.

Copy of the Madras Local Funds Act of 1871 to provide funds for expenditure on objects of local utility, and to constitute local boards for the due administration of such funds, *App.* 799–807.

Arrangement of the sections of the Madras Towns Improvement Act (1871), *App.* 808, 809——Sections of the Act, its object being to make better provision for the conservancy and improvement of towns in Madras, for the diffusion of education therein, and for other purposes of public utility, *ib.* 810–827——Schedules attached to the Act. *ib.* 828–830.

Particulars of local and municipal receipts and expenditure in 1870–71 and 1871–72, *App.* 853–861——Official memorandum relative to various local funds, and rates or taxes, *App.* 862, 863.

Madras Military Expenditure. Minute by Sir Charles Trevelyan, dated 17th December 1863, on the subject of Madras military expenditure, *App.* 667, 668.——*See* also *Army.*

Madras Railway. Grave mistake made in laying out the Madras Railway, as it passes many large towns at a considerable distance from them, *Sir C. E. Trevelyan* 1230–1235.

Madras (*Revenue and Expenditure generally*). Considerable surplus revenue in the case of Madras, *Sir C. E. Trevelyan* 1471.

See also *the Headings generally throughout the Index.*

Magistrates. See *Revenue Establishments.*

Malt Liquor (*Army*). See *Beer and Spirits.*

Manufactories (*Government Supplies*). Expediency of dispensing with the Government tannery at Cawnpore, the gun factory at Madras, and several other smaller manufactories in India, it being far preferable to procure warlike stores from England, *Sir C. E. Trevelyan*, 775–777. 1520–1522.——*See* also *Cossipore Gun Foundry. Harness.*

Mayo, Earl of (*the late*). Views expressed by Lord Mayo in March 1871, in justification of the system of local finance, as inaugurated by the assignments for provincial services, under the Resolution of December 1870, *Harrison* 1682.

Reference to a speech of Lord Mayo in March 1871, in which the taxation of the people of India is computed at 1 *s.* 10 *d.* per head; assumption of Lord Mayo that this taxation cannot be considered "crushing," witness entirely dissenting from this conclusion, *Dadabhai Naoroji* 6727.

Medical Department. Examination upon the question whether a larger proportion of the entire cost of the medical establishment should not be a military charge; considerable medical services in connection with gaols, police, &c., *Harrison* 4246–4272.

Large and unnecessary expense in respect of the staff of the British medical service in Bombay; new arrangement of this service since 1865 or 1866, *Nowrozjee Furdoonjee* 5285, 5286——Excessive medical establishment attached to European regiments; room for economy by the extended employment of native medical men, these being well trained and qualified, *ib.* 5288–5295——Grounds for complaint as regards the practical exclusion of natives from the grade of sub-assistant surgeons, *ib.* 5296.

Very unfavourable footing upon which the native sub-assistant surgeons have been placed as compared with the apothecaries, *Dadabhai Naoroji* 6736——Increase of more than 500 per cent. in the medical charges in the Bombay Presidency between 1856–57 and 1870–71, *Nowrozjee Furdoonjee* 6983.

Room for economy by having but one medical staff for the Royal Army and Native Army; objection on the part of the military authorities to any change in this direction, *Lord Lawrence* 5342——Explanation as regards the great increase of the medical establishment during witness' time, that he objected to a double medical staff, but that otherwise the establishment did not appear to be excessive, *ib.* 5395–5399.

Sunday details in connection with the Grant for Medical Establishments, Supplies, and Services, and the causes of increase or decrease in each presidency under subordinate heads in each year from 1865–66 to 1871–72, *Kellner* 7021——Increase or decrease of staff owing to re-organisation; effect as regards expenditure, *ib.*——Decrease in the charge for medical supplies, *ib.*

Report, 1873—*continued.*

Medical Department—continued.

Further explanations relative to the cost of the Medical Department in 1862-63 and at subsequent periods, and the causes of the enhanced amount of the Medical Grant in the former year, *Kellner* 7279–7283.

Additional information relative to the charges for the Medical Department in 1862-63, 1863-64, and 1871-72, and the causes of increase under several sub-heads, *Kellner and Johnson* 7325-7342——Considerable increase, more especially in the British Medical Staff, *ib.* 7325–7329.

Strong opposition made by the India Office to the large increase of the British Medical Establishment: prospect of reduction, *Johnson* 7330-7332——Very large sum (probably a million) represented by the charge for the entire medical establishment, including the regimental staff; increased pay of all ranks of the service, *Kellner* 7492–7496——Large economy likely to be soon effected in the Medical Department, *Johnson* 7513.

Statement exhibiting the staff appointments, &c., created and abolished in the Medical Department, Grant IX., in the three presidencies, for the years from 1865-66 to 1871–72, *App.* 893, 894——Expenditure of 1863-64 compared with that of 1871-1872 for medical services, *ib.* 904.

Medical Funds. See *Military and Medical Funds.*

Migration of Labour. Statement on the subject of the migration from Nagpore to Berar and the Hyderabad Assigned Districts, *Harrison* 1935. 1996–2005. 2037, 2038——Impression that employment and the rate of wages, rather than the new system of local finance, account for the migration from certain parts of India to other parts, *ib.* 1996–2013. 2037, 2038——Migration to British Burmah adverted to in connection with the incidence of taxation in the province, *ib.* 2007-2010.

Military Expenditure. See *Army.*

Military and Medical Funds. Comment upon the course pursued in not treating as capital the balances transferred to Government on assuming the liability of certain annuity funds, *Sir C. E. Trevelyan* 1601–1603.

Statement to the effect that the Finance Accounts give no satisfactory information to Parliament or to the public relative to the military and medical funds taken over by the Government of India, *Goodliffe* 2740-2750.

Further explanation of the amendments required in the accounts as regards the military funds and medical funds, so that the capital may be clearly shown as well as the annual charge for pensions, *Goodliffe* 2820-2825.

Inaccuracy of the view of Mr. Goodliffe that considerable abatements are made on the military fund payments in India, *Harrison* 4168, 4169——Examination in detail relative to the system of account in the matter of the military and medical funds taken over by Government, and the course pursued in the absorption of the balances; the effect of the operation was an addition to the debt, *ib.* 4283-4293. 4299-4379.

Military Officers (Civil Employment). See *Staff Corps.*

Military Works. Very large expenditure (more than 5,000,000 *l.*) upon military works, other than new barracks, since 1863, *Crommelin* 296–301. 305–308——Responsibility of witness for the general supervision of all military works, *ib.* 302–304.

Total of 9,311,957 *l.*, as the expenditure of the Government of India on military works, &c. from 1862–63 to 1870–71, *Innes* 2198-2204——Expenditure in this period of 725,160 *l.* on small works costing under 250 *l.* each, *ib.* 2205–2208——Average of 1,000,905 *l.* as the annual expenditure on military works during the ten years ending 1871–72, *ib.* 2248–2250.

Examination relative to the establishment charges in reference to barracks and other public works; grounds for the calculation that the proportion of the whole cost of salaries to the whole outlay in works from 1862–63 to 1870-71 is 14 per cent., *Innes* 2327-2363. 2366–2385——Increase of the expenditure on military works by the charge for tools, plant, &c, *ib.* 2352–2356.

Reference to an official inquiry into the system of accounts in India some years ago, when it was decided that the expenditure on military works carried out by the Public Works Department should be accounted for by that Department, *Innes* 2398–2400.

See also *Barracks*

Mint (Calcutta). Full information given in the Finance Accounts as to the receipts and charges of the Calcutta Mint, *Harrison* 4164, 4165.

Mooktee Nullah Reservoir. Very unsatisfactory proceedings of the Public Works Department in the construction of the Mooktee Nullah Reservoir, near Dhoolia, *Nowrozjee Furdoonjee* 5275-5277.

Report, 1873—*continued.*

Moturpha Tax. Information relative to this tax, as levied on certain permanently settled districts of Bengal, *App.* 688, 689.

Muhtarafa Tax. Lengthened period for which the muhtarafa tax was retained in the south of India, whilst in the Native states it is as prevalent as ever, *Sir C. E. Trevelyan* 765–767.

MUNICIPAL TAXATION:

Evidence in explanation of the system of town duties which formerly prevailed in India, and of the great obstruction caused thereby to the general trade; detailed statement on the subject in witness' official Report of October 1833, *Sir C. E. Trevelyan* 759-764. 1380. 1384-1397——Particulars in this Report as to the operation of these duties at Mirzapoor, Banda, and other towns, and as to the injurious effect upon the trade of those places, *ib.* 1386——Full operation formerly of the bonding system as a palliation of the town duties, *ib.* 1386——Explanation that, though strongly objecting to town duties as an octroi, witness would certainly maintain them rather than lose the advantages of municipal government, *ib.* 1392, 1393.

Reference to the Report of the Government of India on Town Duties in 1833, as showing the objections then urged against these duties; subsequent abolition of this system of finance, *Harrison* 1648, 1649——Nature of the objections made by the Government of India in 1864 to the system of town duties, *ib.* 1654——Explanations in connection with an Act of 1868, legalising the octroi system of taxation for towns in the North Western Provinces; this Act can only be applied where there is a municipality, *ib.* 1655-1665——Consideration by Sir William Muir of certain objections raised against the octroi system in the North Western Provinces; disapproval by him of the plan of farming the duties, as in the Central Provinces, *ib.* 1666-1670.

Total municipal levy of 624,080*l.* in Bengal, of which 273,127 *l.* arises in the Calcutta municipality; particulars as to the mode of assessment and distribution of these amounts, *Harrison* 1733–1743——Total of 165,000 *l.* raised in the North Western Provinces in 1870–71 by municipal taxes, including octroi duties; particulars hereon, *ib.* 1745–1754——Doubt as to the actual cost of collection of municipal taxes, *ib.* 1758, 1759.

Statement of the receipt from taxation in the municipalities generally in the Bombay presidency; particulars more especially relative to the town duties in Poonah, Surat, and other towns, *Harrison* 1877–1883——Nature of the check exercised by the Governor in Council before taxes are levied by the municipalities in Bombay, *ib.* 1884–1889——Fresh taxation proposed in towns in Bengal under Mr. Campbell's Municipal Bill; reasons for the rejection of this Bill by the Governor General, *ib.* 1960–1963. 2014——Provision made in some cases for the election of the municipal authority which has charge of the municipal taxation, *ib.* 2039, 2040.

Explanatory statement as to the constitution of the municipal committees of towns in Bombay, *Nowrozjee Furdoonjee* 4991. 5015–5025——Indirect way in which Commissioners are superseded and removed on the recommendation of the collector and magistrate of the district, *ib.* 5026–5028.

Return handed in, and explanation thereon, relative to the enormous increase (to the amount of 900 per cent.) of municipal taxation in the interior cities of the Bombay Presidency between 1856–57 and 1871–72, *Nowrozjee Furdoonjee* 5212–5222——Great number of articles on which town duties are levied in some places in Bombay; great increase of taxation from this source, *ib.* 5221.

Official documents and statistics in detail relative to municipal taxation in the different presidencies and provinces, *App.* 683, *et seq.*

Statements on the subject of municipal taxes and income of Calcutta and other towns in Bengal, *App.* 689. 695.

Statement showing the actual receipts from octroi in the municipalities of the North Western Provinces during 1870–71, and the estimated receipts during 1871–72, *App.* 735, 736——Income raised by municipal taxation in the North Western Provinces during 1870-71, and amount estimated for 1871–72, *ib.* 737.

Return relative to municipal rates and taxes, and charges in the Central Provinces in 1870–71 and 1871–72, *App.* 779.

Statement of municipal taxes in the city of Bombay in 1864 and in 1871, and in the district municipalities in 1856-57 and 1871–72, *App.* 849, 850.

Statement of the local and municipal receipts and expenditure of Madras Presidency in 1870–71 and 1871–72, *App.* 853.

Statement showing the income and debt of the various municipalities in Madras during the year 1870–71, *App.* 854, 855——Statement showing the expenditure in each of the Madras municipalities during 1870–71, *ib.* 856, 857——Statement showing the income and debt of the municipalities during the year 1871–72, *ib.* 858, 859——Also the expenditure in the several municipalities during 1871–72, *ib.* 860, 861.

Report, 1873—*continued.*

MUNICIPAL TAXATION—continued.

Extract from Bill to amend and consolidate the law relating to municipalities, as passed in the Legislative Council of the Government of Bengal on the 27th July 1872; schedules relative to the rates of municipal taxation, *App.* 864–866.

Paper showing the municipal rates and taxes imposed in the city of Bombay under Bombay Acts II. of 1865, I. of 1867, IV. of 1869, and III. of 1872, *App.* 870, 871——Produce of municipal rates and taxes in the Bombay Presidency, exclusive of the city of Bombay, in 1856–57 and 1870–71, *ib.* 871.

Mutiny. Increase of the gulf between the British and the Natives since the mutiny, *Lord Lawrence* 5700, 5701——Incentive to the mutiny through the Natives reporting at the time that there was a clear space, denuded of troops, between Calcutta and Delhi, *ib.* 5707. 5787.

Undue reduction of the English force in India at the time of the mutiny; great advantage if there had been 5,000 more European troops, the regiments having been short of their complement by about this number, *Lord Lawrence* 5780–5790——Peaceful state of the country before the mutiny; witness had however urged upon Lord Canning the reduction of the Native army and the increase of the British force, *ib.* 5788, 5789.

Immense evil of the mutiny, far beyond the value of any lessons it has taught us, *Lord Lawrence* 5834–5836.

Mutlah Railway. See *Calcutta and South Eastern Railway.*

Mysore. Grounds for the conclusion that a very extravagant financial arrangement was made in respect of Mysore, upon its restoration to Native rule, *Sir C. E. Trevelyan* 461. 608–610——Opinion that a great mistake was made in not permanently absorbing or annexing the province, *ib.* 461–463. 526, 527. 553–555.

Statement showing the area, population, &c., of each division of the province of Mysore, *App.* 602——Tribute of 245,000 *l.* received from Mysore, *ib.* 852.

N.

Nagpore. Remarks by the Chief Commissioner upon the emigration from the Nagpore Province into Berar and the Hyderabad assigned districts; question considered as to this resuling in any way from the new scheme of local taxation and finance, *Harrison* 1935. 1996–2005. 2037, 2038.

Calculation by Mr. Peddar as to the very small production of the land in five districts of Nagpore, *Dadabhai Naoroji* 6621.

Nana Maroji (Bombay Police). Unfairness in a young civilian having been appointed to a vacancy to which this gentleman should have been promoted, *Dadabhai Naoroji* 6735.

Naoroji, Dadabhai. See *Dadabhai Naoroji.*

Native Army. See *Army. Barracks,* 15.

Native Councils. See *Representative Institutions.*

Native Evidence. Satisfaction of public opinion in India by calling native witnesses before the present Committee, *Lord Lawrence,* 4829——Suggestion that it be left to the Governor General and the local governors to select the Native witnesses, without receiving applications from the latter, *ib.* 4829–4831.

Employment of witness in various public capacities in the Bombay Presidency over a period of many years, *Nowrozjee Furdonjee* 4833——He has also been Secretary to the Bombay Association, and has been deputed by that association and by the Poona Sarvajanik Sabba to give evidence before the Committee; explanation of the constitution and objects of these bodies, *ib.* 4833–4839.

Further statement that Native witnesses to give evidence before the Committee can best be procured through the Governor General; way in which he might select them, *Lord Lawrence* 5767–5773——Different classes of public opinion in India; expediency of the opinion of the interior of the country as well as of the Presidency towns being represented before the Committee, *ib.* 5774–5778.

Report, 1873—*continued.*

Native Evidence—continued.

Since 1855, witness has been chiefly resident in England as a merchant trading with India; he was previously Professor of Mathematics in the Elphinstone College of Bombay, *Dadabhai Naoroji* 6473-6476.

Correspondence between the East India Association and the Committee, and between the Committee and the India Office and Treasury, upon the question of the attendance of native witnesses; objection by the Treasury to the allocation of 10,000 *l.* for the purpose, as proposed by the Committee, *App.* (*Second Rep.*) 7-9.

Conclusions and suggestions of the Committee on the subject of the reception of evidence from inhabitants or Natives of India, *Second Rep.* iii, iv——Proposal by the Committee, objected to by the Treasury, that 10,000 *l.* be supplied from Imperial sources for the expenses of native witnesses, *ib.* iv.——Special attention of the House drawn to this subject, *ib.*

Arrangements being made for the attendance of Native witnesses before the Committee at the commencement of next Session, *Third Rep.* iii——Steps to be taken by Government for providing for the expenses of Natives who may be selected to attend, *ib.*——Examination of two Natives of India before the Committee during the present Session, *ib.*

Native Opinion. See *Native Evidence.* *Representative Institutions.* *Taxation.*

Native Princes. Disapproval of its being a condition of pensions to Native princes that the money must be spent in India, *Sir C. E. Trevelyan* 522-525——Statement on the subject of the pressure brought to bear by Native princes, through Parliament, upon the Home Government, *ib.* 727-735——Prevention of much abuse in the way of pensions to Native dynasties if there had been local representative councils, *ib.* 884, 885.

See also *Adoption.* *Carnatic, Nawaub of.* *Tippoo Sultan.*

Native States. Way in which not only Mysore but other Native States have benefited by British administration, at the cost of the inhabitants of British India, *Sir C. E. Trevelyan* 608-610——Objection to the Native States being now called upon to contribute their full quota towards military, police, &c. *ib.* 609, 610.

Obstacles to any disarmament of the Native chiefs and their troops, *Lord Lawrence* 5300——Separate treaties with the several Native States, the general rule being not to interfere in the interior administration of any of the large states; approval of this system, *ib.* 5494-5497——Breach of faith if the Native States were asked to share in the military expenditure, *ib.* 5497.

Disapproval, for the present, of any alteration of the practice of dealing separately and directly with each state, *Lord Lawrence* 5498, 5499——Approval of the appeal to the Secretary of State in Council from decisions in India affecting the Native chiefs; objection to a judicial appeal in such cases, *ib.* 5500, 5501.

Statement of the area and population of the Native States under the Government of India, *App.* 603, 604.

Statement furnished by the Government of India, showing the tributes and contributions paid by Native States, *App.* 634-643——Amount of contributions now collected from the Native States under the Government of Bengal, *ib.* 694——Amount of tribute s and contributions from Native States in the Bombay Presidency received in 1856-57 and since that year, *ib.* 846, 847.

Natives, Condition of. See *Condition of the People.*

NATIVES (PUBLIC EMPLOYMENT):

1. *Advocacy by Sir Charles Trevelyan of a much larger Employment of Natives in the Civil Service.*
2. *Views of Lord Lawrence as to the expediency of extended Employment, subject to careful restrictions.*
3. *Public Works Department; Native Complaints submitted.*
4. *Exception taken to Native Employment in the Forest Service.*
5. *Education Department.*
6. *Question of reduced Salaries of Native Employés as compared with Europeans.*

1. *Advocacy by Sir Charles Trevelyan of a much larger Employment of Natives in the Civil Service:*

Strong advocacy of an increased employment of Natives, *Sir C. E. Trevelyan* 848-854——Solemn pledges already given to employ the Natives equally with Europeans, according to their qualifications, though practically nothing has yet been done in fulfilment of such pledges, *ib.* 849. 852——Excellent qualifications of the Natives for civil offices of various kinds, as in the Customs, the Judicial Department, &c., *ib.* 851.

Suggested development, more vigorously, of the policy of opening better paid and more responsible appointments to the Natives, *Sir C. E. Trevelyan* 1077-1079——Necessity of the employment of a large number of ill-paid Natives in the assessment and collection of such taxes as the income tax and license tax, *ib.* 1077.

Further explanation of witness' views relative to the best means of introducing the Natives of India into the public service; system of competition essential before admission,

Report, 1873—*continued.*

NATIVES (*PUBLIC EMPLOYMENT*)—continued.

1. *Advocacy by Sir Charles Trevelyan of a much larger Employment, &c.*—cont$_{d}$.

Sir C. E. Trevelyan 1542-1563——Entire fitness of Natives, and of East Indians, for employment in the Revenue and Judicial Departments, *ib.* 1542, 1543——Important gain, politically and financially, by an extended employment of Natives, *ib.* 1543, 1544.

Opinion that Natives should first enter the uncovenanted service, and should prove their fitness for higher appointment before admission to the covenanted civil service; objections on the other hand to direct admission, on competition, to the covenanted service, *Sir C. E. Trevelyan* 1553-1562——Inexpediency of any further delay in giving practical effect to the promised admission of Natives to the uncovenanted service; approval of Parliamentary action in the matter, *ib.* 1554. 1558, 1559. 1563. 1570.

Witness submits that his fellow-countrymen are perfectly qualified for extended employment and higher appointments in the Civil Service generally (and in the Public Works Department more particularly), and contends that they have a first claim to such employment, *Nowrozjee Furdoonjee* 5148 *et seq.*——Very efficient management of the naval dockyard at Bombay by Natives, *ib.* 5262——Comment upon the exclusion of Natives from the post of magistrate or assistant magistrate in the Mofussil, *ib.* 5862.

Grievance in Government having entirely ignored the just claims of Natives to appointments in the higher department of the Civil Service; violation of the pledges given on the subject in the Royal Proclamation, *Dadabhai Naoroji* 6734, 6735——Complaint also as to the very unfair treatment of the Natives as regards the lower appointments in the uncovenanted service; policy rather to restrict still further the number of such appointments, *ib.* 6735——Grievance in the discontinuance of the Government of India scholarships which were granted at the request of the East India Association, *ib.* 6737-6739. 6780-6786.

2. *Views of Lord Lawrence as to the expediency of extended Employment, subject to careful restrictions:*

Approval of employment of Natives in the public service, so long as due regard is had to efficiency and to the authority of British rule, *Lord Lawrence* 4820, 4821. 4823.

Bias in some departments, but not in all, against the employment of Natives, *Lord Lawrence* 5321——Satisfactory administration of the local treasuries when witness was in India; employment of Native treasurers as well as of English officers, *ib.* 5321-5323——Approval of some check whereby the preparation of Natives in the higher class of uncovenanted appointments should not be unduly limited, *ib.* 5330, 5331.

Great difficulty in working the civil administration of the country if Natives were allowed to rise in large numbers to the higher positions in the Civil Service, *Lord Lawrence* 5519, 5520.

Argument that notwithstanding the promises held out in the Queen's Proclamation relative to the full and free admission of the Natives to the public service, it is not sound policy to carry into operation the promises in question, *Lord Lawrence* 5628-5632——Expediency of so much impartiality towards the Natives as is consistent with our hold on India, *ib.* 5631, 5632.

Approval of a large employment of Native judges, great care being taken in their selection, *Lord Lawrence* 5690-5693——Expediency of the chief administrator of a district being an Englishman; full admission however as to the efficiency of Natives as magistrates or deputy collectors, *ib.* 5691. 5694-5698——Further approval of the extended appointment of Native judges, under limitations, *ib.* 5735-5740.

3. *Public Works Department; Native Complaints submitted:*

Positive denial of statements made before the present Committee in justification of the exclusion of Natives from public employment as civil engineers; inaccuracy of the view that they are not and cannot become qualified for the profession, *Nowrozjee Furdoonjee* 5148 *et seq.*——Evidence in disproof of the statement that due encouragement is given by Government to the training and employment of Natives as civil engineers, *ib.* 5152 *et seq.*

Witness submits that it is the fault of Government that Natives have not been appointed to the post of superintending engineer; with proper facilities they are perfectly competent to qualify for the highest rank, *Nowrozjee Furdoonjee* 5164-5177——Grounds for the statement that the out-door engineering work on public structures generally in the Bombay Presidency is really done by Natives, and that the European engineer in charge only visits the works once in ten days or so, *ib.* 5178-5186.

Injustice in Natives not being admitted to the upper grade of the engineering service, although they have frequently passed better examinations than Europeans, *Nowrozjee Furdoonjee* 5186——Several works have been entirely carried out by Natives in a highly creditable manner, *ib.* 5187, 5188.

Further evidence in refutation of the statement that Government had offered high attractions to Natives in the engineering department, to which they have not responded; numerous instances cited, on the other hand, of the competence and ability of Natives as engineers, their exclusion from the upper appointments in the department being a great injustice, *Nowrozjee Furdoonjee* 5232-5267.

Paper

Report, 1873—*continued.*

NATIVES (*PUBLIC EMPLOYMENT*)—continued.

3. *Public Works Department; Native Complaints submitted*—continued.

Paper submitted, and explanations thereon, relative to important public works constructed or designed by Natives, *Nowrozjee Furdoonjee* 5232-5238——Complaint as to the non-promotion of Native engineers of high efficiency, and as to the undue promotion of Europeans, *ib.* 5246-5250——Great hardship of the case of the Native subordinates of the engineering department; paper submitted hereon, *ib.* 5250-5260.

Strong testimony borne by Colonel Wilkins in 1864 to the excellent qualifications of the Native subordinates of the Public Works Department, *Nowrozjee Furdoonjee* 5263——Statement relative to the valuable services rendered by Mr. Nusserwanjee Chandabhoy in the Public Works Department, whereas promotion was denied him, so that he and another deserving Native left the service in disgust, *ib.* 5263-5267.

Formal protest by witness against the deliberate exclusion of his fellow-countrymen from all the higher grades of the Public Works Department, *Nowrozjee Furdoonjee* 5267——He submits that this grievance should be remedied, and that justice be further done by placing the Native subordinate establishments on a footing of equality with the European subordinates, *ib.*

Complaint as to the great discouragement of Natives for service in the engineering department of India, *Dadabhai Naoroji* 6736.

List of important public works constructed by Natives, *App.* 872, 873.

Memorial from uncovenanted Native officers in the Public Works Department in Bombay, submitting their claims to improved status and pay, *App.* 873-876.

4. *Exception taken to Native Employment in the Forest Service:*

Witness doubts the fitness of Natives for employment in the Forest Department, special training and instruction being apparently necessary, *Lord Lawrence* 5314-5320——Instances of destruction of forests owing to the recklessness of Natives, *ib.* 5318-5320.

5. *Education Department:*

Injustice in the systematic exclusion of Natives from all the better paid educational grades, as in Bombay, *Nowrozjee Furdoonjee* 5968. 5977-5984——Expediency of a large reduction in the education inspectors' salaries, whether filled by Europeans or Natives; ample supply of qualified Natives at very much lower salaries, *ib.* 5969-5992.

6. *Question of reduced Salaries of Native Employés as compared with Europeans:*

Propriety of smaller salaries to Natives than to Europeans holding the same offices; means thereby of reducing the Civil expenditure, *Sir C. E. Trevelyan* 848-854——Fairness of lower remuneration to Natives than of Europeans in the same offices, *Lord Lawrence* 4822-4826.

Opinion that a reasonable standard of remuneration should be fixed for Native employés, and that Europeans in India desirous of entering the public service should come under the same standard, *Lord Lawrence*, 5309-5313.

Injustice in Natives not being as well paid as Europeans for the same work; further injustice in the better paid offices being withheld from Natives, *Nowrozjee Furdoonjee* 5251-5259——Further argument that Natives, being duly qualified for judicial appointments, should be in fairness promoted to the higher grades, and should receive the same salaries as Europeans holding the same posts; the salary should, in fact, be fixed with reference to the work to be done, irrespectively of the doer, *ib.* 5863-5877. 5977-5984.

Great saving to be made in the cost of the civil administration by an extensive employment of qualified Natives at lower salaries than are given to Europeans, *Dadabhai Naoroji* 6776, 6777.

See also *Ardaseer Cursitjee Wadia.* *Army, XII.* *Nana Maroji.* *Northcote, Sir Stafford.* *Nusserwanjee Chandabhoy.* *Poonah Civil Engineering College.* *Roorkee College.*

Natives (Treatment by Europeans). Causes of the increased tendency of the English officials to look more to home interests, and to sympathise less than formerly with the Natives, *Lord Lawrence* 5699-5703——Great importance of the European officials commanding the affection or respect of the Natives, *ib.* 5704, 5705.

Navy and Marine. Undue expense thrown upon India as regards the navy, the annual subsidy in aid of Imperial funds not being a fair charge upon the revenues of India, *Sir C. E. Trevelyan* 446-451——Obsolete and costly character of the Indian navy, so that it was wisely abolished; it had, however, done good service, *ib.* 446-449. 517-520——Equal claim upon Australia and other Colonies as upon India for contributions in aid of the navy, *ib,* 446——A few gunboats in the Persian Gulf are all that is required in the way of a special navy, *ib.* 450. 548, 549.

Report, 1873—*continued.*

Navy and Marine—continued.

Comment upon the action of the Government of Bombay in maintaining an expensive establishment of vessels, &c., when the Indian navy was abolished, *Sir C. E. Trevelyan* 503——Further statement as to the unfairness of charging India with any portion of the cost of naval protection, *ib.* 548-552. 845——Opinion that it would be far better to depend on the British navy and on hired transports for all naval duties, *ib.* 845-847.

Further disapproval of the charge against India for the services of the navy in the Persian Gulf, *Sir C. E. Trevelyan* 1055-1060——Considerable sum formerly expected to be saved by the absorption of the Indian navy into the Royal navy, *ib.* 1061.

Large saving to India by her connection with England in not being required to support a navy, *Maclean* 2552.

Considerable increase in the naval expenditure of Bombay in 1871-72, *Nowrozjee Furdoonjee* 6983——Expediency of India being relieved of charge in respect of the British navy in the Indian seas, *ib.* 6984.

Statement showing the cost of the Indian navy in the year 1861-62, as compared with the expense of the new establishment of the Bombay Marine, including pensions and charges for naval protection, *App.* 644.

Statement showing the marine charges of Bengal, Madras, and British Burmah, for 1861-62, and 1871-72, with an abstract of the total marine charges during those years, *App.* 645, 646.

Official explanation from Bombay relative to the expense of marine tours of the Governor, *App.* 866——Explanation that the Governor has no yacht at his exclusive disposal, *ib.* 866, 867.

Non-agricultural Cess (Bombay). See *Bombay*, i, 5.

NORTH WESTERN PROVINCES:

Statement of the amount produced in the North Western Provinces by the road cess, the education cess, and the district postal cess, respectively, *Harrison* 1744, 1745. 1755——Explanation relative to the cess in the North Western Provinces now realising 181,240 *l.* for the maintenance of the village watch, *ib.* 1745——Local cess also, to the amount of 161,000 *l.* in 1870-71, for the payment of the village accountants, *ib.*——Aggregate of 628,943 *l.* levied in the North Western Provinces, from local funds, *ib.* 1756.

Deficiency of 8,030 *l.* to be made up in the North Western Provinces from local sources under the scheme of 1871; local estimate of 102,000 *l.* as the amount really required, the additional sum being chiefly in respect of roads and buildings, *Harrison* 1964—— Explanation as to the cess proposed to be levied, respectively, on land in the permanently settled districts, and on land in the districts whose term of settlement had expired; amount produced by the cess, *ib.* 1964-1967. 1973——Several heads of expenditure of the new cess in the North Western Provinces, the amount for each district being assigned by the Lieutenant Governor, *ib.* 1968-1971.

Further explanation on the subject of the cess of three per cent. on the rental for the payment of the village accountants in the North Western Provinces, *Harrison* 2046-2048.

More economical traditions in the North West Provinces and the Punjaub than in Bombay, *Lord Lawrence*, 5475.

Official statements relative to the Imperial and local taxes in the North Western Provinces down to 1871-72, *App.* 712 *et seq.*

Copy of Act of 1871 for the levying of rates on land for local purposes, *App.* 831-833.

See also *the Headings generally throughout the Index.*

Northcote, Sir Stafford. Reference to a Despatch of Sir Stafford Northcote in 1868, recognising the inherent right of the natives to appointments in the uncovenanted service; this however has been a dead letter, *Dadabhai Naoroji* 6735.

Nowrozjee Furdoonjee. (Analysis of his Evidence.)—Employment of witness in various public capacities in the Bombay Presidency over a period of many years, 4833——He has also been Secretary to the Bombay Association, and has been deputed by that Association and by the Poona Sarvajanik Sabba to give evidence before the Committee; explanation of the constitution and objects of these bodies, 4833-4839.

Discontent produced in many ways by the manner in which the administration of Bombay is carried on, 4840, 4841——Complaint as to the constitution of the Legislative Council of Bombay, the non-official element being in a minority, and there being only four Native members out of thirteen, 4842-4846——Circumstance of one or two of the Native members being utterly unacquainted with the English language, 4846.

Expediency

Report, 1873—*continued.*

Nowrozjee Furdoonjee. (Analysis of his Evidence)—*continued.*

Expediency of enlarging the Legislative Council in the direction of Native representation, as a means of securing efficient legislation; willingness of Natives of position to serve without pay, 4847-4849——Argument that the Legislative Council should, if properly re-constituted, control the expenditure of the Government of Bombay, 4850, 4851——Instance, in 1871, of the financial statement of Government, under the decentralisation scheme, having been submitted to the Legislative Council; strenuous opposition then made by the Native members to three proposals for fresh taxation, 4851-4859——Rejection by the Council of a proposed tax on marriage and religious feasts, 4855-4858. 4864-4869——Complaint that the deficit under the decentralisation scheme was not met by reduction of expenditure instead of by new taxes, 4858, 4859.

Representations made in the Legislative Council against the proposal in 1871 for levying a contribution on the municipalities of the large towns in Bombay, for the expenditure of the police; this tax was however passed, 4858, 4859. 4864——Information relative to the non-agricultural cess, under the Act of 1871, and the arguments for and against the measure; considerable hardship involved in this tax, which was however passed in the face of much public opposition, 4859-4864——Uselessness of the Native petitions and remonstrances against the Bills in 1871 for the new taxation, 4862-4864.

Evidence in strong condemnation of the withdrawal from the courts of justice in Bombay of the jurisdiction which they possessed for many years in cases relating to alienated or rent-free lands of various kinds, and in cases of pensions, &c., 4870-4878——Strong condemnation also of the constitution and operation of the Inam Commission of Bombay; wholesale confiscation of proprietary rights thereby, 4870-4879——Necessary abolition of the Inam Commission on account of the excessive disaffection which it created, 4879——Question considered whether, when Government originally confirmed by proclamation the rights then existing in the Deccan, reservation was not expressly made as regards cases which required investigation, 4881-4886.

Instances of the Government of Bombay having carried out measures for which there was no legal sanction; *ex post facto* legislation in these cases, 4886, 4887——Levy of a local cess in 1863 for roads, &c., for which there was no legislative sanction till 1869; 4886, 4887——Lapse of a considerable time before legality was given to the city survey operations carried out in Ahmedabad and Surat, 4887-4889——Great complaint among the Natives in Bombay on account of the system of secrecy which pervades the Government administration, 4887——Inaccessibility of the public records throughout the Presidency, 4887. 4966——Dissatisfaction of the Natives with several of the Imperial taxes and the way in which they are levied, 4888.

Evidence in detail relative to the City Survey Act of Bombay, the circumstances under which it was passed, and the immense dissatisfaction caused by its operation in Ahmedabad, Surat, Broach, and other large towns; great grievance of the people, without any any practical redress in the shape of appeal, 4888-4898——Strong complaint against the conduct of Mr. Waite in carrying out the City Survey Act in Broach; numerous prosecutions and fines to which inhabitants have been subjected without any practical redress, general discontent being the result, 4889-4896.

Very great dissatisfaction of the inhabitants of the city of Bombay by reason of the Local Acts for the management of the affairs of the municipality; details as to the grievances under certain Acts in 1865, 1869, and 1872; 4899-4931——Great grievance in respect of Act II. of 1865; exceedingly expensive establishment created thereby for municipal administration, the financial effect being most unsatisfactory, owing to the recklessness of the municipal commissioner (Mr. Crawford), 4899-4903——Repeated and urgent representations made by the inhabitants against the administration under the Act of 1865; delay and neglect on the part of Government before inquiry was instituted, 4899-4903——Strong remonstrances also against certain provisions of the Bombay Municipal Bill of 1872, which was however passed into law with some modification, 4899-4901. 4918, 4919.

Great increase of the local taxation of Bombay for municipal purposes, eight new rates and taxes having been imposed since 1864; the people cannot bear this heavy burden, which now amounts to from fifteen to twenty per cent. on the rental, 4903-4917——Complaint as to the large increase of municipal taxation for the police, whilst the administration is enirely under Government, 4904-4909——Unfairness in Government no longer contributing to the police charge; different practice at Calcutta and Madras, 4905——Illustration of the absence of control in the municipality over the police expenditure for which they are liable, 4906.

Enhancement of nearly 250 per cent. in Bombay municipal taxation since 1864; 4917——Definition of the burden by Sir Seymour Fitzgerald as "almost crushing," 4917——Grounds for objecting to the exemption of Government lands and buildings from municipal taxation, 4917-4919——Several objections urged against the Bombay Municipal Act of last year, as regards the qualification of members of the corporation, the power of Government to control and increase the police expenditure, the imposition of fresh liabilities on the municipality, &c., 4919-4931.

Report, 1873—*continued.*

Nowrozjee Furdoonjee. (Analysis of his Evidence)—*continued.*

Evidence in strong disapproval of the Bombay Local Funds Act of 1869 for raising cesses for roads, schools, &c.; complaint especially as to the administration by the district collectors of the funds thus raised, 4932 *et seq.*——Hardship and injustice in the imposition of new cesses upon the ryots who hold under the thirty years' settlement and upon owners of rent-free lands, 4932, 4933——Argument that money raised under the Local Funds Act is frequently applied to Imperial purposes, 4936, 4937.

Statement in strong condemnation of the action of the revenue collectors as regards cesses for roads, schools, and other local purposes; instances of the municipal committees being entirely superseded in the administration of the funds, and of complaints against collectors being altogether disregarded, 4938-4978. 4985-4990——Complaint especially against Mr. Borradaile as collector of Ahmedabad; several occasions on which he has altogether set aside the action of the municipal committee, whilst there are, practically, no means of redress, 4942-4984. 4987, 4988——Fear of the people to prefer complaints against the collectors as being so much in their power, any complaints being referred back to the collectors themselves for explanation, 4957-4974.

Influential petition, signed by 700 inhabitants of Ahmedabad, setting forth in detail the various grievances of the municipality; grounds for the statement that when the Governor of Bombay visited Ahmedabad in January last the local officials used their influence to prevent this petition being presented to the Governor by a deputation of the inhabitants, 4978-4984.

Comment upon the refusal of Government sanction as regards an outlay by the municipal committee of Punderpoor for the erection of reservoirs, 4985-4987. 4989, 4990——Explanatory statement as to the constitution of the municipal committees, 4991. 5015-5025——Complaint as to the large expenditure out of local funds or cesses upon the erection of bungalows for Europeans, 4992-4998——Necessary sanction of the superior authority before local monies are expended on bungalows, or other objects, 4999-5001.

Levy of the education cess upon the agricultural classes only, whilst all classes benefit by the schools, 5002-5009——Total of one anna in the rupee on the Government assessment as the amount of the cesses for all purposes, 5010-5014.

[Second Examination.]—Several papers handed in by witness in illustration or support of his former evidence, 5026——Total of twenty-five municipal commissioners of Broach, of whom eleven are Government officials; several *ex officio* commissioners, *ib.*——Indirect way in which commissioners are superseded and removed on the recommendation of the collector and magistrate of the district, 5026-5028.

Information relative to the large diversion of local funds or cesses in Surat and several other collectorates for certain roads and other public works of an Imperial character; misappropriation also in the local funds of one district being partially expended in another, 5029-5042. 5062-5065——Comment upon certain irregularities and defalcations discovered in 1871 in the Local Fund Engineering Department of the Tanna district; mode of appointment of the engineer officer in this case, 5042-5046——Complaint relative to the oppressive tolls on roads and bridges throughout the Bombay Presidency; vexatious manner in which levied, 5047-5062.

Evidence in support of the statement that great hardship and injustice are inflicted in levying the non-agricultural tax, whilst those aggrieved are practically without redress, 5067-5077.

Strong remonstrances made in 1869 against the Cotton Frauds Bill of that year, 5078, 5079——Failure of the Cotton Frauds Act to remedy the evils for the suppression of which it was passed; representation by the Bombay Chamber of Commerce to this effect, 5079. 5085-5090. 5104——Argument as to the impolicy of the Act, and the inexpediency of the large expenditure incurred in the maintenance of the Cotton Frauds Department, 5079-5104.

Great dissatisfaction in Bombay by reason of the bunder fees or wharfage dues charged under the Bunder Fees Act of 1870; belief as to increased facilities not having been afforded in consideration of these charges, 5105-5126——Complaint as to the undue haste with which the local taxation measures of 1871 were pushed through the Council, without the inhabitants of the Presidency having been given any opportunity of considering or opposing them, 5126——Proclamation of new laws in the "Gazette," there being vernacular translations posted at the cutcherries, 5127, 5128.

Conclusion as to the necessity of enlarging the Legislative Council of Bombay, and of giving adequate representation to the Natives, 5129——Suggestions relative to the mode of election of Native members of the council, so that the principal towns and districts throughout the Presidency may be elected, 5129. 5137-5139——Expediency of the annual budget being framed by a duly qualified functionary and being fully discussed by a properly constituted council, 5129——Contemplated power of the Governor in Council to veto any resolution of the council for reasons to be publicly assigned, 5129-5136.

Several

Report, 1873—*continued.*

Nowrozjee Furdoonjee. (Analysis of his Evidence)—*continued.*

Several exceptions taken to the constitution of the Executive Council of Bombay, and the mode in which the business is conducted, 5141, 5142——Large salaries and expenses of the Governor and his staff, 5141——Considerable charge for the Commander in Chief and his staff, 5141-5142——Heavy expense of the Secretariat Department; great increase of this charge since 1856-57, *ib.*

Great delay in the transaction of business in the Executive Council; great dissatisfaction caused, 5142——Expediency of more frequent and regular meetings of the Council, and of due deliberation before decisions are arrived at, *ib.*——Grounds for the conclusion that there is no necessity for a separate Commander in Chief for Bombay or Madras; room for much economy in this direction, *ib.*——Open question whether it is advisable to have any council for Bombay; different opinions on the subject, 5143-5145.

Approval of an amalgamation of the native army, 5146——Opinion that the army of India should be purely local, and subject to the Orders of the Government of India, without any control or jurisdiction in the Commander in Chief in England, 5146——Obstacle to reduction of expenditure by reason of the submission of all proposals to the Imperial Authorities, 5146, 5147.

Positive denial of statements made before the present Committee in justification of the exclusion of natives from public employment as civil engineers; inaccuracy of the view that they are not, and cannot become qualified for the profession, 5148 *et seq.*——Information relative to the staff and working of Roorkee College, witness submitting that natives are but nominally instructed for civil engineering or anything else, 5151——Reference to an official report on the Poona Civil Engineering College in 1867, as showing the expediency of further encouragement and employment of natives as civil engineers; testimony in this Report to the qualifications of natives for service in the Public Works Department, 5151, 5152. 5160-5164.

Evidence in disproof of the statement that due encouragement is given by Government to the training and employment of natives as civil engineers, 5152 *et seq.*——Commentupon the circumstances under which Government withdrew one appointment given annually in Bombay to the best qualified student of Poona College, 5152-5157. 5162, 5163——Reference to a report by the principal of Roorkee College as testifying to the fitness of natives for extended employment in the Public Works Department, 5157-5159.

Witness submits that it is the fault of Government that natives have not been appointed to the post of superintending engineer; with proper facilities they are perfectly competent to qualify for the highest rank, 5164-5177——Instance of a native in a high position as civil engineer in the service of the Great India Peninsula Railway Company, 5167-5173——Grounds for the statement that the out-door engineering work on public structures generally, in the Bombay Presidency, is really done by natives, and that the European engineer in charge only visits the works once in ten days or so, 5178-5186.

Several important works carried out under European supervision have broken down, 5186. 5188——Equally long course of study at Poona College as at Cooper's Hill; higher standard of examination at the former than the latter, 5186——Injustice in natives not being admitted to the upper grade of the engineering service, although they have frequently passed better examinations than Europeans, *ib.*——Several works have been entirely carried out by natives in a highly creditable manner, 5187, 5188.

[Third Examination.]—Witness submits a Return showing the municipal rates and taxes levied in the city of Bombay under the Acts of 1865 and 1872 respectively, 5189, 5190——Explanation that an apparent reduction in the house-rate under the Act of last year is not a real reduction, 5191, 5192——Prospect of increased charge for the police as the population of the city increases, 5193, 5194——Several public buildings under the supervision of the police, whilst some only are under the charge of soldiers, 5195-5197——Great increase of the sewage cess, 5199.

Particulars in connection with the water supply of Bombay, and the water rate; the latter is very high and unequal, 5200-5209——Fall of rents in Bombay as a consequence of the crisis of 1866; 5209, 5210——Further reference to the large per-centage of the total rates in proportion to the assessed rental, under the Act of 1872; 5211——Short period within which the Act is expected to come into operation, 5212.

Return handed in, and explanations thereon, relative to the enormous increase (to the amount of 900 per cent.) of municipal taxation in the interior cities of the Bombay Presidency between 1856-57 and 1871-72; 5212-5222——Great number of articles on which town duties are levied in some places, 5221——Further particulars in elucidation of the very unsatisfactory working of the Cotton Frauds Department, 5222, 5223. 5227-5229.

Charge upon local funds in respect of travellers' bungalows on imperial lines of roads; comparatively small expense of dhurumsalas maintained out of local funds 5224-5226——

Report, 1873—*continued.*

Nowrozjee Furdoonjee. (Analysis of his Evidence)—*continued.*

Comment upon the refusal of Government to allow the Esplanade Fee Fund of Bombay to be amalgamated with the General Municipal Fund, 5229–5231.

Further evidence in refutation of the statement that Government had offered high attractions to natives in the Engineering Department to which they had not responded; numerous instances cited, on the other hand, of the competence and ability of natives as engineers, their exclusion from the upper appointments in the department being a great injustice, 5232–5267.

Paper submitted, and explanations thereon, relative to important public works constructed or designed by natives, 5232–5238——Comments upon the failure of various important works designed and constructed by Europeans, as in the case of viaducts and bridges on the Great India Peninsula Railway, 5240–5246——Complaint as to the non-promotion of native engineers of high efficiency, and as to the undue promotion of Europeans, 5246–5250.

Great hardship of the case of the native subordinates of the Engineering Department; Paper submitted hereon, 5250–5260——Injustice in natives not being paid as well as Europeans for the same work; further injustice in the better paid offices being withheld from natives, 5251–5259——Exceedingly efficient services rendered by Mr. Ardaseer Cursitjee Wadia, formerly in charge of the Government Steam Factory at Bombay, 5260–5262——Great efficiency with which the Naval Dockyard at Bombay has been managed by natives, 5262.

Reference to certain examination papers, as showing that the course of studies pursued in the Poona College is of a very superior character, 5262, 5263——Strong testimony borne by Colonel Wilkins in 1864 to the excellent qualifications of the native subordinates of the Public Works Department, 5263——Statement relative to the valuable services rendered by Mr. Nusserwanjee Chandabhoy in the Public Works Department, whereas promotion was denied him, so that he and another deserving native left the service in disgust, 5263–5267.

Formal protest by witness against the deliberate exclusion of his fellow-countrymen from all the higher grades of the Public Works Department, 5267——He submits that this grievance should be remedied, and that justice be further done by placing the native subordinate establishments on a footing of equality with the European subordinates, *ib.*

Complaint as to the great expense incurred upon the Hydraulic Lift Dock at Hog Island without previous discussion locally, whilst there is good ground for concluding that the result will be a total failure, 5268–5271——Undue cost of the conveyance of troops between England and India on account of the special ships and establishment maintained for the purpose, 5272, 5273——Comment upon the outlay of public money in widening a private road leading to the Government House at Malabar Hill, 5273, 5274.

Several instances of public buildings involving much waste of public revenue, not to mention the failure of barracks at different places, 5274, 5275——Excess of expenditure on public works to the amount of from 25 to 50 per cent. owing to the want of proper management, 5275——Necessity of some radical change in the organisation of the department, *ib.*——Very unsatisfactory proceedings of the department in the construction of the Mooktee Nullah Reservoir, near Dhoolia, 5275-5277.

Great contrast between the accommodation provided for Native and for European soldiers; several grounds for complaint on this score, 5277–5283——Receipt of grain compensation by European but not by Native non-commissioned officers and soldiers, 5284, 5285——Large and unnecessary expense in respect of the staff of the British medical service in Bombay; new arrangement of this service since 1865 or 1866; 5285, 5286——Absence of necessity for the Sanitary Commission recently instituted, 5286——Exception taken also to the appointment of a Superintendent General of Vaccination, 5286–5288.

Excessive medical establishment attached to European regiments; room for economy by the extended employment of native medical men, these being well trained and qualified, 5288–5295——Grounds for complaint as regards the practical exclusion of natives from the grade of sub-assistant surgeons, 5296——Large and costly scale upon which the Registration Department is maintained, so that there is very little surplus from fees, 5297–5300.

[Fourth Examination.]—Increase of 40 per cent. in the cost of administration of justice in the Bombay Presidency between 1865-66 and 1870-71; 5845——Reduction in the number of courts since 1869, the provision of justice being inadequate, notwithstanding the excessive increase of charge, 5845. 5853——Very prejudicial results of the removal to Surat of the court of the second class subordinate judge of Olpad in June 1872; 5845——Mischievous effect also of the removal, in June 1869, of the subordinate judge's court from Broach to Wagga, 5845, 5846. 5853.

Great arrear of cases for trial at Surat, Broach, and other places, owing to the inadequacy of the establishments, 5845. 5853——Expediency of an increase of salaries of the native

Report, 1873—*continued.*

Nowrozjee Furdoonjee. (Analysis of his Evidence)—*continued.*

native judges and subordinate officers, 5846. 5851–5853——Considerable surplus derived from the stamps and fees in the courts of the lower grade, or small cause courts, throughout the Presidency; suggested reduction of these, 5846. 5850, 5851——Deficiency, on the other hand, in respect of the Bombay High Court and the district courts, the salaries being very high and the amount of work small, 5846–5850——Entire inadequacy of the establishment of the Small Cause Court at Poona, 5853.

Grounds for objecting to the offices of collector or assistant collector and magistrate being combined in one person; saving of expense and delay by separating the executive officers from the judicial officers, 5853–5857——Exceedingly small proportion of the criminal cases in the Bombay Presidency in 1871 which were tried and committed by the district magistrates, 5857–5862——Great expense of the High Court and district courts as compared with the expense of the subordinate courts, in proportion to the amount of work done, 5862.

Comment upon the exclusion of natives from the post of magistrate or assistant magistrate in the Mofussil, 5862——Argument that natives, being duly qualified for judicial appointments, should be in fairness promoted to the higher grades, and should receive the same salaries as Europeans holding the same posts; the salary should, in fact, be fixed with reference to the work to be done, irrespective of the doer, 5863–5877. 5977. 5984.

Statement relative to the exceedingly costly establishment of the Hfgh Court of Bombay, the very heavy costs of suitors, and the failure of justice in more ways than one, 5878–5889——Very heavy fees of counsel in the court, 5879–5885——Large salaries of the judges, eight in number, 5879——Appointment of Europeans to all the well-paid posts in the court, 5885——Several highly paid appointments attached to the court which should be reduced or abolished, 5885, 5886——Expediency of a large extension of the jurisdiction of the Bombay Small Cause Court, and of a reduction of the institution fee, 5890.

Very large travelling allowances paid for the Revenue Commissioners and their establishmeut, 5890——Statement as to its being prohibited by law, under heavy penalties, to impress labourers, or to seize carts or bullocks, notwithstanding which prohibition these practices are systematically resorted to by Government officials; instances of great abuse and hardship on this score, 5890–5923——Wide-spread discontent throughout the Bombay Presidency by the prevalence of forced labour and compulsory supplies, 5890——Doubt as to the abuse in question being due to the extortions of mere subordinates and servants, 5897–5904——Dissent from the view that forced supplies and forced transport may be legally obtained at certain fixed rates or at market rates, 5905–5923.

Evidence relative to the oppressive operation of the salt tax in Bombay, the people being exceedingly poor and altogether unable to supply themselves with a sufficient quantity of this necessary article of consumption, 5926–5957——Gradual increase of the salt duty in Bombay, so that it now amounts to 1,600 per cent. on the cost of production and manufacture, 5296——Inaccuracy of a statement before the Committee by the Rev. Dr. Wilson that the natives did not complain of the tax; instance (in Surat) of loud and bitter complaint, amounting to a riot, 5926. 5939.

Utter inability of the cultivators in Bombay to pay the same salt duty as the Bengalees; much higher assessment in the former presidency, 5926. 5935–5939. 5956, 5957——Large portion of the people of Bombay whose condition is wretched exceedingly, their income being so low that many are compelled to live on half diet, and many are reduced to a state of starvation, 5926–5955——Earnings of able-bodied men at the rate of from two and a-half to three and four rupees a month, 5927–5932. 5950–5955——Instances of the natives being obliged to mix their food with earth saturated with salt, 5944–5949.

Complaint as to the increase of police expenditure in the Bombay Presidency, the cost being now forty lacs of rupees, or an increase of four lacs since 1867–68; 5958–5964——Great reduction of the police force in Surat, Broach, Khaira, and other large towns, the present force being altogether inadequate, 5964–5967.

Evidence as to the excessive expenditure on superintendence and inspection in the educational department of Bombay, witness submitting that the work of inspection should be largely entrusted to natives, and that on this score much economy might be effected, 5968–5992——Very large salaries of the education inspectors, who are, exclusively, Europeans; just claim of natives to some of these appointments, for which they are perfectly well qualified, 5968–5992.

Injustice in the systematic exclusion of natives from all the better paid educational grades, 5968. 5977–5984——Expediency moreover of a large reduction in the inspectors' salaries, whether filled by Europeans or Natives; ample supply of qualified natives at very much lower salaries, 5969–5992——Comment upon the large salary and allowances (33,000 rupees a year) of the Director of Public Instruction in Bombay, the salary being

Report, 1873—*continued.*

Nowrozjee Furdoonjee. (Analysis of his Evidence)—*continued.*

larger than that of the same office in Bengal and Madras, 5992–5997——Advantage if the Director of Public Instruction in Bombay were not taken from the Civil Service of India, 5997–6001.

Rise of about twenty-five per cent. in wages in the city of Bombay in the last twenty years, whilst the price of living has increased forty per cent., 6002–6012——Comment upon the increase of about 350 per cent. in the staff and household expenses of the Governor of Bombay since 1856–57; 6013–6023——Exception taken also to the expenditure of about 180,000 *l.* a year for ecclesiastical establishments for Europeans in India, 6024–6028.

Constant agitation and discontent among the natives by reason of the unsatisfactory system in regard to local taxation, more especially since the decentralisation scheme, 6029–6044——Weight attached to the views of the late Sir Donald M'Leod as to the impolicy of imposing new taxes without any consultation of the people of India, 6034–6036——Imposition of new local taxes in spite of the remonstrances of the people, the feeling being that there is no necessity for them, and that the great and growing expenditure should be reduced, 6037–6039.

Very inconvenient practice in Bombay as to the payment of the land assessments in two instalments; relief if there were four instalments as formerly, 6045, 6046——Complaint relative to the levy of interest at the rate of ninety-four per cent. upon arrears of Government revenue; 54,000 persons were thus charged in 1867–68, the interest amounting to 43,481 rupees, 6046–6054——Approval of the ryotwaree settlement in Bombay, save that it should not be subject to frequent changes and revisions during the period of thirty years for which it is made, 6055–6057——Objection to the fee charged for notice when arrears of revenue are being called in, 6058——Great hardship in village commons being placed under assessment, so that the villagers can no longer graze their cattle upon them, 6058–6063.

[Fifth Examination.]—Quotation of a report by Mr. Pedder, Salt Commissioner, in July 1870, urging reasons against any further enhancement of the salt tax in Bombay, 6899——Further evidence as to the impoverished condition of the people of Bombay, and the heavy pressure of the land tax, so that they are quite unable to pay an increased duty on salt, 6901–6907——Information with further reference to the price and consumption of salt in the Presidency, 6904–6907.

Decrease in the rate of wages since 1868; average of about three rupees a month, 6907–6911——Total of 16,877 police in the Presidency, the population being thirteen millions; official statement that this number is too small, 6911——Pay of policemen at the rate of six or seven rupees a month, 6912——Great pressure of the income tax in Bombay, in addition to which the natives abhor the tax on account of its demoralising tendency; if the tax be a necessity it should be confined to the well-to-do classes, 6913–6922.

Very short-lived prosperity of the agricultural classes in Western India on account of the American War; the profits then made from the enhanced prices went partly in payment of former debts, and partly in luxury and extravagance, 6922–6925——Relapse of the inhabitants into their normal condition of poverty and want; witness can testify to this from personal observation in Guzerat and the Koncan, where numbers of the people are in debt, are without proper clothing, and are half famished, 6922–6939——Very few gold or silver ornaments now possessed by the mass of the population in Western India, 6922. 6928.

Decrease in the number of cattle in some parts of the Deccan owing to the absorption of the grazing lands, 6939, 6940——Complaint as to the great difficulty of cultivators in the Deccan in obtaining remission of assessments when their crops fail from want of rain; more liberal treatment formerly, 6940–6943——Ruin of many in their lands being sold by auction for arrears of assessment, 6943——Undue obstacles to cutting firewood, *ib.*——Heavy fines sometimes inflicted for not keeping the boundary marks in proper repair, 6943–6945.

[Sixth Examination.]—Denial of the accuracy of statements by Mr. Massey and others that the new settlement in Bombay is very low; sundry instances of immense increase of previous assessments, 6949–6972——Statement in an official report by Colonel Prescott that many villages in the Unkleser talooka of the Broach Collectorate had been highly assessed, 6946——Fallacy in basing the assessment upon an average of prices in past years, *ib.*——Views of Colonel Prescott as to the probability of a fall in prices, *ib.*

Increase of the assessment of the Indapoor talooka by 53 per cent.; in twenty-one villages in this talooka the assessment has been enhanced by from 75 to 149 per cent., 6946–6954. 6959——Excessive assessment in many other talookas, so that the ryots have been unable to pay the revenue; numerous distress warrants and sales of land in consequence, 6954–6959. 6971–6972——Increased rates, varying from 31 to 100 per cent. in Soopa talooka; great decline in the prices of produce since the assessment of this talooka in 1868; 6959–6971——Erroneous calculations by the settlement officers as

to

Report, 1873—*continued.*

Nowrozjee Furdoonjee. (Analysis of his Evidence)—*continued.*

to the produce of the fields, 6971, 6972——Instances of oppressive assessment of villages in the Konkan, 6972.

Ruinous litigation frequently forced upon the natives in order to recover their lands from attachment by the collectors, 6972——Grievance in Guzerat through the imposition of a water cess on lands irrigated from wells not constructed by Government; instances of official condemnation of this impost, *ib.*——Effect of the excessive assessments in driving the cultivators into the hands of the village sowcars, so that they largely become victims to usurious rates of interest as well as to ruinous litigation, 6972–6974——Very general indebtedness of the peasantry throughout the Deccan save in Khandeish, 6974–6976.

Want of a properly framed insolvency law for the Mofussil, 6974. 6983——Expediency also of the exemption of land and agricultural cattle and implements from sale, *ib.*——Suggested power in the civil courts to disallow usurious rates of interest, 6974——Paper submitted on the part of the Poona Association relative to the condition of the people in the Deccan, and the pressure of the land assessment, *ib.*

Proposition that Tuccavee advances be made freely by Government to the landlords and ryots; ample security for the money, which would be repaid with interest, 6976–6983——Proposed exemption from payment of extra cess in respect of water from wells constructed by private enterprise, 6983——Very large reduction proposed in the rate of interest charged by Government on overdue instalments of land revenue, *ib.*——Suggestion that there be four instalments, payable as formerly, *ib.*——Several causes for which remissions should be made, *ib.*——Proposed reduction of the enhanced rates of assessment imposed on the recent re-settlement of culturable lands, *ib.*——Sundry other suggestions for the relief of the ryots in various ways, *ib.*

Statistics, and explanations thereon, purporting to show that the stamp tax, court fees, and other costs of justice not only press excessively on the upper classes, but fall with crushing severity on the mass of the people, 6983.

Increase from 4,814,356 *l.* in 1856–57 to 8,266,178 *l.* in 1870–71 in the total expenditure in the Bombay Presidency; per-centage of increase under separate heads, 6983——Proposition whereby a considerable reduction may be effected in the cost of the Revenue and Magisterial Departments; that is, by separating the two services, and by abolishing the Revenue Commissioners and other highly-paid officers, *ib.*——Excessive charge also in respect of revenue survey, land settlement, and alienation; suggestions for a large reduction of this expense, *ib.*——Expediency of bringing to an end the revenue survey and settlement operations which are constantly going on in the presidency, *ib.*——Sundry other suggestions for the reduction or abolition of highly-paid officers, the establishments generally having been increased excessively, *ib.*

Comment upon the omission in 1871–72 to submit the Budget for India to the Legistive Council, 6983——Increase of 20,000,000 *l.* in the annual expenditure of India since the transfer of the Government to the Crown, *ib.*——Conclusion as to the necessity of a revision of the financial arrangements, and of the application of an effectual check in India upon the annual Budget, *ib.*—— Suggestion that the Budget be prepared by an independent and well-trained financier and be submitted to a properly constituted council, 6983, 6984—— Proposals for the re-constitution of the Legislative Council on a broader basis, and for the introduction of a much larger non-official element, in the shape of native representatives properly chosen, *ib.*——Conclusion that the great increase of the expenditure in India is the main cause of the financial deficits which have occurred, 6984.

Want of a careful re-adjustment of the financial charges as between England and India; various instances in which the former is unfairly relieved at the expense of the latter, 6984——Agreement that the cost of the India Office establishment should be borne by England in the same way as the cost of the Colonial Office is borne, *ib.*——Expediency also of India being relieved of charge in respect of the missions in Persia and China, *ib.*——Also in respect of Ealing Lunatic Asylum, *ib.*——Also in respect of the British Navy in the Indian Seas, *ib.*——Also in respect of the Indian troop service, and the passage of troops, *ib.*——Also in respect of recruiting charges and certain other payments disbursed by the War Office, *ib.*——Great relief to the finances of India if the foregoing rectifications be carried out, *ib.*——Just claim of India to be treated financially by the Impeiral Government with as much consideration as the Colonies, *ib.*.

Witness disclaims being actuated by any hostile motive towards the English Government; on the contrary, he believes it would be a great calamity to India if the connection between the two countries were severed, 6984.

Denial that the wretched condition of the ryots in many parts of the Bombay Presidency is due to over-populatian, 6984*–6987.

[Seventh Examination.]—Witness submits a Paper in confirmation of his evidence as to the enhancement of the assessment in the Bombay Presidency, 6988.

Report, 1873—*continued.*

Nowrozjee Furdoonjee. (Analysis of his Evidence)—*continued.*

In support of the statement that the exaction of local cesses in Bombay involves a breach of faith, witness quotes the testimony of the Government itself, 6989.

Nowrozjee Furdoonjee (*Documentary Evidence.*) Sundry Papers and Returns submitted by Mr. Nowrozjee Furdoonjee in elucidation of his evidence on various points, *App.* 870–884. 921–926.

Nusseerabad Barracks. See *Barracks*, 7.

Nusserwanjee Chandabhoy. Complaint as to the non-promotion of Mr. Nusserwanjee in the Public Works Department; eventually he resigned the service in disgust, *Nowrozjee Furdoonjee* 5263.

O.

Octroi Duties. See *Municipal Taxation.*

Olpad (*Bombay*). Very prejudicial results of the removal to Surat of the court of the second class subordinate judge of Olpad, in June 1872, *Nowrozjee Furdoonjee* 5845.

Opium. Increasing revenue from opium over a course of years, though the annual receipt fluctuates greatly, *Sir C. E. Trevelyan* 616——Fertility of the opium revenue, whilst it is not a tax upon the people of India; reliable character of this source of revenue though the amount varies greatly from year to year, *ib.* 919-921. 925——The tax, so-called, falls partly upon the landowners who grow the opium, and partly upon the consumers in China, *ib.* 919. 925.

Reference to an official minute by witness, before leaving India, upon the question of extending the Bombay system of revenue to Bengal, *Sir E. C. Trevelyan* 921, 922——Further reference to a certain minute by witness in November 1864 in favour of converting the Bengal opium monopoly into an export duty, *ib.* 986.

Defence of the use of opium by the Chinese as a stimulant, *Sir C. E. Trevelyan* 1532–1534. 1539, 1540——Belief that the opium revenue may be always relied upon, the Bengal drug being far superior to any that can be grown in China, *ib.* 1535–1537——Large increase in the consumption of opium by the Chinese, *ib.* 1539, 1540.

Objection to the opium revenue being fixed at a certain maximum in order that the excess beyond such maximum might form a public loan fund, *Sir C. E. Trevelyan* 1615.

Facility to the investigations of the Committee if some particulars of receipt and payment had been set forth in connection with the revenue from opium, *Goodliffe* 2719.

Very large loss of revenue if Government were to abandon the Bengal system of opium cultivation and to introduce the excise system, as in Malwa, *Lord Lawrence* 4512–4516——Better position of the cultivator in Bengal under the system of advances from Government, than if he were to cultivate under advances from traders, *ib.* 4517–4519——Greater difficulty in working an excise system in Bengal than in Malwa, *ib.* 4520, 4521.

Impression that the opium revenue is likely to decrease in course of time, as cultivation is extended in China and Persia, *Lord Lawrence* 5530, 5531. 5576–5578——More cannot be expected from the opium duty, *ib.* 5576–5578.

Information in letter from the Secretary to the Government of Bengal, dated 3rd June 1873, relative to the increased revenue from opium, the price at which supplied by Government, &c.; decreasing consumption by the natives of India, *App.* 687.

Ordnance Stores, &c. Very large increase of the charge for ordnance establishments and stores; increase more especially in Bombay, for which no satisfactory explanation appears to have been given, *Kellner* 7284–7293.

Orissa and Behar Irrigation Works. Comment upon the result of the Orissa irrigation scheme, the works having been taken over by the Secretary of State in Council after they had proved a dead failure; pressure in this case upon the Secretary of State by monied interests in this country, *Sir C. E. Trevelyan* 492-497.

Examination showing that the purchase of the Orissa irrigation works was recommended by the Government of India, and that the Secretary of State gave a much less sum for the works than was so recommended, *Sir C. E. Trevelyan* 648, 649.

Further examination as to the data for witness' condemnation of the home Government on account of its purchase of the Orissa works; that is, at so extravagant a price, *Sir C. E. Trevelyan* 712–726.

Explanation and justification of the action of Government in the purchase of the Orissa irrigation works; denial that the terms were unduly favourable to the Company, *Lord Lawrence* 4764–4768——Advantage of the arrangement with the Company as involving the surrender of the Saone project, *ib.* 4766,4767——Large extent to which the scheme may be considered political rather than irrigational, *ib.* 5561.

Report, 1873—*continued.*

OUDE:

1. *Particulars of Local or Municipal Taxation, and of Receipts therefrom.*
2. *Strong Condemnation of the Imposition of New or Increased Cesses during the Term of the Land Revenue Settlement; breach of Faith thereby.*
3. *Question of Oude being comprised in the Administration of the North Western Provinces.*
4. *Voluntary Fund for Payment of the Police, &c.*
5. *Objection to a Scheme for an Irrigation Canal in the Province.*
6. *Sale of Choukis, or Proprietary Rights.*
7. *Area and Population.*
8. *Revenue in* 1858 *and subsequently.*
9. *Prices of Forest Produce.*
10. *Prices of Produce generally.*

1. *Particulars of Local or Municipal Taxation, and of Receipts therefrom:*

Information relative to the several sums levied in the province of Oude by local taxation; total of 109,354 *l.* thus raised in 1871–72, *Harrison* 1683–1703——Receipt of 32,479 *l.* in Oude in 1871–72 by a cess of 2½ per cent., for local purposes, on the amount fixed as the Government revenue from land, *ib.* 1683–1685——Appropriation of the proceeds by the Lieutenant Governor with reference to the realisations in each district, *ib.* 1686, 1687——Receipt of 12,247 *l.* from ferry tolls in 1871–72; how this receipt was assigned, *ib.* 1690–1692.

Total of 39,244 *l.* derived from municipal taxation; particulars hereon, *Harrison* 1695–1703——Large cost of collection of municipal taxes in Oude, *ib.* 1757. 1759—— Power of the local government to levy taxation upon the chief articles of consumption in the province, *ib.* 1805–1807.

With regard to the operation of the decentralisation scheme in Oude, the amount to be provided locally was fixed at 15,000 *l.*, *Harrison* 1924——Power given by Act No. 17 of 1871 to levy an additional rate of 1¼ per cent. on the annual value of land, in order to carry out the policy of the provincial services scheme and to improve the roads in the province, *ib.* 1924–1928——Provisions in the foregoing Act as to the assignment of the money to the districts, and as to its expenditure by local committees, *ib.* 1925. 1929–1932.

Views expressed by the Chief Commissioner of Oude in February 1871 as to the importance of local expenditure on roads, *Harrison* 1933——Realisation of about 36,000 *l.* by the additional cess in 1871–72, *ib.* 1934——Considerable increase derived from octroi duties in Oude, *ib.*

Detailed return of receipts and expenditure of municipalities in the province of Oude, during the years 1870–71 and 1817–72, *App.* 742–745.

Memorandum showing the authority under which each tax is levied, and the objects to which it is applied, *App.* 746.

Act of 1871 to provide for the levy of rates on land in Oude for local purposes, *App.* 833–835.

2. *Strong Condemnation of the Imposition of New or Increased Cesses during the Term of the Land Revenue Settlement; breach of Faith thereby:*

Witness submits the instructions given before the settlement was commenced for the levy of cesses in Oude, *Sir C. J. Wingfield* 2050——He contends that as by the settlement the demand of the state, including the cesses, was fixed for thirty years, it involves a breach of contract and a breach of faith to raise the cesses during the period of the settlement, *ib.* 2050 *et seq.*

Strong disapproval of the authority under the Act of 1861 relative to the voluntary cesses for roads, &c.; ill will created previously by the course pursued in obtaining the consent of the talookdars to an increase of cesses, such consent not being really voluntary, *Sir C. J. Wingfield* 2050. 2164–2166——Representation made by witness to the India office against the breach of the settlement in Oude, *ib.* 2051–2053.

Decided opinion that it is most injurious to impose by Act increased cesses (even for local roads' improvements), beyond the amount prescribed for the purpose in the existing settlement; this amount was fixed in Oude at 2½ per cent., and should not have been disturbed, *Sir C. J. Wingfield* 2055 *et seq.*——Effect of the decentralisation scheme as regards Oude in leading to the necessity for new cesses, *ib.* 2064. 2098, 2099.

Great impolicy of any breach of faith in regard to the terms of the thirty years' settlement in Oude, whereas such settlement is virtually abrogated if power be subsequently taken to levy cesses at the free will of Government, *Sir C. J. Wingfield* 2078–2093—— Absence of any security to the proprietors or cultivators in Oude that cesses are to be confined to improvements affecting the land, *ib.* 2089–2097.

Doubt as to the increased cess for roads and bridges in Oude adding appreciably to the value of the land, *Sir C. J. Wingfield* 2125–2132——Conclusion as to general

Report, 1873—*continued*

OUDE—continued.

2. *Strong Condemnation of the Imposition of New or Increased Cesses, &c.*—continued.

dissatisfaction being caused by the cesses in question, *Sir C. J. Wingfield* 2134—— Explanation of the position of the talookdars in Oude in relation to the occupiers and cultivators, *ib.* 2135-2143.

Argument that there is no justification for increase of road cess (beyond the amount fixed under the settlement), on the ground that forced labour is no longer resorted to, *Sir C. J. Wingfield* 2144-2160.

Further explanation that witness objects not to a road cess, but to a cess of any such amount as involves a breach of the engagement on the part of Government; with a new engagement the existing terms may be revised, *Sir C. J. Wingfield* 2158-2163—— Practice of levying road cess in Oude by the district, and of spending it on the district; large area involved, *ib.* 2167-2171.

Further explanation in regard to witness having represented to the India Office the impolicy of the additional road cess in Oude, *Sir C. J. Wingfield* 2175-2177—— Expediency of withdrawing the cess in Oude and other provinces, *ib.* 2177.

3. *Question of Oude being comprised in the Administration of the North Western Provinces:*

Doubt whether the province of Oude may not be advantageously comprised in the administration of the North Western Provinces, *Harrison* 1775.

4. *Voluntary Fund for Payment of the Police, &c:*

Information relative to the voluntary fund in operation in Oude for the payment of the police and the village accountants; reason of witness (as settlement officer), for not interfering with the arrangement, *Sir C. J. Wingfield* 2050.

5. *Objection to a Scheme for an Irrigation Canal in the Province:*

Inexpediency of a certain scheme for an irrigation canal in Oude, the local authorities being opposed thereto, and the natives appearing to have an ample natural supply of water for all purposes, *Lord Lawrence* 5682-5689.

6. *Sale of Choukis, or Proprietary Rights:*

Petition of Rajishar and Surajlal Chowdhris, dated 2nd December 1870, relative certain proprietary or hereditary rights, or choukis, which are sold by auction, *App.* 747 —— Directions given for the cessation of the auction of choukis, *ib.*

7. *Area and Population:*

Statement showing the area and population of each district under the administration of the Chief Commissioner of Oude, the census of which, having been taken on the 1st February 1869, was exempted from the general census of 1871-72; total population of 11,220,747, *App.* 608.

8. *Revenue in* 1858 *and subsequently:*

Statement showing the revenue realised in the province of Oude before the assumption of the direct Government of India by the Crown in 1858; also the revenue in subsequent years, *App.* 740, 741.

9. *Prices of Forest Produce:*

Detailed price list of forest produce in the province of Oude, *App.* 748-750.

10. *Prices of Produce generally:*

Diagram showing the rise and fall of the rates of the principal articles of produce in Oude from 1861 to 1870, *App.* 877.

Detailed statement, and explanation thereon, relative to the prices of agricultural produce and provisions in each year from 1861 to 1870, *App.* 877-884.

Oude and Rohilkhund Railway. Minute by Sir Charles Trevelyan on a proposed line of railway between Cawnpore and Lucknow, dated Calcutta, 18th February 1863; suggestion as to the work being undertaken by the East Indian Railway Company, *App.* 663, 664—— Extract from further Minutes of 4th November and 4th December 1863, on the proposed Oude and Rohilkhund lines of railway, *ib.* 664, 665.

Letter from Major De Bourbel to Sir Charles Trevelyan, dated 9th November 1863, relative to the mode of construction of the proposed railway, *App.* 665, 666.

P.

Paper Currency. Full information given in the Finance Accounts as to the receipts and charges of the Paper Currency Department, *Harrison* 4165.

Parliament. Value attached by the natives to the power of Parliament to interfere in their behalf, *Lord Lawrence* 5506.

Pathan Troops. Grounds for concluding that danger does not arise from Affghanistan through the Pathan troops maintained on the North West frontier, *Lord Lawrence* 5343, 5344.

Patna (*Behar*). Statement of the area and population of each district; total population of more than thirteen millions, *App.* 605.

Patronage (*Public Appointments*). Conclusion that under the system of open competition the patronage difficulty has on the whole been well met, *Sir C. E. Trevelyan* 1551, 1552——Objectionable extension of Indian patronage in England, by reason of the increased demand for railways and other public works in India, *ib.* 1617.

Limited number of nominations given to the sons of distinguished officers, in lieu of the former system of patronage cadetships, *Johnson* 3146–3149.

Expediency of due check upon appointments by patronage as distinct from appointments by merit, *Lord Lawrence* 4823–4825——Disapproval of any rule as to the exclusion of Europeans in India from appointment to the uncovenanted service, and from promotion thence to the uncovenanted service; approval hereon of a check upon the number or proportion of such appointments, *ib.* 5324–5331——Advantage of witness' power to promote men from the uncovenanted service who had behaved well during the Mutiny, *ib.* 5326——Belief that abuse of patronage by promotion of European uncovenanted servants has been of rare occurrence, *ib.* 5326. 5328–5330.

Pensions. Suggested classification of the payments made in England for superannuation, *Goodliffe* 2731–2740. 2826, 2827——Obstacles and objections to the charge for pensions being distributed among the three Presidencies, *Harrison* 4161, 4162.

Lists furnished by the Governments of India, Madras, and Bombay, of officers and men who are receiving pensions, as well as salaries in India from Indian revenues; also of persons who are in the receipt of more than one pension in India from Indian revenues, and of persons entitled to pensions from Imperial revenues who draw salaries from Indian revenues, *App.* 625–633.

See also *Army*, III., 8, 9. *Military and Medical Funds. Native Princes. Staff Corps.*

Permanent Settlement. See *Land Revenue.*

Persian Mission. Expediency of India being relieved of charge in respect of the missions in Persia and China, *Nowrozjee Furdoonjee* 6894.

Peshawur. Suggestion that there be a smaller garrison at Peshawur, the place not being healthy for Europeans, and that the main body of the force be located in the adjacent high country, *Sir C. E. Trevelyan* 1144–1149.

POLICE:

1. *Generally.*
2. *Bombay.*

1. *Generally:*

Great value of the local police throughout India, so that the military force may the better be curtailed, *Sir C. E. Trevelyan* 828. 836——Reference to a resolution by the Supreme Government in August 1864, upon the decentralisation of the police expenditure as an important part of the financial reforms set on foot by witness when in India, *ib.* 1379——Re-organisation and increased expense of the police concurrently with the large reduction made in the Madras Army, *ib.* 1382——The police should be entirely local, *ib.* 1510, 1511.

Views of the Government of India in 1864 in favour of returning to the municipal system of police formerly in force, *Harrison* 1654.

Difficulty in the way of a comparative account showing the police charges in 1862–63 and at the present time; estimated increase of about 400,000 *l.*, *Harrison* 4390–4392.

Impracticability of using the Government police in reduction of Native troops, whilst the village police are not available for Government employment at all, *Lord Lawrence* 5336.

Report, 1873—*continued.*

POLICE—continued.

1. *Generally*—continued.

Assignments to be made from Imperial funds for provincial services in respect of the police in each presidency or province, under the decentralisation scheme of December 1870, *App.* 841.

2. *Bombay:*

Great hardship on the municipality of Bombay in having now to provide the whole cost of the police, whilst Madras and Calcutta still receive police grants from the Central Government, *Maclean* 2451–2453——Diversion to other purposes of the Imperial grant formerly made towards the cost of the Bombay police, *ib.* 2557, 2558.

Complaint as to the large increase of municipal taxation for the police, whilst the administration is entirely under Government, *Nowrozjee Furdoonjee* 4904–4909——Unfairness in Government no longer contributing to the public charge; different practice at Calcutta and Madras, *ib.* 4905——Illustration of the absence of control in the municipality over the police expenditure for which they are liable, *ib.* 4906.

Prospect of increased charge for the police as the population of the city increases, *Nowrozjee Furdoonjee* 5193, 5194——Several public buildings under the supervision of the police, whilst some only are under the charge of soldiers, *ib.* 5195–5197.

Complaint as to the increase of police expenditure in the Bombay Presidency generally, the cost being now forty lacs of rupees, or an increase of four lacs since 1867–68, *Nowrozjee Furdoonjee* 5958–5964——Undue increase in the number and salaries of the superintendents, *ib.* 5959——Great reduction of the police force in Surat, Broach, Khaira, and other large towns, the present force being altogether inadequate, *ib.* 5964–5967.

Total of 16,877 police in the Presidency of Bombay, the population being 16,000,000; official statement that this number is too small, *Nowrozjee Furdoonjee* 6911——Pay of policemen at the rate of six or seven rupees a month, *ib.* 6912——Large reduction required in the cost of police administration in Bombay, *ib.* 6983.

Extract from report of the Inspector General of Police, dated 12th January 1863, on the subject of the police establishments in certain districts of the Bombay Presidency, and suggesting the abolition of the Guzerat Irregular Horse, *App.* 681, 682.

Act No. I. of 1871, of the Government of Bombay, to provide for the cost of police employed in towns and suburbs where the Act XXVI. of 1850 is in force, *App.* 795.

Poll Tax. Disapproval of a direct poll tax, apart from the salt tax, *Sir C. E. Trevelyan* 1167–1172——*See* also *Burmah.*

Poonah Association. Witness has been deputed to represent the Poonah Sarvajanik Sabba before the Committee: constitution and objects of this Association, *Nowrozjee Furdoonjee* 4833, 4834. 4838, 4839—— Paper submitted on the part of the Poonah Association relative to the condition of the people in the Deccan, and the pressure of the land assessment, *ib.* 6974.

Poonah (Cantonment Road). Comment upon the expenditure out of local funds on a road in the cantonment of Poonah, made chiefly for Europeans, *Nowrozjee Furdoonjee* 5062–5065.

Poonah Civil Engineering College. Reference to an official report on the Poonah Civil Engineering, in 1867, as showing the expediency of further encouragement and employment of natives as civil engineers; testimony in the report to the qualifications of natives for service in the Public Works Department, *Nowrozjee Furdoonjee* 5151, 5152. 5160–5164.

Comment upon the circumstances under which Government withdrew one appointment given annually in Bombay to the best qualified students of Poonah College, *Nowrozjee Furdoonjee* 5152–5157. 5162, 5163——Equally long course of study at Poonah College as at Cooper's Hill; higher standard of examination at the former than the latter, *ib.* 5186——Reference to certain examination papers as showing that the course of duties pursued in the Poonah College is of a very superior character, *ib.* 5262, 5263.

Poonah (Government House). See *Bombay*, vi.

Poonah Small Cause Court. Entire adequacy of the establishment of the Small Cause Court at Poonah, *Nowrozjee Furdoonjee* 5846–5850.

Population, Area, &c. Denial that the wretched condition of the ryots in many parts of the Bombay Presidency is due to over-population, *Nowrozjee Furdoonjee* 6984–6987.

Statement showing the civil divisions, area, and population of each district of such provinces as are under the administration or immediate control of the Government of India,

Report, 1873—*continued.*

Population, Area, &c.—continued.

India, according to the Administration Reports of each province respectively, for 1871–72; total population of 7,455,289, *App.* 602.

Statement showing the area, population, &c., of the several native states under the Government of India; total of 27,411,936, *App.* 603, 604.

Summary of general statement showing the result of the Census of 1871–72 for the provinces under the administration of the Lieutenant Governor of Bengal; total population of 66,856,859, *App.* 605, 606.

Statement showing the civil division, area, populations, &c., of each district under the administration of the Lieutenant Governor of the North West Provinces, according to the Administration Report of 1871–72: total population of 30,769,056, *App.* 607.

Similar statement as regards Oude: total population of 11,220,747, *App.* 608.

Similar statement as regards the Punjaub; total population of 17,596,752, exclusive of that of the Native States in feudal subordination, *App.* 608, 609.

Similar statement as regards the Central Provinces; total population of nine millions, exclusive of that of the Native or Feudatory States, *App.* 610.

Similar statement as regards British Burmah, the population being 2,562,323, *App.* 611.

Similar statement as regards the Madras Presidency; total population of 31,311,142, *App.* 612.

Similar statement as regards Bombay; total population of 14,042,596, *App.* 613.

List of the Native or Feudatory States of the Bombay Presidency, together with the population of each; total of 7,675,142, *App.* 614.

General Abstract for the whole of India; aggregate of 190,880,802 in territory under British administration, and of 43,042,203 in Native or Feudatory States, *App.* 614.

Post Office. The post office would be under the Supreme Government, under witness' decentralisation scheme, *Sir C. E. Trevelyan* 1508, 1509.

Important discrepancy between the Finance Accounts and the Statement of the Moral and Material Progress of India as regards post office receipts and charges, *Goodliffe* 2858–2861.

Explanation of an apparent discrepancy or error in the Finance Accounts as regards the post office receipts and charges, *Harrison* 4171——Large increase of post office revenue since 1862–63, owing chiefly to the change in the mode of dealing with official postage, *ib.* 4393–4397——Explanation in reference to the mode of distribution of the official postage over the different services in the revised accounts, *ib.* 4398–4401.

Poverty of India. See *Condition of the People. Taxation.*

Prices. Important effect of the rise in prices in India upon the question of public expenditure; indirect effect upon the revenue, *Sir C. E. Trevelyan* 621–626——Circumstance of there being now a heavy fall in rents and prices in Bombay, *Maclean* 2454.

Effect of the railways in equalising the prices of produce, *Lord Lawrence* 4476——Considerable rise of prices in the military and civil stations, *ib.* 4478——Tendency to decrease of prices as irrigation is extended, and more produce is brought into the market, *ib.* 4479——Better ability of Government, as the people are more prosperous under a permanent settlement of the land revenue, to meet in other ways the increased demands upon them through increase of prices, *ib.* 4480. 4486–4493.

Views of Colonel Prescott as to the probability of a fall in prices, *Nowrozjee Furdoonjee* 6946.

Diagram showing the rise and fall of the rates of the principal articles of produce in Oude, from 1861 to 1870, *App.* 877——Statement showing in detail the prices of agricultural produce and provisions in the Province of Oude, from the year 1861 to 1870, *ib.* 877–884.

Proclamation of Laws. Proclamation of new laws in the "Gazette," there being vernacular translations posted at the cutcherries, *Nowrozjee Furdoonjee* 5127, 5128.

Provincial Councils. See *Representative Institutions.*

Provincial Services Scheme. See *Local Taxation and Finance.*

Public Opinion (England). Best protection for the taxpayers of India by an improved knowledge and state of feeling in England which shall make itself felt in the home Government; difficulty of any remedy by a modification of the Council of India, *Sir C. E. Trevelyan* 543–546—— Obstacle to ascertaining the sums spent by native agents in England in order to influence English opinion; the amount is doubtless very large, *ib.* 660–662——Advantage of detailed scrutiny with a view to the exposure of the persons

Report, 1873—*continued.*

Public Opinion (*England*)—continued.

who are to blame in connection with the Mutlah project, the Orissa scheme, the Bank of Bombay, &c., *Sir C. E. Trevelyan* 669, 670. 692. 712–715.

Further consideration of the steps to be taken for exposing and preventing the lavish expenditure in England, on the part of Indian magnates and native princes in influencing public opinion, *Sir C. E. Trevelyan* 935–941.

Public Opinion (*India*). See *Native Evidence. Representative Institutions. Taxation.*

Public Records (*Bombay*). Inaccessibility of the public records throughout the Bombay Presidency, *Nowrozjee Furdoonjee* 4887. 4966.

PUBLIC WORKS:

1. *Views of Sir Charles Trevelyan as to the necessity of a re-organisation of the Public Works Department in the direction of Decentralisation.*
2. *System of Accounts.*
3. *Expenditure, and System of Loans; Restrictions suggested.*
4. *Failure of Works, and wasteful Expenditure.*
5. *Action of the Governments of Bombay and Madras; Collisions between the former and the Supreme Government.*
6. *Question of employment of Natives in the Upper Branches of the Department.*
7. *Native Opinion as to the want of a complete Organisation.*
8. *Memorial from Native Officials of the Department in Bombay.*
9. *Assignments from the Imperial Revenue, under the Decentralisation Scheme, for various Works and Buildings.*

1. *Views of Sir Charles Trevelyan as to the necessity of a re-organisation of the Public Works Department in the direction of Decentralisation:*

Radical reform required in the Public Works Department, which has been greatly over-centralised, *Sir C. E. Trevelyan* 513——Monster instance of over-centralisation in the case of the Public Works Department, *ib.* 810–813——Undue power in the hands of the officer at the head of the department, *ib.* 811, 812——Great improvement as regards Public Works under the decentralisation system advocated by witness, *ib.* 884.

Further proposal for the decentralisation of public works, including irrigation works, *Sir C. E. Trevelyan* 1190–1192——Outline of witness' scheme of decentralisation, with explanations more especially as regards the initiation of public works in each province, *ib.* 1411–1420——Much less probability of wasteful public works (such as the Orissa scheme, the Saone Works, &c.) being undertaken if the selection and payment rested with the provincial Government, *ib.* 1416–1421——Doubt as to any evil arising on the score of want of uniformity if each province carried out its own works, *ib.* 1421.

Necessity of a Government engineering college as a consequence of a concentrated Public Works Department for the whole of India, *Sir C. E. Trevelyan* 1616——Attraction of a valuable class of private engineers to India by decentralising the department, *ib.*

2. *System of Accounts:*

Doubt as to the expediency of keeping any sort of stock account of public works, *Sir C. E. Trevelyan* 514, 515——Expediency of an entirely separate account for each work for which a loan has been raised, such account to be quite apart from the ordinary financial operations of the year, *ib.* 1619–1622.

Suggestions relative to the amended system of accounts desirable as regards extraordinary expenditure on public works, *Goodliffe* 2812–2819——Comments upon the Account of the Public Works Departments for the year 1867–68; reference more especially to the item of loss by exchange on railway transactions, *ib.* 2847.

Exceptions taken to the Finance Accounts for 1869–70 as regards the item of extraordinary expenditure on public works; deceptive effect of the power of transferring expenditure from "ordinary" to "extraordinary," *Goodliffe* 2861–2871——Impossibility of ascertaining from the Finance Accounts how much of the public works expenditure has been defrayed from current revenue, and how much from borrowed money, *ib.* 2897.

Much more complete information now given relative to the extraordinary expenditure on public works; well-known deficiency of the old accounts in this respect, *Harrison* 4160, 4161——Concurrence between the Finance Accounts and the Statement of the Moral and Material Progress of India on certain points on which discrepancies are stated by Mr. Goodliffe to exist; that is, as regards public works, *ib.* 4172–4174. 4179, 4180——Explanation as regards public works expenditure extraordinary, that the revised Finance Accounts give as much information on the subject as they can give under the present policy of dealing with such works, *ib.* 4273–4279. 4380–4390.

Report, 1873—*continued.*

PUBLIC WORKS—continued.

3. *Expenditure, and System of Loans; Restrictions suggested:*

Grounds for the conclusion that the system of borrowing money for public works is a patent cause for the derangement of the finances, *Sir C. E. Trevelyan* 814–816——Importance of keeping expenditure within the ordinary growth of revenue, and of carefully limiting works to the ways and means raised within the year, *ib.* 815–817—— Explanation that witness fully approves of expenditure on public works, provided it be properly regulated, *ib.* 1093.

Dissent from the theory that, in the case of public works, the justification for loans should be when the works are expected to yield a return equal to the interest on the money borrowed, *Sir C. E. Trevelyan* 1401–1408—— Suggestions as to the precise restrictions desirable in raising loans for public works; expediency of loans being for large and well-defined objects, clearly distinguishable from ordinary income and expenditure, *ib.* 1404–1410——Conclusion that borrowing should not be resorted to habitually for public works, but only when the work is an urgent one, and when the means clearly exist for paying the interest, *ib.* 1426–1429.

Importance of an effectual check being promptly placed upon the further excessive expenditure contemplated by the Public Works Department, the best remedy eventually being to localise the department, *Sir C. E. Trevelyan* 1571–1574——Comment upon the large discretion vested now in the Public Works Account Department as to drawing upon balances of former loans for public works, *ib.* 1619.

Conclusion as to the Government of India being really desirous of preventing all unnecessary outlay on public works, *Maclean* 2560. 2579–2584. 2659, 2660.

Disapproval of a limitation of public works to surplus income as retarding the development of the country; expediency, however, of not raising loans save for really important works, *Lord Lawrence* 4789, 4790——Disadvantage in stinting the annual expenditure on any large work once began, *ib.*

4. *Failure of Works, and wasteful Expenditure:*

Costly and faulty construction of certain barracks adverted to in connection with the immense expenditure proposed by the Public Works Department on irrigation and other works, *Crommelin* 183–192.

Several bad cases, since witness left India, in which much discredit has been thrown on the Public Works Department in connection with barracks, *Lord Lawrence* 4732.

Comments upon the failure of various important works designed and constructed by Europeans, as in the case of viaducts and bridges on the Great India Peninsula Railway, *Nowrozjee Furdoonjee* 5186, 5187. 5240–5246——Several important works carried out under European supervision have broken down, *ib.* 5186, 5187.

Several instances of public buildings involving much waste of public revenue; not to mention the failure of barracks at different places, *Nowrozjee Furdoonjee* 5274, 5275—— Excess of expenditure on public works to the amount of from twenty-five to fifty per cent. owing to the want of proper management, *ib.* 5275.

Opinion that a large sum is wasted in the inefficient construction of public works, and that there is a great deal of corruption, *Dadabhai Naoroji* 6800, 6801.

5. *Action of the Governments of Bombay and Madras; Collisions between the former and the Supreme Government:*

Evidence in support of the conclusion that the Government of Bombay has shown an impatience of control, and an independance of action as regards public works, &c., which would never have been allowed in the time of the East India Company, *Sir C. E. Trevelyan* 503–508. 540–542. 671–675. 686–691. 697. 699——Instance of the Government of Bombay having ordered very expensive public works without the sanction of the Government of India, *ib.* 503. 558.

Circumstance of witness having, as Finance Minister at Calcutta, recommended that certain of the works proposed by Sir Bartle Frere, in 1863, in excess of the money at his disposal, should be proceeded with, *Sir C. E. Trevelyan* 1064——Quotations from minutes of witness, dated 11th January and 1st February 1864, in strong condemnation of the action of the Bombay Government in ordering large expenditure without the sanction of the Central Government, *ib.* 1202.

Extraordinary discretion assumed by the Bombay Government in commencing expenditure on works without the previous sanction of the Government of India, *Sir C. J. Wingfield* 2180.

Statement as to the Bombay Government having systematically set the Government of India at defiance as regards local expenditure, *Maclean* 2582. 2657–2662.

Arrangement in witness' time as to the Governments of Bombay and Madras being allowed to undertake works up to a limit of 20,000 *l.*; previous limit up to 10,000 *l.*, *Lord Lawrence* 4660–4662——Frequent collision between the central and local Governments

Report, 1873—*continued.*

PUBLIC WORKS—continued.

5. *Action of the Governments of Bombay and Madras, &c.*—continued.

ments through the large excess of estimates for works; several causes of such excess, *Lord Lawrence* 4663-4665.

Communications between Sir C. Trevelyan at Calcutta, and Sir Bartle Frere at Bombay, in November and December 1863, on the subject of economy in the public works expenditure, *App.* 678.

Minute by Sir Charles Trevelyan, as Member of the Council of the Governor General, dated 11th January 1864, on the subject of public works expenditure in Bombay, and the Supplementary Estimate of the Presidency, involving a large outlay; checks suggested, *App.* 673-678.

6. *Question of the Employment of Natives in the Upper Branches of the Department*:

Denial of statements made before the present Committee in justification of the exclusion of natives from public employments as civil engineers; inaccuracy of the view that they are not, and cannot become qualified for the profession, *Nowrozjee Furdoonjee* 5148 *et seq.*——Evidence in disproof of the statement that due encouragement is given by Government to the training and employment of natives as civil engineers, *ib.* 5152 *et seq.*

Witness submits that it is the fault of Government that natives have not been appointed to the post of superintending engineer; with proper facilities they are perfectly competent to qualify for the highest rank, *Nowrozjee Furdonjee* 5164-5177——Grounds for the statement that the out-door engineering work on public structures generally in the Bombay Presidency is really done by natives, and that the European engineer in charge only visits the works once in ten days or so, *ib.* 5178-5186.

Injustice in natives not being admitted to the upper grade of the engineering service, although they have frequently passed better examinations than Europeans, *Nowrozjee Furdoonjee* 5186——Several works have been entirely carried out by natives in a highly creditable manner, *ib.* 5187, 5188.

Further evidence in refutation of the statement that Government had offered high attractions to natives in the engineering department to which they have not responded; numerous instances cited on the other hand of the competence and ability of natives as engineers, their exclusion from the upper appointments in the department being a great injustice, *Nowrozjee Furdoonjee* 5232-5267——Paper submitted, and explanations thereon, relative to important public works constructed or designed by natives, *ib.* 5232-5238.

Complaint as to the non-promotion of native engineers of high efficiency and as to the undue promotion of Europeans, *Nowrozjee Furdoonjee* 5246-5250. 5263-5267——Great hardship of the case of the native subordinates of the engineering department; Paper submitted hereon, *ib.* 5250-5260——Strong testimony borne by Colonel Wilkins in 1864 to the excellent qualifications of the native subordinates of the Public Works Department, *ib.* 5263.

Formal protest by witness against the deliberate exclusion of his fellow-countrymen from all the higher grades of the Public Works Department, *Nowrozjee Furdoonjee* 5267——He submits that the grievance should be remedied, and that justice be further done by placing the native subordinate establishments on a footing of equality with the European subordinates, *ib.*

Complaint as to the great discouragement of natives for service in the engineering department of India, *Dadabhai Naoroji* 6736.

List of important public works constructed by natives, *App.* 872, 873.

7. *Native Opinion as to the want of a complete Organisation*:

Necessity of a radical change in the organisation of the department, *Nowrozjee Furdoonjee* 5275.

8. *Memoral from Native Officials of the Department in Bombay*:

Memorial submitted to the Government of Bombay by uncovenanted native officers of the upper subordinate branch of the Public Works Department of the Presidency; claims put forward to improved status and remuneration, *App.* 873-876.

9. *Assignments from the Imperial Revenue, under the Decentralisation Scheme, for various Works and Buildings*:

Schedule of works and buildings for which, under the decentralisation scheme, separate funds will be provided from the Imperial revenue, *App.* 842.

See also *Barracks. Bombay*, V. VI. *Cooper's Hill Engineering College. Ganges Canal. Irrigation. Mooktee Nullah Reservoir. Poonah Civil Engineering College. Railways. Roorkee College. Tanna District. Punderpoor.*

Report, 1873—*continued.*

Punderpoor. Comment upon the refusal of Government sanction as regards an outlay by the municipal committee of Punderpoor for the erection of reservoirs, *Nowrozjee Furdoonjee* 4985-4987. 4989, 4990.

PUNJAUB:

Statement of the local taxation or cess levied upon the land revenue in the Punjaub for roads, education, and the district post respectively; total of 58,330 *l.* thus raised in 1870-71, *Harrison* 1808-1811——Information in connection with the municipal taxation in the Punjaub, and the purposes for which imposed; particulars more especially as to the octroi duties and the large proportion thus raised by the municipalities, *ib.* 1812-1816——Considerable sums raised for village accountants, rural police, &c., the total of these sums, and of the municipal taxation amounting to 226,000 *l.* in 1870-71, *ib.* 1817-1822.

Item of 39,000 *l.* to be made up in the Punjaub under the decentralisation scheme; increase beyond this amount considered necessary by the local government, *Harrison* 1972——Additional cess imposed upon land in the Punjaub in order to raise the required amount, such cess to be divided equitably between the landlord and tenant; produce of 118,062 *l.* by the cess in 1871-72, *ib.* 1972, 1973.

Circumstance of the Punjaub frontier force not being under the Commander-in-Chief, *Johnson* 3132, 3133——Permanent increase in 1868-69 in the strength of the Punjaub frontier regiments, *Kellner* 3564, 3565.

Decided disapproval of the per centage added to the land revenue in the Punjaub, just after the settlement had been made, *Lord Lawrence* 4532, 4533——Objection to any conversion of a civil government, as in the Punjaub, into a military government, *ib.* 4677, 4678.

Strong testimony to the value of the frontier force, which should be maintained intact; admirable service rendered by the force during the mutiny, *Lord Lawrence* 4692, 4693——Objection of men in the Punjaub frontier force to be moved from their own country, *ib.* 4744.

Information relative to the proportion of Native and European officers in the Punjaub military police and the Punjaub cavalry; high class of native officers in the latter, *Lord Lawrence* 5518. 5526-5529.

Particulars relative to the area and population of each division of the Punjaub, and of the several districts, *App.* 608, 609——Also of the native states in feudal subordination to the Government of the Punjaub, *ib.* 609.

Minute by Sir Charles Trevelyan, as Member of the Council of the Governor General, dated 25th January 1864, on the subject of Punjaub frontier policy, *App.* 669.

Letter from the Officiating Secretary to the Government of the Punjaub to the Secretary to the Government of India, Financial Department, dated Lahore, the 4th April 1872, relative to the Imperial taxes levied in the Punjaub before and after the assumption by the Crown of the direct Government of India, *App.* 706, 707.

Communication from the Secretary to the Financial Commissioner, Panjaub, dated 22nd March 1872, containing sundry details relative to the land revenue, and the taxes generally, *App.* 707-710——Statement showing the annual rates of assessed taxes in the Punjaub from 1860-61 to 1870-71; *ib.* 710.

Copy of Act of 1871 for levying rates on land for local purposes, *App.* 835, 836.

R.

RAILWAYS:

1. *Unsatisfactory System of Construction under the Public Works Department.*
2. *Objection to the Guarantee System; preference for a Subvention.*
3. *Central Control under a System of Decentralisation.*
7. *Council of India.*
5. *Suggested Purchase of the Guaranteed Railways.*
6. *Proposed Construction and Administration by Government.*
7. *Question of Imperial Guarantee for the Railway Debt of India.*
8. *Suggestions as to the Cost and Construction of New Lines.*
9. *Gauge.*
10. *Rates and Fares.*
11. *Army Transport.*
12. *Accounts.*

1. *Unsatisfactory System of Construction under the Public Works Department:*

Illustration, in the matter of railways, of the great abuse consequent upon the organisation of the Public Works Department, *Sir C. E. Trevelyan* 810-813.

Great extravagance under the system of construction of the railways; several causes to which owing, *Lord Lawrence* 4589-4592——Imperfect qualifications of the railway engineers for the work required of them; difficulty of efficient control through Government officials, *ib.* 4589-4592.

Report, 1873—*continued.*

RAILWAYS—continued.

2. *Objection to the Guarantee System; preference for a Subvention:*

Great mischief in the operation of the guarantee system, as largely enhancing the cost; *Lord Lawrence* 4777-4781——Much to be said, however, in favour of railway construction through private enterprise, *ib.* 4777——Preference for a subvention as compared with a guarantee; failure, however, of an attempt to introduce the former, *ib.*

3. *Central Control under a System of Decentralisation:*

Power still proposed to be exercised by the Central Government as to the railways and their administration, though the local governments should be largely consulted, *Sir C. E. Trevelyan* 1193.

4. *Council of India:*

Unsatisfactory results apprehended, if the question of railways were dealt with by a council consisting largely of commercial men, *Lord Lawrence* 4585-4593.

5. *Suggested Purchase of the Guaranteed Railways:*

Approval of the guaranteed railways being purchased, if this can be done on certain terms, as calculated by Mr. Thornton, *Lord Lawrence* 4780, 4781. 4832.

6. *Proposed Construction and Administration by Government:*

Opinion that it would be better and cheaper for Government to make the railways, rather than to rely upon the guarantee system, *Lord Lawrence* 4777-4779——Respects in which the administration and working of the railways by Government would be more satisfactory than by the companies, *ib.* 4781-4783.

7. *Question of Imperial Guarantee for the Railway Debt of India:*

Expediency of the railway debt being included under Imperial guarantee; probable objection however by Parliament, *Dadabhai Naoroji* 6810. 6896.

8. *Suggestions as to the Cost and Construction of New Lines:*

Approval of the prompt construction of the proposed railway from Lahore to Peshawur; political value of this line, *Sir C. E. Trevelyan* 1245, 1246. 1248, 1249——Opinion in favour also of the line between Moultan and Kotri, though it should not be undertaken at once, *ib.* 1246-1248.

Careful estimates by Government before undertaking the independent construction of lines, like that between Mooltan and Kotri, *Lord Lawrence* 4784——Objection to the expenditure of even 10,000 *l.* a mile on railways, *ib.* 5827.

Suggestions by Major de Bourbel in November 1863, relative to the mode of construction of future railways in India, *App.* 665, 666.

Minute by Sir Charles Trevelyan, in January 1864, upon the question of railways in Rajputana and Central India, *App.* 666, 667.

9. *Gauge:*

Belief that a great mistake was made in the selection of the metre or narrow gauge for certain railways, *Sir C. E. Trevelyan* 812, 813——Explanation as to the professional authorities and the personal experience upon which witness condemns the metre gauge for the Punjaub railways, *ib.* 1067-1076——Statement showing that witness was well qualified for judging as to the best gauge to be adopted in India; repetition of objections to the narrow gauge for trunk lines, *ib.* 1204-1207——Expediency of the railway gauge in each province being subject to the decision of the Central Government, *ib.* 1425.

Much less cost per mile of the new narrow gauge lines than of those on the broad gauge; advocacy of the former, witness attaching very little importance to the question of break of gauge in India, *Lord Lawrence* 4785-4788.

10. *Rates and Fares:*

Great importance attached to very low rates, both for passengers and goods, in the working of the Indian railways, *Sir C. E. Trevelyan* 1226-1229. 1248——Better returns from the railways by lowering the rates, *ib.* 1229. 1248.

11. *Army Transport:*

Advantage to the public finances on account of the railway receipts for army transport, *Johnson* 3762-3766——Conclusion as to the necessity of the railways, in order to carry out the required movements of troops, *ib.* 3767.

12. *Accounts:*

Defect of the Finance Accounts as regards the guaranteed railway companies; amendment required, *Goodliffe* 2679-2681——There should be a balance sheet for each railway company, *ib.* 2681.

Explanation that due provision has been made in the Accounts laid before Parliament for the year 1871-72 for exhibiting separately all necessary particulars relative to each guaranteed railway, *Harrison* 4132-4134.

Information

Report, 1873—*continued.*

RAILWAYS—continued.

12. *Accounts*—continued.

Information supplied in the Home Accounts subsequently to 1869 relative to the capital, revenue, and guaranteed interest of the several railways, *Seccombe* 4135——Full account kept in the Indian Office of the transactions of the several railways, *ib.* 4170.

See also *Calcutta and South Eastern Railway.* *Carwar Railway.* *Madras Railway.* *Oude and Rohilcund Railway.*

Rajpootana. Statement of the area and population of the Rajpootana States, *App.* 603 ——Amount of tribute or contribution paid to the Government of India, *ib.* 635, 636.

Rations. See *Commissariat.*

Re-appointment of Committee. Recommendation that the Committee be re-appointed in the next Session, when their inquiry will, it is hoped, be brought to a close, *Third Rep.* iii.

Recruits. See *Army*, III. 1. 5.

Red Sea Telegraph. See *Indo-European Telegraph.*

Redemption of Land Tax. See *Land Revenue*, VIII. *Waste Lands.*

Registration Department. Large and costly scale upon which the Registration Department is maintained, so that there is very little surplus from fees, *Nowrozjee Furdoonjee* 5297–5300.

Reliefs (*Army*). See *Army*, III. 16.

Remittances (*England and India*). See *Accounts*, 3.

Rent-free Lands. Prevention of much abuse in the way of free grants if there had been local representative institutions, *Sir C. E. Trevelyan* 884, 885——Comment upon the omission from the public accounts of numerous forms of alienation of revenue; contemplated resumption of many of these alienations, *ib.* 1153.

Better position of cultivators in rent-free villages than of cultivators in revenue-paying villages, *Lord Lawrence* 5668.

See also *Inam Commission.* *Land Revenue*, VIII. *Waste Lands.*

REPRESENTATIVE INSTITUTIONS:

Expediency of representation being commensurate with taxation in India, as in European countries, *Sir C. E. Trevelyan* 868——Suggestion that there be eight provincial and quasi representative councils, which should sit at the chief seats of the eight local administrations; the principle of popular elections should not, in the first instance, be applied to these councils, *ib.* 863, 864——Suggestion that there be also zillah or county councils, to be chosen, as soon as possible, by direct election, *ib.*——Suggestion also that there be town and village municipalities, to whom the principle of direct election should at once apply, *ib.*

Sundry data for the conclusion that the people of India are prepared for the efficient exercise of the principle of representation; special reference hereon to the village municipality as the very foundation of Indian society, and as the salvation of India, *Sir C. E. Trevelyan* 864–866——Very numerous instances throughout India of the public-spirited liberality of natives, *ib.* 866——Great political value of the proposed representative institutions as a school of self-government for the whole of India, *ib.*

Proposal that each provincial council should comprise a representative of every district in the Presidency, to be selected, in the first instance, by Government; qualifications to be had in view, *Sir C. E. Trevelyan* 867–869—— Contemplated payment of such members of the council as require payment, *ib.* 870——Expected independence of character and action on the part of members, *ib.* 871——Prevention of great abuse in the way of alienations of revenue and free grants, and of pensions to native dynasties, if there were or had been representative councils, *ib.* 884, 885.

Statement that in proposing to remit the income and expenditure of India into the hands of the people of India, witness refers to the higher cultivated class, who are under the influence of a wholesome public opinion, *Sir C. E. Trevelyan* 1077——Solid basis on which the finances would rest if there were a strong popular element round the local centres under the decentralisation system, *ib.* 1164.

Further explanation of the proposed constitution of the local representative councils; contemplated selection in the first instance by Government, *Sir C. E. Trevelyan* 1187–1189——Contemplated majority of natives on the local representative councils; confidence to be placed in them as regards the expenditure of their own money, *ib.* 1261–1270.

Further explanations relative to the constitution of the proposed local councils for each Government; suggestions that about two-thirds of the members should be representative, whilst the official European element, to be nominated, should be about one-third, *Sir*

Report, 1873—*continued.*

REPRESENTATIVE INSTITUTIONS—continued.

C. E. Trevelyan, 1433–1439——Defence of the proposal for vesting a large discretion in the representative councils in the matter of local taxation; that is, subject to the veto of Provincial Government and of the Governor General, *ib.* 1440–1446.

Concurrence in the view that representative bodies should be constituted, and that they should have the power to impose local taxes; this would not involve any breach of faith, *Sir C. J. Wingfield* 2181. 2188–2196.

Reproductive Works. See *Irrigation. Public Works. Railways. Roads.*

Responsibility (Taxation and Finance). See *Bombay. Council of India. Expenditure. Government of India. Imperial Government. Local Taxation and Finance. Taxation.*

REVENUE:

Opinion that the normal state of Indian finance is sound and satisfactory, whilst, since the time of the Mutiny, the revenue has shown extraordinary elasticity, *Sir C. E. Trevelyan* 398–400——Frequent instances of prompt restoration of Indian finance after it has been deranged, *ib.* 398——Average increase of revenue at the rate of about three-quarters of a million a year since the Mutiny, *ib.* 398, 399.

Opinion that the finances may soon be made more flourishing than ever, if proper correctives be applied, *Sir C. E. Trevelyan* 611, 612——Difficulty in calculating the proportion of increased revenue due to increased taxation, *ib.* 613-615.

Evidence in support of the conclusion that under the East India Company, during a part of Lord Amherst's administration, and a part of Lord William Bentinck's administration, the finances were in a flourishing state, *Sir C. E. Trevelyan* 736–748——Large reduction of expenditure, and surplus income, during the latter period of Lord W. Bentinck's administration, *ib.* 744–747.

Very large surplus revenue belonging, apparently, to Bengal; this is fallacious, though Bengal can doubtless show a considerable surplus, *Sir C. E. Trevelyan* 1458–1463. 1469, 1470——Large surplus in the case of Madras, *ib.* 1471.

See also *the Headings generally throughout the Index.*

Revenue Establishments. Grounds for objecting to the offices of collector or assistant collector and magistrate being combined in one person; saving of expense and delay by separating the executive officers from the judicial officers, *Nowrozjee Furdoonjee* 5853-5857.

Proposition whereby a considerable reduction may be effected in the cost of the revenue and magisterial departments; that is, by separating the two services, and by abolishing the Revenue Commissioners and other highly-paid officers, *Nowrozjee Furdoonjee* 6983; and *App.* 926.

Rivers. Importance generally of opening out the rivers where practicable, *Sir C. E. Trevelyan*, 1237–1244.

Roads. Reproductive character of roads, though not yielding any direct revenue, *Sir C. E. Trevelyan* 1401–1403——More useful roads made if there were representative councils, *ib.* 1422–1424.

Circumstance of the Bengal Road Cess Act of 1871 not having yet come into operation, *Harrison* 1760–1762.

Strong condemnation of the imposition of road cesses, in breach of the terms of settlement of the land revenue, *Sir C. J. Wingfield*, 2064. 2098, 2099——Additional cesses levied for roads in the North Western Provinces and in the Punjaub, as well as in Oude, *ib.* 2133. 2162——Admission as to the benefit conferred by the increased outlay on roads, *ib.* 2172. 2187.

Levy of a local cess in Bombay in 1863, for roads, &c., for which there was no legislative sanction till 1869, *Nowrozjee Furdoonjee* 4886, 4887.

Information on the subject of the District Road Cess Act in Bengal, *App.* 690.

Act No. X. of 1871, of the Government of Bengal, to provide for local rating for the construction and maintenance of roads and other means of communication, *App.* 780–794.

Explanations in connection with the District Road Fund and Local Funds under the Madras Act of 1871, *App.* 863.

See also *Bombay*, I. 5. *District Road Cess Act (Bengal). Local Taxation and Finance.*

Report, 1873—*continued.*

Roorkee College. Information relative to the staff and working of Roorkee College, witness submitting that natives are but nominally instructed for civil engineering or anything else, *Nowrozjee Furdoonjee* 5151——Reference to a Report by the Principal of Roorkee College as testifying to the fitness of natives for extended employment in the Public Works Department, *ib.* 5157-5159.

Ryots. See *Condition of the People. Land Revenue. Taxation.*

S.

SALARIES:

Evidence strongly in favour of the increased employment of natives as a means of reducing the civil salaries and expenditure, *Sir C. E. Trevelyan* 848-854——Propriety of smaller salaries to natives than to Europeans holding the same offices, *ib.* 850, 851——Necessity of a check in the Supreme Government upon the standard of civil servants' remuneration under local administration, *ib,* 1415.

Fairness of lower remuneration of natives than of Europeans in the same offices, *Lord Lawrence* 4822. 4826——Very small salaries in the lower grades of the public service, *ib.* 4826.

Injustice in natives not being paid as well as Europeans for the same work; further injustice in the better paid offices being withheld from natives, *Nowrozjee Furdoonjee* 5251-5259.

Opinion that a reasonable standard of remuneration should be fixed for native employés, and that Europeans in India desirous of entering the public service should come under the same standard, *Lord Lawrence* 5309-5313——Great discontent to be created by giving a much larger salary to a European than to a native holding the same appointment, *ib.* 5366-5370——Inexpediency of less pay of military men than of civilians, where the former fill the same offices as the latter, *ib.* 5367, 5368.

Argument that natives, being duly qualified for judicial appointment, should be, in fairness, promoted to the higher grades, and should receive the same salaries as Europeans holding the same posts; the salary should, in fact, be fixed with reference to the work to be done, irrespectively of the doer, *Nowrozjee Furdoonjee* 5863-5877. 5977. 5984——Expediency of a large reduction in the education inspectors' salaries, whether filled by Europeans or natives; ample supply of qualified natives at very much lower salaries, *ib.* 5969-5992.

Large expenditure out of India of the liberal salaries and pensions of European officials; grievance thereby, *Dadabhai Naoroji* 6755-6760. 6839-6845——Large saving to be made in the cost of the civil administration by an extensive employment of qualified natives at lower salaries than are given to Europeans, *ib.* 6776, 6777.

Minute by Sir Charles Trevelyan, as member of the Council of the Governor General of India, dated 1st February 1864, on the subject of subordinate civil establishments in Bombay; approval of an increase of salaries, *App.* 678-681.

SALT:

Doubt as to the expediency of any further increase of the salt-tax, though the price has been kept down by the better facilities of carriage, *Sir C. E. Trevelyan* 683-685——Data for the conclusion that the incidence of the salt-tax is very light, that the prejudice in this country against the tax is altogether fallacious and unreasonable, and that in India the tax is a popular one, *ib.* 911-915——The annual incidence per head of the highest existing rate of duty is less than one shilling, *ib.* 911——The railways have had an immense influence in cheapening salt, *ib.*——Millions of natives know nothing of the tax, *ib.* 915.

Large increase of the salt revenue of Madras in consequence of arrangements set on foot by witness after his appointment as Governor, *Sir C. E. Trevelyan* 1281.

Several changes made in the amount of the salt duty in Bengal and the Punjaub, the present rate in the Punjaub being three rupees a maund, and in Bengal three rupees four annas, *Lord Lawrence* 4503—— Conclusion that a duty of three rupees per maund is an enormous rate; great dissatisfaction on the subject in the Punjaub, *ib.* 4503-4509——Very light duty in the Trans-Indus districts, as compared with the rate of three rupees, upon the Cis-Indus salt, *ib.* 4503. 4506.

Approval of the salt-tax being retained, though witness would gladly see it reduced in Northern India and Bengal, *Lord Lawrence* 4504-4510——Considerable expense in maintaining the Customs salt line in central India, *ib.* 4510, 4511——The salt-tax should certainly be not increased until the people are better able to bear an enhanced rate, *ib.* 5570-5575.

Evidence relative to the oppressive operation of the salt-tax in Bombay, the people being exceedingly poor, and altogether unable to supply themselves with a sufficient quantity of this necessary article of consumption, *Nowrozjee Furdoonjee,* 5926-5957——

Report, 1873—*continued.*

SALT—continued.

The duty in Bombay has been largely increased since 1844, and is now one rupee thirteen annas per maund of eighty-two pounds, *Nowrozjee Furdoonjee* 5926. 5940-5944——Gradual increase of the salt duty in Bombay, so that it now amounts to 1,600 per cent. on the cost of production and manufacture, *ib.* 5926.

Inaccuracy of a statement before the Committee by the Reverend Dr. Wilson, that the natives did not complain of the tax; instance (in Surat) of loud and bitter complaint, amounting to a riot, *Nowrozjee Furdoonjee* 5926. 5939 ——Utter inability of the cultivators in Bombay to pay the same salt duty as the Bengalees; much higher amount in the former Presidency, *ib.* 5926. 5935-5939. 5956, 5957.

Quotation of a report by Mr. Peddar, Salt Commissioner, in July 1870, urging reasons against any further enhancement of the salt tax in Bombay, *Nowrozjee Furdoonjee* 6899 ——Information with further reference to the price and consumption of salt in the Presidency, *ib.* 6904-6907.

See also *Condition of the People.*

Saltpetre. Mistake made by Mr. Wilson in increasing the duty on saltpetre, *Sir C. E. Trevelyan* 926.

Sanitary Commission (Bombay). Absence of necessity for the Sanitary Commission recently instituted, *Nowrozjee Furdoonjee* 5286.

Saone Irrigation Works. Strong exception taken to the Saone Irrigation Works, as being a very speculative project, *Sir C. E. Trevelyan* 1250.

Saugor Barracks. Costly and defective construction of these barracks; examination as to the officers responsible, *Crommelin* 60, 61. 92-104. 151-177. 183-190——Loss of 95,000 *l.* in respect of these buildings, *App.* 655.

Seccombe, Thomas Lawrence, C. B., and Edward Francis Harrison. (Analysis of their Evidence.) (*Mr. Harrison*—Third Examination.)—Explanation that due provision has been made in the accounts laid before Parliament for the year 1871-72, for exhibiting separately all necessary particulars relative to each guaranteed railway, 4132-4134.

(*Mr. Seccombe.*) Information supplied in the Home Accounts, subsequently to 1869, relative to the capital, revenue, and guaranteed interest of the several railways, 4135 ——Statement of the mode in which bills are drawn on India, there being every security against fraud or forged bills, 4136.

(*Mr. Harrison.*) Practice not to pay bills on India until due advice has been received from England; absence of any case of forgery, 4137-4143——(*Mr. Seccombe.*) Explanation of the origin of the separate accounts which are kept as to remittances; character of the audit of these accounts, 4144-4149.

(*Mr. Harrison.*) Cause of difference between the amount of interest on "Loans" and on "Funded and Unfunded Debt"; in the accounts for 1871-72 this difference does not appear, 4150——Inconvenience of the distinction formerly observed in India between registered debt and funded debt; this is now remedied, 4150-4158——Full details given in the revised form of accounts under the heads of revenue, 4159, 4160 ——Explanation that the revised Revenue Accounts have been prepared by witness in consequence of the report of the present Committee in 1871; 4159, 4160.

Much more complete information now given relative to the extraordinary expenditure on public works; well-known deficiency of the old accounts in this respect, 4160, 4161 ——Obstacles and objections to the charge for pensions being distributed among the three presidencies, 4161, 4162——Difficulty also in the accounts showing the distribution of stores among the several presidencies, 4163. 4167——Feasibility of each local government showing in its accounts the several sources whence the expenditure is made up, as for stores, &c., 4164-4167——Inaccuracy of the view of Mr. Goodliffe that considerable abatements are made on the military fund payments in India, 4168, 4169.

(*Mr. Seccombe.*) Full account kept in the India Office of the transactions of the several railways, 4170.

(*Mr. Harrison.*) Explanation of an apparent discrepancy or error in the Finance Accounts as regards the post office receipts and charges, 4171——Concurrence between the Finance Accounts and the statement of the Moral and Material Progress of India on certain points in which discrepancies are stated by Mr. Goodliffe to exist; that is, as regards public works, 4172-4174. 4179-4180——Difficulty in entirely avoiding discrepancies between the Finance Accounts and the statement of the Moral and Material Progress of India; explanation hereon as to the mode in which the latter is made up, 4175-4178.

Amount of detail given in the Finance Accounts on the subject of telegraph expenditure, 4181——Witness repeats that the objection, generally, as to insufficiency of detail has been met in the accounts now before Parliament; the revised form was, in fact, prepared

Report, 1873—*continued.*

Seccombe, T. L., C.B., *and E. F. Harrison.* (Analysis of their Evidence)—*continued*
prepared by witness while Mr. Goodliffe was still at the India Office, 4181. 4188. 4226. 4294-4298——Imperfect information in the Finance Accounts for 1869-70, as regards losses from irrecoverable loans to municipalities, 4182-4187——Dissent from the objection raised by Mr. Goodliffe on the ground that there was no proper Exchequer Account, 4188-4193.

Witness submits that the net cost of the Army is readily obtainable from the accounts; examination hereon upon the question whether the charge for the Military Secretary at the India Office, and a portion of the charge for the Ecclesiastical Establishments should not appear in the Army Accounts, 4194 *et seq.*——Reason for the Presbyterian and Roman Catholic clergy attached to regiments being a military charge whilst the general Ecclesiastical Establishment is treated as a civil charge, 4227-4245.

Statement as to surgeons who are attached to stations and not to regiments being dealt with as a civil charge, 4237-4247——Examination upon the question whether a larger proportion of the entire cost of the medical establishment should not be a military charge; considerable medical services in connection with gaols, police, &c., 4246-4272.

Explanation as regards public works expenditure extraordinary, that the revised Finance Accounts give as much information on the subject as they can give under the present policy of dealing with such works, 4273-4279. 4380-4389——Full information in the accounts as regards the receipts and expenditure of the telegraphs, 4280, 4281——Due separation already between the revenue and service accounts, 4282.

Examination in detail relative to the system of account in the matter of the military and medical funds taken over by Government, and the course pursued in the absorption of the balances; the effect of the operation was an addition to the debt, 4283-4293. 4299-4379.

Difficulty of a comparative account showing the police charges in 1862-63 and at the present time; estimated increase of about 400,000 *l.*, 4390-4392——Large increase of Post Office revenue since 1862-63, owing chiefly to the change in the mode of dealing with official postage, 4393-4397——Explanation in reference to the mode of distribution of the official postage over the different services in the revised accounts, 4398-4401——Very efficient precautions to check the actual cash balances in the numerous treasuries throughout India, 4402, 4403.

(*Mr. Seccombe.*) Statement to the effect that certain changes in the military charges at different periods have been duly shown on the face of the accounts, 4404-4409——(*Mr. Harrison and Mr. Seccombe.*) Consideration of a suggestion for showing in a separate statement the transfers that have been made from the Home Accounts to the Indian Accounts and from the latter to the former, 4410-4415.

(*Mr. Seccombe.*) Special steps taken for bringing into a satisfactory state the account current, showing the transactions between India and England; the arrears in this account will soon be cleared off, and it will be made much more complete than in former years, 4416-4419.

For First and Second Examinations of Mr. Harrison, see *Harrison, Edward Francis,* and *Edward Gay.*

Secrecy (*Government Administration*). Great complaint among the natives in Bombay on account of the system of secrecy which pervades the Government administration, *Nowrozjee Furdoonjee* 4887.

Secretary of State for India. Disadvantage to India by party Government in England, in so far as through the exigencies of party inexperienced persons are appointed to the office of Secretary of State, or of Under Secretary, *Sir C. E. Trevelyan* 627-633—— Inaccuracy of a certain statement as to India having been represented in the House of Commons by six Under Secretaries of State in six years, *ib.* 1096-1099.

See also *Council of India. Imperial Government.*

Secretariats (*India*). Heavy expense of the Secretariat Department at Bombay; great increase of this charge since 1856-57, *Nowrozjee Furdoonjee* 5141, 5142.

See also *Councils* (*India*).

Self-Government. See *Representative Institutions.*

Sholapore. Excessive enhancement of the assessment of the Sholapore district; increase of from 100 to 300 per cent. in some villages, *Nowrozjee Furdoonjee* 6971.

Simla. Exceptional and unimportant cases in which legislation takes place at Simla; opportunity of the representative members of Council to be present, *Lawrence* 5633-5636——Witness used to be about seven months at Simla, *ib.* 5637.

Estimate of from 30,000 *l.* to 40,000 *l.* a year as the cost of the migration to Simla; a large portion goes to enlarge the railway receipts, *Lord Lawrence* 5638——Allowances

Report, 1873—*continued.*

Simla—continued.

made to the Members of Council and subordinate officials for the visit to Simla, *Lord Lawrence* 5639, 5640——Circumstance of the expense of former Governors General in moving about having been equal to witness' expenses, including the cost of the sojurn at Simla, *ib.* 5639.

Soopa (*Bombay*). Increased assessment rates, varying from 31 to 100 per cent., in Soopa talooka; great decline in the prices of produce since the assessment of this talooka in 1868, *Nowrozjee Furdoonjee* 6959-6971.

Spirits (*Army Consumption.*) See *Beer and Spirits.*

Spirits and Drugs. Much less popular character of the excise on spirits and drugs than the salt tax, *Sir C. E. Trevelyan* 915——Approval of the duty on spirits and drugs by all well-disposed natives; witness considers the tax an excellent one, *ib.*

Statement in official letter from the Secretary to the Government of Bengal, in June 1873, relative to the revenue from country spirits, ganja, &c., *App.* 685-687.

STAFF CORPS:

1. *As to the circumstances under which the Staff Corps was originated.*
2. *Separate Staff Corps for each Presidency.*
3. *System of Appointment; Qualifications and Conditions required.*
4. *Colonels' Allowances, and System of Promotion.*
5. *Regulations as to Pay and Pensions; Present and Prospective Cost.*
6. *Local Officers of the Old Indian Army.*
7. *Henley Clause.*
8. *Unemployed Officers and Provisions as to Retirement.*
9. *Furlough Regulations.*
10. *Returns containing Particulars as to Employment.*
11. *Rules and Regulations generally.*

1. *As to the circumstances under which the Staff Corps was originated:*

Reference to the plan of promotion for the Indian staff corps as having been first proposed by an Indian officer in 1860, *Sir C. E. Trevelyan* 438, 439. 647——Conclusion that the Council of India gave no opposition to the present scheme of promotion in the staff corps, *ib.* 975. 977, 978——Views put on record by Sir Henry Durand, when Military Member of Council in India, in strong disapproval of the staff corps system; large increase of charge apprehended by him, *ib.* 975, 976.

Circumstance of there having been no official dissents recorded in India relative to the staff corps until after its formation, *Sir C. E. Trevelyan* 1292-1297——Belief that civilian administrators would not have recommended the staff corps system, *ib.* 1311, 1312——Full admission as to the strong advice given by Sir George Balfour and Sir George Jameson against the staff corps arrangement, *ib.* 1313, 1314——Origin of the idea of a staff corps further adverted to, *ib.* 1315.

Reference to a letter from Colonel Norman to the Secretary of State for India in February 1860 as having probably led eventually to the formation of the staff corps, *Johnson* 3192-3204.

Explanations relative to the origination of the staff corps, and the financial effect of subsequent regulations, *Lord Lawrence* 5403 *et seq.*——Important difference between the present staff corps system and the system contemplated by witness, *ib.* 5405-5413——The idea of the staff corps first came from India, but Sir Charles Wood elaborated the system, *ib.* 5408.

Witness has made careful inquiry into the origin of the staff corps, and explains the successive steps taken in the matter, the first inquiry on the subject having been set on foot by the Court of Directors in 1857, *Johnson* 7050-7054——Evils experienced in former years from the system of withdrawing officers from their regiments for unlimited periods when required for detached duties, *ib.* 7050——Nature of the inquiries and recommendations by the authorities in England and in India during the years 1858-60, pointing to the establishment of a staff corps, *ib.* 7051, 7052.

Further statement as to the circumstances under which, in February 1860, Lieutenant Colonel Norman submitted recommendations to the Secretary of State for the formation of an unattached list; important difference between this proposal and the subsequent scheme for the staff corps, *Johnson* 7052-7054—— Subsequent appointment of a military committee with reference to the amalgamation of the European and Indian forces, this committee reporting in August 1860, and submitting rules for the formation of a staff corps, *ib.* 7053, 7054——Issue eventually of a Royal Warrant in January 1861, establishing the staff corps, *ib.* 7054.

Formation of the staff corps as a means of supplying officers for the native army, and for employment in political and civil capacities; witness cannot now produce any actual

code

Report, 1873—*continued.*

STAFF CORPS—continued.

1. *As to the circumstances under which the Staff Corps was originated*—continued.

code of staff corps rules, *Johnson* 7055–7059——Original formation of the staff corps without any idea of such a "swamping" as it received in 1866, *ib.* 7118.

Examination upon the general question whether the reduction of the native army did not largely obviate the necessity of a staff corps, and whether a modified system might not have been adopted far less productive of inconvenience and expense, *Johnson* 7187 *et seq.*——Statement as to Lord Lawrence having, when in India, suggested the formation of a staff corps, somewhat similar to that now in operation, *ib.* 7230–7233.

2. *Separate Staff Corps for each Presidency:*

Three distinct staff corps, one for each presidency, established under the warrant of January 1861, *Johnson* 3106. 7054.

3. *System of Appointment; Qualifications and Conditions required:*

Double sanction necessary before any new staff appointments are created, *Kellner* 3079, 3080—— Fewer number of staff appointments, excluding the station staff appointments, than in 1856–57 or 1861–62, *ib.* 3081.

Explanation that the staff corps is recruited entirely from British regiments, as distinct from the Indian service, and that an officer leaving his regiment for the staff corps does not return to it, *Johnson* 3095–3102. 3124, 3125——Qualifications and conditions necessary before an officer is appointed, *ib.* 3103–3106——Necessity of going through the staff corps to the Indian army, *ib.* 3107.

Selection by the Commander in Chief for military staff appointments, subject to veto by the Government, *Johnson* 3108–3113——Selection also for certain appointments without the necessity of going through the staff corps; restriction of the pay by the regulations, *ib.* 3114–3118——Officers of all ranks held staff appointments, *ib.* 3145—— Vacancy created in the regiment when an officer leaves it for the staff corps, *ib.* 3150, 3151——The staff corps was by the new scheme thrown open to all officers of the Indian army who chose to enter it, *ib.* 3549.

Grounds for preferring the present system of the staff corps, and the mode of officering the native regiments therefrom, to the system formerly in force, *Lord Lawrence* 4700–4711——Consideration of the constitution of the staff corps as regards the qualifications of the officers submitted thereto; suggestions for the prevention of abuse in this respect, *ib.* 4720–4730.

Opinion that the qualifications of the officers placed on staff appointments were not impaired, nor were the regiments injured, *Lord Lawrence* 5439–5444——Tendency of some authorities to over-value the importance of an officer being a long time with his regiment; arrangement by which too frequent changes may be checked, *ib.* 5709–5713 ——Opportunity of the commanders in chief to modify the mischief of too frequent removal of officers from one regiment to another, *ib.* 5709——Importance of officers with staff appointments, as being on a kind of probation, *ib.* 5713.

Disapproval of officers in native regiments having no prospect of getting promotion out of their regiments; advantage of the arrangement whereby from six to eight officers in a native regiment were allowed to get away from it, *Lord Lawrence* 5714–5717 —— Comment upon the dissatisfaction still expressed by the officers serving in India, notwithstanding all that has been done for them, *ib.* 5803–5808.

Particulars as to the conditions of admission to, and of promotion in, the staff corps; distinct rule now in force whereby an officer is only admitted when there is a vacancy, *Johnson* 7059–7073——Absence of any fixed establishment for the staff corps, *ib.* 7074–7081——Operation of the rule whereby no officer can enter the staff corps of more than seven years' service; extent to which officers already in their corps are superseded by senior officers who enter, *ib.* 7082–7087.

Very few exchanges of late between officers of the staff corps and officers in British regiments, *Johnson* 7088, 7089——Restriction as to the number or class of staff appointments which officers taken from the European regiments can hold, *ib.* 7090–7093—— Condition of admission originally as to each officer having served already in a staff appointment within a certain period, and having qualified in the languages, *ib.* 7094—— Statement of the relative number of officers of the staff corps and not of the staff corps in January 1862; large increase subsequently of the proportion of the former to the latter, *ib.* 7095.

Amended conditions introduced relative to admission to the corps; necessity of each officer passing a sufficiently stringent examination, and possessing special qualifications, whilst in no case is there an indefeasible right of admission, *Johnson* 7095–7107—— Considerable changes in 1862 as to the constitution of the staff corps, *ib.* 7108.

Appointment of a commission of inquiry in 1864 which resulted in the Secretary of State placing all officers serving in India on precisely the same footing, irrespectively of their being, or not being, in the staff corps, *Johnson* 7109–7111——Further inquiry by a

Report, 1873—*continued.*

STAFF CORPS—continued.

3. *System of Appointment*; *Qualifications and Conditions required*—continued.

military commission, which resulted in an Order by Lord Cranborne (as Secretary of State) in 1866, to the effect that the staff corps should be open to the whole of the Indian Army, without probation or restriction of any kind; great boon conferred thereby, *Johnson* 7112-7114. 7132-7144——New rule in 1868 as to officers not being admitted whose service exceeded seven years, *ib.* 7114——Very few officers who did not join the staff corps after the regulations issued by Lord Cranborne, *ib.*

Explanation in regard to many officers acting for others in the native regiments; necessity of a year's service in a native regiment before entering into a civil department, *Johnson* 7154-7157——Less desire evinced by officers to get away from the native regiments under the staff corps system than under the previous system, *ib.* 7157-7160——Admission that much inconvenience now arises from staff corps officers, general list officers, and native infantry officers all serving in the same regiment, *ib.* 7205-7220.

Consideration of objections to the system whereby officers who have been for many years in civil employment may be deputed to do military duty, *Johnson* 7415-7420.

4. *Colonels' Allowances, and System of Promotion:*

Uselessness of remonstrances made at the time against the colonels' allowances and other parts of the army organisation scheme; undue liberality on the former score, *Sir C. E. Trevelyan* 430-439. 634-636——Approval of the formation of a staff corps, but not of the costly conditions as to promotion, *ib.* 434-437. 1305-1310.

Effect of the system of promotion in the staff corps to increase the rank and pay of the officers holding staff appointments, *Kellner* 3014, 3015. 3029-3031. 3041, 3042——Statement as to the older officers in the staff corps getting colonels' allowances, and gradually rising in the Imperial list of generals; these are not now doing any duty, *Johnson* 3134-3144——Increase of cost owing to the re-organisation of staff salaries in 1862, and the increase in the number of officers with colonels' allowances; further information promised hereon, *Kellner and Johnson* 3240-3248.

Undue expense involved in the large increase of the colonels' allowances; belief that the arrangement applies only to the old officers of the Indian army, and that officers who have joined since 1858 are subject to special rules, *Lord Lawrence* 5401. 5455-5458——Reduction of the expense as the higher officers fall off in numbers, *ib.* 5401——Much quicker promotion than formerly in the junior ranks; under the staff corps rules, a man gets his company in twelve years, *ib.* 5733, 5734.

Large increase going on in the number of officers in receipt of colonels' allowances; estimate of 513 such officers in the year 1892, at a cost of 577,000 *l.*, *Kellner* 6995.

Principle on which the system of promotion by length of service rather than by succession was established, *Johnson* 7081——Provisions in the first instance as to one officer in every thirty succeeding to colonels' allowances or off-reckonings, *ib.* 7094——Regulation issued in 1862 regarding the succession to off-reckonings, *ib.* 7108.

Evidence relative to the effect of Lord Cranborne's Despatch of 1866, more especially as regards the removal of the previous limitation upon the number of colonels' allowances; immense boon thereby, *Johnson* 7112-7114. 7132-7144——Regulation of the promotion and pension by length of service, and not by the rank in which the service has been performed, *ib.* 7120-7129.

Object of the two additional pension-rates of 650 *l.* and 750 *l.* a year to induce the retirement at an earlier date of those officers who would attain their colonels' allowances by succession and not by length of service, *Johnson* 7130——Great inducement to men to cling to the service by reason of the prospect or certainty of succeeding to colonels' allowances, *ib.* 7144-7146. 7151, 7152.

Belief that officers on the general list who entered the service between 1858 and 1861 succeed to colonels' allowances after thirty-eight years' service, in the same way as those admitted to the staff corps in 1866; impression that these officers have only succeeded to vacancies on cadres, *Johnson* 7161-7179——Power of Government to lay down new rules affecting the prospects of the general list officers who have entered the staff corps; that is, as regards their succeeding to colonels' allowances, *ib.* 7169, 7170. 7176-7179.

Further reference to the calculations (by General Hannyngton) relative to the future cost of the staff corps, and the charge for colonels' allowances; much larger estimate by Sir Henry Durand, *Johnson* 7180-7193. 7234-7243.

Number of local officers who will be eligible, if they survive, for colonels' allowances in each year from 1874 to 1884, *Kellner* 7183——Calculations of General Hannyngton adverted to as being far more moderate than those of General Broome; that is, as regards the future charge for colonels' allowances, *ib.* 7184-7186.

Several instances of officers having obtained the colonels' allowances under thirty-eight years' service, *Johnson* 7244-7248——Necessity of service for three years with a native regiment before officers can rise by promotion to the upper ranks in the staff corps,

Kellner,

Report, 1873—*continued.*

STAFF CORPS—continued.

4. *Colonels' Allowances and System of Promotion*—continued.

Kellner 7411–7414——Succession of general officers in time to colonels' allowances, the amount being about 1,124 *l.* a year, *Johnson* 7439–7444 ——Receipt of the allowance of 1,124 *l.* a year, after thirty-eight years' service, although at the time there is no service rendered in return, *ib.* 7441–7451.

Regulation as to the employment of officers of the staff corps on succeeding to colonels' allowances, *App.* 915.

5. *Regulations as to Pay and Pensions; Present and Prospective Cost:*

Consideration of and comment upon the costly burden entailed by the formation of a staff corps, without the usual limitations as to promotion, *Sir C. E. Trevelyan* 430–439. 1305–1310.

Belief that the cost of the staff corps has already nearly reached its maximum; official calculations are being prepared on this point, *Johnson* 3043, 3044. 3083. 3240–3244—— Explanations relative to the financial operation of the staff corps system; nearly all appointments carry with them a salary in addition to the pay of the rank which the officer holds, *ib.* 3045–3057. 3088–3096.

Regulation in force whereby the staff pay of each appointment is limited, there being an established scale which cannot be altered without the sanction of the Government of India and the Home Government, *Kellner* 3074–3078——Large increase of cost owing to officers of the higher ranks now holding staff appointments which were formerly held by captains and subalterns, *ib.* 3082, 3083.

Calculations relative to the number and cost of officers of cavalry, of infantry, and of the staff corps in 1862 and 1872; large decrease of officers, whilst the cost has much increased, *Kellner* 3181–3191—— Increase of cost, owing to the increased number of officers in India in the higher ranks, *ib.* 3189–3191——Item of increase in 1867-68, owing to the effect of promotions in the staff corps, *ib.* 3546–3548.

Large present expenditure in connection with the staff corps; financial advantage eventually, as the older officers or colonels are reduced in number, *Lord Lawrence* 4703, 4704. 4712–4719. 5401——Large increase of charge, owing to the enlarged character of the system of pensions, *ib.* 4718——Inadequacy of the former pension system, *ib.*

Consideration of the objects and operation of the staff corps system, and its effect as regards the number of officers attached to regiments, and the expenditure; dissent from certain views expressed on the subject by Sir Henry Durand, *Lord Lawrence* 5400 *et seq.*—— Denial that the great increase of expenditure was necessarily entailed by the staff corps system as first projected, *ib.* 5405 *et seq.*

Evidence as to the exceedingly heavy charge estimated in course of years, *Kellner* 6995. 7184–7186; *Johnson* 7180–7193. 7234–7243. 7439–7444——Explanation of the regulations as to the pay of the corps, distinguishing between the different ranks and the periods of service, *Johnson* 7094——Great increase in the number of officers in the staff corps in 1867 and in 1868 as compared with 1866, before the issue of Lord Cranborne's order, *Kellner* 7115–7117.

Expectation that in course of years the cost of officers serving with regiments will be less than the cost under the regular system, irrespectively of the staff corps; greater cost at present in the former case, *Johnson* 7234–7243.

Statement to the effect that officers of the staff corps employed in the Public Works or other civil duties receive the pay of the appointment, independently of their rank; essential distinction between the payments for civil and military duties, *Kellner* 7399–7410——Admission that it is anomalous that men employed in civil life should continue to rise in rank, and should receive the same pay, and obtain the same rank as those doing active military work, *Johnson* 7420–7422——Important increase in the cost of the native infantry regiments by reason of the higher rank of the officers now employed from the staff corps, *Kellner* 7497, 7498.

Statement of the number and cost of the officers of the Indian staff corps, of those on the general lists of cavalry and infantry, and on the cadres of old regiments, in the years 1857, 1862, and 1873, respectively, *App.* 908.

6. *Local Officers of the old Indian Army:*

Statement relative to the position and number of local officers of the Indian army who did not elect to enter the staff corps; these are in process of extinction, *Johnson* 3119–3127——Explanation that officers of the old Indian army who have not joined the staff corps are eligible for staff employment, *ib.* 7059.

Returns showing the staff duties or employment, and the number and class of officers of the local service and general list (Indian Army) on 1st April 1873, *App.* 906.

Report, 1873—*continued.*

STAFF CORPS—continued.

7. *Henley Clause:*

Examination upon the question of the Henley Clause in the Act of 1858 applying to those officers subsequently embraced in the staff corps; belief that the protection under this clause does apply to these officers, *Johnson* 3057-3073. 3152-3165.

8. *Unemployed Officers and Provisions as to Retirement:*

Liability of officers to be removed if unemployed for a certain time, and if unfit for their duties, *Johnson* 7119——Considerable number of officers of the staff corps who are not employed at all, or are doing general duty, *ib.* 7141-7149——Very few officers compulsorily retired by reason of their having been pronounced unfit for employment, *ib.* 7149, 7150——Recent rule by which an officer cannot lose his appointment in the staff corps save by special removal, *ib.* 7153.

Provision by the regulations for the removal to the half-pay or pension list of officers who have been unemployed for three years, *Johnson* 7423-7426——Statement relative to the proportion of officers unemployed in India and England, these forming a reserve force for any demand or emergency that may arise, *Kellner* 7427-7437——Decreasing number of the proportion of unemployed officers, *Johnson* 7437, 7438.

Returns showing the number of unemployed officers in England and in India, *App.* 905-907.

9. *Furlough Regulations:*

Modifications subject to which the furlough rules of 1854 were adopted as the rules of the staff corps, *Johnson* 7094.

10. *Returns containing Particulars as to Employment:*

Disposition returns of officers of the Indian Staff Corps, and of the local services in the three presidencies on the 1st April 1862, showing the number of officers of each class, and the duties on which engaged, *App.* 905——Disposition returns of officers of the Local Service and General List (Indian Army) on 1st April 1873, *ib.* 906——Disposition returns of officers of the Indian Staff Corps in the three presidencies on 1st April 1873, *ib.* 907.

11. *Rules and Regulations generally:*

Witness has received from India, and delivers in to the Committee the military rules and regulations by which the staff corps is now administered, *Johnson* 7131.

Extract from rules and regulations relative to commissions and promotions in the Bengal Staff Corps, *App.* 911-913.

Stamps and Stamp Duties. Facility with which the stamp duties are raised, witness strongly objecting, however, to the stamps upon legal proceedings, *Sir C. E. Trevelyan* 916-918——Very little room, if any, for an increase of the stamp duties, *Lord Lawrence* 5583.

Stephens, Fitzjames. Views of Mr. Fitzjames Stephens as to the moral obligation upon Government to uphold the principles of the permanent settlement in Bengal, *Sir C. J. Wingfield* 2085——Circumstance of Mr. Fitzjames Stephens having supported the levy of cesses in Bengal, on the ground that the permanent settlement left the question of cesses entirely untouched, *ib.* 2163.

Stores, and Store Accounts. Examination in approval of stock or store accounts showing the quantity of guns, ordnance, &c. in store at any time; detailed accounts already kept containing this information, *Sir C. E. Trevelyan* 1115-1127——Expediency of prompt measures being taken for the sale of old and obselete stores, such as guns, ammunition, &c.; advantage on this score of complete store accounts, *ib.* 1121-1124.

Examination in support of objections to the mode in which stores paid for in England are brought into the account, witness contending that the payments in the year should be charged within the year, and should be apportioned among the different presidencies, *Goodliffe* 2733-2796.

Difficulty in the accounts showing the distribution of stores among the several presidencies, *Harrison* 4163. 4167.

Considerable increase of cost since 1864-65 for the carriage of stores and materials, *Johnson* 3849-3851——Reduction effected in recent years in the stock of commissariat stores owing to the advantage of quicker means of transport; effect of such reduction as regards the army expenditure, *Kellner* 3864-3873. 3972-3979.

Particulars relative to the annual expenditure in each presidency under the subordinate heads of the Grant for Ordnance Establishments, Stores, and Equipage; increase of the gross expenditure from 256,873 *l.* in 1862-63 to 599,075 *l.* in 1871-72, *Kellner* 7022——Explanations in connection with the charges for material (including all stores and ordnance supplies) in each year from 1865-66 to 1871-72; great fluctuation in the annual charge, *ib.*

Straits

Report, 1873—*continued.*

Straits Settlement. Annual outlay on military works in the Straits Settlement from 1862-63 to 1866-67; considerable decrease since the former year, *Innes* 2403.

Stud and Remount Establishments (*Army*). Evidence in detail relative to the Grant for the Stud and Remount Establishments, the system under which the studs in Bengal are conducted, the practice as to buying or importing horses, and the cost in different years in the several presidencies, *Kellner* 3998 *et seq.*——Several studs maintained in the Bengal Presidency, *ib.* 4003——Establishment of a remount depôt in Madras, there being none in Bombay, *ib.*

Investigation now being made by Government into the whole system of the stud establishments, *Kellner and Johnson* 4035–4037. 4054–4056.

Regular depôts of remounts maintained in Madras and in Bombay, whilst in Bengal there is a totally different system, there being but studs and depôts, *Johnson* 4052–4054——Origin of the studs through the difficulty of finding a sufficiency of suitable horses in India, *ib.* 4066——Considerable supply being now imported from Australia, as well as from the Persian Gulf, *ib.* 4067–4070——Facility of importing supplies at a much less cost than under the stud system, *ib.* 4071, 4072.

Succession Duties. Disapproval of succession duties in India, *Lord Lawrence* 4522.

Sukkur (*Scinde*). Immense number of articles upon which town duties are levied in Sukkur, *Nowrozjee Furdoonjee* 5221.

Sultan's Ball (*India Office*). Comment upon the expenditure of so large a sum as 10,000*l.* in entertaining the Sultan at the India Office, *Sir C. E. Trevelyan* 452–456.

Explanation that, as regards the Sultan's ball at the India Office, witness complains of the omission of the Queen's Government to offer any mark of honour to the Sultan, rather than of the entertainment itself, or the expenditure charged to India, *Sir C. E. Trevelyan* 966. 970–974.

Origin of the Sultan's ball considered in connection with the cost, a much smaller expenditure having been contemplated in the first instance, *Sir C. E. Trevelyan* 974.

Survey Department (*Land Revenue*). Rules and regulations relative to examinations and appointments in the Survey Department, *App.* 918, 919.

Comments by Mr. Nowrozjee Furdoonjee on the faults of the Revenue Survey in Bombay, *App.* 924.

T.

Tanna District. Comment upon certain irregularities and defalcations discovered in 1871 in the local Fund Engineering Department of the Tanna district; mode of appointment of the engineer officer in this case, *Nowrozjee Furdoonjee* 5042–5046.

TAXATION:

1. *Native Complaint as to the burden of Taxation.*
2. *Views of Sir Charles Trevelyan as to the impolicy of various new forms of Taxation.*
3. *System of General and Petty Taxation under Native Rule.*
4. *Unpopularity of Direct Taxation.*
5. *Expediency of restricting Expenditure, rather than of increasing Taxation.*
6. *Question of levying New Taxes irrespectively of the Land Revenue Settlement; how far Breach of Faith is involved therein.*
7. *Effect of the Decentralisation Scheme as regards the Amount of Taxation.*
8. *Statistics of Taxation in the different Provinces.*

1. *Native Complaint as to the burden of Taxation:*

Very general discontent in Bombay as regards the financial administration and the burden of taxation, *Nowrozjee Furdoonjee* 4840, 4841. 6029–6044; *Dadabhai Naoroji* 6599–6623——Dissatisfaction of the Natives with several of the Imperial taxes and the way in which they are levied, *Nowrozjee Furdoonjee* 4888——Imposition of new local taxes in Bombay in spite of the remonstrances of the people, the feeling being that there is no necessity for them, and that the great and growing expenditure should be reduced, *ib.* 6029–6044. 6037, 6038.

Witness submits that the taxation upon the productions of India is "crushing" in its effect upon the mass of the people, *Dadabhai Naoroji* 6477–6485——Calculation that whilst the total production of the country is only about 40 *s.* per head, the total incidence of taxation is about 6 *s.* per head, *ib.* 6485, 6486.

Examination as to the proportion of the total taxation which is levied upon the mass of the people; incidence of the income tax, and of portions of other taxes, upon the higher classes, *Dadabhai Naoroji* 6487–6505——Argument that so small are the means

Report, 1873—*continued.*

TAXATION—continued.

1. *Native Complaint as to the burden of Taxation*—continued.

of the poorer classes, the taxation upon them, even though light, is necessarily crushing, *Dadabhai Naoroji* 6505.

Increase of about 15 per cent. in the revenue of British India between 1863–64 and 1870–71, nearly the whole of which is due to additional taxation; question hereon as to the amount of increase of land revenue from increased cultivation, *Dadabhai Naoroji* 6681–6695——Summary of the chief increments of taxation, *ib.* 6695.

Witness submits that the immense difficulty experienced in finding any new tax which is not oppressive, and the exceedingly wretched condition of the people (as deposed to by Lord Mayo), are proofs of over-taxation, *Dadabhai Naoroji* 6727——Estimate of about 5,000,000 *l.* a year as the local taxation of India, to be added to the burden of the general taxation. *ib.* 6747–6750——Views expressed by Lord Lawrence and Lord Napier as to the discontent of the people on the score of taxation, *ib.* 6744, 6745.

Diversity of feeling in India as to the least oppressive mode of raising new taxation; doubt as to an increase of import duties being the least objectionable mode, *Dadabhai Naoroji* 6802–6804.

2. *Views of Sir Charles Trevelyan as to the impolicy of various new forms of Taxation:*

Strong disapproval of the frequent resort to new taxation since the time of the mutiny, *Sir C. E. Trevelyan* 619, 620——Legitimate character of the additions made to existing taxes since the time of the mutiny, *ib.* 647. 677, 678——Further reference to the frequent attempts to invent new taxes, and to the irritation caused thereby, though only one or two new taxes have been imposed, *ib.* 679–682.

Injustice and impolicy in denying to India the right of raising the required revenue in the manner most convenient to herself; very different course pursued towards Canada and Australia, *Sir C. E. Trevelyan* 890——Grounds for the statement that there has been a perpetual discussion of new forms of taxation; mention more especially of the income tax, the license tax, and the tobacco tax, *ib.* 1083–1088——More than a dozen different taxes have been from time to time suggested, *ib.* 1084–1087.

Further statement as to the constant attempts made under the Queen's Government to invent new taxation, though many new taxes have not improved, *Sir C. E. Trevelyan* 1100–1102——Much greater importance of showing a surplus revenue, and avoiding unpopular taxation, than of extensively promoting public works, *ib.* 1174——Strong native opinion throughout India in the matter of new taxation, *ib.* 1259.

Reference to witness' minute of 20th March 1860 (the publication of which led to his recall), in which he strongly urges the impolicy of new or increased taxation, and strenuously contends for the policy of a reduction of establishments, *Sir C. E. Trevelyan* 1282——Explanatory statement relative to the publication of the foregoing minute; extracts from subsequent minutes of the 4th April and 1st May 1860, in justification of the publicity given by witness to his condemnation of the financial policy of the Central Government, *ib.* 1283.

Strong comments by witness in his minutes of 4th April and 1st May 1860, upon the system of taxation imposed at the instance of Mr. Wilson; protest, also, against the blame attributed to the Madras Government for its active opposition to the financial policy in question, *Sir C. E. Trevelyan* 1283.

Grounds for the conclusion that taxes would now be willingly submitted to for local or municipal purposes, though unpopular for Imperial purposes, *Sir C. E. Trevelyan* 1373–1379——Expediency of the feelings of the natives being fully consulted in matters of taxation, as they will bear less under the British rule than under native rule, *ib.* 1396–1400.

3. *System of General and Petty Taxation under Native Rule:*

Ancient system of Indian finance that everything should be taxed, *Sir C. E. Trevelyan* 764——Very low rates at which taxes were levied under the former native system, the people having become accustomed to universal petty taxation, *ib.* 1080. 1088——General taxation of articles formerly under the head of sayer, though not for Imperial purposes, *ib.* 1394–1396.

4. *Unpopularity of Direct Taxation:*

Strong native predilection for indirect taxation as compared with an income tax or license tax, *Sir C. E. Trevelyan* 390, 891.

5. *Expediency of restricting Expenditure, rather than of increasing Taxation:*

Reversal in recent years of the old rule of Indian finance, whereby the income was dealt with as a certain quantity by which the expenditure was regulated; present rule of first fixing the expenditure, and bringing the taxation up to it, *Sir C. E. Trevelan* 818.

Extracts from minutes by witness when in India, dated 10th June 1859, and 20th March 1860, advocating the policy of reduction of expenditure instead of increase of taxation,

Report, 1873—*continued.*

TAXATION—continued.

5. *Expediency of restricting Expenditure, rather than of increasing Taxation*—contd.

taxation, *Sir C. E. Trevelyan* 1281, 1282——Extract from further minute, dated 1st December 1859, in which witness again advocates the policy of reduction of military and other expenditure, *ib.* 1282.

Great disturbance of the public mind by reason of the liability to novel and incessant taxation, *Sir C. J. Wingfield* 2104-2109——Importance of moderation in taxation as regards military expenditure, *ib.* 2117.

Complaint that the deficit under the decentralisation scheme in Bombay was not met by reduction of expenditure instead of by new taxes, *Maclean* 2421-2426. 2453, 2454.

6. *Question of levying New Taxes irrespectively of the Land Revenue Settlement; how far Breach of Faith is involved therein:*

Argument that, notwithstanding the permanent settlement in Bengal, it would be perfectly just to place an export duty on jute and other produce of the province, *Sir C. E. Trevelyan* 1194-1201.

Several items of local taxation in Bengal, there being some charges upon land, but no general cess on the land, as in other provinces, *Harrison* 1723-1726——Miscellaneous local receipts in Bengal to the amount of 31,000 *l.*, but not in the nature of taxation, *ib.* 1731, 1732.

Doubt as to any complaints having been made in Bombay that it was a breach of faith to impose a road cess on the land revenue after the completion of the settlement, *Harrison* 1853-1860——Statement made by Mr. Strachey in the Governor General's Council in March 1871, relative to the great increase in the value of land in Oude, and throughout India, and the propriety of charging chiefly upon land the local expenditure required for roads and other communications, *ib.* 1933, 1934.

Evidence in strong disapproval of the levy of new or increased cesses in Oude, as involving a breach of the terms under which the land revenue settlement was made, *Sir C. J. Wingfield* 2050 *et seq.*——Contravention of the settlement in Bombay by the local cess for roads and education, *ib.* 2053, 2054. 2086-2088——Obstacles to a reservation of the right of Government to levy cesses apart from land revenue, *ib.* 2070-2072. 2088——Breach of contract equally involved, whether the land revenue be exceeded for local or for Imperiol purposes, *ib.* 2173, 2174.

Grounds for the conclusion that cesses for roads and other local improvements may fairly be imposed under the permanent settlement in Bengal; it is essential, however, that moderation be observed, and that no cess be imposed for Imperial purposes, *Lord Lawrence* 4461-4463——Less difficulty in suddenly raising an increased taxation if the general poverty of the country be relieved by a permanent settlement, *ib.* 5569——Entire concurrence in the view that where the cesses are comprised in the terms of a settlement, it would be a breach of faith to compulsorily impose new cesses whether Imperial or local; this does not apply to Bengal, *ib.* 5654-5660.

Hardship and injustice in the imposition of new cesses upon the ryots in Bombay who hold under the thirty years' settlement, and upon owners of rent-free lands, *Nowrozjee Furdoonjee* 4932, 4933.

With regard to the anna cess imposed in the Bombay Presidency by the Act of 1869, witness submits that the imposition of the tax during the current settlement was a direct breach of faith; extracts cited from various official documents in support of this conclusion, *Dadabhai Naoorji* 6716-6718——In support of the statement that the exaction of local cesses in Bombay involves a breach of faith, witness quotes the testimony of the Government itself, *ib.* 6989.

7. *Effect of the Decentralisation Scheme as regards the Amount of Taxation:*

Belief that if the plan were carried out as contemplated by witness, the necessity for new local taxation would disappear, *Sir C. E. Trevelyan* 861——Grounds for concluding that the necessity for addition or local taxation would not arise under a well-matured plan of decentralisation, *ib.* 862.

Denial that the extension of provincial or local taxation was a necessary result of the reduction of the income tax; it has arisen rather from the incomplete inauguration of the decentralisation system, *Sir C. E. Trevelyan* 1368-1372.

Extent of disturbance or re-adjustment of taxation caused in India by the scheme relieving the Central Government of 350,000 *l.* of Imperial taxation, *Harrison* 1945. 1992-1995——Item of 88,199 *l.* as the amount to be made good in Bengal under the arrangement of 1871, *ib.* 1945——Complication in levying some of the local cesses required under the scheme of 1871, *ib.* 2022-2027.

Necessity of imposing new cesses locally, or increasing existing ones, if, as is anticipated by some competent authorities, the local expenditure under the decentralisation scheme should increase in future years, *Harrison* 2028-2036.

Report, 1873—*continued.*

TAXATION—continued.

7. *Effect of the Decentralisation Scheme as regurds the Amount of Taxation*—contd.

Decided effect of the decentralisation scheme in causing the levying of more taxation, *Sir C. J. Wingfield* 2064. 2098, 2099. 2118, 2119——Disapproval of the great extension of local taxation to the poorer classes in relief of Imperial taxation, *ib.* 2184–2186.

Mischievous effect of the decentralisation policy as stimulating the district officers in Bombay to increase the assessments on the land in spite of the thirty years' settlement; instances of this in the Deccan, *Maclean* 2421–2426. 2453, 2454.

General effect of the decentralisation system that there has been additional local taxation rather than retrenchment, *Lord Lawrence* 4527–4532.

Constant agitation and discontent among the natives of Bombay by reason of the unsatisfactory system in regard to local taxation, more especially since the decentralisation system, *Nowrozjee Furdoonjee* 4858, 4859. 6029–6034. 6037, 6038.

Resolution by the Government of India, dated 14th December 1870, delegating large additional powers of taxation and expenditure to the local governments, *App.* 837–840. ——Tabular statement in explanation of the assignments to be made for provincial services, *ib.* 841.

8. *Statistics of Taxation in the different Provinces:*

Official communications from the Government of Bengal relative to the Imperial and local taxation of the Presidency down to 1871-72, *App.* 683-705——Similar communications from the Governments of the Punjaub, the North Western Provinces, Oude, British Burmah, and the Central Provinces, *ib.* 706 *et seq.*

See also *Army. Bombay. Campbell, Sir George. Central Provinces. Condition of the People. Customs Duties. East India Company. Excise. Duties. Expenditure. Exports and Export Duties. Government of India. House Tax. Imports and Import Duties. Income Tax. Land Revenue. License Tax. Local Taxation and Finance. Moturpha Tax. Municipal Taxation. North Western Provinces. Opium. Oude. Police. Poll Tax. Prices. Public Opinion (England). Punjaub. Representative Institutions. Salt Tax. Simla. Stamp Duties. Stephens, Fitzjames. Succession Duties. Tobacco.*

Telegraphs. Full information in the Finance Accounts as regards the receipts and expenditure of the telegraphs, *Harrison* 4181. 4280, 4281.——*See* also *Indo-European Telegraph.*

Tippoo Sultan. Statement relative to the extraordinary liberality shown to the family of Tippoo Sultan at the expense of the taxpayers of India, this being an instance of expenditure which the East India Company would never have sanctioned, *Sir C. E. Trecelyan* 452. 456-458. 521. 556, 557.

Tobacco. Opinion recorded by witness in June 1859 strongly adverse to proposals for a tax upon tobacco, *Sir C. E. Trevelyan* 1281——Objection to a tobacco tax, as being really an additional tax on the land, *Lord Lawrence* 4522, 4523.

Tolls and Ferries. Receipt of 130,178 *l.* from tolls and ferries in Bengal in 1871-72; *Harrison* 1729–1731.

Complaint relative to the oppressive tolls on roads and bridges throughout the Bombay Presidency; vexatious manner in which levied, *Nowrozjee Furdoonjee* 5047–5062.

Town Duties. Sundry details in connection with the town duties, and the circumstances which led to their abolition as recommended in a report by witness, *Sir C. E. Trevelyan* 759–764——Extracts from report by witness on the town duties, or transit duties, in October 1833, relative to the injurious effect of these duties upon the trade of the country, *ib.* 1380——Extensive re-imposition of town duties in Bombay, the North Western Provinces, and the Punjaub after the mutiny, without any exemption of the staple articles of the foreign trade; comment upon the evils of the system, *ib.*

Evidence in further explanation of the system of town duties which formerly prevailed in India, and of the great obstruction caused thereby to the general trade; detailed statement on the subject in witness' official report of October 1833, *Sir C. E. Trevelyan* 1384–1397—— Particulars in this report as to the operation of these duties at Mirzapoor, Banda, and other places, and as to the injurious effect upon the trade of those places, *ib.* 1386.

Full operation formerly of the bonding system as a palliation of the town duties, *Sir C. E. Trevelyan* 1386——Popularity of the old system of town duties as levied under the native rulers in small towns in the Punjaub and Oude, *ib.* 1387–1391——Explanation that though strongly objecting to town duties, or an octroi, witness would certainly maintain them rather than loose the advantages of municipal government, *ib.* 1392, 1393.

Reference to the report to the Government of India on town duties, in 1833, as showing the objections then urged against these duties; subsequent abolition of this system of finance, *Harrison* 1648, 1649——Nature of the objections made by the Government of India in 1864 to the system of town duties, *ib.* 1654.

Report, 1873—*continued.*

Town Duties—continued.

Explanations in connection with an Act of 1868 legalising the octroi system of taxation for towns in the North Western Provinces; this Act can only be applied where there is a municipality, *Harrison* 1655–1665——Consideration by Sir William Muir of certain objections raised against the octroi system in the North Western Provinces; disapproval by him of the plan of farming the town duties, as in the Central Provinces, *ib.* 1666–1670——Information relative to the town duties in Poonah, Surat, and other places in Bombay, and the receipts therefrom, *ib.* 1877–1883.

Great number of articles on which town duties are levied in some places in Bombay; great increase of taxation from this source, *Nowrozjee Furdoonjee* 5221.

Trade of India. See *Exports, &c.* *Imports, &c.*

Trades and Professions Tax. Statement showing the actual receipts in 1870–71, and the estimated yield during 1871–72, from the tax on professions and trades in the municipalities of the North Western Provinces in which the tax is in force, *App.* 737.

Receipts from the tax on trades and professions in the Central Provinces in 1870–71 and 1871–72, *App.* 778.

Provisions of the Madras Towns Improvement Act of 1871 relative to the taxation of trades and professions, *App.* 816, 817——Schedule in explanation of the rates of taxation, *ib.* 829, 830.

Transit Duties. Evils of the former transit duties which led to their abolition, *Sir C. E. Trevelyan* 759, 760. 764——Consideration as to the objectionable character of the transit duties in the Native States, and as to the necessity of some arrangement on the principle of the Zollverein, *ib.* 1486–1500.——*See* also *Town Duties.*

Transport of Troops and Stores (Inland Transport):

Statement relative to the large increase (138,000 *l.*) in railway transport charges in 1868–69; explanation that the old means of transport are still maintained to some extent, *Kellner* 3694–3707——Very large item of increase in respect of inland transport, *Johnson* 3695——Greater cost of conveyance by railway than of marching to and from the ports, *Kellner* 3708–3713. 3750, 3751. 3757——Means of ascertaining the effect of railway transport upon the Commissariat or Transport establishment maintained, *ib.* 3714–3718.

Very large increase since 1862–63 in the total cost of inland transport, *Kellner* 3753–3758——Increase of 235,460 *l.* in the cost of the transport services of the commissariat between 1862–63 and 1871–72, *ib.*——Heavy charge in respect of the railway transport of stores and war material, *ib.* 3758.

Sundry details submitted in explanation of the large increase in the cost of inland transport under various heads, *Johnson* 3759 *et seq.*——Large addition to the cost of transport when military operations are undertaken, *ib.* 3759——Advantage to the public finances on account of the railway receipts for transport, *ib.* 3762–3766——Conclusions as to the necessity of the railways in order to carry out the required movements of troops, *ib.* 3767.

Increased cost of 168,000 *l.* for transport since 1861–62, owing chiefly to the railway transport to and from Bombay, *Johnson* 3769. 3795–3800. 3824–3826——Enhanced charge for transport on account of the increased use of stations, *ib.* 3769——Increase of inland transport charge by reason of the increase of wages and the increased cost of feeding cattle, *ib.* 3785, 3786——Increase also on account of the assistance which it is found necessary to afford soldiers' families; also on account of the assistance now given to Native soldiers when going on sick furlough, *ib.* 3827–3830. 3849.

Several causes which have led to an increase of charge for the movement of troops, notwithstanding the extension of the railway system, *Lord Lawrence* 4743, 4744——Great decrease in the available supply of elephants and oxen for transport purposes in time of emergency, so that it is more necessary than formerly to keep an increased establishment of animals, *ib.* 4745–4747.

Comparatively small payment formerly for carriage or transport; great difficulty in providing carriage, on account of the short payment made, *Lord Lawrence* 5384——Large increase of the charge for carriage since an improved transport system has been established, *ib.* 5384, 5385——Causes of the increased expense of transport further adverted to and explained, *ib.* 5459–5461.

See also *Beer and Spirits.* *Forced Labour.*

Transport of Troops and Stores (Sea Transport). See *Troop Service.*

Travancore. Evidence in detail relative to the financial administration of the Native State of Travancore, during the period from 1863–64 to 1870–71, and the exceedingly satisfactory results thereof as compared with British administration in India; large accumulation of surplus revenue during the period in question, *Dadabhai Naoroji* 6624–6697.——Increase of 20 per cent. in the revenue of Travancore between 1863–64 and 1870–71,

Report, 1873—*continued.*

Travancore—continued.

1870-71, whilst there has been a reduction in the taxation, *Dadabhai Naoroji*, 6628. 6681. 6695——Doubt as to Government employment having ever been offered to the able administrator of Travancore, Sir Madhava Rao, *ib.* 6787-6791.

Improved financial condition of Travancore further adverted to; question hereon whether the reuenue of Madras has not increased in a still greater ratio, *Dadabhai Naoroji* 6819-6830.

Statement relative to the tribute or contribution paid by Travancore to the Government of India, *App.* 640.

Statement of the revenue and expenditure of Travancore for the years 1863-64 and 1870-71, *App.* 927.

Details of public works in Travancore for the years 1870-71; particulars of receipts and expenditure on each work, *App.* 928-936.

Trevelyan, Sir Charles Edward, K.C.B. (Analysis of his Evidence.)—Various offices filled by witness in India from 1826 to 1838; he was also Governor of Madras in 1859-60, and was Finance Minister of India from January 1863 to April 1864; 396, 397——Opinion that the normal state of Indian finance is sound and satisfactory, whilst, since the time of the mutiny, the revenue has shown extraordinary elasticity, 398-400——Frequent instances of prompt restoration of Indian finance after it has been deranged, 398——Average increase of revenue at the rate of about three quarters of a million a year since the mutiny, 398, 399.

Much greater weakness in Indian finance since the disruption of the East India Company, that body having been frugal and independent, and having stoutly opposed all external or Imperial claims which were unduly pressed, 400-414——Mercantile origin and mercantile habits of the Company, whilst it was very careful in expenditure, and scarcely ever imposed new taxation, 403-414.

Argument that under the direct administration of India by the Secretary of State in Council no sufficient barrier exists against official or popular pressure in the direction of liberal expenditure, 415-417. 426. 581——Comment upon the immense and wasteful expenditure upon new barracks and other military buildings, this outlay having originated in England, and the plans of model barracks having been settled in the main by the Home Authorities, 418-429——Palatial character of the barracks, whilst they are totally unsuited to the circumstances of the country, 418-422——Conviction of witness that the East India Company would never have consented to an expenditure of 10,000,000 *l.* or 11,000,000 *l.* on new barracks, &c., 424, 425. 580.

Much larger discretion left in the local governments in India by the East India Company than by the Secretary of State in Council, 425-427——Excessive and uncalled for liberality in carrying out the amalgamation of the Indian Army with the Queen's Army, this being a further illustration of the inadequate protection of Indian finance under the system of a Secretary of State responsible to Parliament, 430-439. 530, 531——Comment more especially upon the colonels' allowances, and the unprecedented liberality in this respect, 430-439——Economy in carrying out the abolition of purchase in the English army, as compared with the neglect of the Indian taxpayer in carrying out the amalgamation of the Indian army with that of the Queen, 430, 431. 436——Doubt where the plan of promotion for the staff corps originated, 438, 439.

Complaint also as to the great and unnecessary expense imposed upon India in respect of the recruiting establishment in England; very moderate cost of recruits in the time of the East India Company, 440-445——Undue expense also thrown upon India as regards the navy, the annual subsidy in aid of Imperial funds not being a fair charge upon the revenues of India, 446-451——Obsolete and costly character of the Indian navy, so that it was wisely abolished; it had, however, done good service, 446-449. 517-520——Equal claim upon Australia and other colonies as upon India for contributions in aid of the navy, 446.

Statement relative to the extraordinary liberality shown to the family of Tippoo Sultan, at the expense of the taxpayers of India, this being a further instance of expenditure which the East India Company would never have sanctioned, 452. 456-458. 521. 556, 557——Comment also upon the expenditure of so large a sum as 10,000 *l.* in entertaining the Sultan at the India Office, 452-456——Further instance of uncalled for liberality in the large addition made to the stipend of the Nawab of the Carnatic, and of his numerous dependents, 459, 460. 556, 557.

Grounds for the conclusion that a very extravagant financial arrangement was made in respect of Mysore, upon its restoration to native rule, 461. 608-610——Opinion that a great mistake was made in not permanently absorbing or annexing Mysore, 461-463. 526, 527. 553-555——Statement relative to the mismanagement and failure in the case of the Indo-European telegraph, and the perpetual charge thereby upon the finances of India; belief that, under the East India Company, the interests of India in the matter would have been much more closely looked after, 464-479. 534-536——Absence in the

Council

Report, 1873—*continued.*

Trevelyan, Sir Charles Edward, K.C.B. (Analysis of his Evidence)—*continued.*

Council of India of any such representative of Indian interests as Sir James Melvill, in the time of the Company, 472-479.

Evidence in explanation and strong condemnation of the project known as the Mutlah Railway, witness submitting that this scheme was forced upon the Government of India by the Home Government under the pressure brought to bear by Home interests, 480-491——Entire inability of the Government of India to resist the Home Government, backed by the Home public, 489, 490. 546——Comment upon the result of the Orissa irrigation scheme, the works having been taken over by the Secretary of State in Council after they had proved a dead failure; pressure in this case upon the Secretary of State by monied interests in this country, 492-497.

Reference to the transfer of the Elphinstone Land Company at Bombay to Government, and the heavy cost involved, 498, 499——Attempt made to involve Government in the scheme for the reclamation of Back Bay at Bombay; rejection of this proposal, 498-500——Comment upon the enlarged action given to the Bank of Bombay by the Bombay Government without the knowledge or sanction of the Government of India, 498. 501, 502.

Several instances, under the new *régime,* of the Government of Bombay having acted, financially, in direct opposition to the views of the Government of India; this could not have occurred under the East India Company, 503-508——Advantage to India by the transfer of government to the Crown, provided the adverse influences complained of by witness be remedied, 509-511——Obsolete and imperfect character of the former system of accounts, the present system being far more efficient, 512, 513.

Radical reform required in the Public Works Department, which has been greatly over-centralised, 513——Doubt as to the expediency of keeping any sort of stock account of public works, 514, 515——Disapproval of its being a condition of pensions to Native princes that the money must be spent in India, 522-525——Approval of liberal encouragement to the investment of English capital in India, though there should be no munificence at the expense of India, 528, 529——Further statement as to the Home Government having been principally responsible for the plans of the new barracks, and for the adoption of an upper storey, 532, 533. 571-577.

Entirely independent character originally of the East India Company, whilst to the last they preserved a very large measure of independence, 537——Public-spirited manner in which the Madras Irrigation Company was originated, though the scheme is likely to entail a heavy loss upon the finances of India, 538, 539——Way in which, under the East India Company, the Government of Bombay would have been precluded from setting the Government of India at defiance, 540-542.

Best protection for the taxpayers of India by an improved knowledge and state of feeling in England which shall make itself felt in the Home Government; difficulty of any remedy by a modification of the Council of India, 543-546——Expediency of fuller development of the decentralisation system, 546, 547——Further statement as to the unfairness of charging India with any portion of the cost of naval protection, 548-552.

Evidence in further illustration of the disregard of financial control by the Government of Bombay, whilst the Government of India was powerless to prevent the mischief, 558-566. 601-603——Unexceptionable conduct of the Government of Madras in financial matters, 562. 566——Inexpediency of reducing the status of the Governments of Bombay and Madras to that of the other local Governments, 567-570——Great necessity for reduction of expenditure in the Bombay Presidency, 570.

Entire dissent from Colonel Crommelin's opinion that a barrack with an upper storey is cooler and more comfortable than the old-fashioned bungalow, 577-579. 597, 598——Important defence of Indian interests in the time of the Company, through many of the Directors having seats in Parliament, 582-585——More influential and independent check on the Council of India if its members, or some of them, had seats in Parliament, 585-596. 599, 600——Identity formerly between the mercantile interests of England and the interests of India, whereas, since the abolition of the Company, mercantile interests operate to the detriment of Indian finance, 604-607.

Way in which not only Mysore, but other Native States, have benefited by British administration, at the cost of the inhabitants of British India, 608-610——Objection to the Native States being now called upon to contribute their full quota towards military police, &c., 609, 610.

Opinion that the finances of India may soon be made more flourishing than ever if proper correctives be applied, 611, 612——Difficulty in calculating the proportion of increased revenue due to increased taxation, 613-615——Increasing revenue from opium over a course of years, though the annual receipt fluctuates greatly, 616——Further statement as to the salutary opposition of the Company to new taxation, 617, 618——Strong disapproval of the frequent resort to new taxation since the time of the mutiny, 619, 620——Repugnance of the people to the principle of the income tax rather than to its amount, 620.

Report, 1873—*continued.*

Trevelyan, Sir Charles Edward, K.C.B. (Analysis of his Evidence)—*continued.*

Important effect of the rise in prices in India upon the question of public expenditure; indirect effect upon the revenue, 621–626——Disadvantage to India by party government in England in so far as through the exigencies of party inexperienced persons are appointed to the office of Secretary of State, or of Under Secretary, 627–633——Way in which India suffers from class interests in England, 628——Uselessness of remonstrances made at the time against the colonels' allowances and other parts of the army amalgamation scheme, 634–636.

Strong temptation to the English Government to throw upon India more than its fair share of expenditure, 637, 638——Much less direct and influential representation of Indian interests than in the time of the company, 637. 640——Further statement relative to the undue charge upon India in respect of recruits, witness submitting that the charge is based upon arrangements framed with a view primarily to English interests, 641–646——Powerlessness of the Secretary of State for India to compel the removal of grievances, as in the case of the charge for recruits, 642–645.

[Second Examination.] Further reference to the plan of promotion for the Indian staff corps as having been first proposed by an Indian officer in 1860; 647——Legitimate character of the additions made to existing taxes since the time of the mutiny, 647. 677, 678——Grounds upon which, on further consideration, witness is opposed to the members of the Council of India having seats in Parliament, 647. 676.

Examination showing that the purchase of the Orissa Irrigation Works was recommended by the Government of India, and that the Secretary of State gave a much less sum for the works than was so recommended, 648, 649——Statement with further reference to the strength of the Indian depôts in England and the excessive charge made upon India for recruits; decided injustice to India in this matter, 650–659——Obstacle to ascertaining the sums spent by native agents in England, in order to influence English opinion; the amount is doubtless very large, 660–662.

Circumstance of some minutes by witness relative to the Mutlah Railway not having been included with the Parliamentary Papers published on the subject, 663–667——Large rise in the value of the shares of the Elphinstone Land Scheme on its becoming known that Government was likely to be a purchaser, 668——Advantages of a detailed scrutiny with a view to the exposure of the persons who are to blame in connection with the Mutlah project, the Orissa Scheme, the Bank of Bombay, &c. 669, 670. 692. 712–715.

Evidence in further support of the conclusion that the Government of Bombay has shown an impatience of control and an independence of action, as regards public works, &c., which would never have been allowed in the time of the East India Company, 671–675. 686–691. 697–699——Doubt as to its being possible so to reconstruct the Indian Council as to make it a safe guardian of the interests of India, 678——Further reference to the frequent attempts to invent new taxes, and to the irritation caused thereby, though only one or two new taxes have been imposed, 679–682——Doubt as to the expediency of any further increase of the salt tax, though the price has been kept down by the better facilities of carriage, 683–685.

Examination as to the grounds for witness' conclusion that the Government of Bombay had ample authority to prevent the abuse which occurred in connection with the Bank of Bombay, 692–711——Further examination also as to the data for witness' condemnation of the Home Government on account of its purchase of the Orissa works; that is, at so extravagant a price, 712–726——Statement on the subject of the pressure brought to bear by native princes, through Parliament, upon the Home Government, 727–735.

Evidence in support of the conclusion that under the East India Company, during a part of Lord Amherst's administration, and a part of Lord William Bentinck's administration, the finances were in a flourishing state, 736–748——Large reduction of expenditure and surplus incomes during the latter period of Lord W. Bentinck's administration, 744–747——Policy of the company to keep in their own hands the supervision of the local governments, whereas in more recent years the theory has sprung up that India should be governed in India and not in England, 748–754.

Explanation and defence of the plan (originated by witness in Madras), whereby the transmission of a large amount of information to this country by the local governments has been dispensed with, 755–758——Sundry details in connection with the town duties, and the circumstances which led to their abolition as recommended in a report by witness, 759–764——Evils of the former transit duties which led to their abolition, 759, 760. 764——Ancient system of Indian finance that everything should be taxed, 764——Lengthened period for which the muhtarafa tax was retained in the south of India, whilst in the native states it is as prevalent as ever, 765–767.

Statement as to the standard of European troops in India after the mutiny having been first fixed at about 70,000 men, and since reduced to 60,000; 768–772. 784–787——Much less necessity for a large European force since the reduction of the native army, 773——Great excess of artillery, more especially; undue delay in the reduction of the force, 773–775. 782, 783——Opinion that the maintenance of the Cossipore gun foundry

Report, 1873—*continued.*

Trevelyan, Sir Charles Edward, K.C.B. (Analysis of his Evidence)—*continued.*

is a great mistake, 775–777——Similar opinion as regards the Government tannery at Cawnpore for harness, *ib.* ——Further reference to the charge for recruits as unduly high, 777–781. 788–790.

Argument showing the great evils consequent upon the over-centralisation of finance, 791–799——Impossibility of making any effectual revision of the annual estimates under the system of centralisation; experience of witness, as finance minister, to this effect, *ib.* ——Strong motive to economy by each presidency administering its own finances, 791 ——Object at present of the local administrations to get the largest possible share of the common fund, 791. 794.

Statement showing the unduly large share received by Bombay out of the common fund, under the new system of provincial assignment, 791——Opinion that the main administration, both of income and of expenditure, must reside in the local governments, 792——Great importance of decentralisation, as the principal remedy for the derangement of the finances, 800. 805——Admission that the higher prices in Bombay than in Madras offer some reason, but not a sufficient one, for the larger proportionate expenditure in the former presidency, 801–804——Contemplated initiative in the local governments in the matter of taxation, 805–809.

Monster instance of over-centralisation in the case of the Public Works Department, 810–813——Illustrations, in the matter of railways, of the great abuse consequent upon the organisation of the department, *ib.*——Undue power in the hands of the officer at the head of the department, 811, 812——Belief that a great mistake was made in the selection of the metre, or narrow gauge, for certain railways, 812, 813.

Belief also that large and costly irrigation schemes are a great mistake, and that village tanks are the most useful and profitable means of supplying water for irrigation, 813—— Advantage of anicuts, or dams across river, as a means of providing irrigation, *ib.*—— Dead loss on the Ganges Canal, if the account be properly taken, *ib.*——Comment upon the principle of compulsory water rates as applied in connection with irrigation canals, *ib.* —— Unduly independent position of the officers who administer the irrigation system, *ib.*

Grounds for the conclusion that the system of borrowing money for public works is a potent cause of the derangement of the finances, 814–816——Injurious effect of the income tax in India as offering facilities for increased taxation in order to meet profuse expenditure on public works, &c., 815——Importance of keeping expenditure within the ordinary growth of revenue, and of carefully limiting works to the ways and means raised in the year, 815–817——Expediency in India of a departmental and independent control similar to the Treasury control in England, 817, 818.

Reversal in recent years of the old rule of Indian finance whereby the income was dealt with as a certain quantity by which the expenditure was regulated; present rule of first fixing the expenditure, and bringing the taxation up to it, 818——Effect of the appointment of a finance minister in weakening the financial responsibility of the Governor General and the local governors, 819–822——Statement as to the local governors having now nothing to do with finance, whereas when they were responsible the finances were conducted in a very regular and satisfactory manner, 822, 823.

Suggestions relative to the new military arrangements desirable in order to effect the curtailment required in the military expenditure, 824–844——Special room for reduction in the case of the Madras army, the Madras Presidency being peculiarly peaceful; recommendations hereon, 824, 825. 828, 829. 842–844——Great value of the local police throughout India, so that the military force may the better be curtailed, 828. 836 ——Great saving by reducing, not only the native force, but the artillery, 829, 830.

Grounds for the recommendation that there be only one army in India, under the Supreme Government, and that the separate head quarters and general commands of Bengal, Bombay, and Madras be abolished, 830–835——Great economy by abolishing the separate head quarters' staffs, &c., 832——Objections to the office of Commander in Chief as being an office greatly overgrown and as involving a double set of duties which cannot be performed by one person, 837–841——Suggestion that the offices of Commander in Chief and military member of council be fused into one in the person of a Minister of War, and that the duty of inspection be performed by the Commanders of the local army corps, 841.

Further reference to the naval subsidy paid by India to the Admiralty as an unjustifiable charge, 845——Large room for economy as regards transports and other vessels employed in connection with Bombay, 845–847——Importance of bringing dockyards in India under strict control and limitation, 845, 846——Opinion that it would be far better to depend on the British Navy and on hired transports for all naval duties, 845–847.

Evidence strongly in favour of the increased employment of natives as a means of reducing the civil salaries and expenditure, 848–854——Solemn pledges already given to employ the natives equally with Europeans, according to their qualifications, though

Report, 1873—*continued.*

Trevelyan, Sir Charles Edward, K.C.B. (Analysis of his Evidence)—*continued.*

practically nothing has yet been done in fulfilment of such pledges, 849. 852——Propriety of smaller salaries to natives than to Europeans, holding the same offices, 850, 851——Excellent qualifications of the natives for civil offices of various kinds, as in the Customs, the judicial department, &c., 851.

Conclusion further expressed as to the primary importance of the decentralisation of the finances as a security for economy, 855——Steps taken by witness and subsequent finance ministers in the direction of decentralisation, *ib.*——Decided approval of the principle of Lord Mayo's resolution of 14th December 1870, handing over certain branches of administration to the local governments, and assigning them a certain sum out of the general revenue for carrying on the service; conclusion, nevertheless, as to the very inadequate and defective character of this arrangement, 855-857.

Opinion that the proper arrangement is to define the services to be administered by the Supreme Government, for which a sum should be taken out of the general revenue, whilst all the rest should be left to the local governments, 857-860——Importance of the question of the disposal of the balance or surplus under the decentralisation system; suggestions hereon, 857-860——Belief that if the plan were carried out as contemplated by witness the necessity for local taxation would disappear, 861.

[Third Examination.] Further statement of the grounds for concluding that the necessity for additional or local taxation would not arise under a well-matured plan of decentralisation, 862——Expediency of representation being commensurate with taxation in India, as in European countries, 863——Suggestion that there be eight provincial and quasi-representative councils, which should sit at the chief seats of the eight local administrations; the principle of popular election should not, in the first instance, be applied to these councils, 863, 864——Suggestion that there be also zillah, or county councils, to be chosen as soon as possible by direct election, *ib.*——Suggestion also that there be town and village municipalities, to whom the principle of direct election should at once apply, *ib.*

Sundry data for the conclusion that the people of India are prepared for the efficient exercise of the principle of popular representation; special reference hereon to the village municipality as the very foundation of Indian society, and as the salvation of India, 864-866——Very numerous instances throughout India of the public-spirited liberality of Natives, 866——Great political value of the proposed representative institutions as a school of self-government for the whole of India, *ib.*

Views of Mr. Campbell, Lieutenant Governor of Bengal, as to the great advantages of the system of provincial finance, and local self-taxation for local benefits, 866.——Suggestions by Mr. Campbell for an extension of the decentralisation system of finance; that is, as regards the funds assigned for the uncovenanted services, *ib.*

Proposal that each provincial council should comprise a representative of every district in the Presidency, to be selected, in the first instance, by Government; qualifications to be had in view, 867-869——Contemplated payment of such Members of the Council as require payment, 870——Expected independence of character and action on the part of members, 871——Great advantage of full discussion of all questions of finance, and of the initiation of taxation, at the seats of the eight provincial administrations, although no new taxation should be permitted without the previous sanction of the Supreme Government, 872-884.

Inexpediency of the intervention of the Supreme Government until after full local discussion, 873-880——Full responsibility to be vested in the local executive government as to the initiation of taxation, the budget for the presidency being submitted to the provincial council before going to the Supreme Government, 881-884——Great improvement as regards public works under the decentralisation system advocated by witness, 884——Especial advantage of the system of local or provincial finance in the case of irrigation works, *ib.*——Prevention also of great abuse in the way of alienations of revenue and free grants, and of pensions to native dynasties, if there were or had been local representative councils, 884, 885.

Further and important advantage of the system of administration advocated by witness, inasmuch as the Supreme Government would become detached from its exclusive connection with Bengal, and would be built up of intelligence derived from all India, instead of from one presidency, 885-889——Impracticability, on the part, of the Governor General over-ruling the local official interest and the strong Bengal tradition by which the constitution of the Supreme Government was determined, 887-889——Misnomer involved in the term "Government of India," the main portion of the Government resting with the eight provincial administrations, 888, 889.

Injustice and impolicy in denying to India the right of raising the required revenue in the manner most convenient to herself; very different course pursued towards Canada and Australia, 890——Strong native predilection for indirect taxation as compared with an income tax, or license tax, 890, 891——Odium caused by a license tax as an imperial tax, though when assessed by municipalities there is not the same aversion, 892-895.

Report, 1873—*continued.*

Trevelyan, Sir Charles Edward, K.C.B. (Analysis of his Evidence)—*continued.*

895. 908——Popularity in Bengal of the rude form of income tax assessed by the heads of villages for local purposes, 895. 908.

Conclusions in strong condemnation of an imperial income tax, the assessment being most unequal and unjust, and the collection of the tax being attended with great extortion and peculation, 896-910——Statement showing that an income tax based upon the principle of self-assessment is entirely unsuited to the people of India, 896——Small produce of the income tax if fixed high, whereas if fixed low, it causes wide-spread irritation, 897, 898——Extracts from witness' last financial statement, as Finance Minister, showing the gross and net receipts from the first income tax in the five years from 1860, the rate of assessment, and the appropriation of the proceeds, 909, 910.

Data for the conclusion that the incidence of the salt tax is very light, that the prejudice in this country against the tax is altogether fallacious and unreasonable, and that in India the tax is a popular one, 911-915——Much less popular character of the excise on spirits and drugs than the salt tax, 915——Approval of the duty on spirits and drugs by all well-disposed natives; witness considers the tax an excellent one, *ib.*—— Facility with which the stamp duties are raised, witness strongly objecting however to the stamps upon legal proceedings, 916-918.

Fertility of the opium revenue, whilst it is not a tax upon the people of India; reliable character of this source of revenue, though the amount varies greatly from year to year, 919-921. 925——Reference to an official minute by witness, before leaving India, upon the question of extending the Bombay system of opium revenue to Bengal, 921, 922.

Evidence as to the total inadequacy of the customs duties with reference to the great and growing trade of India, witness strongly advocating a revision of export duties, 923-933——Several respects in which by the abolition or reduction of taxes the ground has been cleared for a good customs revenue, 923-925——Expediency of giving every possible encouragement to the imports of India, 925——Entire monopoly of jute possessed by India, so that an export duty of 3 or 5 per cent. might well be imposed, 926-929.

Circumstance of Mr. Wilson having approved of export duties, 926, 927——Views expressed by Mr. McCulloch in 1859, in favour of duties on exports under certain circumstances, 927——High authorities in India in favour of export duties on certain articles; local mercantile feeling also favourable thereto, 930-933——Limit to the export trade of India by reason only of the limited amount of labour and capital applicable to production, 933.

Importance of the hands of Government being strengthened against the constantly recurring claims of Indian officers, 934——Further consideration of the steps to be taken for exposing and preventing the lavish expenditure in England on the part of Indian magnates and native princes in influencing public opinion, 935-941——Larger discretion of the local governments in India, when under the Company, as to the mode of carrying out new measures, 942——Instances of large expenditure in India originated by the Secretary of State under home pressure, 942-945.

Examination as to witness' grounds for the conclusion that the Council of India has failed to exercise an effectual check in several instances of large and questionable expenditure; rare instances of the Council being over-ruled by the Secretary of State, 946-959——Disregard formerly of the representations of the East India Company adverse to the Affghan War, and other matters involving large Indian expenditure; stout and effectual resistance frequently made however against undue burdens being thrown upon the Indian Exchequer by the Queen's Government, 960-966.

Explanation that, as regards the Sultan's ball at the India Office, witness complains of the omission of the Queen's Government to offer any mark of honour to the Sultan, rather than of the entertainment itself, or of the expenditure charged to India, 966. 970-974——Frugality of the East India Company in their public dinners and entertainments; statistics hereon, 966-971——Origin of the Sultan's ball considered in connection with the cost, a much smaller expenditure having been contemplated in the first instance, 974.

[Fourth Examination.]—Statement in confirmation of former evidence as to the ineffectual check exercised by the Indian Council for the protection of Indian interests, 975——Conclusion that the Council gave no opposition to the present scheme of promotion in the Staff Corps, 975. 977, 978——Views put on record by Sir Henry Durand, when Military Member of Council in India, in strong disapproval of the Staff Corps system; large increase of charge apprehended by him, 975, 976.

Important reduction of import duties on numerous articles by witness when Finance Minister of India, 979——Comment upon the objection of the Secretary of State in 1865 to an export duty of 3 per cent. on Indian coffee, 979, 980——Large increase in

Report, 1873—*continued.*

Trevelyan, Sir Charles Edward, K.C.B. (Analysis of his Evidence)—*continued.*

the principal articles of export between 1862 and 1871; 980——Views expressed by Mr. Remfry and Mr. Bullen at a meeting of the Calcutta Chamber of Commerce, in March 1859, in favour of an export duty on certain articles, *ib.*——Similar views expressed by Mr. Maitland at a public meeting at Calcutta on the customs duties in April 1859, *ib.*——Similar course advocated by Mr. Bullen Smith in the Legislative Council of India in March 1871, *ib.*——Further reference to a certain Minute by witness in November in favour of converting the Bengal opium monopoly into an export duty, *ib.*

Argument in further support of the conclusion that on the score of frugality the administration of India was much more satisfactory under the Company than under the Crown, 981-986——Stronger mercantile influence brought to bear upon the Queen's Government than upon the Company; objection to any larger mercantile element in the Council of India, 987-991——Witness repeats that as regards recruits for India, the "actual cost" should alone be charged, 992——Further statement as to the more independent position and action of the Company than of the India Council in all detailed financial matters; illustration of this in the financial controversies between the Melvills and witness, 993-1000.

Free admission by witness that the officers under the Council of India do the utmost in their power for Indian interests, 1001-1004——Very costly results of the Affghan war further adverted to, the Company having been overruled in the matter by the Queen's Government, 1005, 1006——Impression that the Company made no serious objection to the annexation of Oude, 1007, 1008.

Examination in detail upon the question whether the pressure to construct new and extensive barracks was not first put by the Government of India upon the Home Government instead of by the latter upon the former; attention of witness drawn to a Despatch on this subject by Lord Elgin in January 1863; 1009-1025——Impression that the recommendations of the Royal Sanitary Commission formed the basis of the barrack plans prepared in India; accuracy of this view impugned, 1014-1028.

(*Colonel Crommelin.*)—Very slight changes made by witness in the plans for new barracks, or in his Report of October 1861, in consequence of the suggestions of the Royal Sanitary Commission, 1026-1028.

(*Sir Charles Trevelyan.*)—Belief that the Royal Commission recommended that the troops should not sleep on the ground floor, 1029-1032——Report by Colonel Crommelin in October 1863 adverted to as showing that he discouraged upper storeys, save in damp parts of the country, 1033-1036——Views expressed by Sir John Lawrence, as Governor General, in favour of barracks with an upper storey, 1037——Circumstance of witness having in a Minute, dated 19th March 1864, expressed a preference for upper storeyed barracks; this is entirely opposed to his present views, 1038-1042——Explanation and modification of former evidence as to the actual amount thrown away on new barracks by reason of faulty construction, &c., 1043-1052.

Grounds for the conclusion that the East India Company would probably have prevented the arrangement made about the Red Sea Telegraph, 1053, 1054——Further statement in disapproval of the charge against India for the services of the Navy in the Persian Gulf, 1055-1060——Considerable sum formerly expected to be saved by the absorption of the Indian Navy into the Royal Navy, 1061.

Examination with further reference to the insufficient action of the Home Government in regard to the financial extravagance of the Government of Bombay in 1863; 1062-1096——Circumstance of witness having as Finance Minister at Calcutta recommended that certain of the works proposed by Sir Bartle Frere in 1863 in excess of the money at his disposal should be proceeded with, 1064.

Explanation as to the professional authorities and the personal experience upon which witness condemns the mètre gauge for the Punjaub Railways, 1067-1076——Statement that, in proposing to remit the income and expenditure of India into the hands of the people of India, witness refers to the higher cultivated class who are under the influence of a wholesome public opinion, 1077——Necessity of the employment of a large number of ill-paid natives in the assessment and collection of such taxes as the income tax and license tax, *ib.*——Suggested development, more vigorously, of the policy of opening better paid and more responsible appointments to the natives, 1077-1079.

Very low rates at which taxes were levied under the former native system, the people having become accustomed to universal petty taxation, 1080, 1088——Reference to the income tax as a portentious instrument of exaction, although as now levied it may affect only one in a thousand, 1080-1082——Grounds for the statement that there has been a perpetual discussion of new forms of taxation; mention more especially of the income tax, the license tax, and the tobacco tax, 1083-1088.

Question of a stock taking further adverted to with reference to the great loss incurred in respect of canal and navigation works, &c.; decided objection to a stock account, 1089-1095——Explanation that witness fully approves of expenditure on public

Report, 1373—*continued.*

Trevelyan, Sir Charles Edward, K.C.B. (Analysis of his Evidence)—*continued.*

public works provided it be properly regulated, 1093——Inaccuracy of a certain statement as to India having been represented in the House of Commons by six Under Secretaries of State in six years, 1096–1099——Further statement as to the constant attempts made under the Queen's Government to invent new taxation, though many new taxes have not been imposed, 1100–1102.

Circumstance of there being a strong official opinion in Bengal and the North Western Provinces in favour of the income tax; the Madras collectors are on the other hand very generally opposed to the tax, 1103–1107——Suggestion as regards the decentralisation of the finances, that whilst the local governments should have elastic budgets the Supreme Government should have certain fixed services and charges allotted to it, 1108–1110.

Examination in approval of stock or store accounts showing the quantity of guns, ordnance, &c., in store at any time; detailed accounts already kept containing this information, 1115–1127——Expediency of prompt measures being taken for the sale of the old and obsolete stores, such as guns, ammunition, &c.; advantage on this score of complete store accounts, 1121–1124——Objection to a capital account of barracks showing the expenditure from year to year, 1126——Discovery by witness in Madras of several ancient barracks, unsuited to the present time; waste of money in keeping these in repair, 1127–1133——Advantage of a periodical survey of barracks, stores, &c., 1127–1152.

Inspection by witness of the Wellington barracks in the Neilgherries; suitable accommodation in these for European troops, 1134–1136——Explanation as to these barracks being used for convalescents; regret expressed that they are not properly utilised, 1137–1140——Conclusion that a much larger number of the European army should be located in the hills; suggestions to this effect, 1141–1152——Expediency of every encouragement being given to colonisation of the hill tracts; efforts of witness to this end, 1142.

Comment upon the omission from the public accounts of numerous forms of alienation of revenue; contemplated resumption of many of these alienations, 1153——Several dissents by members of the Indian Council upon the question of the amalgamation of the Queen's Army and the Company's Army, 1154, 1155——Necessity of a large European force in India, though involving an immense cost, 1156, 1157.

Disapproval of publicity of the debates of the Indian Council; in such case the Council would be still more subject to English influences, as against India, 1158–1161——Solid basis on which the finances would rest if there were a strong popular element round the local centres, under the decentralisation system, 1162–1164——Successful application of the principle of the income tax by the natives in the form of a municipal tax, 1165, 1166——Disapproval of a direct poll tax, apart from the salt tax, 1167–1172——Objection to the income tax, even though the limit were placed at 10,000 rupees a year, 1173——Much greater importance of showing a surplus revenue, and avoiding unpopular taxation, than of extensively promoting public works, 1174.

Mention of the eight local Governments contemplated under the decentralisation scheme, 1176–1178——Definition of the functions to be discharged by the supreme and local Governments respectively, and of the several heads of service to fall to the administration of each, 1179–1186——Explanation of the heads of revenue proposed to be appropriated to the Supreme Government in order to enable it to defray the expenditure on general services, 1184, 1185——Strong motive to economy in the Supreme Government as well as in the provincial Governments by the proposed allocation of services, and of funds wherewith to defray the expense thereof, 1185.

Further explanation of the proposed constitution of the local representative councils; contemplated selection in the first instance by Government, 1187–1189——Proposed decentralisation of public works, including irrigation works, 1190–1192——Power still to be exercised by the Central Government as to the railways, and their administration, though the local Governments should be largely consulted, 1193.

Argument that, notwithstanding the permanent settlement in Bengal, it would be perfectly just to place an export duty on jute and other produce of the province, 1194–1201——Suggestion that a moderate export duty might be levied on hides, 1201.

[Fifth Examination.]—Quotations from Minutes, dated 11th January and 1st February 1864, in strong condemnation of the action of the Bombay Government in ordering large expenditure without the sanction of the Central Government, 1202——Extracts from the last Financial Statement of witness, and the first Financial Statement of Mr. Massey, relative to the immense expenditure to be provided for in respect of barracks; this expense was "forced" upon the Government of India, and rendered it absolutely necessary to enter upon a system of loans, 1203.

Statement showing that witness was well qualified for judging as to the best railway gauge to be adopted in India; repetition of objections to the narrow gauge for trunk lines, 1204–1207——Further statement that an export duty on any article should apply to the

Report, 1873—*continued.*

Trevelyan, Sir Charles Edward, K.C.B. (Analysis of his Evidence)—*continued.*

whole of India, and not be confined to Bengal or any other province, 1208–1217——Immense development of wealth in Bengal under the permanent settlement, the surplus revenue being greatly in excess of the revenue from any other province, 1209–1216.

Further explanation that, under the proposed system of local finance, the Supreme Government should have a veto upon new taxation, and upon borrowing by the provincial Governments, 1218–1225——Popularity of excessive expenditure in Bombay under the present system, whereas if any deficiency were to be made good out of local resources there would be every motive to economy, 1219–1221——Expediency of central control over salaries and other local expenditure affecting the general administration of India, 1222.

Great importance attached to very low rates both for passengers and goods in the working of the Indian railways, 1226–1229. 1248——Better returns from the railways by lowering the rates, 1229. 1248——Grave mistake made in laying out the Madras railway, as it passes many large towns at a considerable distance from them, 1230–1235——Strong interest taken by witness, when in India, in the opening up of the Godavery, 1236–1244——Importance generally of opening out the rivers where practicable, 1237. 1244.

Approval of the prompt construction of the proposed railway from Lahore to Peshawur; political value of this line, 1245, 1246. 1248, 1249——Opinion in favour also of the line between Moultan and Kotri, though it need not be undertaken at once, 1246–1248——Strong exception taken to the Saone Irrigation Works, as being a very speculative project, 1250.

Argument in detail in strong support of the system of permanent settlement of the land revenue, Government being fully recouped for any direct loss of revenue by the increased prosperity of the people, 1251–1258——Grave objections to which a thirty-years' settlement is open; evil of the absence of security, as compared with the sense of security under permanent settlement, 1251——Great mistake in not making the settlement in Bengal with the real proprietors of the land; also in applying the settlement to uncultivated land, 1251. 1255. 1278, 1279.

Political value of the permanent settlement as a sure means of attaching the people of India to the British Government, 1253——Great importance of an extension of permanent settlements in conjunction with the plan of local finance and provincial administration; much better position of the people thereby as regards municipal taxation for local purposes, 1253–1258.

Strong native opinion throughout India in the matter of new taxation, 1259——Indirect pressure of municipal expenditure in Bombay, as the money has been largely borrowed, 1260——Contemplated majority of natives on the local representative councils advocated by witness; confidence to be placed in them as regards the expenditure of their own money, 1261–1270.

Conclusion as to the immense extension of cultivation in Bengal under the permanent settlement, 1271, 1272——Further statement as to the much less confidence and content under a thirty years' settlement than under a permanent settlement, 1273–1277——Comparative satisfaction given by the thirty years' settlement in the North Western Provinces, 1275–1277——Statement in further disapproval of making permanent settlements with middle men, or zemindars, so-called, 1278–1280.

Opinion recorded by witness in June 1859 strongly adverse to proposals for a tax upon tobacco, 1281——Large increase of the salt revenue of Madras, in consequence of arrangements set on foot by witness after his appointment as governor, *ib.*——Extract from Minute by witness, dated 10th June 1859, advocating the policy of reduction of expenditure instead of increase of taxation, *ib.*

Extract from further Minute by witness, as Governor of Madras, dated 11th July 1859, in detailed elucidation of his views as to the curtailment desirable and feasible in the military expenditure, and as to the re-organisation of the police, 1282——Further Minute by witness, dated 13th July 1859, relative to the evils of over-centralization, and the remedies required, *ib.*——Extract from further Minute, dated 1st December 1859, in which witness again advocates the policy of reduction of military and other expenditure, *ib.*

Special reference to witness' Minute of 20th March 1860 (the publication of which led to his recall), in which he strongly urges the impolicy of new or increased taxation, and strenuously contends for the policy of a reduction of establishments, 1282——Explanatory statement relative to the publication of the foregoing Minute; extracts from subsequent Minutes of 4th April and 1st May 1860, in justification of the publicity given by witness to his condemnation of the financial policy of the Central Government, 1283——Strong comments by witness, in his Minutes of 4th April and 1st May 1860, upon the system of taxation imposed at the instance of Mr. Wilson; protest also against the blame attributed to the Madras Government for its active opposition to the financial policy in question, *ib.*

Conviction

Report, 1873—*continued.*

Trevelyan, Sir Charles Edward, K.C.B. (Analysis of his Evidence)—*continued.*

Conviction of witness that the policy of reduction of expenditure advocated by him in 1859 and 1860 would have been adequate to restore the equilibrium of the finances, 1284——Satisfactory reduction made eventually in the military expenditure at the instance of Mr. Laing, assisted by Sir George Balfour and Sir George Jameson, 1285——Valuable services rendered also by Sir Bartle Frere in the direction of military economy, 1286, 1287——Injunctions sent to the Government of India by Lord Stanley (Earl of Derby) for a reduction of military expenditure; steps previously taken for this purpose by Lord Canning, 1288, 1289.

Great increase of military expenditure since the period of the reduction therein by Lord Canning after the Mutiny, 1290–1294——Reference to witness' financial statement for 1865-66, as showing the increase of military charge under various heads, the increased price of rations being an important item, 1290——Views urged by witness as Finance Minister in favour of a reduction of the native army, but without effect; Minutes hereon handed in, *ib.*——Circumstance of there having been no official dissents recorded in India relative to the staff corps, until after its formation, 1292–1297.

Explanations in connection with correspondence between the Secretary of State and the Government of India in 1869-71 relative to the extent and character of the reduction to be effected in the native army and in the European artillery, 1298–1304——Larger reductions urged by the Government of India than were sanctioned by the Home Government, 1298–1302——Objections raised by the Government of India in 1870 against the excessive number of artillery officers; large unnecessary expenditure on this score, 1299.

Further consideration of the costly burden entailed by the formation of a staff corps, without the usual limitations as to promotion, 1305–1310——Belief that civilian administrators would not have recommended the staff corps system, 1311, 1312——Full admission as to the strong advice given by Sir George Balfour and Sir George Jameson against the staff corps arrangement, 1313, 1314——Origin of the idea of a staff corps further adverted to, 1315——Testimony to the excellent public services of Sir George Jameson, 1316. 1319——Instances of military administrators or officials who have been strong economists, 1316–1320.

Explanation as to witness, when Finance Minister, having been adverse to the continued maintenance of the special Military Commission (Sir George Balfour and Sir George Jameson) though the Commission had done most excellent service, 1319, 1320——Large and unnecessary increase of expenditure beyond the amount as settled by the Military Commission, owing to the numerical maintenance of the native army; room for great economy by a reduction of the Madras and Bombay armies, 1321–1327——Belief that the European force may be further reduced, though the greatest care should be observed before reduction, 1323. 1328——Information relative to the extensive economy effected by Sir George Balfour and witness in the Madras military expenditure, 1328.

Examination in support of the conclusion that, including the revenue from salt and customs, the increase of indirect revenue from Bengal through the permanent settlement of the land revenue, more than compensates for the apparent loss consequent upon such settlement; comparison with the North Western Provinces as regards income tax, stamps, excise, &c., 1329–1344——Admission that a thirty years' lease, as in the North Western Provinces, is effectual in bringing waste land into cultivation; denial, however, that it is equally effectual with permanent settlement, as in Bengal, in causing the application of capital and improvements to the land, 1344–1349.

Examination upon the question whether customary tenants are not liable under the permanent settlement to have their rents raised by the proprietors by reason of the increased value of the soil; deprecation of the exercise of any such power, 1350–1357——Cheerful payment of the land tax by the people, as compared with the payment of direct taxation, 1357–1361——Reference to the rise of prices as the only argument against a permanent settlement, whilst this argument is outweighed by the great security and contentment given by such settlement, 1358.

Evidence opposed to a low income-tax, although less abuse would doubtless arise as the operation of the tax is restricted, 1362–1368——Denial that the extension of provincial or local taxation was a necessary result of the reduction of the income-tax; it has arisen rather from the incomplete inauguration of the decentralisation system, 1368–1372——Grounds for the conclusion that taxes would now be willingly submitted to for local or municipal purposes, though unpopular for Imperial purposes, 1373–1379——Reference to a resolution of the Supreme Government in August 1864 upon the decentralisation of the police expenditure, as an important part of the financial reforms set on foot by witness when in India, 1379.

[Sixth Examination.]—Past experience in the matter of town duties adverted to in illustration of the importance of keeping the customs revenue under the supreme Government, 1380——Extracts from Report by witness on the town duties, or transit duties, in October 1833, relative to the injurious effect of these duties upon the trade of the country,

Report, 1873—*continued.*

Trevelyan, Sir Charles Edward, K.C.B. (Analysis of his Evidence)—*continued.*

1380——Extensive reimposition of town duties in Bombay, the North West Provinces, and the Punjaub after the Mutiny, without any exemption of the staple articles of the foreign trade; comment upon the evils of the system, *ib.*

Further information relative to the very extensive reductions of Madras military expenditure effected by the Madras Government and the Military Finance Commission after the Mutiny, 1381, 1382—— Re-organisation and increased expense of the police concurrently with the large reduction made in the Madras army, 1382——Approval of the policy which led to the entertainments formerly given by the East India Company to their civil servants, 1383.

Evidence in further explanation of the system of town duties which formerly prevailed in India, and of the great obstructions caused thereby to the general trade; detailed statement on the subject in witness' official Report of October 1833; 1384-1397—— Particulars in this Report as to the operation of these duties at Mirzapoor, Banda, and other places, and as to the injurious effect upon the trade of those places, 1386——Full operation formerly of the bonding system as a palliation of the town duties, *ib.*

Popularity of the old system of town duties as levied under the native rulers in small towns in the Punjaub and Oude, 1387-1391——Explanation that, though strongly objecting to town duties or an octroi, witness would certainly maintain them rather than lose the advantages of municipal government, 1392, 1393——General taxation of articles formerly under the head of sayer, though not for Imperial purposes, 1394-1396—— Expediency of the feelings of the natives being fully consulted in matters of taxation, as they will bear less under British rule than under native rule, 1396-1400.

Dissent from the theory that, in the case of public works, the justification for loans should be when the works are expected to yield a return equal to the interest on the money borrowed, 1401-1408——Reproductive character of roads, though not yielding any direct revenue, 1401-1403—— Suggestions as to the restrictions desirable in raising loans for public works; expediency of loans being for large and well-defined objects, clearly distinguishable from ordinary income and expenditure, 1404-1410.

Further outline of witness' scheme of decentralisation, with explanations more especially as regards the initiation of public works in each province, 1411-1420——Necessity of a check in the Supreme Government upon the standard of civil servants' remuneration under local administration, 1415——Much less probability of wasteful public works (such as the Orissa Scheme, the Saone Works, &c.) being undertaken if the selection and payment rested with the Provincial Government, 1416-1421——Doubt as to any evil arising on the score of want of uniformity if each province carried out its own works, 1421——More useful roads made if there were representative councils, 1422-1424.

Expediency of the railway gauge in each province being subject to the decision of the Central Government, 1425——Conclusion that borrowing should not be resorted to *habitually for* public works, but only when the work is an urgent one, and when the means clearly exist for paying the interest, 1426-1429——Facility of raising public loans cheaply, the difficulty being to attract surplus private capital from England for investment in India, 1430-1432.

Further explanations relative to the constitution of the proposed local councils for each Government; suggestion that about two-thirds of the members should be representative, whilst the official European element, to be nominated, should be about one-third, 1433-1439——Defence of the proposal for vesting a large discretion in the representative councils in the matter of local taxation; that is, subject to the veto of the Provincial Government and of the Governor General, 1440-1446.

Effect of the permanent settlement further adverted to in connection with the question of the right of the proprietors to raise the tenants' rents, 1447-1449——Disapproval of a permanent redemption of the land revenue, 1450-1452——Suggestions that waste lands or mountainous districts be sold to the highest bidder, subject to a fixed annual quit rent, 1452——Increased receipts from existing taxes other than the land revenue, in the event of a continued rise of prices under the permanent settlement, 1453-1455—— Expediency of confining permanent settlement to fully cultivated districts, 1455.

Examination to the effect that, in order to ascertain the exact financial condition of each province, it would be necessary to take to pieces the existing financial accounts, and put them together again on a new principle, 1456-1485——Utter confusion of the accounts, as for each province, by the preponderating item of army expenditure, 1457——Very large surplus revenue belonging, apparently, to Bengal; this is fallacious, though Bengal can doubtless show a considerable surplus, 1458-1463. 1469, 1470—— Large surplus in the case of Madras, 1471——Statement that Bombay has always been our financial difficulty, and has been sucking the rest of India for years, 1472-1474—— Exception taken to the credit given in the Bombay accounts in respect of the Malwa opium; undue charge, on the other hand, in respect of the army, 1472-1485.

Considerations as to the objectionable character of the transit duties in the Native States, and as to the necessity of some arrangement on the principle of the Zollverein, 1486-

Report, 1873—*continued.*

Trevelyan, Sir Charles Edward, K.C.B. (Analysis of his Evidence)—*continued.*

1486-1500——Explanation as to the model contemplated by witness in applying to India the plan of decentralisation; he would give to each local Government autonomy in every respect not inconsistent with the general interest, which should still be guarded by the Supreme Government, 1501-1504——Separate civil service contemplated for each province, 1505——General supervision to be exercised by the Central Government over the Customs Department in each province, 1506, 1507——The Post Office would be under the Supreme Government, 1508, 1509——The police should be entirely local, 1510, 1511.

Approval of separate legislative councils at Madras and Bombay, 1512-1514——Unnecessarily expensive character of the High Courts at Calcutta, Madras, and Bombay, 1515-1517——Facility with which the reduction of the Madras Native Army was effected after the mutiny, the European officers being the only difficulty in the way of further reduction, 1518, 1519——Expediency of dispensing with the Gun Carriage Factory at Madras, and several other similar manufactories in India, it being far preferable to procure warlike stores from England, 1520-1522——Approval of a complete magazine at Bangalore, properly entrenched, 1520. 1522.

Propriety of any redemption of the land revenue being applied in the reduction of debt, 1523——Very large saving feasible by reducing the strength of the native army, and by amalgamating the troops of the three Presidencies, 1524-1526——Obstacles to an amended constitution of the Council of India by an introduction of the mercantile and commercial element, such as formerly pervaded the Court of Directors, 1527-1531——Defence of the use of opium by the Chinese as a stimulant, 1532-1534. 1539, 1540——Belief that the opium revenue may be always relied upon, the Bengal drug being far superior to any that can be grown in China, 1535-1537——Large increase in the consumption of opium by the Chinese, 1539, 1540.

Further explanation of witness' views relative to the best means of introducing the natives of India into the public service; system of competition essential before admission to the service, 1542-1563——Entire fitness of natives and of East Indians for employment in the Revenue and Judicial Departments, 1542. 1553——Important gain, politically and financially, by an extended employment of natives, 1543, 1544.

Exception taken to the establishment of the college at Cooper's Hill, 1546——Great efficiency displayed formerly by natives in irrigation works, whilst our own canals have been, financially, dead failures, 1547-1550——Advantage if the money spent in recent years on costly canals had been applied to the restoration of the ancient tanks scattered throughout the country, 1548——Conclusion that under the system of open competition the patronage difficulty has, on the whole, been well met, 1551, 1552.

Opinion that natives should first enter the uncovenanted service, and should prove their fitness for higher appointment before admission to the covenanted Civil Service; objections, on the other hand, to direct admission, on competition, to the covenanted service, 1553-1562——Inexpediency of any further delay in giving practical effect to the promised admission of natives to the uncovenanted service; approval of Parliamentay action in the matter, 1554. 1558, 1559. 1563. 1570.——Explanation that in lieu of the Indian Council witness recommends the appointment of two well-paid Indian officers as under secretaries, with a limited term of office, 1564, 1565.

Further expression of the view that the work of decentralisation, inaugurated by Lord Mayo, is of a very fragmentary character, and requires large extension, 1566, 1567——Necessity of the introduction conjointly of the plan of decentralisation and the plan of representative institutions advocated by witness; difficulty in the case of Bengal adverted to hereon, 1568-1570——Importance of an effectual check being promptly placed upon the further excessive expenditure contemplated by the Public Works Department, the best remedy eventually being to localise the department, 1571-1574——Way in which the introduction of British enterprise and capital is barred by the system and operation of the Public Works Department, 1575-1577.

Consideration of the subject of cash balances, and the confusion caused thereby in the accounts and finances generally; obstacle to simplification under this head, unless by a decentralisation of Indian finance, 1578-1590. 1606——Confusion more specially by reason of loans or "debt" going to swell the cash balances, 1580-1588——Opinion that the cash balances are much too large in amount, 1591-1594.

Expediency of its being made perfectly clear that England is in no way liable for the guarantees or loans of the Indian Government, 1595-1598——Grounds for the conclusion that India should not have been called upon to pay towards the Abyssinian Expedition, 1599, 1600——Doubt expressed upon the question whether India should contribute to the cost of the expedition to Zanzibar, 1599.

Comment upon the course pursued in not treating as capital the balances transferred to Government on assuming the liability of the Civil Service Annuity Funds, 1601-1603——Disapproval also of the practice which has grown up of treating as income the amount derived from the sale of waste lands; remarks by witness on this subject in his

Report, 1873—*continued.*

Trevelyan, Sir Charles Edward, K.C.B. (Analysis of his Evidence)—*continued.*

first financial statement in April 1863; 1604–1606——Temptation to a cooking of the accounts by reason of the account of cash balances, 1606.

Examination upon the question whether by the permanent settlement in Bengal Government has not sacrificed an immense annual revenue; further argument to a contrary purport, 1607-1613——Evidence further submitted as to the disadvantages of a thirty years' lease in comparison with a permanent settlement, 1613.

Advantage of the plan adopted by Lord Mayo of making public loans to municipalities in aid of local improvements, 1614, 1615——Objection to the opium revenue being fixed at a certain maxmum, in order that the excess beyond such maximum might form a Public Work Loan Fund, 1615.

[Seventh Examination.]—Necessity of a Government Engineering College as a consequence of a concentrated Public Works Department for the whole of India, 1616——Attraction of a valuable class of private engineers to India by decentralising the department, *ib.*——Comment upon the power of the department to compel the ryots to take irrigation water at a fixed price, *ib.*——Objectionable extension of Indian patronage in England by reason of the increased demand for railways and other public works in India, 1617.

Suggestions relative to the qualifications desirable in the Under Secretaries of State, proposed in lieu of the Indian Council, 1618——Comment upon the large discretion now vested in the Public Works Accounts Department as to drawing upon balances of former loans for public works, 1619——Expediency of an entirely separate account for each work for which a loan has been raised, such account to be quite apart from the ordinary financial operations of the year, 1619–1622.

Examination in detail with further reference to the authorities responsible for the heavy charge upon Indian revenues by reason of the imprudent contract for the Red Sea Telegraph, and the omission to hold the contractors to the terms of the contract; admission as to the Court of Directors having concurred in the contract, though it was managed by the Queen's Government, 1623–1637. 1639, 1640.

Comment upon the pressure put upon witness during a previous examination, to express the opinion that the Governor of Bombay (Sir Bartle Frere), a cotemporary officer, should under certain circumstances have been recalled, 1638——Admission as to the Secretary of State for India having in 1859 repeatedly enjoined a reduction of expenditure, 1641–1644——Further denial however that reduction of expenditure was the policy of the Government of India after the Mutiny; comment hereon upon the inadequate reduction of military expenditure in 1860-61; 1641–1645.

Attention of witness called to a despatch from the Governor General in Council to the Secretary of State, dated 17th April 1860, commenting in strong terms upon the Minute of witness (as Governor of Madras), in which he charged the Government of India with rejecting the policy of a reduction of expenditure, 1645——Extract from Minute by witness dated 1st May 1860, showing that the reduction of military expenditure in 1860–61 was far less than might have effected, *ib.*

Trevelyan, Sir C. E. Exceptionable conduct of Sir Charles Trevelyan as Governor of Bombay, in the matter of the income tax; testimony however to his meritorious public services, witness, having been very sorry he was recalled, *Lord Lawrence* 5752, 5753.

Minute by Sir Charles Trevelyan, dated 18th February 1873, relative to the construction of a railway between Cawnpoor and Lucknow, *App.* 663, 664——Extracts from further Minutes on the same subject in November and December 1863, *ib.* 664, 665.

Minute, dated 14th January 1864, on the question of railways in Rajputana and Central India, *App.* 666, 667.

Minute on Madras military expenditure, dated 17th December 1863, *App.* 667, 668.

Minute on Punjaub frontier policy, dated 25th January 1864, *App.* 669.

Minute dated 22nd July 1864, on the snbject of reduction of the military force; suggestions in detail on this question, *App.* 670–672.

Minute, dated Calcutta, 11th January 1864, on the Bombay Supplementary Estimates for public works; checks proposed upon this expenditure, *App.* 663–678.

Minute on the Bombay Subordinate Civil Establishments, dated 1st February 18[illegible] *App.* 678–681.

Tribute (Native States). Statement showing the tributes and contributions paid by Native States to the Government of India, *App.* 634-643.

Statement showing the amount now collected as tribute or contributions from different Native States under the Government of Bengal, *App.* 694.

Statem[illegible]

Report, 1873—*continued.*

Tribute (*Native States*)—continued.

Statement of tributes and contributions from certain Native States in 1858-59 and 1870-71; also as estimated for 1871-72, *App.* 752, 753.

Amount of tributes and contributions from Native States in the Bombay Presidency as received in 1856-57, and since that year, *App.* 846, 847.

Troop Service (*Sea Transport*). Large room for economy as regards transports and other vessels employed in connection with Bombay, *Sir C. E. Trevelyan* 845-847. Opinion that the contract system should be used exclusively for purposes of transport, *ib.* 846, 847.

Average cost of sea transport per head at different periods, *Johnson and Kellner* 3805, 3806. 3809. 3820, 3821——Information relative to the charges for sea transport in England and India respectively in each year since 1863-64; statement hereon as to the large item for Government troops since 1868-69, *Johnson* 3810-3823.

Investigation of the expenditure under the Grant for the Sea Transport Charges; very fluctuating charge both before and since the employment of Government troop transports in 1867-68, *Kellner* 7025-7035——Large excess upon former expenditure if allowance be made for interest and depreciation of the Government transports, *ib.* 7025——Statement of the charges for sea transport by chartered vessels in England and India respectively in each year from 1863-64 to 1871-72, *ib.*

Important item represented by the longer or shorter duration of the voyage between England and India, *Kellner* 7026-7035——Several changes made in the arrangements for relief in India; effect thereof in enhancing the cost of sea transport, *ib.* 7035——Payment for the troop ships out of Indian revenues, whilst the money is spent under the control of the Admiralty, *ib.* 7037-7039

Undue cost of the conveyance of troops between England and India on account of the special ships and establishment maintained for the purpose, *Nowrozjee Furdoonjee* 5272, 5273——Expediency of India being relieved of charge in respect of the India troop service, and the passage of troops, *ib.* 6984.

Statement of the charges in India and in England in 1865-66, and in 1871-72, in respect of the military transport service, *App.* 646.

U.

Under Secretaries of State. Explanation that in lieu of the Indian Council witness recommends the appointment of two well-paid Indian officers, as Under Secretaries of State, with a limited term of office, *Sir C. E. Trevelyan* 1564, 1565——Suggestions relative to the qualifications desirable in the Under Secretaries of State proposed in lieu of the Indian Council. *ib.* 1618.

Unkleser (*Bombay*). Statement in an official report by Colonel Prescott that many villages in the Unkleser talooka of the Broach collectorate had been highly assessed, *Nowrozjee Furdoonjee* 6946.

V.

Village Commons (*Bombay*). Great hardship in village commons being placed under assessment, so that the villagers can no longer graze their cattle upon them, *Nowrozjee Furdoonjee* 6058-6063.

Volunteer Services (*Army*). Considerable increase in the Grant for Volunteer Services, the strength of the force having more than doubled since 1865-66, *Kellner* 7041.

W.

Wages. Great rise in the price of public labour in the neighbourhood of railways and other public works, but not in the more remote parts of the country, *Lord Lawrence* 4474, 4475. 4484.

Earnings of able-bodied men in Bombay Presidency at the rate of from two-and-half to three rupees a month, *Nowrozjee Furdoonjee* 5927-5932. 5950-5955——Somewhat higher rate of wages in Bombay than ten or twelve years ago, *ib.* 5950-5954——Rise of about twenty-five per cent. in wages in the city of Bombay in the last twenty years, whilst the price of living has increased forty per cent., *ib.* 6002-6012.

Evidence in support of the conclusion that the average rate of wages of the common agricultural labourer throughout India is two annas a day, *Dadabhai Naoroji* 6562-6579——Higher wages in the town districts than in the agricultural districts, *ib.* 6571, 6572. 6579.

Rate of wages in Bombay city for men, women, and boys respectively; decrease since 1863, *Dadabhai Naoroji* 6572-6577——Rate of wages on public works in 1866-67; tendency to lower rates since that year, *ib.* 6579-6583——Average of one-and-a-half annas a day as the earnings of women, and of one anna as the earnings of children, *ib.* 6592-6598.

Report, 1873—*continued.*

Wages—continued.

Decrease in the rate of wages since 1868; present average of about three rupees a month, *Nowrozjee Furdoonjee* 6907-6911.

See also *Condition of the People.*

Waite, Mr. See *Broach.*

War Office. See *Army. Barracks,* 2.

Waste Lands. Suggestion that waste lands or mountainous districts be sold to the highest bidder subject to a fixed annual quit rent, *Sir C. E. Trevelyan* 1452——Disapproval of the practice which has grown up of treating as income the amount derived from the sale of waste lands; remarks by witness, on this subject, in his financial statement in April 1863, *ib.* 1604-1606.

Consideration of objections to the practice of allowing English capitalists to buy the fee simple of waste land, whereby they are for ever exempt from land tax; advantage of the system as attracting capital and increasing production, *Lord Lawrence* 4611-4624——Power also of the natives to purchase rent free land under certain conditions, *ib.* 4618, 4619.

Explanation in reference to the course pursued in carrying to income the proceeds of the sale of waste land, *Lord Lawrence* 5641-5643.

Water Rates. See *Irrigation.*

Wellington Barracks. See *Barracks,* 10.

Wells. See *Irrigation.*

Wingate, Sir George. Circumstance of Sir George Wingate having, in the first instance, advocated the permanent settlement in Bombay, *Maclean* 2571.

Wingfield, Sir Charles John, K.C.S.I., C.B. (*Member of the Committee.*) (Analysis of his Evidence.)—Has held different offices in the Civil Service of India; was eventually Chief Commissioner of Oude, 2049——Submits the instruction given before the settlement was commenced for the levy of cesses in Oude, 2050——Contends that as by the settlement the demand of the State, including the cesses, was fixed for thirty years, it involves a breach of contract and a breach of faith to raise the cesses during the period of the settlement, 2050 *et seq.*

Voluntary fund in operation in Oude for the payment of the police and the village accountants; reason of witness for not interfering with this arrangement, 2050——Strong disapproval of the authority under the Act of 1861 for doubling the voluntary cesses for roads, &c.; ill-will created previously by the course pursued in obtaining the consent of the talookdars to an increase of cesses, such consent not being really voluntary, 2050. 2164-2166——Representation made by witness to the India Office against the breach of the settlement in Oude, 2051-2053——Exceptions taken to the Act of 1869 for imposing a road and education cess in Bombay; contravention of the Government settlement thereby, 2053, 2054. 2086-2088.

Decided opinion that it is most injurious to impose by Act increased cesses (even for local roads and improvements) beyond the amount prescribed for the purpose in the existing settlement; this amount was fixed in Oude at two-and-a-half per cent., and should not be disturbed, 2055 *et seq.*——Effect of the decentralisation scheme as regards Oude in leading to the necessity for new cesses, 2064. 2098, 2099——Employment of compulsory labour in former times on local works, 2065, 2066——Obstacles to a reservation of the right of Government to levy cesses apart from land revenue, 2070-2072. 2088.

Condemnation of the decentralisation scheme as putting the local Governments under a direct motive to screw as much as possible out of the people, 2073-2077——Great danger in giving the local Governments power to levy local rates without the consent of the Supreme Government, 2074-2076——Approval of the local Governments being allowed whatever surplus remains after defraying Imperial expenditure and civil establishments, 2075. 2077.

Great impolicy of any breach of faith in regard to the terms of the thirty years' settlement in Oude, whereas such settlement is virtually abrogated if power be subsequently taken to levy cesses at the free will of Government, 2078-2093——Views of Mr. Fitzjames Stephen as to the moral obligation upon Government to uphold the principles of the permanent settlement in Bengal, 2085——Absence of any security to the proprietors or cultivators in Oude that cesses are to be confined to improvements affecting the land, 2089-2097——Increasing expenditure for the special services made over to the local Governments, 2100.

Doubt as to the local Governments really obtaining much increase of independent control under the decentralisation scheme, 2101, 2102. 2178-2180——Limited extent to which the local Governments have a direct interest in economy under the scheme, 2103——Great disturbance of the public mind by reason of the liability to novel and incessant taxation, 2104-2106.

Report, 1873—*continued.*

Wingfield, Sir C. J., K.C.S.I., C.B., M.P. (Analysis of his Evidence)—*continued.*

Argument that the constitution of the local bodies is not of a representative character and does not afford a fair limit to the amount of local taxation, 2107-2116——Doubt as to the municipality of Bombay being representative, 2116 ——Great importance of moderation in taxation as regards military expenditure, 2117——Decided effect of the decentralisation scheme in causing the levying of more taxation, 2118, 2119——Relief of the few at the expense of the many by the repeal of Imperial income tax, 2119.

Great impetus to cultivation by moderation in the taxation of land; illustration in the Madras Presidency, 2120–2122——Willingness evinced by the people to give their labour on irrigation works, 2123, 2124——Doubt as to the increased cess for roads and bridges in Oude adding appreciably to the value of the land, 2125–2132——Additional cesses levied for roads in the North Western Provinces, and in the Punjaub as well as in Oude, 2133. 2162——Conclusion as to general dissatisfaction being caused by the cesses in question, 2134.

Explanation of the position of the talookdars in Oude in relation to the occupiers and cultivators, 2135-2143——Argument that there is no justification for increase of road cess (beyond the amount fixed under the settlement) on the ground that forced labour is no longer resorted to, 2144-2160——Further explanation that witness objects not to a road cess, but to a cess of any such amount as involves a breach of the engagement on the part of Government; with a new engagement the existing terms may be revised, 2158-2163.

Circumstance of Mr. Fitzjames Stephen having supported the levy of cesses in Bengal on the ground that the permanent settlement left the question of cesses entirely untouched, 2163——Practice of levying road cess in Oude by the district, and of spending it on the district; large area involved, 2167-2171——Admission as to the benefit conferred by the increased outlay on roads, 2172. 2187——Breach of contract equally involved whether the land revenue be exceeded for local or for Imperial purposes, 2173-2174.

Further explanation in regard to witness having represented to the India Office the impolicy of the additional road cess in Oude, 2175-2177——Expediency of withdrawing the cess in Oude and other provinces, 2177——Concurrence in the view that representative bodies should be constituted, and that they should have the power to impose local taxes; this would not involve any breach of faith, 2181. 2188–2196.

Onus thrown upon the landowner under the decentralisation scheme to make up the required deficits of taxation, 2182, 2183——Further disapproval of the great extension of local taxation to the poorer classes in relief of Imperial taxation, 2184-2186.

Witnesses from India. See *Native Evidence.*

Z.

Zanzibar Expedition. Doubt expressed upon the question whether India should contribute to the cost of the expedition to Zanzibar, *Sir C. E. Trevelyan* 1599.

Zemindars (Bengal). Great mistake in not making the settlement in Bengal with the real proprietors of the land; also in applying the settlement to uncultivated land, *Sir C. E. Trevelyan* 1251. 1255. 1278, 1279——Statement in further disapproval of making permanent settlements with middlemen, or zemindars, so called, *ib.* 1278–1280.

Great value of the permanent settlement in Bengal in conferring security of tenure upon the zemindars, and giving a great impetus to improved cultivation, *Lord Lawrence* 4422. 4427. 4442-4444——Creation of a wealthy class having a strong interest in the maintenance of British rule, *ib.* 4423.

Circumstance of the permanent settlement in Bengal having been made with the zemindars who were not cultivators, and were frequently only the collectors of the revenue, *Lord Lawrence* 4424-4426——Frequent instances of the zemindars having made settlements with those under them, thus giving an impetus to improved cultivation; illustration in the case of the Rajah of Burdwan, *ib.* 4428–4431.

Continued struggle between the zemindars and the occupiers in Bengal since the time of the permanent settlement, *Lord Lawrence* 4434, 4435——Limited extent to which steps have been taken by Government to ascertain or define the right of those holding under the zemindars, *ib.* 4436, 4437——Better position of the cultivators of the soil under the zemindars than if they had been under the revenue collectors, *ib.* 4451.

Limited powers of the zemindars as to the exaction of exorbitant rents, save in the case of tenants at will; defect of the settlement in Bengal and Behar in not providing against extortion, *Lord Lawrence* 5548-5551. 5665-5667.
